[Back to Top](#)

Alteration	<p>Definition: Modifying the anatomic structure of a body part without affecting the function of the body part</p> <p>Explanation: Principal purpose is to improve appearance</p> <p>Includes/Examples: Face lift, breast augmentation</p>
Bypass	<p>Definition: Altering the route of passage of the contents of a tubular body part</p> <p>Explanation: Rerouting contents of a body part to a downstream area of the normal route, to a similar route and body part, or to an abnormal route and dissimilar body part. Includes one or more anastomoses, with or without the use of a device</p> <p>Includes/Examples: Coronary artery bypass, colostomy formation</p>
Change	<p>Definition: Taking out or off a device from a body part and putting back an identical or similar device in or on the same body part without cutting or puncturing the skin or a mucous membrane</p> <p>Explanation: All CHANGE procedures are coded using the approach EXTERNAL</p> <p>Includes/Examples: Urinary catheter change, gastrostomy tube change</p>
Control	<p>Definition: Stopping, or attempting to stop, postprocedural bleeding</p> <p>Explanation: The site of the bleeding is coded as an anatomical region and not to a specific body part</p> <p>Includes/Examples: Control of post-prostatectomy hemorrhage, control of post-tonsillectomy hemorrhage</p>

Section 0 - Medical and Surgical
Character 3 - Operation (**continued**)

[Back to Top](#)

Creation	<p>Definition: Making a new genital structure that does not take over the function of a body part</p> <p>Explanation: Used only for sex change operations</p> <p>Includes/Examples: Creation of vagina in a male, creation of penis in a female</p>
Destruction	<p>Definition: Physical eradication of all or a portion of a body part by the direct use of energy, force, or a destructive agent</p> <p>Explanation: None of the body part is physically taken out</p> <p>Includes/Examples: Fulguration of rectal polyp, cautery of skin lesion</p>
Detachment	<p>Definition: Cutting off all or a portion of the upper or lower extremities</p> <p>Explanation: The body part value is the site of the detachment, with a qualifier if applicable to further specify the level where the extremity was detached</p> <p>Includes/Examples: Below knee amputation, disarticulation of shoulder</p>
Dilation	<p>Definition: Expanding an orifice or the lumen of a tubular body part</p> <p>Explanation: The orifice can be a natural orifice or an artificially created orifice. Accomplished by stretching a tubular body part using intraluminal pressure or by cutting part of the orifice or wall of the tubular body part</p> <p>Includes/Examples: Percutaneous transluminal angioplasty, pyloromyotomy</p>

Section 0 - Medical and Surgical
 Character 3 - Operation (**continued**)

[Back to Top](#)

<p>Division</p>	<p>Definition: Cutting into a body part, without draining fluids and/or gases from the body part, in order to separate or transect a body part</p> <p>Explanation: All or a portion of the body part is separated into two or more portions</p> <p>Includes/Examples: Spinal cordotomy, osteotomy</p>
<p>Drainage</p>	<p>Definition: Taking or letting out fluids and/or gases from a body part</p> <p>Explanation: The qualifier DIAGNOSTIC is used to identify drainage procedures that are biopsies</p> <p>Includes/Examples: Thoracentesis, incision and drainage</p>
<p>Excision</p>	<p>Definition: Cutting out or off, without replacement, a portion of a body part</p> <p>Explanation: The qualifier DIAGNOSTIC is used to identify excision procedures that are biopsies</p> <p>Includes/Examples: Partial nephrectomy, liver biopsy</p>
<p>Extirpation</p>	<p>Definition: Taking or cutting out solid matter from a body part</p> <p>Explanation: The solid matter may be an abnormal byproduct of a biological function or a foreign body; it may be imbedded in a body part or in the lumen of a tubular body part. The solid matter may or may not have been previously broken into pieces</p> <p>Includes/Examples: Thrombectomy, choledocholithotomy</p>
<p>Extraction</p>	<p>Definition: Pulling or stripping out or off all or a portion of a body part by the use of force</p> <p>Explanation: The qualifier DIAGNOSTIC is used to identify extraction procedures that are biopsies</p> <p>Includes/Examples: Dilation and curettage, vein stripping</p>

Section 0 - Medical and Surgical
Character 3 - Operation (***continued***)

[Back to Top](#)

Fragmentation	<p>Definition: Breaking solid matter in a body part into pieces</p> <p>Explanation: Physical force (e.g., manual, ultrasonic) applied directly or indirectly is used to break the solid matter into pieces. The solid matter may be an abnormal byproduct of a biological function or a foreign body. The pieces of solid matter are not taken out</p> <p>Includes/Examples: Extracorporeal shockwave lithotripsy, transurethral lithotripsy</p>
Fusion	<p>Definition: Joining together portions of an articular body part rendering the articular body part immobile</p> <p>Explanation: The body part is joined together by fixation device, bone graft, or other means</p> <p>Includes/Examples: Spinal fusion, ankle arthrodesis</p>
Insertion	<p>Definition: Putting in a nonbiological appliance that monitors, assists, performs, or prevents a physiological function but does not physically take the place of a body part</p> <p>Includes/Examples: Insertion of radioactive implant, insertion of central venous catheter</p>
Inspection	<p>Definition: Visually and/or manually exploring a body part</p> <p>Explanation: Visual exploration may be performed with or without optical instrumentation. Manual exploration may be performed directly or through intervening body layers</p> <p>Includes/Examples: Diagnostic arthroscopy, exploratory laparotomy</p>

Section 0 - Medical and Surgical
Character 3 - Operation (***continued***)

[Back to Top](#)

Map	<p>Definition: Locating the route of passage of electrical impulses and/or locating functional areas in a body part</p> <p>Explanation: Applicable only to the cardiac conduction mechanism and the central nervous system</p> <p>Includes/Examples: Cardiac mapping, cortical mapping</p>
Occlusion	<p>Definition: Completely closing an orifice or the lumen of a tubular body part</p> <p>Explanation: The orifice can be a natural orifice or an artificially created orifice</p> <p>Includes/Examples: Fallopian tube ligation, ligation of inferior vena cava</p>
Reattachment	<p>Definition: Putting back in or on all or a portion of a separated body part to its normal location or other suitable location</p> <p>Explanation: Vascular circulation and nervous pathways may or may not be reestablished</p> <p>Includes/Examples: Reattachment of hand, reattachment of avulsed kidney</p>
Release	<p>Definition: Freeing a body part from an abnormal physical constraint by cutting or by the use of force</p> <p>Explanation: Some of the restraining tissue may be taken out but none of the body part is taken out</p> <p>Includes/Examples: Adhesiolysis, carpal tunnel release</p>

