# ICD-10 Transition

The ICD-9 code sets used to report medical diagnoses and inpatient procedures will be replaced by the ICD-10 codes for services provided on or after October 1, 2014.

- The ICD-10 compliance deadline is October 1, 2014.
- ICD-10 compliance means that a HIPAA-covered entity uses ICD-10 codes for health care services provided on or after October 1, 2014. ICD-9 diagnosis and inpatient procedure codes cannot be used for services provided on or after this date.

# About ICD-10

ICD-10-CM/PCS (International Classification of Diseases, 10th Edition, Clinical Modification /Procedure Coding System) consists of two parts:

- ICD-10-CM for diagnosis coding
- ICD-10-PCS for inpatient procedure coding
- ICD-10-CM is for use in all U.S. health care settings. Diagnosis coding under ICD-10-CM uses 3 to 7 digits instead of the 3 to 5 digits used with ICD-9-CM, but the format of the code sets is similar.
- ICD-10-PCS is for use in U.S. inpatient hospital settings only.
