**Subject:** RE: UPDATED: Discussion - USG || Gilead

Attendees for the call at 2pm are as follows:

**Gilead Sciences**

- Daniel O'Day, Chief Executive Officer
- Merdad Parsey, Chief Medical Officer
- Kristie Banks, VP COVID-19 Business Unit
- Michael Boyd, SVP Government Affairs & Policy

- • Tomas Cihlar, SVP Virology Research
- • Chuck Clapton, VP Government Affairs
- • Kathleen Love-Weitz, VP Program Strategy Lead, Veklury
- • Brian Nilstoft, Exec. Director Pharmaceutical Manufacturing
- • Anu Osinusi, VP Virology Clinical Development
- • Rekha Ramesh, VP Policy

## USG

- • David Kessler
- • Jason Roos, incoming Chief Operating Officer for H-CORE (formerly known as CAG and OWS)
- • Robert Johnson, outgoing Chief Operating Officer for the Countermeasure Acceleration Group and Deputy Director of BARDA
- • Cliff Lane, Deputy Director for Clinical Research and Special Projects, NIAID
- • Carl Dieffenbach, Director of the Division of AIDS, NIAID and senior advisor for COVID small molecule therapeutics
- • Jay Epstein, Senior advisor for COVID monoclonal antibody therapeutics
- • Meredith Chuk, outgoing COVID response lead for clinical outreach, reimbursement and communications
- • Derek Eisnor, incoming COVID response lead for clinical outreach, reimbursement and communications
- • Sheila Miknyoczki, project officer, BARDA – moving forward, Sheila will be your main point of contact
- • Kim Armstrong, Chief of the Immunology and Emerging Infectious Diseases Therapeutics Branch, BARDA

-----Original Appointment-----

**Subject:** Unlock Zero Trust With Content-based Risk Policies [webinar]

**Date:** 2023/02/14 11:07:11

**Priority:** Normal

**Type:** Note

# Kiteworks

WEBINAR

## Unlock the Power of REAL Zero Trust Through Content-based Risk Policies

February 22 @ 9 AM PT | 12 PM ET

**REGISTER  
NOW**

**Panelist**

**Daniel Turner**

*VP of GTCI, Forcepoint*

**Panelist**

**Amit Toren**

*SVP of Corp. & Business Development, Kiteworks*

## Moderator

**Patrick Spencer, Ph.D.**

*VP of Research & Corp. Mktg., Kiteworks*

Kiteworks and Forcepoint have joined forces to apply zero-trust controls on the content itself for better threat and private information protection in one solution.

Attend this moderated webinar to get details on the 4 key components of the integrated solution ...

- • Assumes all entities are untrusted by default, including the content itself
- • Enforces least-privilege content access
- • Ensures comprehensive always-on monitoring
- • Delivers real-time data loss prevention with integrated policy management tracking and controls

**REGISTER  
NOW**

**If you would rather register for our other webinar session on  
February 23rd at 11 AM CET, click here.**

Kiteworks, 1510 Fashion Island Blvd, Suite 100, San Mateo, CA 94404, United States, 650-485-4300

## To Combat Opioid Crisis, Support Recovery.

On Friday, President Biden announced "his administration would distribute \$1.5 billion to states and territories, including Alaska. HHS will distribute "the funding through the Substance Abuse and Mental Health Services Administration's (SAMHSA) National Recovery Month." Assistant Secretary of Health and Human Services for Mental Health and Substance Use Disorders said the opioid and overdose crisis indeed depends on collaboration between federal entities, state, local and tribal communities, and individuals in crisis and individuals in recovery."

These "grants will expand access to treatment and recovery support services, allow states to invest in better overdose reversal products, which are used to help reverse an opioid overdose."

The Administration also announced an additional \$12 million "for law enforcement agencies working 'on the front lines' against global drug trafficking operations." This money, "which adds to \$275 million of funding announced in April, will help combat the crime associated with drugs, the White House said."

Secretary Xavier Becerra as saying, "Providing access to evidence-based, person-centered care is a central part of HHS' mission. Investing in evidence-based support and services for individuals, families, and communities on the road to recovery. Through

[Medical Marketing & Media](#) (9/23, Bushak) also covered the story.

[The Sun Sentinel](#) (9/23, Man, 525K) reported the Administration "said Friday that Florida is getting funding to combat the crisis. The Department of Children and Families is getting a grant of \$101.3 million. A separate grant, for \$500,000, is going to

### **on Ban From 19th Century.**

(5.1M) reported on Friday, Judge Kellie Johnson of Pima County Superior Court “ruled that a near-total abortion ban was unconstitutional, throwing into question one day before the start of a 15-week ban that passed the Legislature this year.” This “stricter ban was enacted shortly after the Supreme Court, in *Roe v. Wade*, determined that there was a constitutional right to abortion.” The judge rejected Planned Parenthood’s request for the court to ‘harmonize the laws’ in Arizona was flawed.”

(10.52M) reported these “conflicting restrictions on abortion had created confusion, with Arizona Attorney General Mark Brannan (R) previously insisting that the 15-week ban was the law of the land.” The stricter “law threatens abortion providers who have no exception for victims of rape or incest.” Certain “states did not update the laws on their books after *Roe* was decided, from Michigan to West Virginia as to whether those laws still apply.”

The ruling means people seeking abortions will have to go to another state to obtain one. An appeal of the ruling is likely to be heard on Friday, the White House “condemned” the ruling which “allowed the state’s abortion ban to be enforced, saying

that this ruling, “if allowed to stand, will result in ‘catastrophic, dangerous, and unacceptable’ consequences for women and force survivors of rape and incest to bear the children of their assaulters, while leaving health care providers to face

criticism.” Gans, 5.69M) reported, “Sen. Kyrsten Sinema (D-Ariz.) criticized a near-total abortion ban that a judge upheld in her

opinion.” (Cooper) reported Democrats in Arizona “vowed Saturday to fight for women’s rights after a court reinstated a law forcing providers to look to capitalize on an issue they hope will have a major impact on the midterm elections.” GOP “candidates want to target doctors who assist with an abortion unless it’s necessary to save the mother’s life.”

The story were the [Wall Street Journal](#) (9/23, Kusisto, Calfas, Subscription Publication, 8.41M), [CNN](#) (9/23, Reston, 1.1M).

### **Agency Rules For Airlines, Travel Sites During Upcoming Monday Meeting.**

President Joe Biden on Monday is expected to announce a new proposed rule that would require airlines and travel sites to be more transparent about fees for baggage, flight changes or cancellations, a White House official tells CNN.” And “at a meeting with top Cabinet members, Biden is expected to take similar action to increase transparency and limit add-on fees for American consumers.” The Monday “meeting will be held in the White House Council,” and “participants are expected to include Buttigieg, Secretaries Janet Yellen of Treasury, Lloyd Austin of Defense, Director of the Office of Management and Budget Shalanda Young and Chair of the Council of Economic Advisors

### **White House Conference On Hunger.**

President Joe Biden will headline the White House conference on hunger, nutrition and health on Sept. 28, unveiling his plan to “end hunger in America.” This event, “planned for the Ronald Reagan Building in Washington, will feature panels and working group sessions with lawmakers, cabinet officials and everyday Americans.” HHS Secretary Xavier Becerra is among the featured speakers.

---

---

### **Marked Decrease In New Monkeypox Cases.**

0K) reported HHS Secretary Xavier Becerra, along with "two leaders of the White House monkeypox response team" on a visit to D.C.'s recently opened Monkeypox Vaccine Clinic on Martin Luther King Jr. Ave., S.E." During "a briefing for reporters" and a tour of the clinic, the D.C. and federal officials pointed to a sharp decline in new monkeypox cases in D.C. as a sign of "boosting the number of people at risk for monkeypox who have been vaccinated." Becerra lauded DC's medical "and public health" efforts, including gay and bisexual men, to encourage them to get vaccinated and promptly treating those who tested positive for the virus.

3.37M) reported assistance "for a mental health crisis is now just three digits away: 9-8-8. Early data show that people are using 988 as an easy-to-remember alternative to 911." Rather than "being directed to police, callers (or texters) are connected to trained crisis counselors" who can help with suicidal thoughts to drug addiction. They can even advise people who aren't in crisis but hope to help a struggling friend or family member. HHS Secretary Xavier Becerra.

---

### **Decline While Some States See Increase In Cases.**

0.6M) reports, "Nearly four months after the first report of monkeypox in the United States, the virus is showing promise in adults, pregnant women and young children." However, "case numbers are accelerating in a few states and jurisdictions, which make up nearly two-thirds of the infected, but only about one-fourth of those vaccinated so far." Biden Administration officials say the virus is in your armamentarium, that can be somewhat precarious. ... But you've got to go with what you have at the same time.

---

### **Doses Of Monkeypox Vaccine Available At Pride Event.**

694K) reported, "The St. Louis area is keeping the number of monkeypox cases at bay thanks to targeted education and vaccination effort yet against monkeypox, about 1,000 doses" were made "available to those who are eligible at the Tower Grove Park." The event was held at the Tower Grove Park.

---

### **Spread During Fall, Winter Seasons.**

5:11 p.m. CDT, story 8, Duncan, 1.58M) reported, "The flu season is expected to flare-up soon after virtually disappearing last year due to the omicron surge in January." There are "concerns about a possible twindemic, meaning flu and COVID outbreaks." COVID-19 this fall. As we move indoors, both are much easier to spread. The last couple years we have not been exposed to the flu. Getting very sick from the flu. From Australia, where their winter and summer is different than ours, we're starting to see a rise in flu cases.

---

### **Comprehensive COVID-19 Studies, Transparency To Public.**

Commentator Hu Xijin "said on Sunday that as China ponders its COVID-19 policies, epidemic experts need to speak out and make studies transparent to the public." Hu's statements "earned him 34,000 likes on the popular Twitter-like microblog Weibo. The internet quick to censor voices deemed a risk to social stability." China "has significantly tightened its COVID-19 policies since the death toll since the pandemic began remains low – around 5,226 as of Saturday – and as many other countries let go of their strict measures."

### **Not End All COVID-19 Travel Restrictions Yet.**

"Hong Kong can't remove all travel restrictions at this stage of the Covid pandemic, though there is room to quickly ease them. The business community wants officials to lift the three-day movement restrictions that remain for incoming travelers from abroad, but that would be too risky. The statistics on imported infections show moving too quickly could pressure the health care system."

### **Pediatric Use Of Updated Omicron-Targeted COVID-19 Vaccine.**

"Moderna said on Friday it has requested U.S. authorization for use of its Omicron-targeting COVID vaccine in adolescents. The study in children between the ages of six months and under six years is expected to be completed later this year." "Moderna filed two separate FDA authorization requests, one for adolescents ages 12 to 17 and another for kids under 12. The youngest children, 6 months through 5-years-old, later this year." The CDC, "in a document published Tuesday, said it is seeking authorization by the FDA. The CDC's vaccine advisory committee has meetings scheduled for October 19 and 20." [Axios](#) (9/23, Habeshian, 1.26M) also reported the story.