Section 0 - Medical and Surgical
Character 3 - Operation (***continued***)

[Back to Top](#)

Removal	<p>Definition: Taking out or off a device from a body part</p> <p>Explanation: If a device is taken out and a similar device put in without cutting or puncturing the skin or mucous membrane, the procedure is coded to the root operation CHANGE. Otherwise, the procedure for taking out a device is coded to the root operation REMOVAL</p> <p>Includes/Examples: Drainage tube removal, cardiac pacemaker removal</p>
Repair	<p>Definition: Restoring, to the extent possible, a body part to its normal anatomic structure and function</p> <p>Explanation: Used only when the method to accomplish the repair is not one of the other root operations</p> <p>Includes/Examples: Colostomy takedown, suture of laceration</p>
Replacement	<p>Definition: Putting in or on biological or synthetic material that physically takes the place and/or function of all or a portion of a body part</p> <p>Explanation: The body part may have been taken out or replaced, or may be taken out, physically eradicated, or rendered nonfunctional during the Replacement procedure. A Removal procedure is coded for taking out the device used in a previous replacement procedure</p> <p>Includes/Examples: Total hip replacement, bone graft, free skin graft</p>

Section 0 - Medical and Surgical
Character 3 - Operation (**continued**)

[Back to Top](#)

Reposition	<p>Definition: Moving to its normal location, or other suitable location, all or a portion of a body part</p> <p>Explanation: The body part is moved to a new location from an abnormal location, or from a normal location where it is not functioning correctly. The body part may or may not be cut out or off to be moved to the new location</p> <p>Includes/Examples: Reposition of undescended testicle, fracture reduction</p>
Resection	<p>Definition: Cutting out or off, without replacement, all of a body part</p> <p>Includes/Examples: Total nephrectomy, total lobectomy of lung</p>
Restriction	<p>Definition: Partially closing an orifice or the lumen of a tubular body part</p> <p>Explanation: The orifice can be a natural orifice or an artificially created orifice</p> <p>Includes/Examples: Esophagogastric fundoplication, cervical cerclage</p>
Revision	<p>Definition: Correcting, to the extent possible, a portion of a malfunctioning device or the position of a displaced device</p> <p>Explanation: Revision can include correcting a malfunctioning or displaced device by taking out or putting in components of the device such as a screw or pin</p> <p>Includes/Examples: Adjustment of position of pacemaker lead, recementing of hip prosthesis</p>

Section 0 - Medical and Surgical
Character 3 - Operation (**continued**)

[Back to Top](#)

Supplement	<p>Definition: Putting in or on biological or synthetic material that physically reinforces and/or augments the function of a portion of a body part</p> <p>Explanation: The biological material is non-living, or is living and from the same individual. The body part may have been previously replaced, and the Supplement procedure is performed to physically reinforce and/or augment the function of the replaced body part</p> <p>Includes/Examples: Herniorrhaphy using mesh, free nerve graft, mitral valve ring annuloplasty, put a new acetabular liner in a previous hip replacement</p>
Transfer	<p>Definition: Moving, without taking out, all or a portion of a body part to another location to take over the function of all or a portion of a body part</p> <p>Explanation: The body part transferred remains connected to its vascular and nervous supply</p> <p>Includes/Examples: Tendon transfer, skin pedicle flap transfer</p>
Transplantation	<p>Definition: Putting in or on all or a portion of a living body part taken from another individual or animal to physically take the place and/or function of all or a portion of a similar body part</p> <p>Explanation: The native body part may or may not be taken out, and the transplanted body part may take over all or a portion of its function</p> <p>Includes/Examples: Kidney transplant, heart transplant</p>

Abortion	Definition: Artificially terminating a pregnancy
Change	Definition: Taking out or off a device from a body part and putting back an identical or similar device in or on the same body part without cutting or puncturing the skin or a mucous membrane Explanation: All CHANGE procedures are coded using the approach EXTERNAL
Delivery	Definition: Assisting the passage of the products of conception from the genital canal
Drainage	Definition: Taking or letting out fluids and/or gases from a body part Explanation: The qualifier DIAGNOSTIC is used to identify drainage procedures that are biopsies
Extraction	Definition: Pulling or stripping out or off all or a portion of a body part by the use of force Explanation: The qualifier DIAGNOSTIC is used to identify extraction procedures that are biopsies
Insertion	Definition: Putting in a nonbiological appliance that monitors, assists, performs, or prevents a physiological function but does not physically take the place of a body part
Inspection	Definition: Visually and/or manually exploring a body part Explanation: Visual exploration may be performed with or without optical instrumentation. Manual exploration may be performed directly or through intervening body layers

Removal	<p>Definition: Taking out or off a device from a body part, region or orifice</p> <p>Explanation: If a device is taken out and a similar device put in without cutting or puncturing the skin or mucous membrane, the procedure is coded to the root operation CHANGE. Otherwise, the procedure for taking out a device is coded to the root operation REMOVAL</p>
Repair	<p>Definition: Restoring, to the extent possible, a body part to its normal anatomic structure and function</p> <p>Explanation: Used only when the method to accomplish the repair is not one of the other root operations</p>
Reposition	<p>Definition: Moving to its normal location, or other suitable location, all or a portion of a body part</p> <p>Explanation: The body part is moved to a new location from an abnormal location, or from a normal location where it is not functioning correctly. The body part may or may not be cut out or off to be moved to the new location</p>
Resection	<p>Definition: Cutting out or off, without replacement, all of a body part</p>
Transplantation	<p>Definition: Putting in or on all or a portion of a living body part taken from another individual or animal to physically take the place and/or function of all or a portion of a similar body part</p> <p>Explanation: The native body part may or may not be taken out, and the transplanted body part may take over all or a portion of its function</p>

