2010 - 2011 Seasonal Influenza (Flu) Resources for Health Care Professionals

Note: This article was updated on August 27, 2012, to reflect current Web addresses. Previously, this article was revised on November 29, 2010, to include a reference to MLN Matters® article MM7234 (New HCPCS Q-codes for 2010-2011 Seasonal Influenza Vaccines). All other information is the same.

Provider Types Affected

This article is intended for all Medicare fee-for-service (FFS) physicians, non-physician practitioners, providers, suppliers, and other health care professionals who order, refer, or provide seasonal flu vaccines and vaccine administration provided to Medicare beneficiaries.

Provider Action Needed

- Keep this Special Edition *MLN Matters* article and refer to it throughout the 2010 - 2011 flu season.
- Take advantage of each office visit as an opportunity to encourage your patients to protect themselves from the seasonal flu and serious complications by getting a seasonal flu shot.
- Continue to provide the seasonal flu shot as long as you have vaccine available, even after the new year.
- Don't forget to immunize yourself and your staff.

Introduction

Annual outbreaks of seasonal flu typically occur from the late fall through early spring. Typically, 5 to 20 percent of Americans catch the seasonal flu, with about 36,000 people dying

Disclaimer

This article was prepared as a service to the public and is not intended to grant rights or impose obligations. This article may contain references or links to statutes, regulations, or other policy materials. The information provided is only intended to be a general summary. It is not intended to take the place of either the written law or regulations. We encourage readers to review the specific statutes, regulations and other interpretive materials for a full and accurate statement of their contents.

from flu-related causes.¹ Complications of flu can include pneumonia, ear infections, sinus infections, dehydration, and even death.

The Centers for Medicare & Medicaid Services (CMS) reminds health care professionals that Medicare Part B reimburses health care providers for seasonal flu vaccines and their administration. (*Medicare provides coverage of the seasonal flu vaccine without any out-of-pocket costs to the Medicare patient. No deductible or copayment/coinsurance applies.*) All adults 65 and older should get seasonal flu vaccine. People with Medicare who are under 65 but have chronic illness, including heart disease, lung disease, diabetes or end-stage renal disease should get a seasonal flu shot.

Get the Flu Vaccine, Not the Flu!

Unlike last flu season patients needed to get both a seasonal vaccine and a separate vaccine for the H1N1 virus, this season, a single seasonal flu vaccine will protect your patients, your staff, and yourself.

The seasonal flu vaccine continues to be the most effective method for preventing flu virus infection and its potentially severe complications. You can help your Medicare patients reduce their risk for contracting seasonal flu and serious complications by using every office visit as an opportunity to recommend they take advantage of the annual seasonal flu shot benefit covered by Medicare. And don't forget, health care providers and their staff can spread the highly contagious flu virus to their patients. Don't forget to immunize yourself and your staff.

The following educational products have been developed by CMS to be used by Medicare FFS health care professionals and are not intended for distribution to Medicare beneficiaries.

Educational Products for Health Care Professionals

CMS has developed a variety of educational resources to help Medicare FFS health care professionals understanding coverage, coding, billing, and reimbursement guidelines for seasonal flu vaccines and their administration.
