Subject: Incoming File from CMS: Beneficiary-level file to support 2016 Part D bids

CMS has pushed out to all PACE organizations a beneficiary-level file that your actuaries will be using to develop 2016 Part D bids. This memo is to inform you that there may be potential action that is needed for you to accept this new file. Please also note that we posted contract-PBP level risk score data on HPMS.

The file name will be constructed as follows:

GENTRAN: P.Rxxxxx.PRTD2016.Dyymmdd.Thhmmsst.pn
C:D mainframe: zzzzzzzz.Rxxxxx.PRTD2016.Dyymmdd.Thhmmsst
C:D non-mainframe: [directory]Rxxxxx.PRTD2016.Dyymmdd.Thhmmsst

KEY

xxxxx = 5 character plan contract #

yymmdd = two digit year, month, day

hhmmsst = hour/minute/second/tenths of second

pn = process number

zzzzzzzz = Plan-provided high level qualifier, default is EFTO for production; EFTT for test

[directory] = optional directory specified from non-mainframe C:D clients, default is EFTO. for production; EFTT. for test

Tech Notes –

Please note the following:

1. The file includes beneficiaries who were in your contract for at least one month in 2014.
2. The risk scores provided in this file are not normalized and your projected 2016 risk score will need to take into account the appropriate normalization factor, per the *2016 Bid Instructions*.
The 2016 Part D normalization factor is 0.939.
3. The estimated 2014 risk score takes into account retroactive (1) enrollment and disenrollment, (2) long term institutional status, and (3) low income status that have occurred since the 2014 payments were initially made. The diagnosis data used for the risk score estimates are from calendar year 2013 dates of service (i.e., the data collection period) based on: 1) plan diagnosis data submitted through January 31, 2015 and 2) Medicare FFS diagnosis data through January 2015.
4. Final 2014 risk scores will use the same runout for plan-reported and FFS diagnoses, as well as any additional status changes that occur before the final risk score run (e.g., low income, long term institutional, disability, ESRD).
5. The 2014 Part D risk scores were calculated using both the RxHCC risk adjustment model that was used in 2014 payment and the updated RxHCC risk adjustment model that will be used in 2016 payment. The coefficients for the 2014 model are published in the 2014 *Rate Announcement*, published on April 1, 2013. The coefficients for the 2016 model are published in the 2016 *Rate Announcement*, published on April 6, 2015.
