Date: February 16, 2021

Subject: PLEASE READ: CY 2022 Part D Application Attestations

CMS identified an issue in the attestation section of the CY 2022 Part D application. A software fix was deployed to HPMS production earlier this evening, February 16, 2021.

As a result, CMS is asking all Part D applicants to review their Part D attestation responses and make adjustments, if needed.

If you already performed a final submission, but need to update your Part D attestation responses, please contact the PartD_Applications@cms.hhs.gov resource mailbox to reopen the Part D attestation section.

As a reminder, the CY 2022 applications must be final submitted in HPMS **by 8:00 p.m. ET on Wednesday, February 17, 2021.**

If your organization is unable to complete the review of Part D attestations before the deadline, please contact the PartD_Applications@cms.hhs.gov resource mailbox for assistance.

For technical issues, please contact the HPMS Help Desk at either hpms@cms.hhs.gov or 1-800-220-2028.
