Transmittal 12053	Date: May 18, 2023
	Change Request 13210

SUBJECT: July 2023 Update of the Hospital Outpatient Prospective Payment System (OPPS)

I. SUMMARY OF CHANGES: The purpose of this Change Request (CR) is to describe changes to and billing instructions for various payment policies implemented in the April 2023 OPPS update. The April 2023 Integrated Outpatient Code Editor (I/OCE) will reflect the Healthcare Common Procedure Coding System (HCPCS), Ambulatory Payment Classification (APC), HCPCS Modifier, and Revenue Code additions, changes, and deletions identified in this CR. This RUN applies to Chapter 4, section 50.8 (Annual Updates to the OPPS Pricer for Calendar Year (CY) 2007 and Later).

EFFECTIVE DATE: July 1, 2023

**Unless otherwise specified, the effective date is the date of service.*

IMPLEMENTATION DATE: July 3, 2023

Disclaimer for manual changes only: The revision date and transmittal number apply only to red italicized material. Any other material was previously published and remains unchanged. However, if this revision contains a table of contents, you will receive the new/revise information only, and not the entire table of contents.

III. FUNDING:

For Medicare Administrative Contractors (MACs):

The Medicare Administrative Contractor is hereby advised that this constitutes technical direction as defined in your contract. CMS does not construe this as a change to the MAC Statement of Work. The contractor is not obligated to incur costs in excess of the amounts allotted in your contract unless and until specifically authorized by the Contracting Officer. If the contractor considers anything provided, as described above, to be outside the current scope of work, the contractor shall withhold performance on the part(s) in question and immediately notify the Contracting Officer, in writing or by e-mail, and request formal directions regarding continued performance requirements.

SUBJECT: July 2023 Update of the Hospital Outpatient Prospective Payment System (OPPS)

EFFECTIVE DATE: July 1, 2023

**Unless otherwise specified, the effective date is the date of service.*

IMPLEMENTATION DATE: July 3, 2023

I. GENERAL INFORMATION

A. Background: This Recurring Update Notification (RUN) provides instructions on coding changes and policy updates that are effective July 1, 2023 for the Hospital OPPS. The updates include coding and policy changes for new services, pass-through drug and devices, Covid-19 treatments, PLA codes and other items and services. The July 2023 revisions to I/OCE data files, instructions, and specifications are provided in the forthcoming July 2023 I/OCE CR.

B. Policy: 1. New Covid-19 CPT Vaccines and Administration Codes

American Medical Association (AMA) has been issuing unique Current Procedural Terminology (CPT) Category I codes which are developed based on collaboration with Centers for Medicare & Medicaid Services (CMS) and Centers for Disease Control and Prevention (CDC) for each coronavirus vaccine as well as administration codes unique to each such vaccine and dose. These codes are effective upon receiving Emergency Use Authorization (EUA) or approval from the Food and Drug Administration (FDA).

The CPT Editorial Panel has recently approved:

- A new CPT code (0174A) describing the service to administer the booster dose of the “Pfizer-BioNtech COVID-19 Vaccine, Bivalent” (91317) for individuals 6 months through 4 years.

The CMS identify an effective date of March 14, 2023 for CPT code 0174A, which describes the service to administer the Pfizer-BioNTech “COVID-19 Vaccine, Bivalent” as a booster dose for individuals 6 months through 4 years. This effective date corresponds with FDA EUA and/or approvals for the “Pfizer BioNTech COVID-19 Vaccine, Bivalent,” described by CPT code 91317, effective March 14, 2023.

Effective March 14, 2023, CPT code 0174A is assigned to status indicator “S” (Procedure or Service, Not Discounted When Multiple, separate APC assignment) and APC 9398 (Covid-19 Vaccine Admin Dose 2 of 2, Single Dose Product or Additional Dose) in the July 2023 I/OCE update.

Beneficiary cost sharing shall not be applied to the new vaccine administration code.

CMS will provide future direction to the contractors as EUAs and/or approvals become available.

Table 1, attachment A, lists the long descriptors for the codes. These codes, along with their short descriptors, status indicators, and payment rates (where applicable) are also listed in the July 2023 OPPS Addendum B that is posted on the CMS website. For information on the OPPS status indicators, refer to OPPS Addendum D1 of the CY 2023 OPPS/Ambulatory Surgical Center (ASC) final rule for the latest definitions.

