Percent of adolescents ages 12-17 who:	Florida	United States
Had health insurance at time of survey (according to parent)	88%	90%

Physical activity among high school students (grades 9-12), 2011 [PH2]

Percent of high school students who:	Florida	United States
Were physically active at least 60 minutes per day on 5 or more days (during the 7 days before the survey)		
Total	N/A	49%
Male	N/A	60%
Female	N/A	38%
Attended physical education classes on 1 or more days in an average week (when they were in school)		
Total	44%	52%
Male	53%	57%
Female	35%	47%
Played on at least one sports team run by their school or community groups (during the 12 months before the survey)		
Total	51%	58%
Male	57%	64%
Female	46%	53%
Watched television 3 or more hours per day (on an average school day)		
Total	37%	32%
Male	39%	33%
Female	36%	32%
Used computers 3 or more hours per day (on an average school day)		
Total	35%	31%
Male	39%	35%
Female	31%	27%

Physical activity is defined as doing any kind of physical activity that increased their heart rate and made them breathe hard some of the time during the 7 days before the survey.

Used computers is defined as having played video or computer games or used a computer for something that was not school work on an average school day.

Weight/obesity and eating behaviors among high school students (grades 9-12), 2011 [PH2]

Percent of high school students who:	Florida	United States
Were obese		
Total	12%	13%
Male	15%	16%
Female	8%	10%
Described themselves as slightly or very overweight		
Total	27%	29%
Male	23%	24%
Female	30%	35%
Did not eat for 24 or more hours to lose weight or to keep from gaining weight (during the 30 days before the survey)		
Total	10%	12%
Male	6%	7%
Female	13%	17%
Vomited or took laxatives to lose weight or to keep from gaining weight (during the 30 days before the survey)		
Total	4%	4%
Male	3%	3%
Female	5%	6%

Obesity is defined as students who were ≥ 95th percentile for body mass index (BMI), based on sex- and age-specific reference data from the 2000 CDC Growth Charts. BMI is calculated from students' self-reported height and weight.

Fruit, vegetable, and soda intake among high school students (grades 9-12), 2011 [PH2]

Percent of high school students who:	Florida	United States
Ate fruit or drank 100% fruit juices two or more times per day (during the 7 days before the survey)		
Total	35%	34%
Male	39%	37%
