

## Testimony

Sandee Justiss

My daughter has Chronic Fatigue Syndrome and she's getting worse. This is a real disease - a virus, not a mental disorder. Please use your influence and power to see that funding is provided for more research into this wonderful scientific discovery XMRV, the retrovirus. It is just like HIV/AIDS, a retrovirus. Research should be funded, clinical trials should be done. Will you please help the people suffering from these maladies now.