### **Booster Shots Seeing Slower Uptake Than First 2021 Boosters.**

"Updated COVID-19 boosters have gone into 4.4 million arms in the United States since a new revaccination campaign targeting the Omicron variant of the coronavirus than the rollout of the first boosters last year." The US "government is mostly from Pfizer/BioNTech." The "production of the similarly retooled Moderna shots has been slower due to what the company calls a contract manufacturing site run by Catalent Inc," but on Tuesday the FDA "said it had cleared some vaccine from that plant." [ABC News](#) (9/23, Musto, 3.06M) reported, "Nationally, a total of 109 million Americans have received their first booster dose – representing less than 33% – of the total U.S. population over the age of 5 has received their first booster." But "following the federal green light, there has been a sharp increase in the number of Americans getting vaccinated." On Thursday, CDC Director Dr. Rochelle Walensky "became the latest to get the shot." [ABC News](#), "I'm here getting my updated fall vaccine because I think it's critically important to do. We are really encouraged by the vaccine."

and [Fox Business](#) (9/24, Musto, 3.06M) also reported the story.

### **COVID-19 Pandemic Supply Chain Lessons.**

[Subscription Publication](#), 8.41M) reported Pfizer Global Supply Chain SVP Jim Cafone spoke at the yearly Council of Supply Management Executives pandemic like the gaps in current supply chains. Pfizer will apply the lessons to how supply chains for life-saving medicines.

---

---

### **Donations Due To Drop In Demand From Some Lower Income Countries.**

The U.S. and Pfizer will be lowering their number of global vaccine donations in response to a 'reduced demand,' though the U.S. has committed to providing." According to a Pfizer statement, "more than 400 million doses have been produced to deliver 600 million vaccine doses for this program."

### **in The United States.**

Hoewaldt, 1.91M) reported "the prevalence of omicron subvariant BA.5 is declining slightly in the U.S." according to data from this week "it caused about 83% of infections," which is down from an August peak of 87% of new cases. Amid the data from this new bivalent vaccine have demonstrated that it will protect you against...the strains that we have circled

### **Up In COVID-19 Vaccinations.**

Leaders gathered "to discuss equitable access to COVID vaccines, tests and treatments" across the globe on Thursday. When made to fight COVID-19," United States Ambassador to the United Nations Linda Thomas-Greenfield stated "the less than 20% "of people living in low-income countries are fully vaccinated," including just "35% of health care workers" initiatives" to combat that disparity including "a \$50 million commitment from the U.S to improve access to medical care

### **to Continue Fight Against COVID-19 Globally.**

World Health Organization Senior Adviser Bruce Aylward "warned that richer nations must not step back from tackling COVID-19" had a point domestically as the United States has good access to all COVID tools" and "it has also not cut its global aid" world leaders "if you go to sleep right now and this wave hits us in three months."

### **COVID-19 Pandemic Entry Restrictions.**

Hooley, 20.6M) reported "Hong Kong said on Friday that it would abandon mandatory hotel quarantine for people coming from their COVID-19 restrictions for travelers. Across Asia, COVID-19 "hospitalizations and deaths have fallen" and "authorities have increased." However, recovery of activities like tourism in Japan and Taiwan may occur more quickly than in Hong Kong, Beijing, which has ultimate say over what the city does, and the international community." "Mainland China now becomes a last stalwart of strict COVID-19 pandemic restrictions, clinging to its zero COVID policy" "more relaxed than ever" and could affect other Asian nations' economies because the absence of Chinese tourists has "left a void" "having saved millions of lives" but "it's unlikely that the country can keep the virus out indefinitely."

### **Thailand Emergency Declaration.**

Thailand reported "Thailand's government will lift an emergency decree it imposed in March 2020 to battle the coronavirus, officially allowing proof of being vaccinated" and people who test positive for COVID-19 in Thailand "will no longer need to quarantine"

### **Quarantine Policy For Travelers.**

Chief Executive John Lee said Friday "the city would no longer require incoming travelers to quarantine in designated

---

ive PCR test within 48 hours before boarding a plane to Hong Kong." However, visitors "will need to present a negative PCR test before the flight" and "undergo three days of home monitoring." (The New York Times, Roantree) reported visitors and citizens returning from abroad "will be allowed to go to work or school but will not be required to quarantine." Hong Kong also "still bans public groups of more than four people and masks are mandatory for all." Travelers must submit the results of at least one rapid antigen test each day for a week along with take a PCR test on the first, third, fifth, and sixth days after arrival.

### **Call For Even More Relaxation Of COVID-19 Pandemic Protocols.**

Local leaders in Hong Kong are stating the end of the city's hotel quarantine policy for travelers doesn't go far enough, and some in Hong Kong "said the government needs to provide a clear roadmap to reopen fully" as "almost three years of pandemic have left the Hong Kong business community's concerns is a recent report that "showed Singapore had overtaken the city to become the world's most open economy."

### **Union Nullifying COVID-19 Vaccine Mandate For Police Union Members.**

(The New York Times Subscription Publication, 8.41M) reported a state Supreme Court judge on Friday ruled New York City cannot discipline police officers for not getting the vaccine. The city will appeal the ruling.

The city will appeal the ruling of New York Supreme Court Judge Lyle Frank which determined the city's COVID-19 vaccine mandate was "unlawful" over non-compliance with the rule. While Frank's order called the city's right to issue such mandates undisputed, it said the city was "creating a new condition of employment" instead of addressing the matter through collective bargaining with the union.

The report supported Frank's ruling would reinstate every member of the union who has fired or put on leave for non-compliance with the vaccine mandate. The heels of New York City Mayor Eric Adams rescinding the city's vaccine mandate for employees of private companies, the coverage are the [New York Post](#) (9/23, McCarthy, 7.45M) and the [New York Daily News](#) (9/23, Seiwel, Sommerfeldt, 2.5M).

### **Report During COVID-19 Pandemic.**

(The New York Times, 3.37M) reports "one of California's smallest public schools," Kneeland Elementary, "was on the verge of closing last year" but kept its kindergarten through the eighth grade. However, "since 2020, enrollment has more than doubled, to 33 students" and "other schools, including rural ones, did not grow during the pandemic." However, Kneeland was able to attract students because of its small size and close-knit community.

### **Editorial COVID-19 Pandemic Warrants Correction.**

(The New York Times, 3.37M), Doyle McManus writes despite COVID-19 losing "its status as a disease that was utterly beyond control" and "this winter could turn [President] Biden's optimistic claim" that the pandemic is over to ashes. McManus cited Dr. Anthony Fauci's statement "we have to live with the virus" and calls Biden's statement "bad on two levels, public health and politics." McManus argues "the pandemic is not over" and to emphasize "without more vaccinations and more research, the disease will still cause tens of thousands of needless deaths."

### **Report on Activities In Resuming Activities Through COVID-19 Pandemic.**

(The New York Times, 10.52M) reported "many Americans remain conflicted and confounded about what activities are safe" despite the fact that many are returning to work and school.

---

are currently practicing “a crazy quilt of contradictory decisions about how to spend their discretionary time and money” because of a “mix of competing motivations behind the decisions like employer demands, age and geography, which is “resulting in a patchwork of policies.”

### **Universal Testing During COVID-19 Pandemic.**

UC-Davis reports the city of Davis in California figured out a way in the early days of the COVID-19 pandemic to “test thousands of people” in the surrounding area experienced a different kind of pandemic than virtually anywhere else in the country.” The role of the university’s natural school already had “expertise in pandemic testing” and the university agreed to spend almost a million dollars to “test for saliva for Covid each week.” That and a donation of \$40 million enabled UC-Davis to test “its students and staff even before the state

### **Americans Wear Mask Indoors.**

Dr. Rochelle Walensky (2.44M) reported the Centers for Disease Control and Prevention recommends “more than 32% of Americans wear masks indoors as a measure based on their risk for severe COVID-19.” Although COVID-19 rates have been declining, deaths “remain high.” Dr. Walensky said that the number of deaths is “not an acceptable number as far as I’m concerned, we’ve gotta get it down much, much more.”

### **Schools Lost Students During COVID-19 Pandemic.**

Dr. Walensky reported school tracking website Burbio found “80% of the urban public school districts receiving the largest share of federal aid lost students this school year. Additionally, “40 of the 50 districts with more than 10,000 students...had more Title 1 students who qualify for free or reduced lunch in Detroit Public Schools where “enrollment fell 3.7% and dropped again by half a percentage point last year.”

### **Healthcare Settings.**

Dr. Walensky (2.44M) reported the Centers for Disease Control and Prevention “on Friday issued new guidelines for the use of personal protective equipment, making the masking only compulsory in areas with a high risk of COVID-19 community spread. Additionally, the CDC said that “2% of counties in the United States and “Moderna has asked the Food and Drug Administration to authorize its omicron vaccine for use in children.”

### **Antisocial Behavior Could Threaten Efficacy Of Treatments And Vaccines.**

Dr. Walensky reported HHS HHS Secretary Dr. Anthony Fauci is among experts who “foresee a [COVID-19 infection] wave beginning to swell in late 2022, which could render “current COVID countermeasures like drugs and vaccines powerless.” Fauci labeled a new variant, BA.2.75.2, “a major concern for the fall.” BA.2.75.2 “is picking up mutations that make it more similar to globally dominant BA.5 and the new variant is being even more transmissible and better at dodging immune responses.

### **Depression Rise Through COVID-19 Pandemic.**

Dr. Walensky reported data from the Centers for Disease Control and Prevention show “suicide is the third leading cause of death among people aged 18 and older who have been suicidal has increased 50%.” Mental healthcare providers encourage parents to look for sudden changes in their children’s behavior.

### **States Make Masks Optional In Nursing Homes.**

---

---

### **ment Of Michigan's Response To COVID-19 Pandemic.**

a first draft of a report from "disaster preparedness firm Tidal Basin" shows "Michigan's response to the COVID-19 pandemic. The report, which was prepared by interviewing people in 24 state agencies and departments" and was critical "of local and state coordination, and found several recommendations for improvement are more investment "in state government technology."

### **Need For Modernization Of Government Technology.**

(2.5, 10.52M) says while "the existence of fraud does not mean" unemployment assistance programs during the COVID-19 pandemic. The Board says "the Board has learned important lessons for how governments should manage aid and loan programs going forward." The Board says "the Board has learned important lessons" but the retroactive measures are "a costly and inefficient approach." A better strategy is "modernizing the courts to verify application data with information from payroll taxes and other filings."

### **Unemployment Assistance Heavier Than Expected.**

As reported as of Thursday "more than 313,000 individuals had requested applications through" Connecticut's "online portal for unemployment applications." The portal represents a way "to apply for the state's coronavirus pandemic bonus program for essential workers and \$500 for part-timers."

