

To: CMS Federally-facilitated Exchange (FFE) Qualified Health Plan (QHP) Issuers
From: CMS Center for Program Integrity (CPI) and Center for Consumer Information and Insurance Oversight (CCIIO)
Date: May 6, 2019

FFE Issuers:

The FFE asks you to review a list of potentially unauthorized enrollments (“Unauthorized Enrollment Finder File/UEFF”) sent via EFT to you for cancellation¹ if they meet the criteria provided below. The UEFF has been placed in your SPOE folder if you pull files from CMS, or in the server folder you use for EFT if CMS pushes files to you. The file has a date and time stamp of **“TPID.CMPLFL.D190502.T162246781.P”** where “TPID” is your organization’s trading partner identification number. Since the file requires manual review, you may need to move it out of the EFT folder into some other folder.

CMS Criteria for Cancellation of Unauthorized Enrollments

CMS has developed criteria that could reasonably demonstrate if the enrollment identified by the consumer was unauthorized. CMS is sending each issuer with potentially unauthorized policies an Unauthorized Enrollment Finder File (UEFF) identifying the policies consumers called about between December 1, 2018 and February 28, 2019.

IMPORTANT NOTE: For UEFF 9, the “NPN Agree” criterion will not be used to determine whether or not to cancel a policy. The column for responding to this criterion remains on the form, but has been prepopulated with a “T” so that it will not prevent issuers from cancelling policies for which this criterion might be the only “F” for the policy.² DO NOT CHANGE the mark in this column. If there is a discrepancy between the prepopulated NPN (or lack thereof) and the Issuer’s records, do not change the “T” to an “F.” Instead, note the NPN or NPNs in the “Notes” column at the end of each row.

Issuers, therefore, are now required to fill out only three columns plus the “Issuer will Rescind” column. The information issuers still must verify are: 1) Consumer Responsibility Payment Owed; 2) No Claims Filed; and 3) Consumer Contact with Issuer. The fourth criterion, i.e., the consumers actively told CMS they did not enroll or authorize an enrollment, is again stipulated as true.

¹ In this document the more accurate terms “cancel” and “cancellation” are used in place of “rescind” and “rescission,” although the UEFF column headers may still contain “rescind” until the form can be recoded.

² Many issuers told CMS they believed some policies on previous UEFFs were unauthorized, but they were unable to cancel the policies because the instructions required that they mark an “F” in the “NPN Agree” column even when there was no NPN prepopulated by CMS.

If all criteria, described in the specification document included in Appendix 1, are True for each enrollment, CMS will consider this a demonstration that a cancellation is appropriate under the requirements at 45 CFR 155.430(b)(1)(iv)(C), and will work with the issuer to effectuate the cancellation of the policy and coordinate the return of APTCs.

It is very important to submit cancellations for all policies that meet the criteria *even if they have already been terminated for any reason, including non-payment*. Advanced Premium Tax Credits (APTC) will be reported to the IRS, and a Form 1095-A will be issued for any month(s) that a policy was in effect. Consumers with APTC associated with their policies may have a tax liability for the months prior to termination. A corrected 1095-A can only be issued if the policy is cancelled back to the effectuation date.

Returning the file to CMS

Issuers should return the completed file in **pipe-delimited, text format** to CMS by sending the file to the CMS/CPI EFT Folder:

TPID.MID.RESOFL.DYYMMDD.THHMMSSmmm.P.IN

CMS requests that completed files be returned by **Friday, June 7, 2019**.

CCIIO and CPI appreciate your cooperation to protect the Exchange and Exchange consumers from misconduct and fraud. If you have any questions about the file or instructions, please email MarketplaceIntegrity@cms.hhs.gov.

