

A WORD FROM THE EXPERTS

All4You! + All4You2!

Interviews with Developers of Evidence-Based Programs for Teen Pregnancy Prevention

This webinar was developed by Child Trends under contract #GS-10F-0030R for the Office of Adolescent Health; US Department of Health and Human Services as a technical assistance product for use with OAH grant programs.

Inclusion on the HHS Teen Pregnancy Prevention Evidence Review does not indicate HHS or OAH endorsement of a program model.

Karin Coyle, PhD
Senior Research Scientist

Program goals:

- Reduce the number of students who have unprotected sexual intercourse
- Change key determinants related to sexual risk taking

Target population:

- Young people ages 14 to 18 in alternative school settings

Key components:

- Skills- and norms-based classroom lessons
- Service-learning visits in community (All4You! only)
- Use of in-class peer leaders

Delivery methods:

- Educator-led classes
- Service-learning visits (All4You! only)

Previous evaluation results

■ Study #1¹

- ✓ Population: California urban and suburban alternative high schools
- ✓ Findings:
 - Reduced intercourse without a condom in the previous 3 months
 - Increased condom use during last intercourse
 - Reduced frequency of sexual intercourse

■ Study #2²

- ✓ Population: California urban and suburban alternative high schools
- ✓ Findings:
 - Reduced intercourse without a condom in the previous 3 months
 - Reduced likelihood of placing themselves in risky situations

² Coyle, K., Glassman, J., Franks, H., Campe, S., Denner, J., and Lepore, G. 2013. Interventions to reduce sexual risk behaviors among youth in alternative schools: A randomized controlled trial. *Journal of Adolescent Health* 53 (1): 68-78.

Target population

- Evaluated populations
 - Urban and suburban alternative schools
 - Multi-racial/ethnic youth
 - Large majority of young people already sexually active at baseline
- Target populations
 - Mixed- and single-gender classrooms
 - Racially and ethnically diverse groups
 - Urban, suburban, rural, low-income
 - Teens in alternative school settings

Settings

- Evaluated settings
 - Urban and suburban alternative high schools
- Other settings
 - Rural alternative high schools
 - Community-based organizations if retention over multiple sessions is feasible

Potential adaptations

■ Potential adaptations

○ Cultural relevance

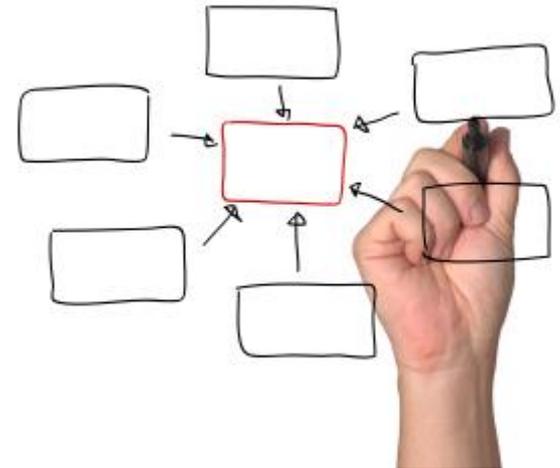

- Specific ethnic/racial groups
(green light)

○ Language

- Edit for context or translate to other languages (green light)

○ Settings

- Community-based organizations if retention feasible (yellow light)
- Mainstream school setting (yellow light)

Note: TPP grantees must obtain prior approval from OAH for any adaptations.

Staffing considerations

■ Staffing

- 1 educator per class
 - Multiple classes concurrently
- Classroom teachers or CBO-based visiting health educators
- Characteristics of educators
 - Connections with youth
 - Experience with interactive activities (role plays) and service learning (All4You! only)
 - Experience/comfort with sexuality education
 - Been trained to implement curriculum

- ETR Distributive Learning Process

- Training services (packages or a la carte)

- Training of Educators (TOEs)
- EBP Boosters
- Training of Trainers (TOTs)
- Program Enrichment Training
- Tailored TA/Consultation
- More information:

<http://www.etr.org/ebi/training-ta/>

- Common challenges
 - Logistics for service-learning visits (All4You! only)
 - Exposure/dosage
- Strategies for success
 - Initiate service-learning site search early
 - Select sites that are youth friendly and meet engagement priorities
 - Implement on days that typically have highest attendance

- Recent or planned curriculum revisions
 - All4You!
 - Updated and reprioritized birth control information
 - Updated facts and source citations
 - Second Program Option from Second Study: All4You2!
 - Classroom-based only
 - No service-learning component
