One Health

United States One Health Zoonotic Disease Prioritization Workshop – December 2017

- 3 federal partners used a One Health approach to:
 - Prioritize zoonotic diseases of greatest national concern that should be jointly addressed by human, animal, and environmental health sectors
 - Develop plans for implementing and strengthening multisectoral, One Health approaches to address these diseases in the United States
- Workshop Summary with additional details at:
 - www.cdc.gov/onehealth/domestic-activities/us-ohzdp.html

Top 8 Zoonotic Diseases of National Concern in the U.S. *for One Health Collaboration*

1 Zoonotic influenza

2 Salmonellosis

3 West Nile virus

4 Plague

5 Emerging coronaviruses
(SARS, MERS)

6 Rabies

7 Brucellosis

8 Lyme disease

If You Have Pets

A small number of pets have tested positive for the virus that causes COVID-19. Currently, the risk of pets spreading it to people is low. [Learn more](#)