Unauthorized Enrollment Finder File

The Federally-facilitated Exchange (FFE) asks issuers to review a list of potentially unauthorized enrollments (“Unauthorized Enrollment Finder File/UEFF”) sent to them via EFT for cancellation if they meet the criteria provided below. The UEFF has been placed in each issuer’s SPOE folder if they pull files from CMS, or in the server folder used for EFT if CMS pushes files to them. The file has a date and time stamp of “**TPID. CMPLFL.D190502.T162246781.P**” where “TPID” is the issuer organization’s trading partner identification number.

The purpose of this document is to provide the details on the UEFF file and the responses to be sent back by the Issuers to CMS.

Background

The FFE Call Center continues to receive calls from consumers reporting that they are enrolled in Exchange plans they did not authorize. Complaints cover all plan years although most of the policies in the current UEFF are for plan years 2018 and 2019. In many cases, the consumers stated that they did not know they were enrolled in a QHP through the FFE until they received a communication from the Exchange or issuer, or were notified by the IRS that they must reconcile their advance premium tax credit (APTC) before their tax refund would be processed. In some cases, the consumers indicated that they had other health insurance at the time of the enrollment and did not want or need the Exchange policy.

FFE data shows that these enrollments had several similarities such as enrollments were performed by an agent or broker; many of the consumers had APTCs that covered 100% of their premium payments; and some of the policies have already been terminated for non-payment of the premium amount not covered by APTC. Because APTC amounts are reported to the Internal Revenue Service (IRS) for each month they were paid to the issuer, consumers may have tax liabilities for unauthorized enrollments. Cancelling the policy is the only way to remove these tax liabilities.

For the policies in the UEFF, if there is reasonable evidence that the enrollee did not consent to the enrollment, or the enrollment was the result of an act, practice or omission that constitutes fraud, the issuer may cancel the enrollment. Regulations at 45 CFR 155.430(b)(1)(iv)(C) specify that an Exchange issuer may cancel a policy if “[t]he enrollee demonstrates to the Exchange that he or she was enrolled in a QHP without his or her knowledge or consent by any third party, including third parties who have no connection with the Exchange, and requests cancellation within 60 days of discovering of the enrollment.”

CMS is satisfied that any enrollment on the Unauthorized Enrollment Finder File that meets the criteria below may be cancelled.

CMS Criteria for Cancellation of Unauthorized Enrollments

CMS has developed criteria that could reasonably demonstrate if the enrollment identified by the consumer was unauthorized. CMS is sending each affected issuer an Unauthorized Enrollment

Finder File (UEFF) identifying their policies consumers called about between December 1, 2018 and February 28, 2019. Issuers are requested to respond to three of the five criteria listed below. (NOTE: CMS stipulates that criterion #1 is true in all cases. The “NPN Agree” criterion is no longer being used as a factor in cancellations; the prepopulated “T” in that column should NOT BE CHANGED.)

If criteria 3, 4, and 5 on the chart below are true for each enrollment, CMS will consider this a demonstration that a cancellation is appropriate and will work with the issuer to effectuate the cancellation of the policy and coordinate the return of APTCs.

Table 1: UEFF File Criteria

Header	Criteria	Source	Instructions
None	1. The consumer affirmatively stated directly to the issuer or to CMS (e.g. through the FFE Call Center) that he/she did not enroll in the Exchange, did not give authorization or consent to enrollment, and did not want the coverage.	CMS	CMS stipulates that criterion #1 is true in all cases since all these consumers called the Call Center to complain about these policies.
NPN_Agree	NO LONGER A CRITERION FOR CANCELLATION OF POLICIES.	CMS	This field will already be marked with a “T”. DO NOT CHANGE THIS MARK. Note any discrepancies in the “Notes” column.
Consumer_Responsibility_Payment_Owed	3. The consumer’s premium is covered 100% by APTC or, if not 100%, any portion of the premium that is the responsibility of the enrollee was not paid.	CMS	Mark “T” if the consumer’s premium is covered 100% by APTC or if the consumer premium responsibility amount was NOT paid. Mark “F” if a payment was made for the consumer portion on the policy.
No_Claims_Filed	4. No claims have been filed for any of the enrollees on the policy.	Issuer	Mark “T” if no claims have been filed on the policy for any enrollee. Mark “F” if any claim has been filed on the policy.
Issuer_Consumer_Contact	5. The issuer has had no contact from the enrollee about their policy or benefits, including emails and calls to customer service, or the enrollee only contacted the issuer to report they did not know about or consent to the enrollment.	Issuer	Mark “T” if there has been no contact from the enrollee about their policy or benefits, including emails and calls to customer service, <i>or</i> the enrollee only contacted the issuer to report they did not know about or consent to the enrollment. Mark “F” if the enrollee has called your call center about member ID cards, policy benefits or other

