James Hall

I have had cfs/me for 26 and 1/2 years, sudden onset 3/29/84. this has been a horrible illness to live with for that long. I received a clinical diagnosis from Dr Nelson Gantz, who helped write the clinical deffinition for the CDC. I would like to see funding of the likes that hiv was given in its time. This effects 11 million people worldwide and must be given the full attention of all concerned!

Thank You, James Hall
