

Dear Mrs. Jones,

I'm writing you from Kentucky .I'm 50 year old woman who was hurt on the job in 1994.As I strained my spine they said. I felt something snap in my body and I continued on or I would have been fired. It will downhill from there. I went to many many doctor's. In 96` was told I had Fibromyalgia. As time went by and many more doctor's I got worse. Infection's every 2-3 months. In 2000 I was told now I have CFS too. .Now I'm bed ridden and continuing getting worse.

As I want my Life back like millions of sad souls like me. This is not a mental illness at all. Now who would not get depressed being in Pain 24/7 and losing family, friend's, our job's and people not believing in us. Who would not feel depressed I ask you?

We have been abused by the system. CDC hide this for many year's and the lie's they have told just are not true. Those folks need to be removed from there job's for doing this to us. We have rights and We are real people here. If they did not do this we maybe we would of had a Cure for this horrible illness by now. Wasted time and lost Lives because of this.

This is disgraceful to millions of loving and caring people wanting there Lives back. We want it back badly. Now XMRV is in the picture Thanks to Annette Whittemore and Judy Mikovits and few other's that believe we are very ill as we are.

I hope that you all will change the name to something different as it holds us back from getting the help and support we need. I will die soon I feel it if I don't get some treatment I need. I will leave you with what I wrote out of my heart how we feel .God Bless.

Broken Hearts,.....Torn Souls.....Life swept right out of us.....Lost family,.....Lost Friendships.....Loving people who need there lives back.....,precious lives are now bed bound.....God give us strength to fight for our rights to find a Cure4ME !!

Sincerely,

Pamela Black