Atmospheric Control	Definition: Extracorporeal control of atmospheric pressure and composition
Decompression	Definition: Extracorporeal elimination of undissolved gas from body fluids
Electromagnetic Therapy	Definition: Extracorporeal treatment by electromagnetic rays
Hyperthermia	Definition: Extracorporeal raising of body temperature
Hypothermia	Definition: Extracorporeal lowering of body temperature
Pheresis	Definition: Extracorporeal separation of blood products
Phototherapy	Definition: Extracorporeal treatment by light rays
Shock Wave Therapy	Definition: Extracorporeal treatment by shock waves
Ultrasound Therapy	Definition: Extracorporeal treatment by ultrasound
Ultraviolet Light Therapy	Definition: Extracorporeal treatment by ultraviolet light

Section B - Imaging Character 3 - Type

[Back to Top](#)

Computerized Tomography (CT Scan)	Definition: Computer reformatted digital display of multiplanar images developed from the capture of multiple exposures of external ionizing radiation
Fluoroscopy	Definition: Single plane or bi-plane real time display of an image developed from the capture of external ionizing radiation on a fluorescent screen. The image may also be stored by either digital or analog means
Magnetic Resonance Imaging (MRI)	Definition: Computer reformatted digital display of multiplanar images developed from the capture of radiofrequency signals emitted by nuclei in a body site excited within a magnetic field
Plain Radiography	Definition: Planar display of an image developed from the capture of external ionizing radiation on photographic or photoconductive plate
Ultrasonography	Definition: Real time display of images of anatomy or flow information developed from the capture of reflected and attenuated high frequency sound waves

Section C - Nuclear Medicine Character 3 - Type

[Back to Top](#)

Nonimaging Nuclear Medicine Assay	Definition: Introduction of radioactive materials into the body for the study of body fluids and blood elements, by the detection of radioactive emissions
Nonimaging Nuclear Medicine Probe	Definition: Introduction of radioactive materials into the body for the study of distribution and fate of certain substances by the detection of radioactive emissions; or, alternatively, measurement of absorption of radioactive emissions from an external source
Nonimaging Nuclear Medicine Uptake	Definition: Introduction of radioactive materials into the body for measurements of organ function, from the detection of radioactive emissions
Planar Nuclear Medicine Imaging	Definition: Introduction of radioactive materials into the body for single plane display of images developed from the capture of radioactive emissions
Positron Emission Tomographic (PET) Imaging	Definition: Introduction of radioactive materials into the body for three dimensional display of images developed from the simultaneous capture, 180 degrees apart, of radioactive emissions
Systemic Nuclear Medicine Therapy	Definition: Introduction of unsealed radioactive materials into the body for treatment
Tomographic (Tomo) Nuclear Medicine Imaging	Definition: Introduction of radioactive materials into the body for three dimensional display of images developed from the capture of radioactive emissions

Activities of Daily Living Assessment	Definition: Measurement of functional level for activities of daily living
Activities of Daily Living Treatment	Definition: Exercise or activities to facilitate functional competence for activities of daily living
Caregiver Training	Definition: Training in activities to support patient's optimal level of function
Cochlear Implant Treatment	Definition: Application of techniques to improve the communication abilities of individuals with cochlear implant
Device Fitting	Definition: Fitting of a device designed to facilitate or support achievement of a higher level of function
Hearing Aid Assessment	Definition: Measurement of the appropriateness and/or effectiveness of a hearing device
Hearing Assessment	Definition: Measurement of hearing and related functions
Hearing Treatment	Definition: Application of techniques to improve, augment, or compensate for hearing and related functional impairment
Motor and/or Nerve Function Assessment	Definition: Measurement of motor, nerve, and related functions
Motor Treatment	Definition: Exercise or activities to increase or facilitate motor function
Speech Assessment	Definition: Measurement of speech and related functions

Acoustic Reflex Decay	<p>Definition: Measures reduction in size/strength of acoustic reflex over time</p> <p>Includes/Examples: Includes site of lesion test</p>
Acoustic Reflex Patterns	<p>Definition: Defines site of lesion based upon presence/absence of acoustic reflexes with ipsilateral vs. contralateral stimulation</p>
Acoustic Reflex Threshold	<p>Definition: Determines minimal intensity that acoustic reflex occurs with ipsilateral and/or contralateral stimulation</p>
Aerobic Capacity and Endurance	<p>Definition: Measures autonomic responses to positional changes; perceived exertion, dyspnea or angina during activity; performance during exercise protocols; standard vital signs; and blood gas analysis or oxygen consumption</p>
Alternate Binaural or Monaural Loudness Balance	<p>Definition: Determines auditory stimulus parameter that yields the same objective sensation</p> <p>Includes/Examples: Sound intensities that yield same loudness perception</p>
Anthropometric Characteristics	<p>Definition: Measures edema, body fat composition, height, weight, length and girth</p>
Aphasia (Assessment)	<p>Definition: Measures expressive and receptive speech and language function including reading and writing</p>
Aphasia (Treatment)	<p>Definition: Applying techniques to improve, augment, or compensate for receptive/ expressive language impairments</p>

[Back to Top](#)

Articulation/Phonology (Assessment)	Definition: Measures speech production
Articulation/Phonology (Treatment)	Definition: Applying techniques to correct, improve, or compensate for speech productive impairment
Assistive Listening Device	Definition: Assists in use of effective and appropriate assistive listening device/system
Assistive Listening System/Device Selection	Definition: Measures the effectiveness and appropriateness of assistive listening systems/devices
Assistive, Adaptive, Supportive or Protective Devices	Explanation: Devices to facilitate or support achievement of a higher level of function in wheelchair mobility; bed mobility; transfer or ambulation ability; bath and showering ability; dressing; grooming; personal hygiene; play or leisure
Auditory Evoked Potentials	Definition: Measures electric responses produced by the VIIIth cranial nerve and brainstem following auditory stimulation
Auditory Processing (Assessment)	Definition: Evaluates ability to receive and process auditory information and comprehension of spoken language
Auditory Processing (Treatment)	Definition: Applying techniques to improve the receiving and processing of auditory information and comprehension of spoken language

