

MAI: Additions to FAQs from TA webinar

1. The FOA indicates that this funding will support the maintenance, operation and re-launch a National Resource Center for HIV/AIDS Prevention among Adolescents. Can you further explain the circumstance that necessitates a re-launch of the online Resource Center?

Answer: To continue this comprehensive online resource center, OAH plans to re-launch the website through this funding opportunity. Applicants should describe in their applications how they propose to re-launch the online resource center. The current resource center is online and active, but without current updates being posted due to expired funding.

2. Is there a specific age range that OAH defines as adolescence for information and resources on the website?

Answer: The FOA does not specify an age range that defines adolescence. Applicants should describe the age range they plan to target for the website content, including providing current data that supports the age range the applicant plans to target with website content.

3. Who is the target audience for the National Resource Center for HIV/AIDS Prevention among adolescents?

Answer: The website should provide practical tools and resources to anyone working with adolescents and youth (e.g. providers, clinicians, community-based organizations or providers) and the general public. The content on the website should be specific to HIV/AIDS prevention among adolescents and youth with a focus on special populations including racial and ethnic minorities, young men who have sex with men, and youth at risk for HIV infection.

4. What is OAH's definition of multimedia?

Answer: Applicants should describe, within their application, the type(s) of multimedia it plans to utilize in its programmatic efforts.