2. CPT Proprietary Laboratory Analyses (PLA) Coding Changes Effective July 1, 2023

The AMA CPT Editorial Panel established 15 new PLA codes, specifically, CPT codes 0387U through 0401U, effective July 1, 2023.

Table 2, attachment A, lists the long descriptors and status indicators for the codes. The codes have been added to the July 2023 I/OCE with an effective date of July 1, 2023. In addition, the codes, along with their short descriptors and status indicators, are listed in the July 2023 OPSS Addendum B that is posted on the CMS website. For more information on OPSS status indicators, refer to OPSS Addendum D1 of the Calendar Year 2023 OPSS/ASC final rule for the latest definitions.

3. Advanced Diagnostic Laboratory Tests (ADLT) Under the Clinical Lab Fee Schedule (CLFS)

On March 23, 2023, CMS announced the approval of one laboratory test as an ADLT under paragraph (1) of the definition of an ADLT in § 414.502. We note that, under the OPSS, tests that receive ADLT status under section 1834A(d)(5)(A) of the Act are assigned to status indicator “A”. The laboratory test is listed in Table 3, attachment A.

Based on the ADLT designation, we revised the OPSS status indicator for HCPCS codes 0295U to "A" (Not paid under OPSS. Paid by MACs under a fee schedule or payment system other than OPSS) effective March 23, 2023. However, because the ADLT designation was made in March 2023, it was too late to include this change in the April 2023 I/OCE Release and the April 2023 OPSS update; therefore, we are including this change in the July 2023 I/OCE Release with an effective date of April 1, 2023.

For the latest list of ADLT approved tests under the CLFS, refer to this CMS website:

<https://www.cms.gov/files/document/advanced-diagnostic-laboratory-tests-under-medicare-clfs.pdf>. For more information on the OPSS status indicator “A”, refer to OPSS Addendum D1 of the CY 2023 OPSS/ASC final rule for the latest definitions.

4. New CPT Category III Codes Effective July 1, 2023

The AMA releases CPT Category III codes twice per year: in January, for implementation beginning the following July, and in July, for implementation beginning the following January.

For the July 2023 update, CMS is implementing 20 new CPT Category III codes that the AMA released in January 2023 for implementation on July 1, 2023. The status indicators and APC assignments for these codes are shown in Table 4, attachment A. CPT codes 0791T through 0810T have been added to the July 2023 I/OCE with an effective date of July 1, 2023. These codes, along with their short descriptors, Status Indicators (SI), and payment rates (where applicable) are also listed in the July 2023 OPSS Addendum B that is posted on the CMS website. For more information on the OPSS SI, refer to OPSS Addendum D1 of the CY 2023 OPSS/ASC final rule for the latest definitions.

5. Fecal Microbiota Procedure/Service

As discussed in the CY 2023 OPSS/ASC Final Rule (FR) (87 FR 71859 through 71860), there are three codes to describe the services associated with fecal microbiota. The long descriptors for the codes are listed below:

- G0455: Preparation with instillation of fecal microbiota by any method, including assessment of donor specimen
- 44705: Preparation of fecal microbiota for instillation, including assessment of donor specimen
- 0780T: Instillation of fecal microbiota suspension via rectal enema into lower gastrointestinal tract

We also stated in the same final rule that the only recognized Medicare code to describe the fecal microbiota service is HCPCS code G0455. This code describes the preparation and instillation of fecal microbiota by any method, including assessment of donor specimen, and does not involve the administration of any FDA approved drug. However, as listed in Table 11, attachment A, for the July 2023 Update, we are approving

the live fecal microbiota item (described by HCPCS code J1440), as an OPSS pass-through drug. With the drug pass-through approval, we are making the following changes to HCPCS codes 0780T and G0455 effective July 1, 2023:

- 0780T: Reassigning the OPSS status indicator from "B" to "S" and assigning the code to APC 5734 (Level 4 Minor Procedures). This administration code should be reported with HCPCS code J1440, which has been designated as a pass-through drug. The OPSS payment for CPT code 0780T reflects only the administration service and does not include the payment for the pass-through drug. The pass-through drug is paid separately under HCPCS code J1440.
- G0455: Reassigning the OPSS status indicator from "Q1" to "T" and reassigning the code from APC 5301 (Level 1 Upper GI Procedures) to APC 5311 (Level 1 Lower GI Procedures) to appropriately reflect current medical practice. This service does not involve the administration of any FDA approved drug.

