## Audience Q&A

## Closing

---

*On-site ASL interpretation will be provided.*

*Following the event, there will be light refreshments (provided by Howard County), exhibitor booths, and self-guided tours of the Belmont Manor property and grounds. The Belmont Manor is not typically open to the public, except for special events, weddings, etc.*

*When the National Commission held their pivotal retreat (February 13-16, 1976) at Belmont to develop the basic ethical principles later enshrined in the Belmont Report, they met in the large blue room on the first floor of the estate—this room is largely unchanged since 1976.*

*Archival materials on display in the blue room are courtesy of the HHS Office for Human Research Protections (OHRP), the Georgetown University Bioethics Research Library, and the Smithsonian Institution, which managed the property (then called the Belmont Conference Center) in the 1970s.*

*This event will be recorded. A video link will be posted to the OHRP website approximately one month post-event.*

*Participating in this event qualifies for 2.0 Certified IRB Professional (CIP) continuing education credits.*

*Share your photos, reactions, and reels at #BelmontatBelmont.*