### **Unemployment Assistance For Deceased Persons.**

(2.5K) reported "states paid out billions of dollars in pandemic unemployment claims to more than 200,000 applicants who had died." The report was performed by the US Dept. of Labor's Office of the Inspector General. Additionally, the audit showed "nearly 1 million dollars in unemployment assistance paid out to deceased persons." Some estimates state that almost a quarter of the total \$875.2 billion in unemployment assistance paid out during the pandemic was for deceased persons.

### **Need To Prepare For COVID-19 Care When Federal And State Resources Expire.**

The report says "starting next year, the federal government and the state of Colorado plan to play much smaller roles in managing the health care system to prevent people from falling through the health care system's cracks." The state "still operates a reduced number of free testing sites and is not providing the new bivalent boosters for now, "but those will close whenever federal funding for them runs out." While "people will have access to COVID-19 treatment" it is unclear "how much access uninsured people will have."

### **Coronavirus Could Resist Current Vaccines.**

(2.5, 2.51M) reported "researchers say they have discovered a vaccine-resistant coronavirus in Russian horseshoe bats." The report involved a second look at a virus in the bats and demonstrated the virus could attack human cells plus was unlikely to cause serious illness in most people."

### **Need For Lapsing Awareness Of Risk Of COVID-19.**

(2.5, 2.44M) reported even as COVID-19 cases and hospitalizations are waning across the United States, experts like Scott Gottlieb, M.D., director of the FDA's Center for Drug Evaluation and Research, are warning that the public's awareness of the risk of COVID-19 is fading.

---

---

social mirage, that the pandemic is over, or can be called over in some meaningful way.” Those health experts state effects of long COVID and other lingering impacts of infection.” They “continue to advise people to wear face coverings on public transit or in grocery stores.”

### **“Under Control,” But Not “Over.”**

Cercone write in [Kaiser Health News](#) (9/26), “President Joe Biden caused a stir in a ‘60 Minutes’ interview on Sept. 20 when he countered that the U.S. is still averaging about 400 deaths daily from the virus, that nearly 30,000 Americans remain hospitalized stemming from previous infections.” Meanwhile, “PolitiFact has been tracking a campaign promise Biden made in 2020. During the presidential campaign, Biden said, ‘I’m never going to raise the white flag and surrender. We’re going to beat the virus.’ On safer linguistic ground with his promise to get covid “under control” than saying ‘the pandemic is over.’”

### **COVID-19 Pandemic Being Over Premature.**

Contributor Michelle A. Williams wrote President Joe Biden’s declaration that the COVID-19 pandemic is over “is not only even harder to persuade Americans to get the new bivalent boosters” and “persuade Congress to fund essential COVID-19 response new indoor mask requirements should another surge arrive.” Williams argues “declaring the pandemic over at this time is just background noise.”

### **Combat Long COVID-19.**

Writer and pulmonary and critical-care physician at Brigham and Women’s Hospital in Boston writes in the [New York Times](#), “During the pandemic, my colleagues and I” wanted to “develop a robust system of follow-up care for the patients who had been hospitalized.” But “when it opened, the clinic was deluged with self-referrals from patients who had not been hospitalized.” “The Institutes of Health research funding has in part resulted in hospitals building clinics for those with long Covid, then long COVID syndrome.”

---

### **Why Using Taxpayer Funds To Drive Immigrant Girls To States Where They Can Obtain Abortions.**

(NYT) reported, “The Biden administration is driving illegal immigrant girls to states where they can get late-term abortions, violating a federal law that prohibits the use of taxpayer money to facilitate the procedure.” HHS, which “cares for illegal immigrants, is ensuring pregnant girls end up in states where abortions are still allowed.” The department’s “Office of Refugee Resettlement is implementing policies to ensure pregnant girls can get abortions.” GOP lawmakers said, “Driving a pregnant minor to another state to get an abortion is a federal crime.”

---

### **Head Of IHS.**

(NYT) reported, “In a long-awaited vote, the U.S. Senate on Wednesday confirmed President Joe Biden’s pick to lead the Indian Health Service.”

---

leading the agency's operations on her own Navajo Nation." The agency, which provides healthcare "for 2.6 million Navajo people," Biden took office." Tso promised "to prioritize patient safety, worker retention, and technology upgrades at aging clinics."

### **With Over 8B Scanning Attempts In DDOS-Style Attack In 2020.**

HHS "was hit with more than eight billion scanning attempts over 18 hours in a distributed denial-of-service-style attack in 2020." In an interview with FedScoop, José Arrieta said that attackers were waiting for the agency to lower its perimeter firewall, "flooded it with 8 billion packets slowing it down – to access the department's network." The article added, "According to Arrieta, HHS' defenses include firewalls, Trusted Internet Connections capacity at multiple locations, server capacity and Virtual Private Network capabilities."

### **Focus On Cancer Care.**

At a paywall, "Drawing on Charles Dickens, NCI Acting Director Douglas Lowy has a teaching moment for oncology: we live in a time when all of human society – both in the United States and in low- and middle-income countries – fully benefit from modern cancer treatments."

### **Illicit Use of Animal Tranquilizer Xylazine In Street Drugs.**

"Xylazine, an animal tranquilizer used for animals," Xylazine, "is appearing more frequently in street drugs across North America, alarming researchers because it's not an opioid...it can knock a user out for longer than most opioids – about six to eight hours – thus playing a growing role in overdoses." Nora Volkow said in an email, "The harms of xylazine are compounded when it is used in combination with other central nervous system depressants (like fentanyl or heroin), which can increase the risk of fatal overdose. Xylazine is one component of the severe current drug crisis. It's sold for orders cheaper and easier to obtain than illicit drugs."

"NIDA (4.11M) reports when reacting to overdose death figures in spring 2021, NIDA Director Dr. Nora Volkow "warned: 'The opioid epidemic in America. Behind each of these numbers, there is a person's life that has been lost, a family devastated, a community in pain. We must find solutions that could help many people. We must meet people where they are to prevent overdoses, reduce harm, and connect them to care.' We're finding that people are overdosing because they've had no exposure to opioids that powerful. We like to see what's opening right now on the street is this incredible experiment in combination of drugs.'"

### **AI Could Help Combat Research Security Risks.**

"The New York Times (Subscription Publication) reported behind a paywall, "Members of the National Security Advisory Board for Biosecurity emphasized the need to ask research questions without taking on the risks inherent in some kinds of experimentation involving pandemic-potential pathogens." The agency's newly selected director "Renee Wegrzyn, who spoke at the meeting, said researchers may be able to avoid risky experiments by using AI."

### **Heart Failure, HBP, Shows Potential As AUD Treatment.**

"The New York Times reported, "A generic drug used for decades to treat heart failure and high blood pressure," spironolactone, "shows evidence of effectiveness in treating alcohol use disorder," Molecular Psychiatry suggests. But "one outstanding question is whether larger human studies will turn up any safety concerns." Dr. Lorenzo Leggio, MD, PhD, co-senior author of the new study and chief of a joint NIDA and NIAA lab in the clinical psychology branch, said, "We're excited about the potential of spironolactone as a treatment for AUD."

"The New York Times (4.2M) reported, "Researchers from the National Institutes of Health studied" spironolactone, "a medication with existing FDA approval for heart failure and high blood pressure."

---

publication, 215K) reported the CDC “announced on Friday that it has established a Pathogen Genomics Centers of Excellence and their academic partners.” The CDC “said in a statement that the PGCoE network will foster and improve innovation in genomics, and bioinformatics, with the goal of improving prevention, control, and response to microbial threats to public health. Each will each be partnered with one or more academic institutions, the CDC said.” Also reporting was [GenomeWeb](#) (9/

### **Updating CDC Food Guidelines.**

(9M), Dr. William H. Dietz wrote, “Over a decade ago, the Centers for Disease Control and Prevention (CDC) led the effort to reduce healthcare spending and improve the health of millions of Americans – if only anyone cared enough to fully implement the recommendations to resurrect the White House Conference on Hunger, Nutrition, and Health. He should use this event as an opportunity to immediately achieving many of his ambitious goals for the conference and advancing a decade-long effort by the CDC to implement the White House Conference on Hunger, Nutrition, and Health with an executive order mandating the CDC’s guidelines would do

### **Discussing Mental Health With Students.**

Dr. Dietz wrote, “Every day at the start of his classes, Nick Orr, a high school science teacher in Nevada, said he checks in with his students about how they are doing after his own brother Anthony died by suicide shortly after graduating high school in 2020.” Orr “said Anthony felt there was a safe space to talk about his mental health.” During the COVID-19 pandemic “youth mental health was a top priority for the American Academy of Child and Adolescent Psychiatry and the Children’s Hospital Association.” And “U.S. Surgeon General Vivek Murthy addressed the mental health crisis among young people, writing, ‘The challenges today’s generation of young people face are unprecedented’

### **Medical Records Examined.**

Dr. Murthy wrote, “Discrimination in health care is ‘the secret, or silent, poison that taints interactions between providers and patients.’” Dr. Murthy is a professor at the Dean of George Washington University’s law school and an expert in civil rights law and disparities in health care.” Dr. Murthy said, “Patients, Matthew said, are described simply by their conditions. Others are characterized by terms that communicate more than they address their symptoms.” Consequently, “the stereotypes that can find their way into patients’ records sometimes help to make it simple to write down and easy to copy and paste over and over. Descriptions such as ‘difficult’ and ‘disruptive’ are common.” Dr. Murthy is the head of HHS’ Office for Civil Rights.

---

### **To Fight “Rainbow Fentanyl.”**

Dr. Murthy wrote, “Sen. Chuck Schumer called for \$290 million in funding to combat a deadly surge of ‘rainbow fentanyl,’ which has had a devastating impact on children.” The Drug Enforcement Agency has issued a public warning about the pills, a surge in younger people with areas devastated by the opioid epidemic – like Staten Island – steadily in the crosshairs of federal law enforcement.

### **To Work Toward Recovery To Decrease Opioid Overdoses.**

Star (9/24, 662K), CareSource Indiana President Steve Smitherman wrote, "Substance use and substance use disorders are a national and state public health crisis. Nationally and in Indiana. Data from the Centers for Disease Control and Prevention (CDC) National Center for Health Statistics shows that from January to December 2020, there was a 41% increase in drug overdose deaths in the U.S. during a 12-month period ending in April 2021, an increase of 28.5% from the same period in 2020. The CDC also tells us that from January to December 2020, there was a 41% increase in drug overdose deaths. We recognize that the process of accessing and completing proper treatment and care for SUD was hindered during the pandemic. Barriers greatly increased as well as the barriers standing in their way of receiving assistance. Because of this, we need to work toward recovery to decrease opioid overdoses."

---

### **How to Incorporate Religion Into Their Practices.**

reported that David H. Rosmarin, an associate professor at Harvard Medical School, "is one of a growing number of psychologists who are addressing the intersection of faith and mental health crisis." In recent years, there "has been an increase in training opportunities to integrate faith and psychology into professional journals." But Rosmarin "says that convincing others in a profession, who are statistically less likely to be religious, is a challenge."