We note that we are not making any change to the OPSS status indicator for CPT code 44705. This code will continue to be assigned to status indicator "B" to indicate that another more specific code should be reported under the OPSS. In this case, the appropriate code that should be reported for the fecal microbiota procedure/service is either HCPCS code G0455 or CPT code 44705.

The payment rates and status indicators for all three codes can be found in the July 2023 OPSS Addendum B that is posted on the CMS website. For more information on the OPSS SI, refer to OPSS Addendum D1 of the CY 2023 OPSS/ASC final rule for the latest definitions.

6. Status Indicator and APC Assignment Corrections for CPT codes 0697T and 0698T Effective April 1, 2023, in the July 2023 I/OCE Update

In the CY 2023 OPSS April Addendum B, we inadvertently assigned CPT code 0697T to APC 5523 (Level 3 Imaging without Contrast) with status indicator "S" and CPT code 0698T to status indicator "N." The quantitative magnetic resonance for analysis of tissue composition (e.g., fat, iron, water content), including multiparametric data acquisition, data preparation and transmission, interpretation and report, described by CPT codes 0697T and 0698T was approved for placement in a New Technology APC in March of 2023; but it was too late to include the changes in the April 2023 I/OCE Update. Therefore, we are including the changes in the July 2023 I/OCE Update by re-assigning CPT codes 0697T and 0698T to APC 1511 (New Technology - Level 11 (\$901 - \$1000)) with status indicator "S" (Procedure or Service, Not Discounted When Multiple) retroactive to April 1, 2023. Table 5, attachment A, lists the long descriptors, status indicator, and APC for these codes. The payment rates for these codes can be found in Addendum B of the July 2023 OPSS Update that is posted on the CMS website.

7. New HCPCS code Describing the Endoscopic Sleeve Gastroplasty Service

CMS is establishing a new HCPCS code, C9784, to describe the endoscopic sleeve gastroplasty procedure. Table 6, attachment A, lists the official long descriptor, status indicator, and APC assignment for HCPCS code C9784. For information on OPSS status indicators, please refer to OPSS Addendum D1 of the CY 2023 OPSS/ASC final rule for the latest definitions. This code, along with its short descriptor, status indicator, and payment rate, is also listed in the July 2023 Update of the OPSS Addendum B.

8. New HCPCS Code Describing the Endoscopic Outlet Reduction Service

CMS is establishing a new HCPCS code, C9785, to describe the endoscopic outlet reduction procedure. Table 7, attachment A, lists the official long descriptor, status indicator, and APC assignment for HCPCS code C9785. For information on OPSS status indicators, please refer to OPSS Addendum D1 of the CY 2023 OPSS/ASC final rule for the latest definitions. This code, along with its short descriptor, status indicator, and payment rate, is also listed in the July 2023 Update of the OPSS Addendum B.

9. New HCPCS Code Describing Diagnostic Aid Service for Routine Functional Cardiovascular Assessment Using Echocardiography

CMS is establishing a new HCPCS code, C9786, to describe the diagnostic aid service for routine functional cardiovascular assessment using echocardiography. Table 8, attachment A, lists the official long descriptor, status indicator, and APC assignment for HCPCS code C9786. For information on OPPS status indicators, please refer to OPPS Addendum D1 of the CY 2021 OPPS/ASC final rule for the latest definitions. This code, along with its short descriptor, status indicator, and payment rate, is also listed in the July 2023 Update of the OPPS Addendum B.

10. New HCPCS Code Describing the High-resolution Gastric Electrophysiology Mapping Procedure (GEMS)

CMS is establishing a new HCPCS code, C9787, to describe Gastric Electrophysiology Mapping with Simultaneous (GEMS) patient symptom profiling. Table 9, attachment A, lists the official long descriptor, status indicator, and APC assignment for HCPCS code C9787. For information on OPPS status indicators, please refer to OPPS Addendum D1 of the CY 2023 OPPS/ASC final rule for the latest definitions. This code, along with its short descriptor, status indicator, and payment rate, is also listed in the July 2023 Update of the OPPS Addendum B.