<p>Augmentative/Alternative Communication System (Assessment)</p>	<p>Definition: Determines the appropriateness of aids, techniques, symbols, and/or strategies to augment or replace speech and enhance communication</p> <p>Includes/Examples: Includes the use of telephones, writing equipment, emergency equipment, and TDD</p>
<p>Augmentative/Alternative Communication System (Treatment)</p>	<p>Includes/Examples: Includes augmentative communication devices and aids</p>
<p>Aural Rehabilitation</p>	<p>Definition: Applying techniques to improve the communication abilities associated with hearing loss</p>
<p>Aural Rehabilitation Status</p>	<p>Definition: Measures impact of a hearing loss including evaluation of receptive and expressive communication skills</p>
<p>Bathing/Showering</p>	<p>Includes/Examples: Includes obtaining and using supplies; soaping, rinsing, and drying body parts; maintaining bathing position; and transferring to and from bathing positions</p>
<p>Bathing/Showering Techniques</p>	<p>Definition: Activities to facilitate obtaining and using supplies, soaping, rinsing and drying body parts, maintaining bathing position, and transferring to and from bathing positions</p>
<p>Bed Mobility (Assessment)</p>	<p>Definition: Transitional movement within bed</p>
<p>Bed Mobility (Treatment)</p>	<p>Definition: Exercise or activities to facilitate transitional movements within bed</p>

Bedside Swallowing and Oral Function	Includes/Examples: Bedside swallowing includes assessment of sucking, masticating, coughing, and swallowing. Oral function includes assessment of musculature for controlled movements, structures and functions to determine coordination and phonation
Bekesy Audiometry	Definition: Uses an instrument that provides a choice of discrete or continuously varying pure tones; choice of pulsed or continuous signal
Binaural Electroacoustic Hearing Aid Check	Definition: Determines mechanical and electroacoustic function of bilateral hearing aids using hearing aid test box
Binaural Hearing Aid (Assessment)	Definition: Measures the candidacy, effectiveness, and appropriateness of a hearing aids Explanation: Measures bilateral fit
Binaural Hearing Aid (Treatment)	Explanation: Assists in achieving maximum understanding and performance
Bithermal, Binaural Caloric Irrigation	Definition: Measures the rhythmic eye movements stimulated by changing the temperature of the vestibular system
Bithermal, Monaural Caloric Irrigation	Definition: Measures the rhythmic eye movements stimulated by changing the temperature of the vestibular system in one ear
Brief Tone Stimuli	Definition: Measures specific central auditory process
Cerumen Management	Definition: Includes examination of external auditory canal and tympanic membrane and removal of cerumen from external ear canal

Section F - Physical Rehabilitation and Diagnostic
Audiology

[Back to Top](#)

Character 5 - Type Qualifier (***continued***)

Cochlear Implant	Definition: Measures candidacy for cochlear implant
Cochlear Implant Rehabilitation	Definition: Applying techniques to improve the communication abilities of individuals with cochlear implant; includes programming the device, providing patients/families with information
Communicative/Cognitive Integration Skills (Assessment)	<p>Definition: Measures ability to use higher cortical functions</p> <p>Includes/Examples: Includes orientation, recognition, attention span, initiation and termination of activity, memory, sequencing, categorizing, concept formation, spatial operations, judgment, problem solving, generalization and pragmatic communication</p>
Communicative/Cognitive Integration Skills (Treatment)	<p>Definition: Activities to facilitate the use of higher cortical functions</p> <p>Includes/Examples: Includes level of arousal, orientation, recognition, attention span, initiation and termination of activity, memory sequencing, judgment and problem solving, learning and generalization, and pragmatic communication</p>
Computerized Dynamic Posturography	Definition: Measures the status of the peripheral and central vestibular system and the sensory/motor component of balance; evaluates the efficacy of vestibular rehabilitation

Section F - Physical Rehabilitation and Diagnostic
 Audiology
 Character 5 - Type Qualifier (***continued***)

[Back to Top](#)

Conditioned Play Audiometry	<p>Definition: Behavioral measures using nonspeech and speech stimuli to obtain frequency-specific and ear-specific information on auditory status from the patient</p> <p>Explanation: Obtains speech reception threshold by having patient point to pictures of spondaic words</p>
Coordination/Dexterity (Assessment)	<p>Definition: Measures large and small muscle groups for controlled goal- directed movements</p> <p>Explanation: Dexterity includes object manipulation</p>
Coordination/Dexterity (Treatment)	<p>Definition: Exercise or activities to facilitate gross coordination and fine coordination</p>
Cranial Nerve Integrity	<p>Definition: Measures cranial nerve sensory and motor functions, including tastes, smell and facial expression</p>
Dichotic Stimuli	<p>Definition: Measures specific central auditory process</p>
Distorted Speech	<p>Definition: Measures specific central auditory process</p>
Dix-Hallpike Dynamic	<p>Definition: Measures nystagmus following Dix-Hallpike maneuver</p>
Dressing	<p>Includes/Examples: Includes selecting clothing and accessories, obtaining clothing from storage, dressing and, fastening and adjusting clothing and shoes, and applying and removing personal devices, prosthesis or orthosis</p>

Section F - Physical Rehabilitation and Diagnostic
 Audiology
 Character 5 - Type Qualifier (***continued***)

[Back to Top](#)

Dressing Techniques	Definition: Activities to facilitate selecting clothing and accessories, dressing and undressing, adjusting clothing and shoes, applying and removing devices, prostheses or orthoses
Dynamic Orthosis	Includes/Examples: Includes customized and prefabricated splints, inhibitory casts, spinal and other braces, and protective devices; allows motion through transfer of movement from other body parts or by use of outside forces
Ear Canal Probe Microphone	Definition: Real ear measures
Ear Protector Attenuation	Definition: Measures ear protector fit and effectiveness
Electrocochleography	Definition: Measures the VIIIth cranial nerve action potential
Environmental, Home and Work Barriers	Definition: Measures current and potential barriers to optimal function, including safety hazards, access problems and home or office design
Ergonomics and Body Mechanics	Definition: Ergonomic measurement of job tasks, work hardening or work conditioning needs; functional capacity; and body mechanics
Eustachian Tube Function	Definition: Measures eustachian tube function and patency of eustachian tube
Evoked Otoacoustic Emissions, Diagnostic	Definition: Measures auditory evoked potentials in a diagnostic format
Evoked Otoacoustic Emissions, Screening	Definition: Measures auditory evoked potentials in a screening format
Facial Nerve Function	Definition: Measures electrical activity of the VIIth cranial nerve (facial nerve)

