Objectives

At the conclusion of this webinar, you will be able to:

• Define trauma and trauma-informed approaches using Substance Abuse and Mental Health Services Administration’s (SAMHSA) definitions.

• Describe SAMHSA’s Six Principles of a Trauma-Informed Approach (TIA).

• State the importance of integrating a TIA into teen pregnancy prevention (TPP) programs.

• Identify where your TPP program is already utilizing a trauma-informed approach and/or opportunities for integrating a trauma-informed approach into your program.
How familiar are you with trauma-informed approaches?

• Very familiar
• Familiar
• Somewhat familiar
• Not familiar at all
“...experiences that cause intense physical and psychological stress reactions. It can refer to a single event, multiple events, or a set of circumstances that is experienced by an individual as physically and emotionally harmful or threatening and that has lasting adverse effects on the individual’s physical, social, emotional, or spiritual well-being.”

SAMHSA. (Spring 2014).
• **Realizes** the widespread impact of trauma and understands potential paths for recovery;

• **Recognizes** the signs and symptoms of trauma in clients, families, staff, and others involved with the system;

SAMHSA, National Center for Trauma-Informed Care. (May 20, 2014).
Trauma-Informed Approach (TIA)

- **Responds** by fully integrating knowledge about trauma into policies, procedures, and practices; and

- Seeks to actively resist *re-traumatization*.

SAMHSA, National Center for Trauma-Informed Care. (May 20, 2014).
Six Principles of a TIA

1. Safety
2. Trustworthiness and transparency
3. Peer support
4. Collaboration and mutuality
5. Empowerment, voice, and choice
6. Cultural, historical, and gender issues
What do you think the **benefits** are of integrating a TIA into teen pregnancy prevention programs?

*Please type your answers in the Q&A Box.*
What are the **benefits** of integrating a TIA into teen pregnancy prevention programs?

- Empirical evidence to organize and guide prevention efforts
- A more comprehensive approach for prevention
- Streamlined service provision
- Better outcomes
TIA & Teen Pregnancy Prevention Programs

- Safety
- Cultural, historical, and gender issues
- Empowerment, voice, and choice
- Trustworthiness and transparency
- Collaboration and mutuality
- Peer support

TPP Program
How concerned are you that using a trauma-informed approach may affect the fidelity of an evidence-based program?

- Very concerned
- Concerned
- Somewhat concerned
- Not concerned at all
How is a TIA compatible with evidence-based programs?

- A TIA provides an empirical foundation for further enhancing the positive outcomes of EBPs.
- Using knowledge about domains of impairment can enhance communication and influence better decision making.
- It also has potential to make our jobs easier by reducing obstacles to change.
How can organizations ensure a successful implementation of a TIA?

• Assess service settings and create soothing environments for everyone involved - youth, families, and staff.
• Provide practical and effective training for all staff.
• Integrate ongoing supervision to enhance permanent integration of key concepts.
How do organizations ensure a successful implementation of a TIA?

- Monitor service delivery for continuous quality improvement.
- Document community resources and make sure staff and young people have easy access to them.
- Model sex positive communication that supports healing for those in need and promotes health and well being for everyone.
Do organizations need to have mental health professionals on staff?

- No; specialized training and skill-building with corrective feedback.
- Provide warm, non-judgmental, empathic, and genuine interaction at all times.
- Maintain a referral directory.
- Ongoing consultation with TIA-TPP specialist.
Do organizations need to have mental health professionals on staff?

- Maintain a referral directory of local licensed mental health service providers who can document they have specialized training in a TIA.
- Consider ongoing consultation as needed with a licensed mental health service provider who specializes in TIA-TPP.
Connections Project
PREP funding: Cardea (PI)

Healthy Youth Partnership
OASH funding: UT (PI)

- Juvenile detention centers
- Homeless shelters
- Foster care
- Residential treatment center

- Juvenile probation
- Foster care agencies
- Alternative charter school
### Attitudes about sex over the next 3 months (1=very bad idea to 5=very good idea)

Staff/professionals who work with youth in these settings

- Are anxious about talking with youth about sexual health
- Are uncomfortable discussing sexuality
- May use shaming and/or focus on the negatives

Realities of these youth are intense

- Sexual abuse
- Sex trafficking/prostitution
- Early sexual activity
- Previous STI
Empowerment, Voice, and Choice

Staff/professionals who work with youth in these settings

• Need training, support, and PRACTICE

Youth need adults who are not going to

• Stifle their voices
• Judge their choices
Staff Training: Recognizing & Using TIA

Training on EBP

Specific training on trauma & sexual health
Provider’s Responsibility

• Recognize that EBPs are not a substitute for an ongoing sexual health dialogue.
• Youth-serving professional have to accept responsibility for having sexual health discussions with youth, especially for youth without stable caregivers.

Creates a Sense of Safety
Elements of Safety

Supported by Values
- Safety
- Trustworthiness
- Choice
- Collaboration
- Empowerment

We're All The Same Within
Create Safety

- Provide choice & control
- Be curious not analytical
- Clear expectations
- Shared group values
- Clear boundaries
- Visual stimulation
- Use music
- Modulate tone of voice
- Regulate speaking tempo
- Smaller non-verbals
- Model breathing
- Transition rituals
When I was a boy and I would see scary things in the news, my mother would say to me, “Look for the helpers. You will always find people who are helping.” To this day, especially in times of ‘disaster,’ I remember my mother’s words and I am always comforted by realizing that there are still so many helpers – so many caring people in this world.

~ Fred Rodgers
Healthy sexual development and healing from trauma exposure happens within the context of supportive relationships.
What is one “ah-ha” you’ve had so far during today’s webinar?
In Summary...

- Many people experience trauma.
- We can all use a trauma-informed approach!
- There are many benefits of using a trauma-informed approach.
- A trauma-informed approach can enhance TPP programs.
Are you ready to assess your trauma-informed approach?

• Definitely!
• Yes.
• Maybe.
• Not yet.