11. Expiring Pass-through Status for One (1) Device Category HCPCS Code Effective July 1, 2023

As specified in section 1833(t)(6)(B) of the Social Security Act, under the OPPS, categories of devices are eligible for transitional pass-through payments for at least two (2), but not more than three (3) years. We note that the device category HCPCS code C1748 will remain active, however, its payment will be included in the primary service.

As a reminder, for OPPS billing, because charges related to packaged services are used for outlier and future rate setting, hospitals are advised to report the device category HCPCS codes on the claim whenever they are provided in the hospital outpatient department setting. It is extremely important that hospitals report all HCPCS codes consistent with their descriptors, CPT and/or CMS instructions, and correct coding principles, as well as all charges for all services they furnish, whether payment for the services is made separately or is packaged.

For the entire list of current and historical device category codes created since August 1, 2000, which is the implementation date of the hospital OPPS, refer to Table 10, attachment A. We note this list can also be found in Chapter 4, Section 60.4.2 (Complete List of Device Pass-through Category Codes) of the Medicare Claims Processing Manual, Pub.100-04.

12. Drugs, Biologicals, and Radiopharmaceuticals

a. New CY 2023 HCPCS Codes and Dosage Descriptors for Certain Drugs, Biologicals, and Radiopharmaceuticals Receiving Pass-Through Status

Six (6) new HCPCS codes have been created for reporting drugs and biologicals in the hospital outpatient setting, where there have not previously been specific codes available starting on July 1, 2023. These drugs and biologicals will receive drug pass-through status starting July 1, 2023. These HCPCS codes are listed in Table 11, attachment A.

b. Existing HCPCS Codes for Certain Drugs, Biologicals, and Radiopharmaceuticals Starting Pass-Through Status as of July 1, 2023

There are two (2) existing HCPCS codes for certain drugs, biologicals, and radiopharmaceuticals in the outpatient setting that will have their pass-through status start on July 1, 2023. These codes are listed in Table 12, attachment A. Therefore, effective July 1, 2023, the status indicator for these codes is changing to

status indicator = “G”.

c. Existing HCPCS Codes for Certain Drugs, Biologicals, and Radiopharmaceuticals with Pass-Through Status Ending on June 30, 2023

There are thirteen (13) HCPCS codes for certain drugs, biologicals, and radiopharmaceuticals in the outpatient setting that will have their pass-through status end on June 30, 2023. These codes are listed in Table 13, attachment A. Therefore, effective July 1, 2023, the status indicator for these codes is changing from “G” to either “K” or “N.” For more information on OPSS status indicators, refer to OPSS Addendum D1 of the Calendar Year 2023 OPSS/ASC final rule for the latest definition. These codes, along with their short descriptors and status indicators are also listed in the July 2023 Update of the OPSS Addendum B.

d. Newly Established HCPCS Codes for Drugs, Biologicals, and Radiopharmaceuticals as of April 1, 2023, that Were Not Previously Reported

Three (3) new drug, biological, and radiopharmaceutical HCPCS codes were established on April 1, 2023, and not previously reported. These HCPCS codes are listed in Table 14, attachment A.

e. Newly Established HCPCS Codes for Drugs, Biologicals, and Radiopharmaceuticals as of July 1, 2023

Fifty-nine (59) new drug, biological, and radiopharmaceutical HCPCS codes will be established on July 1, 2023. These HCPCS codes are listed in Table 15, attachment A.

f. HCPCS Codes for Drug, Biological, and Radiopharmaceutical Deleted as of June 30, 2023

One (1) drug, biological, and radiopharmaceutical HCPCS code will be deleted on June 30, 2023. This HCPCS code is listed in Table 16, attachment A.

g. Drugs and Biologicals with Payments Based on Average Sales Price (ASP)

For CY 2023, payment for the majority of pass-through and nonpass-through drugs, biologicals, and therapeutic radiopharmaceuticals is generally made at a single rate of ASP plus 6 percent (or ASP plus 6 or 8 percent of the reference product for biosimilars), which provides payment for both the acquisition cost and pharmacy overhead costs of these items. Payments for drugs and biologicals based on ASPs will be updated on a quarterly basis as later quarter ASP submissions become available. Effective July 1, 2023, payment rates for many drugs and biologicals have changed from the values published in the CY 2023 OPSS/ASC final rule with comment period as a result of the new ASP calculations based on sales price submissions from the first quarter of CY 2023. In cases where adjustments to payment rates are necessary, changes to the payment rates will be incorporated in the July 2023 Fiscal Intermediary Standard System (FISS) release. CMS is not publishing the updated payment rates in this Change Request implementing the July 2023 update of the OPSS. However, the updated payment rates effective July 1, 2023, can be found in the July 2023 update of the OPSS Addendum A and Addendum B on the CMS website at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS>.