Section F - Physical Rehabilitation and Diagnostic
 Audiology
 Character 5 - Type Qualifier (***continued***)

Feeding/Eating (Assessment)	Includes/Examples: Includes setting up food, selecting and using utensils and tableware, bringing food or drink to mouth, cleaning face, hands, and clothing, and management of alternative methods of nourishment
Feeding/Eating (Treatment)	Definition: Exercise or activities to facilitate setting up food, selecting and using utensils and tableware, bringing food or drink to mouth, cleaning face, hands, and clothing, and management of alternative methods of nourishment
Filtered Speech	Definition: Uses high or low pass filtered speech stimuli to assess central auditory processing disorders, site of lesion testing
Fluency (Assessment)	Definition: Measures speech fluency or stuttering
Fluency (Treatment)	Definition: Applying techniques to improve and augment fluent speech
Gait and/or Balance	Definition: Measures biomechanical, arthrokinematic and other spatial and temporal characteristics of gait and balance
Gait Training/Functional Ambulation	Definition: Exercise or activities to facilitate ambulation on a variety of surfaces and in a variety of environments
Grooming/Personal Hygiene (Assessment)	Includes/Examples: Includes ability to obtain and use supplies in a sequential fashion, general grooming, oral hygiene, toilet hygiene, personal care devices, including care for artificial airways

Section F - Physical Rehabilitation and Diagnostic
 Audiology
 Character 5 - Type Qualifier (***continued***)

[Back to Top](#)

Grooming/Personal Hygiene (Treatment)	<p>Definition: Activities to facilitate obtaining and using supplies in a sequential fashion: general grooming, oral hygiene, toilet hygiene, cleaning body, and personal care devices, including artificial airways</p>
Hearing and Related Disorders Counseling	<p>Definition: Provides patients/families/caregivers with information, support, referrals to facilitate recovery from a communication disorder</p> <p>Includes/Examples: Includes strategies for psychosocial adjustment to hearing loss for clients and families/caregivers</p>
Hearing and Related Disorders Prevention	<p>Definition: Provides patients/families/caregivers with information and support to prevent communication disorders</p>
Hearing Screening	<p>Definition: Pass/refer measures designed to identify need for further audiologic assessment</p>
Home Management (Assessment)	<p>Definition: Obtaining and maintaining personal and household possessions and environment</p> <p>Includes/Examples: Includes clothing care, cleaning, meal preparation and cleanup, shopping, money management, household maintenance, safety procedures, and childcare/parenting</p>
Home Management (Treatment)	<p>Definition: Activities to facilitate obtaining and maintaining personal household possessions and environment</p> <p>Includes/Examples: Includes clothing care, cleaning, meal preparation and clean-up, shopping, money management, household maintenance, safety procedures, childcare/parenting</p>

Instrumental Swallowing and Oral Function	<p>Definition: Measures swallowing function using instrumental diagnostic procedures</p> <p>Explanation: Methods include videofluoroscopy, ultrasound, manometry, endoscopy</p>
Integumentary Integrity	<p>Includes/Examples: Includes burns, skin conditions, ecchymosis, bleeding, blisters, scar tissue, wounds and other traumas, tissue mobility, turgor and texture</p>
Manual Therapy Techniques	<p>Definition: Techniques in which the therapist uses his/her hands to administer skilled movements</p> <p>Includes/Examples: Includes connective tissue massage, joint mobilization and manipulation, manual lymph drainage, manual traction, soft tissue mobilization and manipulation</p>
Masking Patterns	<p>Definition: Measures central auditory processing status</p>
Monaural Electroacoustic Hearing Aid Check	<p>Definition: Determines mechanical and electroacoustic function of one hearing aid using hearing aid test box</p>
Monaural Hearing Aid (Assessment)	<p>Definition: Measures the candidacy, effectiveness, and appropriateness of a hearing aid</p> <p>Explanation: Measures unilateral fit</p>
Monaural Hearing Aid (Treatment)	<p>Explanation: Assists in achieving maximum understanding and performance</p>

<p>Motor Function (Assessment)</p>	<p>Definition: Measures the body's functional and versatile movement patterns</p> <p>Includes/Examples: Includes motor assessment scales, analysis of head, trunk and limb movement, and assessment of motor learning</p>
<p>Motor Function (Treatment)</p>	<p>Definition: Exercise or activities to facilitate crossing midline, laterality, bilateral integration, praxis, neuromuscular relaxation, inhibition, facilitation, motor function and motor learning</p>
<p>Motor Speech (Assessment)</p>	<p>Definition: Measures neurological motor aspects of speech production</p>
<p>Motor Speech (Treatment)</p>	<p>Definition: Applying techniques to improve and augment the impaired neurological motor aspects of speech production</p>
<p>Muscle Performance (Assessment)</p>	<p>Definition: Measures muscle strength, power and endurance using manual testing, dynamometry or computer-assisted electromechanical muscle test; functional muscle strength, power and endurance; muscle pain, tone, or soreness; or pelvic-floor musculature</p> <p>Explanation: Muscle endurance refers to the ability to contract a muscle repeatedly over time</p>

Section F - Physical Rehabilitation and Diagnostic
 Audiology
 Character 5 - Type Qualifier (***continued***)

[Back to Top](#)

