

Healthy relationships data for Oklahoma

Supportive neighborhoods, ages 12-17, 2007^{HR1}

Percent of adolescents ages 12-17 who:	Oklahoma	United States
Live in a supportive neighborhood (according to parent)	87%	85%

Supportive neighborhood information is reported by parents and is based on the statements: people in my neighborhood help each other out; we watch out for each other's children in this neighborhood; there are people I can count on in this neighborhood; if my child were outside playing and got hurt or scared, there are adults nearby who I trust to help my child. Parents were asked whether they strongly agree, somewhat agree, somewhat disagree, or strongly disagree with each statement. Choosing a "disagree" option on more than one statement removes someone from living in a supportive neighborhood.

Positive social skills, ages 12-17, 2007^{HR1}

Percent of adolescents ages 12-17 who:	Oklahoma	United States
Consistently exhibit positive social skills (according to parent)	92%	93%

Positive social skills is a composite measure of four positive social skills. Positive social skills are reported by parents and include respect for teachers and neighbors; getting along well with other children; trying to understand other people's feelings; and trying to resolve conflicts with classmates, family, or friends.

Sexual relationships among high school students (grades 9-12), 2011^{HR2}

Percent of high school students who:	Oklahoma	United States
Have ever had sexual intercourse		
Total	51%	47%
Male	51%	49%
Female	50%	46%

Bullying among high school students (grades 9-12), 2011^{HR2}