---

### **Challenges in Los Angeles.**

(3.37M) reports, "There's no way to sugarcoat it: These are challenging times to live in Los Angeles. In the last few years, we've seen skyrocketing inflation and immense income inequality; record-breaking drought and heat waves; an alarming rise in homelessness; and the lingering effects of a devastating global pandemic. Amid – and because of – these adversities, our children are suffering." The piece discusses a series featuring "individuals who have faced their own challenges – like living with a psychological condition."

---

### **Disparities in Quality Of Mental Health Treatment, APA Says.**

(2.44M) reported, "According to data from the Substance Abuse and Mental Health Services Administration, in 2019, 40.3% of Hispanic people experienced a mental health condition," and research available on the CDC's "website also showed that 40.3% of Hispanic people experienced a mental health condition." The piece discusses a series featuring "individuals who have faced their own challenges – like living with a psychological condition." The piece also discusses a series featuring "individuals who have faced their own challenges – like living with a psychological condition."

---

### **Present Enormous Challenges To Affordability.**

The era of multimillion-dollar gene therapies has arrived, providing a ray of hope to patients with debilitating diseases. However, the number of patients who'll likely receive the treatments is relatively low, it's unclear how small employers, state Medicaid programs, and private payers will cover the cost. The FDA "recently approved two gene therapies," and both "previously-approved non-oncological gene therapies."

---

lished last year in JAMA Pediatrics found that if a \$1.85 million sickle cell gene therapy was administered to only 7% of the Medicaid program included in the study would be nearly \$30 million.” Now “the question of how to handle an influ

## **Reforms Will Extend Lives Of Patients With Cancer Through Lower Out-Of-Pocket Costs For Pharmacy Drugs**

The White House is pitching an added benefit to Democrats’ recent drug pricing reform package: lower cancer death rates. “The analysis found that Medicare patients’ out-of-pocket costs for pharmacy drugs at \$2,000 per year, starting in 2025.” The analysis found that “the cap would save an average of nearly \$1,600 per year on prescription drugs because of the out-of-pocket cap.” The White House aims to reduce the death rate from cancer by at least 50% over the next 25 years. If patients can afford drugs that they otherwise couldn’t, said White House Cancer Moonshot Coordinator Danielle Carnival.

## **Used Largest Quarterly Decline In Net Drug Prices.**

Amid ongoing debate over the cost of prescription medicines, a new analysis finds that brand-name drugmakers in the U.S. saw a 4.4% drop in net prices from a year earlier. Yet “when accounting for inflation, wholesale prices fell by 3.7%, and inflationary pressures on health plans paid for medicines – after subtracting rebates, discounts, and fees – dropped by 0.8%.” And “after the first quarter.” The drops are “the largest quarterly decline in real terms seen by analysts at SSR Health, a research firm.”

## **Also Be Measured By Cost Curve Impact.**

Idetti wrote for [STAT](#) (9/23, 262K), “Market share is often held up as the most relevant metric for the success of a drug. But if greater patient access, that should also be used to define biosimilars’ successes or failures.” And analyzing data from the drop in total spending in the infliximab category and Remicade biosimilars “impact to the cost curve has been quite significant.” It warrants increased focus,” as “reimbursement is driven by a product’s average sales prices.” Maintaining average sales price is a dynamic, and is worth further analysis to ensure a robust and competitive biosimilars market that is sustainable in the long term.

---

## **Patients To Pay For Lab Charges, Medical Appointments: Experts.**

Experts, “The Centers for Disease Control and Prevention estimates 1.2 million Americans can benefit from PrEP.” Insurers are not covering lab charges and medical appointments.” People on PrEP “must get tested every three months to check for HIV and other sexually transmitted infections.” Many consumers are struggling to get insurers to fully pay the lab charges and medical appointments.”

## **Uninsured Plans May Have Greater Medical Debt, Researchers Say.**

Researchers reported, “The prevalence of medical debt may be tied to health insurance coverage status, as uninsured individuals are more likely to have medical debt, according to a study published in JAMA Network Open.” Researchers “analyzed data from the Census Bureau’s Survey of Consumer Finances (SCF) to assess health-related and insurance-related risk factors for medical debt.” The study sample “included over 13,000 households (17 percent), 17 percent were covered by Medicare, 15 percent had Medicaid coverage, 5.2 percent had military coverage, and 1.2 percent had private insurance.”

## Is Political Stunt That Reveals Policy Failure.

ported with a Bloomberg analysis that a “campaign by Republican governors in several states to transport thousands of migrants to the interior” – and also an indictment of the federal government’s failure to control the country’s borders.” Rather than “deflect blame,” the report says, the administration “must mobilize an effective response.” So far this year, border officials “have reported a record 2.2 million encounters with

**d Welfare Money For Football Facility.**

Mississippi spent millions of dollars in welfare money on Brett Favre's pet project, a university volleyball arena, the retirement of a former NFL player, and a new welfare agency for another sports facility, new court documents show." The governor at the time, Republican Phil Bryant, said he was "not a fan" of Favre's project. "I was not involved in the project," Bryant said. "I was not involved in the welfare agency for the University of Southern Mississippi's football team." Bryant "told him federal money for children and low-income families was not available under Federal Law."

## Mental Disabilities Were More Likely To Die From COVID-19 At Pandemic's Peak.

"New research finds that people with developmental disabilities were much more likely to die from COVID-19 at the nationwide for 2020" and found "that COVID-19 was the top cause of death among people with intellectual and dev death following heart disease and cancer for those without such disabilities."

## Reduce Poverty Is An Idea That Is Here To Stay.

es (9/23, Manjoo, 20.6M), columnist Farhad Manjoo wrote, "Among the big changes ushered in by the pandemic was trying to jazz up a government program whose very name – the Child Tax Credit – I worry will have a lot of people in effect last year, President Biden's expanded version of the Child Tax Credit provided parents of most American children, the credit gave people another lump sum of cash assistance." Manjoo wrote, "There is a possibility that the expansion of the credit here to stay."

**ed Due To Lack Of Inspection.**

ports, "About 6,247 pounds of a Sarasota company's frozen empanadas that went to stores around Florida have been recalled. The USDA's Food Safety and Inspection Service "announced the recall of Empanadas Valrico's Steak Empanadas and Empanadas Valrico's Chicken Empanadas, both of which have a "best by" date of 11/15/2017. The recall was announced on Friday." According to the USDA recall notice, the Florida Department of Agriculture "informed the USDA of the recall on Friday."

**Of Aldi-Brand Salad Dressing.**

ports, "Wrong salad dressing in the wrong bottles created a problem with potentially 'serious or life-threatening' consequences nationwide." TreeHouse Foods, "which makes the salad dressing for Aldi, recalled Tuscan Garden Restaurant Style Imitation Chicken Dressing. The recall affects 1.5 million bottles of dressing. TreeHouse Foods said the bottles contained Asian Sesame Dressing."

## To Manage Most Of State's \$1.8B Medicaid Program.

Healthcare of Nebraska, Nebraska Total Care and UnitedHealth Care of the Midlands.” Two, Nebraska Total Care and UnitedHealth Care of the Midlands are “is new to Nebraska but provides Medicaid, Medicare and Affordable Care Act marketplace plans in several other

## For Low-Income People In Nebraska.

ddard, 509K) reports, "The two years since Nebraska expanded Medicaid to cover more low-income people have changed the state's health care landscape. The number of people without health coverage has plunged, hospitals are feeling less stress on their bottom lines and fewer people are filing for bankruptcy. It's a far cry from what advocates argued during six years of failed efforts to win legislative approval of expansion and, later, during the years of the federal court case that eventually forced the state to expand Medicaid."

### ent Period On Interim Rule On Medicaid Funding.

Publication, 4K) reported behind a paywall that the Biden Administration “is reopening a public comment period on federal matching funds for their Medicaid programs under the Families First Coronavirus Response Act.” The Centers (IFR) with request for comments on Nov. 6, 2020.” But “in light of the possibility of changed circumstances since publishing those requirements,” said the new CMS interim final rule released Friday.

## der Playing Everyone Looking For Medicaid Expansion?

26K) editorialized, "After more than a decade of lobbying, urging, cajoling and begging state legislators to bring Medicaid to melting the iceberg we call N.C. Senate leader Phil Berger. After years of freezing out the uninsured, earlier this year a supporter of the provision that could provide health coverage for as many as 600,000 uninsured North Carolinians who use emergency rooms. What Berger didn't mention, at the time, was the asterisk and the fine print." The Journal editorial board said, "Everyone who has been pushing for Medicaid expansion."

---

## **Healthcare Systems “Operate Like For-Profit Companies.”**

(9/24, Thomas, Silver-Greenberg, 20.6M) feature reported its investigation into nonprofit healthcare systems found “hospitals sending patients into affluent areas” while using federal programs to increase their profits. The Times highlighted that Bon Secours “closed a psychiatric ward” due to years of underinvestment, and “yet the hollowed-out hospital...has the highest profit margin in the region.” “For example, according to the hospital’s financial data,” thanks to “a federal program that allows clinics in impoverished neighborhoods to receive federal funds to help cover the cost of care,” the hospital “pocket the difference.” With over “half of all hospitals in the United States” being “set up as nonprofits, a design that many are not returning benefits to the communities they operate in.”

(9/24, A1, Silver-Greenberg, Thomas, 20.6M) reported in a separate article on how “senior executives at one of the country’s largest hospital systems have a playbook for wringing money out of patients – even those who were supposed to receive free care because of their Medicaid status.”

## **Residents Oppose Mandatory Arbitration Of Disputes.**

The Washington Post reported, “Arbitration clauses appear frequently, often little noticed, in contracts with businesses of many kinds: banks, car dealers, landlords, and even nursing homes.” “They are also ‘widespread in long-term care facilities, in nursing homes, assisted living, board and care homes,’ said Linda Smetanka, executive director of the National Long-Term Care.” But advocates for residents, families and consumers “have opposed mandatory arbitration for decades.” “It’s a way of making sure that compulsory arbitration ‘binds the resident upfront,’ Ms. Smetanka said.”

## **Efforts To Stop Misuse Of Antibiotics During Rise In Bacterial, Fungal Infections.**

The Washington Post (9/24, Prescription Publication, 4K) reported, “The CDC is devoting funding to dozens of local health departments for programs to reduce antibiotic misuse and prevent fungal infections during the Covid-19 pandemic.” The CDC “has already issued \$120 million to departments in New York, California, and Texas to improve antibiotic and antifungal prescribing within health-care settings.” CDC Office Of Antibiotic Stewardship “will develop model plans for each jurisdiction, and will grant additional funding through 2024.”