Muscle Performance (Treatment)	<p>Definition: Exercise or activities to increase the capacity of a muscle to do work in terms of strength, power, and/or endurance</p> <p>Explanation: Muscle strength is the force exerted to overcome resistance in one maximal effort. Muscle power is work produced per unit of time, or the product of strength and speed. Muscle endurance is the ability to contract a muscle repeatedly over time</p>
Neuromotor Development	<p>Definition: Measures motor development, righting and equilibrium reactions, and reflex and equilibrium reactions</p>
Neurophysiologic Intraoperative	<p>Definition: Monitors neural status during surgery</p>
Non-invasive Instrumental Status	<p>Definition: Instrumental measures of oral, nasal, vocal, and velopharyngeal functions as they pertain to speech production</p>
Nonspoken Language (Assessment)	<p>Definition: Measures nonspoken language (print, sign, symbols) for communication</p>
Nonspoken Language (Treatment)	<p>Definition: Applying techniques that improve, augment, or compensate spoken communication</p>
Oral Peripheral Mechanism	<p>Definition: Structural measures of face, jaw, lips, tongue, teeth, hard and soft palate, pharynx as related to speech production</p>
Orofacial Myofunctional (Assessment)	<p>Definition: Measures orofacial myofunctional patterns for speech and related functions</p>

Section F - Physical Rehabilitation and Diagnostic
 Audiology
 Character 5 - Type Qualifier (**continued**)

[Back to Top](#)

Orofacial Myofunctional (Treatment)	Definition: Applying techniques to improve, alter, or augment impaired orofacial myofunctional patterns and related speech production errors
Oscillating Tracking	Definition: Measures ability to visually track
Pain	<p>Definition: Measures muscle soreness, pain and soreness with joint movement, and pain perception</p> <p>Includes/Examples: Includes questionnaires, graphs, symptom magnification scales or visual analog scales</p>
Perceptual Processing (Assessment)	Definition: Measures stereognosis, kinesthesia, body schema, right-left discrimination, form constancy, position in space, visual closure, figure-ground, depth perception, spatial relations and topographical orientation
Perceptual Processing (Treatment)	<p>Definition: Exercise and activities to facilitate perceptual processing</p> <p>Explanation: Includes stereognosis, kinesthesia, body schema, right-left discrimination, form constancy, position in space, visual closure, figure-ground, depth perception, spatial relations, and topographical orientation</p> <p>Includes/Examples: Includes stereognosis, kinesthesia, body schema, right-left discrimination, form constancy, position in space, visual closure, figure-ground, depth perception, spatial relations, and topographical orientation</p>
Performance Intensity Phonetically Balanced Speech Discrimination	Definition: Measures word recognition over varying intensity levels

Section F - Physical Rehabilitation and Diagnostic
 Audiology
 Character 5 - Type Qualifier (***continued***)

[Back to Top](#)

Postural Control	Definition: Exercise or activities to increase postural alignment and control
Prosthesis	Explanation: Artificial substitutes for missing body parts that augment performance or function
Psychosocial Skills (Assessment)	<p>Definition: The ability to interact in society and to process emotions</p> <p>Includes/Examples: Includes psychological (values, interests, self-concept); social (role performance, social conduct, interpersonal skills, self expression); self-management (coping skills, time management, self-control)</p>
Psychosocial Skills (Treatment)	<p>Definition: The ability to interact in society and to process emotions</p> <p>Includes/Examples: Includes psychological (values, interests, self-concept); social (role performance, social conduct, interpersonal skills, self expression); self-management (coping skills, time management, self-control)</p>
Pure Tone Audiometry, Air	Definition: Air-conduction pure tone threshold measures with appropriate masking
Pure Tone Audiometry, Air and Bone	Definition: Air-conduction and bone-conduction pure tone threshold measures with appropriate masking
Pure Tone Stenger	Definition: Measures unilateral nonorganic hearing loss based on simultaneous presentation of pure tones of differing volume

Section F - Physical Rehabilitation and Diagnostic
 Audiology
 Character 5 - Type Qualifier (***continued***)

[Back to Top](#)

Range of Motion and Joint Integrity	<p>Definition: Measures quantity, quality, grade, and classification of joint movement and/or mobility</p> <p>Explanation: Range of Motion is the space, distance or angle through which movement occurs at a joint or series of joints. Joint integrity is the conformance of joints to expected anatomic, biomechanical and kinematic norms</p>
Range of Motion and Joint Mobility	<p>Definition: Exercise or activities to increase muscle length and joint mobility</p>
Receptive/Expressive Language (Assessment)	<p>Definition: Measures receptive and expressive language</p>
Receptive/Expressive Language (Treatment)	<p>Definition: Applying techniques to improve and augment receptive/expressive language</p>
Reflex Integrity	<p>Definition: Measures the presence, absence, or exaggeration of developmentally appropriate, pathologic or normal reflexes</p>
Select Picture Audiometry	<p>Definition: Establishes hearing threshold levels for speech using pictures</p>
Sensorineural Acuity Level	<p>Definition: Measures sensorineural acuity masking presented via bone conduction</p>
Sensory Aids	<p>Definition: Determines the appropriateness of a sensory prosthetic device, other than a hearing aid or assistive listening system/device</p>
Sensory Awareness/Processing/Integrity	<p>Includes/Examples: Includes light touch, pressure, temperature, pain, sharp/dull, proprioception, vestibular, visual, auditory, gustatory, and olfactory</p>

Section F - Physical Rehabilitation and Diagnostic
 Audiology
 Character 5 - Type Qualifier (***continued***)

[Back to Top](#)

Short Increment Sensitivity Index	Definition: Measures the ear's ability to detect small intensity changes; site of lesion test requiring a behavioral response
Sinusoidal Vertical Axis Rotational	Definition: Measures nystagmus following rotation
Somatosensory Evoked Potentials	Definition: Measures neural activity from sites throughout the body
Speech and/or Language Screening	Definition: Identifies need for further speech and/or language evaluation
Speech Threshold	Definition: Measures minimal intensity needed to repeat spondaic words
Speech-Language Pathology and Related Disorders Counseling	Definition: Provides patients/families with information, support, referrals to facilitate recovery from a communication disorder
Speech-Language Pathology and Related Disorders Prevention	Definition: Applying techniques to avoid or minimize onset and/or development of a communication disorder
Speech/Word Recognition	Definition: Measures ability to repeat/identify single syllable words; scores given as a percentage; includes word recognition/speech discrimination
Staggered Spondaic Word	Definition: Measures central auditory processing site of lesion based upon dichotic presentation of spondaic words
Static Orthosis	Includes/Examples: Includes customized and prefabricated splints, inhibitory casts, spinal and other braces, and protective devices; has no moving parts, maintains joint(s) in desired position

