

We receive HUD funding through the Supportive Housing Program. This funding (\$1.0M/year) is vital to our effort to address homelessness.

Application and Reporting Forms: I would recommend combining the data elements of the application, technical submission and Annual Report. This way it would be easier to track certain measurements and compare them to the original application

Terms and Conditions: I would like to see objective criteria used in assessing whether agencies meet the terms and conditions. This would reduce the amount of subjectivity used across the nation, counties and cities.

Audit - I would like to see training sessions held regionally to discuss the Single Audit Process and set realistic expectations for agencies.

Electronic processing - The current process works well. I would recommend streamlining the process to change users in the event of employee turnover. We would certainly use on-line reporting. We however do not have many resources to support electronic processing and HUD funding to supplement our Information Technology efforts would benefit HUD, the agencies and the clients who we are trying to assist.

Thank you for the opportunity to respond to your request.