Header	Criteria	Source	Instructions
			questions indicating they knew about and wanted the policy.

UEFF Inbound Specification

The UEFF responses will be received in the Multidimensional Insurance Data Analytics System (MIDAS).

Issuers should return the completed file to CMS at

TPID.MID.RESOFL.DYYMMDD.THHMMSSmmm.P.IN

(There must be 6 digits after the D in the date and 9 digits after the T in the timestamp.)

UEFF File Submission

The issuer must submit files to MIDAS in **pipe delimited, text format**. The file format that will be used is ASCII text and will use a CRLF as the line terminator. The file submitted by the issuers should contain all the data that the issuers received in the inbound file. **Do not remove or add rows or columns.**

The filenames proposed for usage by issuers will consist of the following sections:

1. Trading Partner (TP) Identifier (ID)
2. Application ID
3. Function Code
4. Date
5. Time
6. Environment Code
7. Direction

Trading Partner (TP) Identifier (ID):

TPID is the identification number assigned to the Trading Partner. The length of the TPID can range between 5-10 characters.

Application ID:

The Application ID section of the filename is an ID for the application that processes the files. This section specifies the target application where the system routes the file. This is a static value and is MID for this process.

Function Code:

The Function Code section of the filename is an alphanumeric code indicating the functional purpose of the file within the application. This also helps identify specific processing once the system routes the file to the application. This is a static value and is RESOFL for all the data.

Date:

The Date section of the filename specifies the date the issuer transferred the file in DYYMMDD format. The first D is static text; six numbers must follow.

Time:

The Time section of the filename specifies the time created (timestamp) for the file in THHMMSSmmm format where HH is hours, MM is minutes, SS is seconds, and mmm is milliseconds. The T is static text and exactly nine numerals must follow.

Environment Code:

The Environment Code section of the filename is a single character code indicating the environment to which the system transfers the file. Allowed values are as follows: P for Production Environment (PROD)

Direction:

The Direction section of the filename indicates the direction in which the data flows, towards the Centers for Medicare & Medicaid Services (CMS):

☐IN for to CMS

All the sections need to be separated by a period (.)

Example of a sample filename: **1234567.MID.RESOFL.D170217.T071025123.P.IN**

Lessons Learned: Avoid Rejected Files

To make sure your file submission is not rejected, please note the lessons learned from previous rounds of UEFFs and avoid the most common mistakes.

Common Mistakes	Solutions
Incorrect File Name	There must be 6 digits after the D in the date and 9 digits after the T in the timestamp.
File sent to wrong EFT	File should be sent to the MID eft code.
Compressing the file	File should be Unzipped.
Incorrect File Format	UEFFs should be retuned as “pipe-delimited” text files only.
Resubmission has Same Date & Time Stamp	If resubmitting a file, <u>change the date and timestamp in the filename</u> . EFT will not deliver the file if it has the same name as the previous submission.
File Format has been Changed	Do not delete any rows or columns – including the header record. Do not move columns around – format must be intact and has to be in the same position.
Notes have added pipes	When typing notes in the ‘Notes’ column, do not include a “pipe delimiter” within the text. Commas, periods or semi-colons are okay, but do not insert “pipes” as they change the format.