h. Drugs and Biologicals Based on ASP Methodology with Restated Payment Rates

Some drugs and biologicals paid based on ASP methodology will have payment rates that are corrected retroactively. These retroactive corrections typically occur on a quarterly basis. The list of drugs and biologicals with corrected payments rates will be accessible on the CMS website on the first date of the quarter at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/OPSS-Restated-Payment-Rates.html>

Providers may resubmit claims that were affected by adjustments to a previous quarter's payment files.

13. Skin Substitutes

The payment for skin substitute products that do not qualify for pass-through status will be packaged into the payment for the associated skin substitute application procedure. For payment packaging purposes, the skin substitute products are divided into two groups: 1) high cost skin substitute products and 2) low cost skin substitute products. New skin substitute HCPCS codes are assigned into the low-cost skin substitute group unless CMS has pricing data that demonstrates that the cost of the product is above either the mean unit cost of \$47 or the per day cost of \$837 for CY 2023.

a. Additional New Skin Substitute Products as of April 1, 2023, that Were Not Previously Reported

There were three (3) new skin substitute HCPCS codes that were active as of April 1, 2023. These codes are listed in Table 17, attachment A.

b. Additional New Skin Substitute Products as of July 1, 2023

There are twelve (12) new skin substitute HCPCS codes that will be active as of July 1, 2023. These codes are listed in Table 18, attachment A.

14. Coverage Determinations

As a reminder, the fact that a drug, device, procedure, or service is assigned a HCPCS code and a payment rate under the OPSS does not imply coverage by the Medicare program but indicates only how the product, procedure, or service may be paid if covered by the program. MACs determine whether a drug, device, procedure, or other service meets all program requirements for coverage. For example, MACs determine that it is reasonable and necessary to treat the beneficiary's condition and whether it is excluded from payment.

Table 2. – PLA Coding Changes Effective July 1, 2023

CPT Code	Long Descriptor	OPPS SI
0387U	Oncology (melanoma), autophagy and beclin 1 regulator 1 (AMBRA1) and loricrin (AMLo) by immunohistochemistry, formalin-fixed paraffin-embedded (FFPE) tissue, report for risk of progression	Q4
0388U	Oncology (non-small cell lung cancer), next-generation sequencing with identification of single nucleotide variants, copy number variants, insertions and deletions, and structural variants in 37 cancer-related genes, plasma, with report for alteration detection	A
0389U	Pediatric febrile illness (Kawasaki disease [KD]), interferon alpha-inducible protein 27 (IFI27) and mast cell-expressed membrane protein 1 (MCEMP1), RNA, using reverse transcription polymerase chain reaction (RT-qPCR), blood, reported as a risk score for KD	A
0390U	Obstetrics (preeclampsia), kinase insert domain receptor (KDR), Endoglin (ENG), and retinol-binding protein 4 (RBP4), by immunoassay, serum, algorithm reported as a risk score	Q4
0391U	Oncology (solid tumor), DNA and RNA by next-generation sequencing, utilizing formalin-fixed paraffin-embedded (FFPE) tissue, 437 genes, interpretive report for single nucleotide variants, splice site variants, insertions/deletions, copy number alterations, gene fusions, tumor mutational burden, and microsatellite instability, with algorithm quantifying immunotherapy response score	A