## **Seniors Grapple With Home-Care Worker Shortage.**

The Washington Post (9/25, 10.52M) reports a shortage of home-care workers across the US is “jeopardizing the independence of a generation of seniors, forcing them to spend their twilight years in nursing homes.” While “an overwhelming majority of people older than 50 want to remain in their homes,” the Post says, “they need to do so safely. The shortage was exacerbated by the pandemic, which caused demand for in-home services to surge.” “Many seniors have quit for less taxing jobs in Amazon warehouses and as Uber drivers.” The Post says, “Workers can earn equal or higher wages than in home care, but the work is not easier than bathing, dressing and feeding seniors.”

## **Lawmakers Push To Promote Adoption Of Research Animals.**

The Washington Post (9/24, 401K) reported, “Now-famous beagles rescued from” Envigo medical dog-breeding facility in Cumberland County, Virginia. “Rep. Tony Cárdenas (D-CA) ‘pushed for legislation that would promote adoption of research animals.’” Envigo was “accused of numerous animal welfare violations, the Virginia Mercury has reported,” and “federal agents in May seized hundreds of dogs and puppies.” “The bill would require any facility receiving funding from the National Institutes of Health to make ‘reasonable efforts’ to adopt research animals no longer needed for biomedical and behavioral research.”

---

---

### **Smoking, Vaping In City Parks, Outdoor Recreational Venues.**

Columbus, Ohio, city council members "will be voting" to ban smoking and vaping "for all city-owned parks and outdoor recreational venues." The new ordinance states that "any violation of the proposed law would be considered a misdemeanor." The ordinance also bans smoking and vaping on city-owned construction in the downtown area.

### **Improved Working Conditions At Minnesota Hospitals.**

Minneapolis (855K) reported that Earlier in September "15,000 Twin Cities and Duluth hospital nurses went on strike" and the union is working on improving working conditions to retain existing nurses but also to address a worsening shortage by enticing former nurses back." Union leaders said, "There are plenty of licensed nurses ... to fill the vacant positions in Minnesota hospitals. ... But they are not coming back because the pay has doubled from 2,450 in 2019 to 5,587 in 2021, leaving 8% of jobs unfilled, according to the Minnesota Department of Health. Before the pandemic, with baby boomer nurses retiring and reaching the age at which they needed health care themselves, the shortage was not as acute."

### **Combine Consumer Suits Over Recall Of Smoking Cessation Drug Chantix.**

Washington (4K) reported, "Chantix maker Pfizer Inc. urged the US Judicial Panel on Multidistrict Litigation to combine consumer suits over possible carcinogen contamination." In a Thursday filing, Pfizer said "other efforts to streamline the litigation are being made because of efficiency because there are only 11 pending lawsuits, just a few plaintiffs' law firms, and Pfizer is the only defendant."

### **Test Cancer Drugs From Spectrum Pharmaceuticals, Oncopeptides.**

An independent committee that advises the FDA on cancer drugs has weighed in on medicines from Spectrum Pharmaceuticals and Oncopeptides. The committee "issued negative votes on both." FDA staff "flagged safety concerns" for poziotinib's proposed dose, but "also noted that the drug is being tested at a lower dose than the planned confirmatory study will be at 8 mg twice daily." For Oncopeptides "multiple myeloma drug, Pepaxto, the committee noted "a potential for severe toxicity associated with the drug." However, European regulators approved the drug in August.

### **Repeal PASTEUR Act To Incentivize The Antibiotic Market.**

Antibiotic resistance is a growing global health threat. Gunnar Esiason, writes for [The Hill](#) (9/25, 5.69M), "The antibiotic market is failing" due to growing antibiotic resistance from bacteria evolving to "become impervious to those drugs." Without the development of new drugs, the only way to curb the spread of resistance is limiting antibiotic use." Esiason concludes, "Congress should pass the bipartisan Pioneering Antimicrobial Subscriptions to End Upsurging Resistance (PASTEUR) Act." PASTEUR basically "allows antibiotics to be used off the shelf until medical necessity beckons, while enabling drug makers to keep the lights on."

### **Approval Of Amylyx Pharmaceuticals ALS Treatment By Thursday.**

San Francisco (7K) reported, "Eight years after the ALS Ice Bucket Challenge went viral across social media and raised hundreds of millions of dollars, Amylyx Pharmaceuticals "is on the brink of a major breakthrough for ALS patients." Amylyx "should receive word this week from the FDA whether it will approve the local firm's drug treatment" AMX0035 for Amyotrophic Lateral Sclerosis (ALS). AMX0035, "which has already been used in the ALS Ice Bucket Challenge donations that's being considered for approval by the FDA," with a decision expected Thursday.

---

---

### **Egg-Freezing May Not Get Pregnant, Researchers Say.**

NIH) reported, "The procedure of egg-freezing is an increasingly popular, but expensive, option for women who want to have a child later in life. The timing of when she freezes her eggs and how many eggs she freezes make a significant difference in whether she will get pregnant. Women who freeze eggs later in life are more likely to not succeed, often because they had waited until they were too old to freeze eggs and had not frozen enough of them."

### **First Responders For Burnout, Stress See Spike In Number Of Patients.**

Harbor of Grace reports that specialized recovery facilities like Harbor of Grace "focus on treating law enforcement officers, firefighters, and others who experience trauma, violence and death at work." In the past two years, Harbor of Grace co-founder and CEO Ken Beyer "said, the number of patients has more than tripled." Other treatment centers for first responders "reported a similar spike in patients."

### **Robotic Surgery Removes Less Of Lung To Excise A Small Tumor.**

When Claudia Donohue "first learned she had lung cancer," it "seemed to her that the odds at her age, 76, weren't good." Dr. Michael J. Zevaloff, a thoracic surgeon at Northwestern Medicine in Chicago, breezily told her not to worry." His department, "he said, had a new surgical program for early-stage lung cancer, and get her back on her feet quickly." It's "called A-PLUS or Ambulatory Precision Lung Sparing surgery." With this new technique, "he said, surgeons should take less of the lung out."

### **Gender-Affirming Care Should Be Met With Vitriol.**

Dr. Carole Allen, a pediatrician, wrote, "As a pediatrician and a parent of a transgender son, I have become increasingly concerned about the vitriol directed at gender-affirming care to children and adolescents. Those three words, 'gender-affirming care,' indicate a thoughtful approach to helping children and adolescents live as their true selves, regardless of the sex assigned them at birth. I am appalled that delivering this kind of care has caused well-publicized incidents of violence against health care workers at Boston Children's Hospital and a bomb threat directed at the same facility." Allen wrote, "Our children and adolescents deserve to live. Government has an obligation to prevent disruptions of health care and to prosecute those who attempt to use violence against them. We, as a society, must reject vitriol and hate directed at those who want nothing more than to live as their authentic selves."

### **Optum's Health Data Licensing Could Force Them To Scale Back Programs.**

Optum's move by Optum to change longstanding practices for licensing data to academic institutions has sparked an outcry among researchers. "It's extremely difficult that universities will scale back their research programs." Optum "notified users that they now must access data through a new portal." But "using the enclave results in higher costs and technical complications that may make it harder to harness the data for research."

### **Delta-8 Laws Raise Health Concerns.**

At least a dozen states have banned "the hemp-derived drug delta-8 THC," including Colorado, Montana, New York, and others. "The FDA says all the concerns unfounded and say they're driven by marijuana businesses trying to protect their market share." The drug is typically produced by dissolving CBD – a compound found in cannabis plants – in solvents, such as toluene that is often used in industrial processes. "The process leaves potentially harmful residue."

---

---

### **One On Little-Known STI.**

s, "Doctors are urging more research into a little-known sexually transmitted infection that may be more common than chlamydia or M. genitalium or M. gen., a sexually-transmitted infection that may cause genital pain, bleeding and swelling, and in 2019 that the first Food and Drug Administration-approved test for M. gen. became commercially available." Many cases

### **Hepatitis B And C By 2030.**

) reported that Philadelphia health officials "are taking aim at two infectious diseases known as silent killers." The Philadelphia Inquirer reported that "These 'two infections of the liver, which can lead to cirrhosis and liver cancer, kill about 325 city residents a year." The article also notes that "the viruses that they know about, with more than 2,000 new cases just in 2019, as well as identify the many more cases that go undiagnosed." The article concludes that "The wide represents a major obstacle."

### **Humanity Toward Next Pandemic.**

(25, 3.37M), infectious diseases resident physician Arjun V.K. Sharma writes, "For years, scientists have been warning that a global pandemic is likely in our collective future. Much like climate change's effects on our environment, its effects on our health seem potentially destructive viruses – a clear cause for concern, given that we are reaching nearly three years of life under a global pandemic. Ecological networks that bind us with our natural surroundings are clearer than ever. It's a relationship we must honor and protect."

### **Economic Bills.**

ed, "More than 300,000 U.S. families have infants who require advanced medical attention in newborn intensive care units. The cost of medical fees for highly specialized surgeries and round-the-clock care." The services "are delivered, and in U.S. health care, the burden can be too much to bear."

### **Medical Center Loses Money.**

(32K) reported, "Baylor St. Luke's Medical Center has built a reputation for providing high quality medical care, ranking it as one of the 'top' list of best hospitals." It also "tends to provide that care at lower prices than competitors, according to a hospital industry analyst. Lower prices – would spell success." But the most recent public data "shows Baylor St. Luke's is losing money, attracting fewer patients than its rivals."

### **Disparities May Be Related To Broader Challenges, Study Suggests.**

(93K) reported, "The Blue Cross Blue Shield Association has released data showing evidence that women of color are more likely to have commercial health insurance or Medicaid." Instead, the numbers "indicate U.S. maternal health disparities are likely the result of a combination of chronic conditions, racial inequities, and likely biases within the healthcare system itself." The [study](#) "examined the impact of having either commercial insurance or Medicaid as measured by the Centers for Disease Control and Prevention's Severe Maternal Morbidity (SMM) Registry (2013-2017/25, Plescia).

### **Each By The FDA.**

TM), Cigar Association of America David M. Ozgo wrote, "When the Tobacco Control Act (TCA) was signed in 2009, it stated harms." However, President Obama "was clear that the law would allow also 'adults to make their own choices.' Permit the sale of tobacco products to adults." While cigar use among youths has had a dramatic decline, the FDA is taking this drastic step on distorted scientific evidence...in complete violation of the congressionally mandated guidance from President Obama guaranteed, when it comes to cigars, FDA should let adults be adults and withdraw the proposed rule.

### **With Juul.**

out of a \$440 million multistate settlement with electronic cigarette maker Juul Labs in objection to certain conditions in school districts from suing the company." The state "would have received roughly \$11 million over six to 10 years," Lundy, M. Christensen, 178K) also reported.

### **To Uphold Or Block Flavored Tobacco Products Ban.**

TM) reported, "California voters will decide in November whether to uphold or block" Senate Bill 793 which "Gov. Gavin Newsom signed." The law "would have prohibited retailers in California from selling flavored tobacco products, popular among teens." The proponents of the ballot measure said the new rules would help prevent tobacco use among younger people, "the products that smokers use as a way to quit standard cigarette smoking." The FDA is mentioned.