UEFF Data File Overview

Data files are created by HIOS ID and these files **should never be zipped.**

Issuers will be required to keep the file in the original format and fill out every response field with a capital ‘T’ or ‘F’ without any leading or trailing spaces.

Table 2: Data Elements and Descriptions

Data Element Field Name	Data Element	I=Informational R=Required	Data Type	Data Element Description	Instructions
row_id	Row ID	I	Alphanumeric	System generated Unique identifier for each row sent to the issuer in the UEFF. This is a required field. Please do not alter.	
hics_case_id	HICS Case ID	I	Numeric	The Case ID is the casework ID number that is assigned by Health Insurance Casework System (HICS).	
hics_application_id	Application ID	I	Numeric	The Application ID is the number that keeps track of individual(s) seeking an eligibility who submit(s) an application (either individually or as part of a household) to the Exchange for enrollment in a QHP.	
hics_plan_id	Plan ID	I	Text	The 16-digit HIOS-generated qualified health plan (QHP) identification number.	
hics_coverage_year	Coverage Year	I	Numeric	The calendar plan year. This is the year the insurance policy covers.	
State	State	I	Text	The state associated with the policy.	
issr_hios_id	Issuer ID Number	I	Numeric	The five-digit Health Insurance Oversight System (HIOS)-generated Issuer ID number.	
FFE_policy_id	Policy ID	I	Numeric	The Policy ID Assigned by the Exchange for the policy for which an unauthorized enrollment case is being reported	
subscriber_id	Subscriber ID	I	Text	The insured member identifier indicated as the subscriber in MIDAS.	
NPN	National Producer Number	I	Numeric	The National Producer Number (NPN) is an Agent/Broker’s unique NAIC identifier assigned through the licensing application process. An Agent/Broker is permitted to apply or help apply for health plans on behalf of a consumer if they receive training	

Data Element Field Name	Data Element	I=Informational R=Required	Data Type	Data Element Description	Instructions
				from CMS and are on CMS' Registration Completion List. An NPN is essential for the agent or broker to receive compensation from a QHP issuer.	
premium_amt	Premium Amount	I	Numeric	Monthly Premium amount on the policy	
applied_APTC	Applied APTC Amount	I	Numeric	Monthly APTC amount on the policy	
policy_status	Policy Status	I	Text	The Policy Status indicates the insurance policy status.	
Round_number	UEFF Round Number	I	Text	For internal use only – Round Number denoting which UEFF the file is related to.	
Issuer_response					
NPN_Agree	NPN Match [No longer a criterion for cancellation.]	I	Text	NPN in the FFE data base from MIDAS will be prepopulated.	This data field will be prepopulated with a “T,” DO NOT CHANGE THIS RESPONSE. Although the NPN will no longer be used to determine whether a policy should be cancelled, please let us know if the prepopulated information does not agree with your agent of record information by noting the discrepancy in the “Notes” column. DO NOT change the prepopulated “T” in the “NPN Agree” column.
Consumer_Responsibility_Payment_Owed	Consumer Responsibility Payment Owed	R	Text		Mark “T” if the consumer’s premium is covered 100% by APTC or if the consumer premium responsibility amount was not paid. Mark “F” if a payment was made for the consumer portion on the policy.
No_Claims_Filed	Claims Filed by Providers	R	Text		Mark “T” if no claims have been filed on the policy for any enrollee. Mark “F” if any claim has been filed on the policy.
Issuer_Consumer_Contact	Issuer Customer Contact	R	Text		Mark “T” if there has been no contact from the enrollee about their policy or benefits, including emails and calls to customer service, or the enrollee only contacted the issuer to report they did not know about or consent to the enrollment. Mark “F” if the enrollee has called your call center about member ID cards, policy benefits or other questions indicating they knew about and wanted the policy.

