Subject: after all these years -finally a chance!

Dear Dr. Cavaille Coll -

I am writing to tell you how much I appreciate all that you are doing to facilitate the investigation of the possibility of getting Ampligen approved. I took that wonderful drug by i.v. therapy for 8 years, 400 mg., and it saved my life! It completely eradicated the HHV6 virus in my body and gave me the energy I needed to care for my children and enjoy the precious gift of living a healthy life. I have been ill with this immune dysfunction and energy depletion Chronic Fatigue Syndrome for almost 23 years, having begun my career at a science laboratory in New Mexico as a top secret security clearance word processor, typing proposals and projects for the federal government, before becoming ill in 1986. I am a patient of Dr. Daniel Peterson, of Incline Village, Nevada, and was part of the AMP-511 protocol from 1997 to 2005. You may know me as AKP-020.

Today I simply want to thank you for all that you did to help me get on Ampligen, and the many years of studying it's safety and efficacy since then. It was just like liquid gold to me in all that it gave me in physical capacity and immune strengthening. It gave my body the ability to re-set and operate the way it was supposed to, and I remain extremely grateful for having had the chance to be on Ampligen.

I hope and pray that other people will one day have the chance to experience renewed health by the work that you do at the FDA. There has been senseless suffering for so many people with CFS, for so long, and yet I trust that it will all be worth it in the end when the science and investigation are done properly and sufficiently to expedite the necessary approval of Ampligen. I think it will be the first of many therapeutics to come to help people with CFS.

I'm rooting for possible approval, and truly thank you for all that you are doing!

Very sincerely,

Anita K. Patton