### **Cigarette, Tobacco Products Tax.**

ation, 4K) reported, "The California Governor Sept. 22 signed a law revising the Cigarette and Tobacco Products Tax." The California Department of Tax and Fee Administration more control over the taxes.

### **Sidewalks, Streets.**

ry, 587K) reports, "It may become illegal to smoke anywhere but on private property in Encinitas under a proposal to develop an ordinance that would expand the city's current ban on smoking in public places to include sidewalks and streets."

### **Hookah Bars.**

2K) reported that in June, Daytona Beach "put in an ordinance to force bars to close an hour earlier." However, Daytona Beach "people end up instead at the hookah bars, which are open until 3 a.m." Currently, "the city is considering a new ordinance to force hookah bars to close at 11 p.m."

### **Increased Risk For Preeclampsia, Hypertensive Disorders During Pregnancy.**

s, "Undergoing in vitro fertilization using frozen embryos is linked to a greater risk of hypertensive disorders, including preeclampsia, according to a new study published in the journal Hypertension." Although "the link between frozen embryo transfers and elevated blood pressure is not yet clear," the study provides a clearer understanding of the risk. The study was also the largest to date that included data on women who had more than one frozen embryo transfer.

---

---

toral fellow and study lead author Dr. Sindre Petersen said, "If our study only found that there was an association just because we found it, but we found in our extra analysis that there was a strong association between frozen IVF and preeclampsia."

### **y County Health Officials, Vape Shops.**

Eisenstadt, 467K) reports, "New York first outlawed flavored vapes in 2019 in response to a teen vaping epidemic fueled by largely ignored by county health officials and vape shops. The illegal vapes are still sold in dozens of shops around the state. Vaping has become a national child-health disaster." While "some clerks who work in the shops that sell the vapes in Onondaga County

### **Herpes Virus May Have Saved A Patient With Cancer.**

reports, "A new type of cancer therapy was made using a common virus that infects and harms tumors, showing big promise. Scientists used a drug from the genetically modified form of herpes simplex and created cutting-edge cancer therapy." But even with the safety and effectiveness of the cancer-killing virus," there was one patient who was "seemingly treated for cancer using the virus as part of" a trial. Project lead researcher Kevin Harrington "told BBC that it is rare to see a positive response in the early stages of a trial. Researchers presented their findings at the [ESMO Congress](#), a medical conference in Paris, France. The findings suggest a new approach for cancer patients. There were also side effects, like tiredness, but were generally mild."

### **Suspects For Allegedly Trafficking 87 Pounds Of Marijuana.**

reports, "Florida law enforcement officials arrested two suspects this week after intercepting packages containing 87 pounds of marijuana, reports." One suspect, "Bennie Neely, 41, was arrested on Wednesday on charges of trafficking in cannabis, a first-time offense, according to court records." And "Corey Jovan Brown, 38, was arrested on the same charges on Friday."

### **Recreational Swimming Still Impacts Black Children Today.**

reports, "Black children drown at more than twice the rate of white children, the Centers for Disease Control and Prevention reports. Despite swimming pool access continue today, and the racist history of recreational swimming still impacts Black people, like the fight against history's harsh legacies, one swimmer at a time." The "historical lack of access has another devastating impact on Black children, according to a 2017 USA Swimming Foundation study. Black children ages 10-14 drown in swimming pools at a rate more than twice that of white children, according to a 2017 USA Swimming Foundation study. Black children ages 10-14 drown in swimming pools at a rate more than twice that of white children, according to a 2017 USA Swimming Foundation study. Black children ages 10-14 drown in swimming pools at a rate more than twice that of white children, according to a 2017 USA Swimming Foundation study.

### **Colorado's Chance To Expand Access To Plant-Derived Psychedelics.**

the [Colorado Sun](#) (9/26), "A historic opportunity for Colorado to once again lead the country in progressive drug policy with the Natural Medicine Health Act, "seeks to end the decades-long legacy of harmful prohibition of psychedelic drugs, and bring them back into the mainstream. The Natural Medicine Health Act is our chance to create an equitable system of access to plant-derived psychedelics for medical and recreational use."

---

### **Children In Zimbabwe.**

---

---

n, 20.6M) reported, "A measles outbreak has killed more than 700 children and infected thousands of others across  
ins around the globe." As of Sept. 6, the country's Ministry of Health and Child Care "was reporting more than 6,500  
ors endangering child health in many countries."

### **Resources Into Global Vaccine Programs Before Next Pandemic.**

5.68M), Gavi CEO Dr. Seth Berkley said the world is not prepared for the next pandemic. Berkley said there need to  
and funded in advance...to ensure that next time the response is faster and more effective." Berkley argued, "Had C  
had at-risk contingency funding already been in place rather than having to be raised in the midst of a global crisis,  
and got larger volumes of doses out to people quicker."

### **Have Reduced Amount Of Smoking Due To Cost Of Living.**

New data from TECC found that 80% of British smokers have reduced the amount they smoke due to the cost of liv  
their cigarette consumption in some way due to the cost of living crisis with a further 5% dropping the habit comple  
cigarette spending, and that "the highest proportion of smokers who have reduced how much they smoke in the UK

### **Can President To Pass Tobacco Control Law.**

K) reports, "The South African tobacco-free youth forum has urged President Cyril Ramaphosa and members of Par  
d that approximately 44 000 people in South Africa die every year from tobacco-related diseases adding that passing  
the forum has urged South Africans to sign a petition calling on policymakers to prioritise passing the bill into law."  
ya, 5K) also reports.

### **ne "The Fate Of Cigarettes."**

wrote for the [Globe and Mail \(CAN\)](#) (9/23, Knelman, 1.09M) about the history of the tobacco industry and its regul  
te ever tougher controls, but recently "a seismic court ruling has threatened to disrupt" it. Knelman raises the possi  
ng the lines of the "radical concept of outlawing the sale of cigarettes to the next generation" as New Zealand inten  
y be decided by the next generation of business and political leaders, judges and lawyers, and, yes, voters, to figure  
points out that the total number of smokers worldwide has continued to rise and constitutes "a quiet but powerful l

### **"Catastrophic Consequences" For Using Nuclear Weapons In Ukraine.**

ullivan on [NBC's Meet The Press](#)  [Video](#) warned Russia would face "catastrophic consequences" if it uses nuclear we  
strophic consequences for Russia. The United States will respond decisively." However, [The Hill](#) (9/25, Schonfeld, 5  
ould entail."

ka, 3.57M) reports Sullivan told [CBS' Face The Nation](#)  [Video](#) that Russian President Vladimir Putin's threat to use

---

continued, "We have communicated directly, privately at very high levels to the Kremlin that any use of nuclear weapons by Russia would be a catastrophic event. The United States and our allies will respond decisively, and we have been clear and specific about what that will entail." [The Hill](#) (9/25, 3.19M) reports that Blinken said this in private because the Administration has been "trying to prevent a 'rhetorical tit for tat.'" The [Wall Street Journal](#) (9/25, 3.19M) also reports this.

[CBS News Video](#) (9/25, 4.19M), Secretary of State Blinken said, "We've heard a lot of irresponsible rhetoric coming out of Moscow, especially when it comes to this kind of loose rhetoric. We've been very clear with the Russians publicly and as well as privately. Vladimir Putin has a clear way out of the war he started, and that's to end it. If Russia stops fighting, the war ends." [CBS News](#) (9/25, 4.19M) also reports that Blinken said, "Russia is targeting nuclear power plants in Ukraine. That's a very serious threat. We're very concerned about that." [Using Nuclear Weapons, Says US Has Provided Ukraine With Air Defense System. CNBC](#) (9/25, Capoot, Stebbins, 7.34M) reports that Blinken said, "Russia's threat of nuclear weapons use 'could be a reality,'" and "said Russia is targeting nuclear power plants in Ukraine. Vladimir Putin 'wants to scare the whole world. These are the first steps of his nuclear blackmail. I don't think he's bluffing. Europe cannot be stable with Putin in power.'" A brief [CBS Weekend News Video](#) (9/25, 5:05 p.m. CDT, story 3, Du

Schreck) reports Zelensky "said he's bracing for more Russian strikes on Ukraine's electrical infrastructure, as the weather gets colder." Meanwhile, [Reuters](#) (9/25, Popeski) reports Zelensky in a separate interview broadcast on Sunday "said 'the United States' and he thanked President Biden. Reuters says that his remarks were "the first acknowledgment that the US has provided Ukraine with more advanced weapons systems (NASAMS), long sought by Kyiv and whose shipment was approved by Washington late last month."

[CBS News](#) (9/25, 2.17M), Sullivan said, "President Biden will emphasize how to put Ukrainians in the best position possible. For the United States, it's been on for several months. That's to make sure the weapons and intelligence and the information that Ukraine needs to win this war is in close touch with the Ukrainians throughout this conflict."

[CBS News Video](#) (9/25, 4.19M), Blinken said, "President Biden has been determined that as we're doing everything we can to win this war, we can to rally other countries to put pressure on Russia, we're also determined that this war not expand, not get broader. We're determined to provide Ukraine with long-range weapons for use against Russia. [The Hill](#) (9/25, Williams, 5.69M) reports that congressional leaders are pushing for more advanced weapons systems as Kyiv proves itself capable with its recent counteroffensive." According to [The Hill](#) (9/25, Williams, 5.69M), some members of the Biden administration, but others think it's time to meet Kyiv's demands."

[ABC's This Week Video](#) (9/25, 2.17M), said, "There continues to be bipartisan support in the House and Senate to provide Ukraine with more advanced weapons systems. There's been bipartisan criticism of the administration for being too slow with weapons to Ukraine. We need more advanced weapons systems. We need to use energy as a weapon, both to fund his military and to punish Europe for not standing with him. That's been the bipartisan position."

[The New York Times](#) (9/25, Santora, 20.6M) reports that the Ukrainian military on Sunday announced that it had struck the city of Odesa on Sunday, the second day in a row that unmanned aerial vehicles have struck there." The Times says that the drones are "kamikaze" drones supplied to Russia by Iran, so named because they explode on impact, carrying a warhead of 100 kilograms. "They played an important role in the Ukraine war, both for surveillance and for launching munitions." The Times says the US "has supplied Ukraine with a number of kamikaze drones, and it's clear that Russia's Black Sea Fleet headquarters in August involved a drone," while "Ukraine has also deployed Turkish-made Bayraktar TB2 drones."