Data Element Field Name	Data Element	I=Informational R=Required	Data Type	Data Element Description	Instructions
Issuer_will_rescind	Issuer Cancel	R	Text		<p>Mark “F” if one or more of the criteria is not true. Mark “T” if ALL of the criteria are marked “T.”</p> <p><u>To Effectuate Cancellation:</u> Issuers cancelling coverage for 2018 policies should send an IC834 cancel transaction to the FFE with a reason code of fraud (use CANCEL-FRD, not TERM-FRD).</p> <p>Cancellation of policies for 2017 and previous years must be done by submitting an ER&R Dispute, setting “Prior Year – End Date” to equal the start date of the policy.</p>
Notes	Additional Notes/Justification	R	Text		<p>Use this text column to:</p> <p>1) Add data from your records if it differs from the data provided by CMS, e.g., if you have an NPN of record but the CMS NPN field is blank or contains a different NPN.</p> <p>2) Provide an explanation if all columns are marked “T,” but you do NOT plan to cancel, e.g., the policy was already cancelled.</p>

UEFF File Error Checks and Business Validations

The following error checks and validations will be performed on each UEFF Submission file.

Note: Error Checks and Business validations will include format validations.

Table 3: Error Checks and Business Validations

Error Code Identifier	Error Code Description	Detailed Error Code Description	CMS Action if Validation Fails
UEFFERR01	File cannot be opened (corrupt file)	This is a file format issue. CMS was unable to access the data within the Unauthorized Enrollment File. It may have been corrupted during file transfer.	CMS will reject the file
UEFFERR01a ³	Duplicate File name - file name is the same as a previous submission	The Unauthorized Enrollment File was rejected due to a duplicate file name being used for submission. Duplicate file names cannot be	CMS will reject the file

³ Issuers will receive only an email notification for error code UEFFERR01a; Issuers will not receive an error report via EFT for this error code.

		processed. Resubmit with new date or time so the name is different.	
UEFFERR02	-File received is not a flat File -Columns have been added or deleted by the issuer -Columns have been rearranged or reordered by the issuer	This is a file format issue. The Unauthorized Enrollment File submitted did not conform to the required format.	CMS will reject the file
UEFFERR02a	File received is not in the required format as columns have been added/deleted by the issuer (header and/or data)	This is a file format issue. The Unauthorized Enrollment File submitted did not conform to the required format.	CMS will reject the file
UEFFERR03	All response fields are blank for all records in the submission	This is a file format issue. NONE of the responses were populated in the Unauthorized Enrollment File submitted. All rulings must contain either a 'T' or 'F'.	CMS will reject the file
UEFFERR04	The return file has more or fewer policies than the original file that was sent to the issuer.	This is a file format issue. One or more policies are missing or have been added in the Unauthorized Enrollment File submitted.	CMS will accept and process the file, but will send an error
UEFFERR05	Invalid Issuer Response field(s): consumer_responsibility_payment_owed no_claims_filed issuer_consumer_contact issuer_will_rescind	The data element(s) do not meet the format requirements. One or more response fields include Y/N or other text, instead of T/F, in the Unauthorized Enrollment File submitted.	CMS will accept and process the file, but will send an error
UEFFERR06	Blank Issuer Response field(s): consumer_responsibility_payment_owed no_claims_filed issuer_consumer_contact issuer_will_rescind	The data element(s) do not meet the format requirements. One or more response fields were not completed (left blank) in the Unauthorized Enrollment File submitted.	CMS will accept and process the file, but will send an error
UEFFERR07	Blank Cells when "issuer_will_rescind " is marked "T"	One or more response fields are blank, but the issuer has marked this policy for cancellation in the Unauthorized Enrollment File submitted.	CMS will accept and process the file, but will send an error
UEFFERR08	"issuer_will_rescind " is marked "T", Other response fields are marked 'F' or contain other text	One or more response fields are marked 'F' or populated with other text but the issuer has marked this policy for cancellation on the Unauthorized Enrollment File submitted.	CMS will accept and process the file, but will send an error
UEFFERR09	Rulings on the same FFE Policy ID	Rulings on the same "FFE Policy ID" (MGPI) are different in the Unauthorized Enrollment File submitted.	CMS will accept and process the file, but will send an error

UEFF File Error handling

If the data submitted fails any of the error checks or business validations (see tables above), an error report will be generated, the issuer will receive an email indicating that the file has been rejected or submitted with errors, and the UEFF Outreach Team will be notified.