0392U	Drug metabolism (depression, anxiety, attention deficit hyperactivity disorder [ADHD]), gene-drug interactions, variant analysis of 16 genes, including deletion/duplication analysis of CYP2D6, reported as impact of gene-drug interaction for each drug	A
0393U	Neurology (eg, Parkinson disease, dementia with Lewy bodies), cerebrospinal fluid (CSF), detection of misfolded α -synuclein protein by seed amplification assay, qualitative	Q4
0394U	Perfluoroalkyl substances (PFAS) (eg, perfluorooctanoic acid, perfluorooctane sulfonic acid), 16 PFAS compounds by liquid chromatography with tandem mass spectrometry (LC-MS/MS), plasma or serum, quantitative	Q4
0395U	Oncology (lung), multi-omics (microbial DNA by shotgun nextgeneration sequencing and carcinoembryonic antigen and osteopontin by immunoassay), plasma, algorithm reported as malignancy risk for lung nodules in early-stage disease	A
0396U	Obstetrics (pre-implantation genetic testing), evaluation of 300000 DNA single-nucleotide polymorphisms (SNPs) by microarray, embryonic tissue, algorithm reported as a probability for single-gene germline conditions	E1
0397U	Oncology (non-small cell lung cancer), cell-free DNA from plasma, targeted sequence analysis of at least 109 genes, including sequence variants, substitutions, insertions, deletions, select rearrangements, and copy number variations	A
0398U	Gastroenterology (Barrett esophagus), P16, RUNX3, HPP1, and FBN1 DNA methylation analysis using PCR, formalin-fixed paraffin-embedded (FFPE) tissue, algorithm reported as risk score for progression to high-grade dysplasia or cancer	A
0399U	Neurology (cerebral folate deficiency), serum, detection of anti-human folate receptor IgGbinding antibody and blocking autoantibodies by enzyme-linked immunoassay (ELISA), qualitative, and blocking autoantibodies, using a functional blocking assay for IgG or IgM, quantitative, reported as positive or not detected	Q4

0400U	Obstetrics (expanded carrier screening), 145 genes by nextgeneration sequencing, fragment analysis and multiplex ligationdependent probe amplification, DNA, reported as carrier positive or negative	E1
0401U	Cardiology (coronary heart disease [CAD]), 9 genes (12 variants), targeted variant genotyping, blood, saliva, or buccal swab, algorithm reported as a genetic risk score for a coronary event	A

Table 3. – Advanced Diagnostic Laboratory Tests (ADLT) Under the Clinical Lab Fee Schedule (CLFS)

Lab Name	Test Name	CPT Code	CPT Long Descriptor
Prelude	DCISionRT®	0295U	Oncology (breast ductal carcinoma in situ), protein expression profiling by immunohistochemistry of 7 proteins (cox2, foxa1, her2, ki-67, p16, pr, siah2), with 4 clinicopathologic factors (size, age, margin status, palpability), utilizing formalin-fixed paraffin-embedded (ffpe) tissue, algorithm reported as a recurrence risk score

0792T	Application of silver diamine fluoride 38%, by a physician or other qualified health care professional	E1	N/A	N/A
0793T	Percutaneous transcatheter thermal ablation of nerves innervating the pulmonary arteries, including right heart catheterization, pulmonary artery angiography, and all imaging guidance	J1	5194	Level 4 Endovascular Procedures

0794T	Patient-specific, assistive, rules-based algorithm for ranking pharmaco-oncologic treatment options based on the patient's tumor-specific cancer marker information obtained from prior molecular pathology, immunohistochemical, or other pathology results which have been previously interpreted and reported separately	S	5733	Level 3 Minor Procedures
0795T	Transcatheter insertion of permanent dual-chamber leadless pacemaker, including imaging guidance (eg, fluoroscopy, venous ultrasound, right atrial angiography, right ventriculography, femoral venography) and device evaluation (eg, interrogation or programming), when performed; complete system (ie, right atrial and right ventricular pacemaker components)	E1	N/A	N/A
0796T	Transcatheter insertion of permanent dual-chamber leadless pacemaker, including imaging guidance (eg, fluoroscopy, venous ultrasound, right atrial angiography, right ventriculography, femoral venography) and device evaluation (eg, interrogation or programming), when performed; right atrial pacemaker component (when an existing right ventricular single leadless pacemaker exists to create a dual-chamber leadless pacemaker system)	E1	N/A	N/A
0797T	Transcatheter insertion of permanent dual-chamber leadless pacemaker, including imaging guidance (eg, fluoroscopy, venous ultrasound, right atrial angiography, right ventriculography, femoral venography) and device evaluation (eg, interrogation or programming), when performed; right ventricular pacemaker component (when part of a dual-chamber leadless pacemaker system)	J1	5194	Level 4 Endovascular Procedures
0798T	Transcatheter removal of permanent dual-chamber leadless pacemaker, including imaging guidance (eg, fluoroscopy, venous ultrasound, right atrial angiography, right ventriculography, femoral venography), when performed; complete system (ie, right atrial and right ventricular pacemaker components)	E1	N/A	N/A
0799T	Transcatheter removal of permanent dual-chamber leadless pacemaker, including imaging guidance (eg, fluoroscopy, venous ultrasound, right atrial angiography, right ventriculography, femoral venography), when performed; right atrial pacemaker component	E1	N/A	N/A