**Gov. Ron DeSantis Cancels Planned Trip Ahead Of Expected Hurricane.**

---

President Biden on Saturday "issued an emergency declaration for the state of Florida as Tropical Storm Ian intensified due to the storm." The Hill adds the President's order "directs federal assistance to supplement Florida's storm response and of Homeland Security to help coordinate emergency relief efforts."

reports Florida Gov. Ron DeSantis (R) "declared a state of emergency throughout Florida and urged residents to prepare for high winds and rising seas," while [Politico](#) (9/25, Sarkissian, 6.73M) reports DeSantis "said the state is mobilizing resources as National Guard troops and preparing more than 2 million meals for residents." During a briefing, DeSantis "was joined by Florida Gov. Ron DeSantis who has already moved 360 trailers carrying 2 million meals and 1 million gallons of water to areas along the Gulf Coast to support evacuation orders and plans."

reports that during a briefing, DeSantis said, "The impacts will be broad throughout the state of Florida. Expect heavy rain and flooding." Florida "is under a state of emergency," which DeSantis "expanded from two dozen counties to the entire state Sunday." Although the storm "is most likely to hit Florida's west coast or Panhandle regions, the state's east coast could see flooding as well, depending on a range of scenarios."

[Video](#) (9/25, 5:31 p.m. CDT, story 1, Snow, 3.08M) reported, "All 67 counties in Florida under state of emergency for Tropical Storm Ian. The state has mobilized utility workers across the state. Tampa's last collision course with a major hurricane was a century ago." [Reuters](#) (9/25) reports Tropical Storm Ian "hurtled toward western Cuba on Sunday, prompting the government to warn of its potential to become a hurricane on Monday." Hurricane warnings "had been issued for the Cuban provinces of Isla de Juventud, Pinar del Rio, and Matanzas, as well as flooding and possible mudslides in areas of higher terrain, especially over Jamaica and Cuba." By mid-week "the storm is expected to make landfall in the Gulf of Mexico."

[World News Tonight](#)  [Video](#) (9/25, 5:33 p.m. CDT, story 1, Johnson, 3.26M) reported, "The sooner [Ian] makes landfall, the sooner the storm is now. It hasn't organized much today. It's about 500 miles south of Cuba but we do expect it to rapidly intensify into Wednesday." Meteorologist Rick Knabb for the [CBS Weekend News](#)  [Video](#) (9/25, 5:01 p.m. CDT, story 1, DuBois, 3.08M) reports, "The storm is moving into the eastern Gulf of Mexico as a strong hurricane. What we don't know is exactly where the center is going to make landfall and what the impacts will be."

## **Democrats Depart From Party Line.**

It's a pattern throughout the Biden administration: The president says something in an interview or makes an unsolicited announcement. It happened twice in last weekend's '60 Minutes' interview – the president declared the pandemic was over, and he vowed to "bring back the popular ones," with the midterms six weeks away "and Democratic control of Congress on the line, Biden will face a tough re-election administration lines." The bottom line, says Axios, is that "there's a divide in our politics – including within the Democratic Party." Biden is "a gut-instinct politician, but he is being contained by the technocratic impulses of his administration." [Washington Post](#) (9/25) reports, "The midterms mean shifting focus away from Biden." [Fox News](#) (9/25, Panreck, 23.99M) reports, "Former White House press secretary Psaki said the midterm elections end up being a referendum on President Biden." Speaking with NBC's Chuck Todd, Psaki "acknowledged the party's focus on the economy." She "said Republicans were throwing a lot of money behind ads focusing on crime and Pennsylvania Senate candidate Pat Toomey."

## **Biden To Run For Reelection In 2024.**

reports, "A majority of US Democrats and Democrat-leaning independents want the party to replace President Joe Biden in 2024. 55% of this group prefer Biden for the nomination, while 56% say the Democratic Party should pick someone else, a slight majority."

---

independents, 47% back former president Donald Trump for the 2024 nomination, while 46% prefer someone else. In a head-to-head rematch." Biden has "a 2-point lead over Trump in the hypothetical rematch, with 48 percent of a sample favoring his predecessor." The findings are "reversed among registered voters, 48 percent of whom support Trump compared to 47% for Biden."

### **Lawsuit Against Georgia's Election Integrity Law As Midterms Loom.**

Only 15 months after the Department of Justice filed a lawsuit against the state of Georgia over an election integrity law, the Biden administration has little to say about the status of that lawsuit and whether Georgia's upcoming midterm election will be affected. Fox News Digital this past week that it does not have an update on its lawsuit against Georgia's election integrity law or whether it is under the jurisdiction of an election law President Biden called 'Jim Crow in the 21st Century' and 'a blatant attack on the Constitution.' Foundation's Meese Center for Legal and Judicial Studies Hans von Spakovsky, show a weak lawsuit that has grown even weaker.

### **'Commitment to America' Ahead Of Midterms.**

House Minority Leader McCarthy "predicted that House Republicans' 'Commitment to America' plan would enable them to win the House." He said, "We're first going to preserve our constitutional rights, but we're going to hold government accountable for the origins of COVID started. The DOJ – you've got an individual [who] called parents terrorists because they went to school." On Fox News' Sunday Morning Futures  [Video](#) (9/25, 1.23M), discussed GOP strategy for the midterms. Scalise said, "We're showing the country that there can be a better way. We don't have to have this as the new normal where inflation is out of control, the economy is wide open that thousands of people come across every day. People don't even feel safe in their own neighborhoods." McCarthy said, "Commitment to America is just showing people if you elect Republicans to replace these Democrats who have been voting against the bills we would bring to a Republican House floor to address all the problems that Joe Biden and Nancy Pelosi are responsible for."

 [Video](#) (5.69M) reports House Republican Conference Chair Elise Stefanik on Fox News Sunday  [Video](#) "said the media are not reporting on the policy platform outlining their agenda if they take the majority in the lower chamber."

 [Video](#) (5.69M) reports Rep. Nancy Mace (R-SC) on NBC's Meet The Press  [Video](#) "said Republicans will face pressure to impeach Biden." Mace adds Mace "declined to say how she would vote on a potential Biden impeachment, but noted that she did not vote on the impeachment." "away."

**enda.** On MSNBC  [Video](#) (9/24, 416K), Rep. Ro Khanna (D-CA) discussed the rollout of the House Republicans' legislative agenda. "I want to tell you what will happen if the Republicans take control of Congress. They will be talking about Hunter Biden the way they talk about how to get people's lives to be better; all they wanted to do was have Hunter Biden. All they wanted to do is have Hunter Biden for years of obstructionism. If the Democrats are there, we're gonna do more to actually lower prices for the middle class than the Republicans, but that is not what they intend to do if they win."

 [Video](#) (9/25, 10.52M), E.J. Dionne Jr. writes that the House Republicans' "Commitment to America" is "so short on specifics that it's not clear as McCarthy and his colleagues spoke on Friday is that the GOP plans to wrap three issues – fears about China, the economy, and the Supreme Court." Dionne adds, "Here's another thing the Republicans made clear: If they take the majority, they plan to use the Supreme Court." Dionne concludes that Republicans "really do have a commitment – to making Washington a pitiless battlefield."

 [Video](#) (9/25, 10.52M), Karen Tumulty writes, "It was not even close to what Republicans had hoped would sound like a commitment to America."

---

**Term Battlegrounds.** The Washington Post (9/25, A1, 10.52M) reports, "Republicans are increasingly centering their pitch on violent criminal conduct." Republicans are "also increasingly seeking to connect crime with their immigration message on national security and also fuels the illicit drug trade." The strategy is "prompting growing accusations of racism from some Democratic candidates are "scrambling to distance themselves from slogans such as 'Defund the police' that were popular among voters but have complicated the party's image more broadly since that time, according to strategists across the political spectrum."

### **DeSantis In Re-Election Campaign.**

The New York Times (9/25, Leary, Subscription Publication, 8.41M) reports Florida Gov. Ron DeSantis (R) is targeting voters in the Republican primary by moving toward the center. Should his strategy prevail, he could be the front-runner in the 2024 presidential race. The strategy is "normalized."

The Wall Street Journal (9/25, C. Bender, Goodman, 20.6M) reports DeSantis and Texas Gov. Greg Abbott (R) are "locked in an increasingly high-stakes battle over conservatism and pushing boundaries by using desperate migrants for political gain." DeSantis' "stunt" of flying migrants to the border is "the allies and aides" of Abbott. The Times says "no one in the Texas governor's office was given a heads-up that Mr. DeSantis was in the car with the matter." In addition, DeSantis "grabbed the attention of right-wing America, using Mr. Abbott's tactic, of blaming the two governors' policy moves antagonizing the Biden administration and the Democratic Party as a whole have."

**Latino Vote On Gun Safety.** The AP (9/25, Licon) reports Democrats courting Latino voters are campaigning on gun violence as a key issue for a group that often feels overlooked in national politics." Gun violence is "a particularly powerful issue in Florida." In a poll conducted in June by the Associated Press and NORC Center for Public Affairs Research, "35% of Latinos named gun violence as one of the five issues for the government to be working on in the next year. That compared with 18% in late 2021 and 10% in 2019."

### **DeSantis Governor Is "Languishing."**

The New York Times (9/25, 10.52M), Charles Bullock III, a professor of public and international affairs at the University of Georgia, writes Stacey Abrams is "recently showing her solidity outside the margin of error, in a rematch with her Republican rival, Gov. Brian Kemp." The Times says "the toughest moves in the electorate." For Abrams, Bullock writes, "the challenge will be to achieve a 29-29 election – a victory that a Democratic candidate could attract 30 percent of the White vote and if Blacks cast 30 percent of all votes, the Democratic candidate would suffice – that's about what Biden, Warnock and Ossoff achieved."

### **DeSantis Open For Those Not Religious.**

The New York Times (9/25, French, 10.52M), Tish Harrison Warren spoke with David French, senior editor of The Dispatch, about religious freedom. French says the case "to allow religious websites for a same-sex wedding" as an upcoming case that is important for religious liberty. French believes "America is a country of granting the government the power to determine when a creative professional can be compelled to create art." French asks, "Would you want your own artistic expression compelled by the government?" French continues, "Most people are not. They would rather have their conscience overridden by the government. They wouldn't want to hand that power to the opposing political party. Regarding the issue of conscience."

---

editorials on September 25.

**chin's 'Big Oil Side Deal.'"** In an editorial, the [Washington Post](#) (9/25, 10.52M) argues that as Senate Democrats vote on a spending bill funding federal operations," they should include "what opponents call 'the big oil side deal' – legislation in return for his summertime vote on the Inflation Reduction Act, Democrats' landmark climate and health-care legislation." Biden's bill would improve the package. This is true even – or especially – if one's primary concern is climate change."  
**ne Extension Could Be Delayed Again."** In an editorial, the [Washington Post](#) (9/25, 10.52M) welcomes "a new Metro rail expansion project and points farther west." However, "Metro might not have enough rail cars in service to run on the network, meaning service might be cut again unless service elsewhere is slashed." The Post urges local leaders "to think beyond Metro's current anemic ridership. If ridership is so short, passenger counts might never rebound to pre-pandemic levels." It warns that "ignoring Metro today means

**nd. Here Is The Right Response."** In an editorial, the [Washington Post](#) (9/25, 10.52M) argues that the existence "of fraud in government programs offer important lessons for how governments should manage aid and loan programs going forward." The Post argues for "more information from payroll taxes and other filings, allowing officials to catch fraudulent activity earlier. In addition, new ID verification and machine-learning algorithms could quickly flag suspicious patterns in data." In light of the challenges observed, the right response is "a national emergency — and start building a more nimble, responsive and resilient system for the future."