Section F - Physical Rehabilitation and Diagnostic
 Audiology
 Character 5 - Type Qualifier (***continued***)

[Back to Top](#)

Stenger	Definition: Measures unilateral nonorganic hearing loss based on simultaneous presentation of signals of differing volume
Swallowing Dysfunction	Definition: Activities to improve swallowing function in coordination with respiratory function Includes/Examples: Includes function and coordination of sucking, mastication, coughing, swallowing
Synthetic Sentence Identification	Definition: Measures central auditory dysfunction using identification of third order approximations of sentences and competing messages
Temporal Ordering of Stimuli	Definition: Measures specific central auditory process
Therapeutic Exercise	Definition: Exercise or activities to facilitate sensory awareness, sensory processing, sensory integration, balance training, conditioning, reconditioning Includes/Examples: Includes developmental activities, breathing exercises, aerobic endurance activities, aquatic exercises, stretching and ventilatory muscle training
Tinnitus Masker (Assessment)	Definition: Determines candidacy for tinnitus masker
Tinnitus Masker (Treatment)	Explanation: Used to verify physical fit, acoustic appropriateness, and benefit; assists in achieving maximum benefit
Tone Decay	Definition: Measures decrease in hearing sensitivity to a tone; site of lesion test requiring a behavioral response

Section F - Physical Rehabilitation and Diagnostic
 Audiology
 Character 5 - Type Qualifier (***continued***)

[Back to Top](#)

Transfer	Definition: Transitional movement from one surface to another
Transfer Training	Definition: Exercise or activities to facilitate movement from one surface to another
Tympanometry	Definition: Measures the integrity of the middle ear; measures ease at which sound flows through the tympanic membrane while air pressure against the membrane is varied
Unithermal Binaural Screen	Definition: Measures the rhythmic eye movements stimulated by changing the temperature of the vestibular system in both ears using warm water, screening format
Ventilation, Respiration and Circulation	<p>Definition: Measures ventilatory muscle strength, power and endurance, pulmonary function and ventilatory mechanics</p> <p>Includes/Examples: Includes ability to clear airway, activities that aggravate or relieve edema, pain, dyspnea or other symptoms, chest wall mobility, cardiopulmonary response to performance of ADL and IAD, cough and sputum, standard vital signs</p>
Vestibular	Definition: Applying techniques to compensate for balance disorders; includes habituation, exercise therapy, and balance retraining
Visual Motor Integration (Assessment)	Definition: Coordinating the interaction of information from the eyes with body movement during activity
Visual Motor Integration (Treatment)	Definition: Exercise or activities to facilitate coordinating the interaction of information from eyes with body movement during activity

Section F - Physical Rehabilitation and Diagnostic
 Audiology
 Character 5 - Type Qualifier (***continued***)

[Back to Top](#)

<p>Visual Reinforcement Audiometry</p>	<p>Definition: Behavioral measures using nonspeech and speech stimuli to obtain frequency/ear-specific information on auditory status</p> <p>Includes/Examples: Includes a conditioned response of looking toward a visual reinforcer (e.g., lights, animated toy) every time auditory stimuli are heard</p>
<p>Vocational Activities and Functional Community or Work Reintegration Skills (Assessment)</p>	<p>Definition: Measures environmental, home, work (job/school/play) barriers that keep patients from functioning optimally in their environment</p> <p>Includes/Examples: Includes assessment of vocational skill and interests, environment of work (job/school/play), injury potential and injury prevention or reduction, ergonomic stressors, transportation skills, and ability to access and use community resources</p>
<p>Vocational Activities and Functional Community or Work Reintegration Skills (Treatment)</p>	<p>Definition: Activities to facilitate vocational exploration, body mechanics training, job acquisition, and environmental or work (job/school/play) task adaptation</p> <p>Includes/Examples: Includes injury prevention and reduction, ergonomic stressor reduction, job coaching and simulation, work hardening and conditioning, driving training, transportation skills, and use of community resources</p>
<p>Voice (Assessment)</p>	<p>Definition: Measures vocal structure, function and production</p>
<p>Voice (Treatment)</p>	<p>Definition: Applying techniques to improve voice and vocal function</p>

Section F - Physical Rehabilitation and Diagnostic
Audiology
Character 5 - Type Qualifier (***continued***)

Voice Prosthetic (Assessment)	Definition: Determines the appropriateness of voice prosthetic/adaptive device to enhance or facilitate communication
Voice Prosthetic (Treatment)	Includes/Examples: Includes electrolarynx, and other assistive, adaptive, supportive devices
Wheelchair Mobility (Assessment)	Definition: Measures fit and functional abilities within wheelchair in a variety of environments
Wheelchair Mobility (Treatment)	Definition: Management, maintenance and controlled operation of a wheelchair, scooter or other device, in and on a variety of surfaces and environments
Wound Management	Includes/Examples: Includes non-selective and selective debridement (enzymes, autolysis, sharp debridement), dressings (wound coverings, hydrogel, vacuum-assisted closure), topical agents, etc.

Section G - Mental Health Character 3 - Type

[Back to Top](#)

Biofeedback	<p>Definition: Provision of information from the monitoring and regulating of physiological processes in conjunction with cognitive-behavioral techniques to improve patient functioning or well-being</p> <p>Includes/Examples: Includes EEG, blood pressure, skin temperature or peripheral blood flow, ECG, electrooculogram, EMG, respirometry or capnometry, GSR/EDR, perineometry to monitor/regulate bowel/bladder activity, electrogastrogram to monitor/regulate gastric motility</p>
Counseling	<p>Definition: The application of psychological methods to treat an individual with normal developmental issues and psychological problems in order to increase function, improve well-being, alleviate distress, maladjustment or resolve crises</p>
Crisis Intervention	<p>Definition: Treatment of a traumatized, acutely disturbed or distressed individual for the purpose of short-term stabilization</p> <p>Includes/Examples: Includes defusing, debriefing, counseling, psychotherapy and/or coordination of care with other providers or agencies</p>
Electroconvulsive Therapy	<p>Definition: The application of controlled electrical voltages to treat a mental health disorder</p> <p>Includes/Examples: Includes appropriate sedation and other preparation of the individual</p>
Family Psychotherapy	<p>Definition: Treatment that includes one or more family members of an individual with a mental health disorder by behavioral, cognitive, psychoanalytic, psychodynamic or psychophysiological means to improve functioning or well-being</p> <p>Explanation: Remediation of emotional or behavioral problems presented by one or more family members in cases where psychotherapy with more than one family member is indicated</p>