- If the file contains no errors, the issuer will receive an email indicating that the file has been accepted and processed successfully. Please see table below for the format of the expected email message.
- If mandatory response elements are not populated or are input incorrectly, the file will be accepted but will be flagged as containing errors. The issuer will also receive an email indicating that the file has been processed with errors. Please see Table 4, below, for the format of the expected email message. A comprehensive error report will also be generated and will be sent to the issuer's outbound folder through the EFT.

If the file does not conform to the required format or the data is inaccessible, the file will be rejected and the issuer will receive an email indicating that the file has been rejected and cannot be processed. Please see table below for the format of the expected email message. A comprehensive error report will also be generated and will be sent to the issuer's outbound folder through the EFT.

[Please note: Issuers will only receive an email notification for error code UEFFERR01a; issuers will not receive an error report via EFT for this code.]

Refer to the Table 3: Error Checks and Business Validations, above, for CMS processing responses to files based on field validations.

Table 4: Email Messages to Issuers Regarding Status of Files

Scenario	Status	Email Message/Error Message
CMS has received and processed the issuer's data file submission successfully.	FILE ACCEPTED AND PROCESSED SUCCESSFULLY	CMS has processed your recent Unauthorized Enrollment File submission. Your submission passed all CMS validation checks. Your data submission will be marked as complete and processed successfully.
CMS has received and processed the issuer's data file submission, but the file has errors.	FILE ACCEPTED WITH ERRORS	CMS has processed your recent Unauthorized Enrollment File submission, but the file has errors. You will receive an error report in your EFT folder within the next 24 hours that summarizes the errors. Please review the error report to determine if you need to correct the data, in which case you should resubmit the entire file to CMS.

Scenario	Status	Email Message/Error Message
CMS has rejected the issuer's file submission due to data formatting or other critical error(s).	FILE REJECTED	CMS has rejected your recent Unauthorized Enrollment File submission due to formatting or other critical errors. You will receive an error report in your EFT folder within the next 24 hours that summarizes the errors. Please review the error report to determine what you need to correct, and then resubmit the entire file to CMS. All data resubmissions must include the required rulings for your submission to be considered complete.

UEFF File Resubmission Process

- Resubmissions by Issuers:

CMS will consider every resubmission as a new submission. The name of the file must be unique. **Every resubmission by issuers must have a new date and time.** CMS will not accept or process resubmissions with identical dates and times in the file name. **Each time an issuer resubmits, it must submit the entire file (i.e. the full pipe-delimited file).**

CMS will not process partial resubmissions; therefore, issuers should plan accordingly by saving their flat, pipe-delimited file in a separate environment so that it can be modified and resubmitted as necessary.

- UEFF Outreach Team:

The UEFF Outreach team from the Center for Program Integrity works closely with the CMS Account Managers to facilitate the accurate and timely submissions of files from the issuers to CMS. The outreach team will provide coordination between CMS and contract partners. The files submitted by issuers and the files' statuses are communicated across stakeholders to identify any issues/errors in file submission to be resolved by issuers. Tracking and reporting the success or failure of each issuer's file will occur on a daily basis. **The outreach team can be reached for questions and assistance at: MarketplaceIntegrity@cms.hhs.gov.**

- Enterprise File Transfer (EFT) Location:

CMS will only accept submissions through EFT. For direct SFTP (for automation) - **sftp://eft.feps.cms.gov**, please send files using the "Inbound 30" folder.
