Data Matching Issues (DMIs) 2019 Operations Information Update

Background

Enrollees who experience an adjustment in eligibility to be enrolled in a Qualified Health Plan (QHP) or for financial assistance (loss or adjustment of Advance Premium Tax Credit (APTC) and cost-sharing reduction (CSR), due to an unresolved DMI, will be indicated on the 834 transaction files to the issuer. As such, Issuers will be able to identify if a policy is being modified by the origin code populated on the M834 transaction

Note: Issuers should not update your systems with the information contained in the DMI Outreach Files (sent EFT code DATAM). Instead, the FFM will send 834 transactions from the FFM will be sent for issuers to adjust the coverage of impacted any policies that fail to resolve their DMIs. Please note that in the chart above, the only time a M834 transaction would not be sent would be removing a subscriber due to a citizenship/immigration DMI. That will be sent to issuers in 2 transactions (TERM-NLE and an initial). For further clarification, please refer to the M834 Operations Manual.
