FDA

Name:

Enterprise Business Objects

PIA Unique Identifier:

P-8712410-382822

The subject of this PIA is which of the following?

Major Application

Identify the Enterprise Performance Lifecycle Phase of the system.

Test

null

Does the system include a Website or online application available to and for the use of the general public?

No

Identify the operator.

null

Is this a new or existing system?

Existing

Does the system have Security Authorization (SA)?

Yes

Indicate the following reason(s) for updating this PIA.

PIA Validation

Describe in further detail any changes to the system that have occurred since the last PIA.

This is the initial PIA for the system.

Describe the purpose of the system.

The Enterprise Business Objects (EBO) system provides a technical platform used internally by Food and Drug Administration (FDA) personnel for reporting and management purposes. A limited number of Center for Veterinary Medicine (CVM) personnel use EBO via the secure FDA Extranet .

Describe the type of information the system will collect, maintain (store), or share.

EBO does not collect or maintain any data. Rather, it provides management tools for FDA offices. Centers use EBO for their own reporting purposes and for analysis and decision making related to their data.

Provide an overview of the system and describe the information it will collect, maintain (store), or share,

The EBO system environment maintains an internal Business Intelligence platform for users across all FDA Centers except the Office of Regulatory Affairs (ORA). The system environment provides users access to Business Objects' Web Intelligence (WEBI) reports, and other management tools including performance management products such as Dashboards and Scorecards. EBO also supports creation of analytic templates for graphical representation of reports for various Centers. In addition, there is an auditing database to track the usage history of Business Objects. EBO is available on the FDA Intranet and to limited Center for Veterinary Medicine (CVM) users on the secure FDA Extranet. EBO is not publicly accessible.

Does the system collect, maintain, use or share PII?

No
