Mariah Eichler Newman

Dear CFSAC,

I have been bedbound for five years with ME/CFS. I am too ill to write very much today, but I want to briefly ask you to do the following:

1. Increase funding for ME/CFS research
2. Support clinical trials for XMRV-positive patients
3. Withdraw all support from the 2005 Reeves Empiric Definition, and declare all research based on it null and void.

Than you.

Sincerely,
Mariah Eichler Newman
