

## **Testimony**

**Kari Merner**

Dear CFSAC,

I am not well enough right now to write very much. Besides, anything I could say has already been said, thousands upon thousands of times over. Doctor's need to be educated, so that we may receive proper support and treatment. Funding needs to be allocated to research, so progress can be made. I have had ME/CFS for 25 years, and nothing has really changed in all that time. I'm tired of waiting.

Please help us.

Sincerely,

Kari Merner
