I. GENERAL INFORMATION

A. Background: The purpose of this Change Request (CR) is to provide a maintenance update of ICD10 conversions and other coding updates specific to NCDs. These NCD coding changes are the result of newly available codes, coding revisions to NCDs released separately, or coding feedback received. Previous NCD coding changes appear in ICD-10 quarterly updates that can be found at:

<https://www.cms.gov/Medicare/Coverage/CoverageGenInfo/ICD10.html>, along with other CRs implementing new policy NCDs. Edits to ICD-10 and other coding updates specific to NCDs will be included in subsequent quarterly releases and individual CRs as appropriate. No policy-related changes are included with the ICD-10 quarterly updates. Any policy-related changes to NCDs continue to be implemented via the current, longstanding NCD process.

B. Policy: Edits to ICD-10, and other coding updates specific to NCDs, will be included in subsequent quarterly releases as needed. No policy-related changes are included with these updates. Any policy-related changes to NCDs continue to be implemented via the current, long-standing NCD process. Please follow the link below for the NCD spreadsheets included with this CR:

<https://www.cms.gov/Medicare/Coverage/DeterminationProcess/downloads/CR13390.zip>

Clarification: Coding (as well as payment) is a separate and distinct area of the Medicare Program from coverage policy/criteria. Revisions to codes within an NCD are carefully and thoroughly reviewed and vetted by the Centers for Medicare & Medicaid Services and are not intended to change the original intent of the NCD. The exception to this is when coding revisions are released as official implementation of new or reconsidered NCD policy following a formal national coverage analysis.

Note: The translations from ICD-9 to ICD-10 are not consistent one-to-one matches, nor are all ICD-10 codes appearing in a complete General Equivalence Mappings (GEMs)* mapping guide or other mapping guides appropriate when reviewed against individual NCD policies. *GEMs mapping is no longer provided by CMS as of October 1, 2019. In addition, for those policies that expressly allow Medicare Administrative Contractor (MAC) discretion, there may be changes to those NCDs based on current review of those NCDs against ICD-10 coding. For these reasons, there may be certain ICD-9 codes that were once considered appropriate prior to ICD-10 implementation that are no longer considered acceptable.

Note/Clarification: A/B MACs Part A and A/B MACs Part B shall complete all tasks that involve updates to local system edits/tables associated with the attached NCDs in this CR.

Note/Clarification: A/B MACs shall use default Council for Affordable Quality Healthcare (CAQH) Committee on Operating Rules for Information Exchange (CORE) messages where appropriate: Remittance Advice Remark Codes (RARC) N386 with Claim Adjustment Reason Code (CARC) 50, 96, and/or 119. See latest CAQH CORE update. When denying claims associated with the attached NCDs, except where otherwise indicated, A/B MACs shall use: Group Code PR (Patient Responsibility) assigning financial responsibility to the beneficiary (if a claim is received with occurrence code 32, or with occurrence code 32 and a GA modifier, indicating a signed Advance Beneficiary Notice (ABN) is on file).