Section G - Mental Health
Character 3 - Type **(continued)**

[Back to Top](#)

Group Psychotherapy	Definition: Treatment of two or more individuals with a mental health disorder by behavioral, cognitive, psychoanalytic, psychodynamic or psychophysiological means to improve functioning or well-being
Hypnosis	Definition: Induction of a state of heightened suggestibility by auditory, visual and tactile techniques to elicit an emotional or behavioral response
Individual Psychotherapy	Definition: Treatment of an individual with a mental health disorder by behavioral, cognitive, psychoanalytic, psychodynamic or psychophysiological means to improve functioning or well-being
Light Therapy	Definition: Application of specialized light treatments to improve functioning or well-being
Medication Management	Definition: Monitoring and adjusting the use of medications for the treatment of a mental health disorder
Narcosynthesis	Definition: Administration of intravenous barbiturates in order to release suppressed or repressed thoughts
Psychological Tests	Definition: The administration and interpretation of standardized psychological tests and measurement instruments for the assessment of psychological function

Section G - Mental Health Character 4 - Qualifier

Behavioral	<p>Definition: Primarily to modify behavior</p> <p>Includes/Examples: Includes modeling and role playing, positive reinforcement of target behaviors, response cost, and training of self-management skills</p>
Cognitive	<p>Definition: Primarily to correct cognitive distortions and errors</p>
Cognitive-Behavioral	<p>Definition: Combining cognitive and behavioral treatment strategies to improve functioning</p> <p>Explanation: Maladaptive responses are examined to determine how cognitions relate to behavior patterns in response to an event. Uses learning principles and information-processing models</p>
Developmental	<p>Definition: Age-normed developmental status of cognitive, social and adaptive behavior skills</p>
Intellectual and Psychoeducational	<p>Definition: Intellectual abilities, academic achievement and learning capabilities (including behaviors and emotional factors affecting learning)</p>
Interactive	<p>Definition: Uses primarily physical aids and other forms of non-oral interaction with a patient who is physically, psychologically or developmentally unable to use ordinary language for communication</p> <p>Includes/Examples: Includes. the use of toys in symbolic play</p>
Interpersonal	<p>Definition: Helps an individual make changes in interpersonal behaviors to reduce psychological dysfunction</p> <p>Includes/Examples: Includes exploratory techniques, encouragement of affective expression, clarification of patient statements, analysis of communication patterns, use of therapy relationship and behavior change techniques</p>

 Character 4 - Qualifier (***continued***)

[Back to Top](#)

Neurobehavioral and Cognitive Status	<p>Definition: Includes neurobehavioral status exam, interview(s), and observation for the clinical assessment of thinking, reasoning and judgment, acquired knowledge, attention, memory, visual spatial abilities, language functions, and planning</p>
Neuropsychological	<p>Definition: Thinking, reasoning and judgment, acquired knowledge, attention, memory, visual spatial abilities, language functions, planning</p>
Personality and Behavioral	<p>Definition: Mood, emotion, behavior, social functioning, psychopathological conditions, personality traits and characteristics</p>
Psychoanalysis	<p>Definition: Methods of obtaining a detailed account of past and present mental and emotional experiences to determine the source and eliminate or diminish the undesirable effects of unconscious conflicts</p> <p>Explanation: Accomplished by making the individual aware of their existence, origin, and inappropriate expression in emotions and behavior</p>
Psychodynamic	<p>Definition: Exploration of past and present emotional experiences to understand motives and drives using insight-oriented techniques to reduce the undesirable effects of internal conflicts on emotions and behavior</p> <p>Explanation: Techniques include empathetic listening, clarifying self-defeating behavior patterns, and exploring adaptive alternatives</p>
Psychophysiological	<p>Definition: Monitoring and alteration of physiological processes to help the individual associate physiological reactions combined with cognitive and behavioral strategies to gain improved control of these processes to help the individual cope more effectively</p>

Section G - Mental Health
Character 4 - Qualifier (***continued***)

[Back to Top](#)

Supportive	<p>Definition: Formation of therapeutic relationship primarily for providing emotional support to prevent further deterioration in functioning during periods of particular stress</p> <p>Explanation: Often used in conjunction with other therapeutic approaches</p>
Vocational	<p>Definition: Exploration of vocational interests, aptitudes and required adaptive behavior skills to develop and carry out a plan for achieving a successful vocational placement</p> <p>Includes/Examples: Includes enhancing work related adjustment and/or pursuing viable options in training education or preparation</p>

Section H - Substance Abuse Treatment Character 3 - Type

[Back to Top](#)

Detoxification Services	<p>Definition: Detoxification from alcohol and/or drugs</p> <p>Explanation: Not a treatment modality, but helps the patient stabilize physically and psychologically until the body becomes free of drugs and the effects of alcohol</p>
Family Counseling	<p>Definition: The application of psychological methods that includes one or more family members to treat an individual with addictive behavior</p> <p>Explanation: Provides support and education for family members of addicted individuals. Family member participation is seen as a critical area of substance abuse treatment</p>
Group Counseling	<p>Definition: The application of psychological methods to treat two or more individuals with addictive behavior</p> <p>Explanation: Provides structured group counseling sessions and healing power through the connection with others</p>
Individual Counseling	<p>Definition: The application of psychological methods to treat an individual with addictive behavior</p> <p>Explanation: Comprised of several different techniques, which apply various strategies to address drug addiction</p>
Individual Psychotherapy	<p>Definition: Treatment of an individual with addictive behavior by behavioral, cognitive, psychoanalytic, psychodynamic or psychophysiological means</p>
Medication Management	<p>Definition: Monitoring and adjusting the use of replacement medications for the treatment of addiction</p>
Pharmacotherapy	<p>Definition: The use of replacement medications for the treatment of addiction</p>