0800T	Transcatheter removal of permanent dual-chamber leadless pacemaker, including imaging guidance (eg, fluoroscopy, venous ultrasound, right atrial angiography, right ventriculography, femoral venography), when performed; right ventricular pacemaker component (when part of a dual-chamber leadless pacemaker system)	J1	5183	Level 3 Vascular Procedures
0801T	Transcatheter removal and replacement of permanent dual-chamber leadless pacemaker, including imaging guidance (eg, fluoroscopy, venous ultrasound, right atrial angiography, right ventriculography, femoral venography) and device evaluation (eg, interrogation or programming), when performed; dual-chamber system (ie, right atrial and right ventricular pacemaker components)	E1	N/A	N/A
0802T	Transcatheter removal and replacement of permanent dual-chamber leadless pacemaker, including imaging guidance (eg, fluoroscopy, venous ultrasound, right atrial angiography, right ventriculography, femoral venography) and device evaluation (eg, interrogation or programming), when performed; right atrial pacemaker component	E1	N/A	N/A
0803T	Transcatheter removal and replacement of permanent dual-chamber leadless pacemaker, including imaging guidance (eg, fluoroscopy, venous ultrasound, right atrial angiography, right ventriculography, femoral venography) and device evaluation (eg, interrogation or programming), when performed; right ventricular pacemaker component (when part of a dual-chamber leadless pacemaker system)	J1	5194	Level 4 Endovascular Procedures
0804T	Programming device evaluation (in person) with iterative adjustment of implantable device to test the function of device and to select optimal permanent programmed values, with analysis, review, and report, by a physician or other qualified health care professional, leadless pacemaker system in dual cardiac chambers	Q1	5741	Level 1 Electronic Analysis of Devices
0805T	Transcatheter superior and inferior vena cava prosthetic valve implantation (ie, caval valve implantation [CAVI]); percutaneous femoral vein approach	C	N/A	N/A
0806T	Transcatheter superior and inferior vena cava prosthetic valve implantation (ie, caval valve implantation [CAVI]); open femoral vein approach	C	N/A	N/A

0807T	Pulmonary tissue ventilation analysis using software-based processing of data from separately captured cinefluorograph images; in combination with previously acquired computed tomography (CT) images, including data preparation and transmission, quantification of pulmonary tissue ventilation, data review, interpretation and report	S	5721	Level 1 Diagnostic Tests and Related Services
0808T	Pulmonary tissue ventilation analysis using software-based processing of data from separately captured cinefluorograph images; in combination with computed tomography (CT) images taken for the purpose of pulmonary tissue ventilation analysis, including data preparation and transmission, quantification of pulmonary tissue ventilation, data review, interpretation and report	S	5722	Level 2 Diagnostic Tests and Related Services
0809T	Arthrodesis, sacroiliac joint, percutaneous or minimally invasive (indirect visualization), with image guidance, placement of transfixing device(s) and intraarticular implant(s), including allograft or synthetic device(s)	J1	5116	Level 6 Musculoskeletal Procedures
0810T	Subretinal injection of a pharmacologic agent, including vitrectomy and 1 or more retinotomies	E1	N/A	N/A

BOLD codes are still actively receiving pass-through payment.

Italicized codes have received preliminary approval for pass-through payment.

* Refer to the definition below for further information on this device category code.

** Effective 1/1/06 C1767 descriptor was changed for succeeding claims. See CR 4250, Jan. 3, 2006 for details.

*** Although the pass-through payment status for device category codes has expired, these codes are still active and hospitals are still required to report the device category C-codes (except the brachytherapy source codes, which are separately paid under the OPPS) on claims when such devices are used in conjunction with procedures billed and paid under the OPPS.

^Sec. 4141. Extension of Pass-Through Status Under the Medicare Program for Certain Devices Impacted by COVID-19 of the Consolidated Appropriations Act, 2023 has extended pass-through status for a 1-year period beginning on January 1, 2023