In an editorial, the [Wall Street Journal](#) (9/25, Subscription Publication, 8.41M) argues World Bank President David Malpass, as well as the New York Times have argued in public that Malpass is a "climate denier." The Journal argues the push for "Green New Deal" by the Democratic Party" for climate change policy.

In an editorial, The [Wall Street Journal](#) (9/25, Subscription Publication, 8.41M) says Meloni came into the election with a coalition government formed behind caretaker Mario Draghi. A win for Meloni will bring in a complex new period of Italian politics. Italy will get the conservative government they seemed to want four years ago, and will now find out if it works.

In an editorial, the [Wall Street Journal](#) (9/25, Subscription Publication, 8.41M) argues the Administration's trade policy is a complex one. Negotiations between the UK and US as an example.

**ation."** In an editorial, the [Wall Street Journal](#) (9/25, Subscription Publication, 8.41M) says the Third Circuit may be looking at talcum powder claims and class actions as their next big paydays. The Third Circuit recently heard arguments on whether to allow them rather than through class-action lawsuits.

**Subject:** RE: UPDATED: Discussion - USG || Gilead

Attendees for the call at 2pm are as follows:

#### **Gilead Sciences**

- Daniel O'Day, Chief Executive Officer
- Merdad Parsey, Chief Medical Officer
- Kristie Banks, VP COVID-19 Business Unit
- Michael Boyd, SVP Government Affairs & Policy
- Tomas Cihlar, SVP Virology Research
- Chuck Clapton, VP Government Affairs
- Kathleen Love-Weitz, VP Program Strategy Lead, Veklury
- Brian Nilstoft, Exec. Director Pharmaceutical Manufacturing
- Anu Osinusi, VP Virology Clinical Development
- Rekha Ramesh, VP Policy

#### **USG**

- David Kessler
- Jason Roos, incoming Chief Operating Officer for H-CORE (formerly known as CAG and OWS)
- Robert Johnson, outgoing Chief Operating Officer for the Countermeasure Acceleration Group and Deputy Director of BARDA
- Cliff Lane, Deputy Director for Clinical Research and Special Projects, NIAID
- Carl Dieffenbach, Director of the Division of AIDS, NIAID and senior advisor for COVID small molecule therapeutics
- Jay Epstein, Senior advisor for COVID monoclonal antibody therapeutics
- Meredith Chuk, outgoing COVID response lead for clinical outreach, reimbursement and communications
- Derek Eisnor, incoming COVID response lead for clinical outreach, reimbursement and communications
- Sheila Miknyoczki, project officer, BARDA – moving forward, Sheila will be your main point of contact
- Kim Armstrong, Chief of the Immunology and Emerging Infectious Diseases Therapeutics Branch, BARDA

-----Original Appointment-----

**From:** Kessler, David (HHS/IOS) <David.Kessler@hhs.gov>

**Sent:** Sunday, December 26, 2021 10:57 PM

**To:** Kessler, David (HHS/IOS); Armstrong, Kimberly (OS/ASPR/BARDA); Chuk, Meredith (FDA/OC); Epstein, Jay (OS/ASPR/IO); Eisnor, Derek (OS/ASPR/BARDA); Roos, Jason (OS/ASPR/H-CORE); Johnson, Robert (OS/ASPR/CAG); Lane, Cliff (NIH/NIAID) [E]; Dieffenbach, Carl (NIH/NIAID) [E]; O'Connell, Dawn (OS/ASPR/IO); Michael Boyd; Levine, Rachel (HHS/OASH); Miknyoczki, Sheila (OS/ASPR/BARDA)

## [Heads Up] What About the Risks of Your Password Manager? Stu Sjouerman SACP

In KnowBe4's new Password Policy eBook, "What Your Password Policy Should Be," we recommend that all users use a password manager to create and use perfectly random passwords. A perfectly random 12-character or longer password is impervious to all known password guessing and cracking attacks.

A human-created password has to be 20 characters or longer to get the same protection. Humans are not good at creating or using very long (and sometimes also complex) passwords, so we recommend using a trusted password manager program instead.

**A common question is if password managers are worth the risk of using them.**

The answer, in our opinion, is yes. We believe that the increase in risks a person will get from using a password manager is offset by all the advantages, which decrease and thoroughly offset the risks from not using one.

disadvantages.

Let's look at the risks and advantages of using a password manager. They can be summed up as follows:

- • User must obtain and install password manager
- • User must learn how to use password manager
- • It may take a user longer to create or input a password using a password manager (but not always)
- • Subject to attacks
- • Password managers do not work with all programs or devices
- • If access to the password manager cannot be done (e.g., corruption, lost login access, etc.), the user loses all access to all login information contained therein at once
- • If attacker compromises the password manager, the attacker can possibly access and obtain all of the user's passwords (and sites they belong to) at once

**It is the last issue that presents the biggest risk in most concerned user's minds -- single point of failure.**

Next, the advantages:

- • Creates and allows the use of perfectly random passwords
- • Creates and allows the far easier use of different passwords for every site and service
- • Can be used to prevent password phishing
- • Can be used to simulate some MFA solutions so users do not need separate MFA programs
- • Can be shared among devices so passwords are where the user needs to use them
- • Passwords can be more easily and securely backed up
- • All passwords may be protected by MFA login requirement to password manager
- • May warn user of compromised passwords that the user was not otherwise aware of
- • Will warn user of identical passwords used between different sites and services
- • Can be shared with trusted person(s) in times of need, when original user is temporarily or permanently incapacitated or unavailable

It is a very real risk that someone's password manager could get compromised, and from that compromise all of the user's passwords to all stored sites and services are stolen very quickly at once. That is a risk that must be measured and weighed by the admins or users who are using password managers.

**CONTINUED at the KnowBe4 blog, with a form to download the new Password Policy eBook:**

# Understanding the Threat of NFT and Cryptocurrency Cyber Attacks How to Defend Against Them

A growing number of organizations worldwide are **utilizing cryptocurrency for a host of investment, operational and transactional purposes**. Seemingly overnight, technologies like non-fungible tokens (NFTs) emerged and just as quickly, cybercriminals learned how to capitalize on organizations' naivety for their own benefit.

Are you still not sure about the **ins and outs of NFTs and cryptocurrencies**? Should your organization even care? The answer is YES, and we are here to help you make sense of it all. Join Roger A. Griener, KnowBe4's Data-Driven Defense Evangelist, as he shares what you need to know to **defend yourself in the new age of Web 3.0**.

Roger will cover:

- • The business impact of NFTs and cryptocurrencies: What are they and why should you care
- • The various and increasingly popular attacks against NFT and cryptocurrencies
- • How you can best defend yourself and your organization from becoming the victim of an attack
- • The projected future of NFTs and cryptocurrencies

**Stay up-to-date on the latest technologies and their hidden threats!** Plus, earn CPE for attending this event.

Date/Time: **TOMORROW, Wednesday, June 15 @ 2:00 PM (ET)**

**Save My Spot!**

<https://event.on24.com/wcc/r/3808653/26F4784C86D918E01E028B0029CCD40D?partnerref=CHN3>

## [CISA ALERT] Karakurt Ransomware Now Calls Your Business Contacts and Threatens Them

The U.S. Cybersecurity and Infrastructure Security Agency (CISA) and its partners have issued a joint alert on Karakurt, a data theft extortion group that harasses victims' employees, customers and business partners in order to pressure the victim to pay up.

"Karakurt actors have typically provided screenshots or copies of stolen file directories as proof of successful data theft."

data," the alert says. "Karakurt actors have contacted victims' employees, business partners, and clients with harassing emails and phone calls to pressure the victims to cooperate.

"The emails have contained examples of stolen data, such as social security numbers, payment account information, private company emails, and sensitive business data belonging to employees or clients. Upon payment of ransoms, Karakurt actors have provided some form of proof of deletion of files and, occasionally, a written statement explaining how the initial intrusion occurred."

Unlike many similar gangs, Karakurt doesn't encrypt the stolen data after stealing them, and instead relies solely on threatening to damage the organization and its customers and partners by publishing the data online.

## [New PhishER Feature] Turn the Tables on the Cybercriminals with PhishFlip

Cybercriminals are always coming up with new, devious phishing techniques to trick your users. PhishER now has a new PhishER feature that allows you to respond in real time and turn the tables on these threat actors. With PhishFlip, you can now immediately "flip" a dangerous attack into an instant real-world training opportunity for your users.

Your users are likely already reporting potentially dangerous emails in some fashion within your organization. You can now combine your existing PhishRIP email quarantine capability with the new PhishFlip feature, which automatically replaces active phishing threats with a new defanged look-alike back into your users' inboxes.

The new PhishFlip feature is included in PhishER—yes you read that right, no extra cost—so now you can turn the tables on these threat actors and flip targeted phishing attacks into a simulated phishing test for your users. This new feature dramatically reduces data breach risk and the burden on your IT and InfoSec teams.

**See how you can best manage your user-reported messages.**

Join us **Wednesday, June 22 @ 2:00 PM (ET)** for a live 30-minute demo of PhishER, the #1 Leader in Phishing Protection.

G2 Grid Report for SOAR Software.

With PhishER you can:

- • **NEW!** Automatically flip active phishing attacks into safe simulated phishing campaigns with PhishER. You can even replace active phishing emails with safe look-alikes in your user's inbox.
- • Easily **search, find and remove email threats with PhishRIP**, PhishER's email quarantine for Microsoft 365 and Google Workspace
- • **Cut through your Incident Response inbox noise** and respond to the most dangerous threats quickly
- • **Automate message prioritization** by rules you set into one of three categories: Clean, Spam, or Phishing
- • **Easy integration with KnowBe4's email add-in button, Phish Alert**, or forwarding to a mail client that works too!

Find out how adding PhishER can be a huge time-saver for your Incident Response team!

Date/Time: **Wednesday, June 22 @ 2:00 PM (ET)**

**Save My Spot!**

## [BUDGET AMMO] WSJ: "The Biggest Mistakes Companies Make With Cybersecurity—and How to Avoid Them"

There is a fantastic article in the *Wall Street Journal* that finally covers some of the biggest cybersecurity mistakes that KnowBe4 has talked about these last 10 years. Here is a short excerpt and then a link to the full article that I strongly recommend you send to your C-level exec who owns the InfoSec budget.

"Every manager knows it by now: Cyberattacks are frequent and dangerous. You need tough defenses to stay safe. Every manager knows it. But they still get things wrong with cybersecurity. All the time.

"In our research at the Massachusetts Institute of Technology's Sloan School of Management, we saw that managers should build organizations that are resilient to cyber threats, and have found a number of things that managers routinely get wrong, leading to wasted resources, poor decisions—and potentially catastrophic cyber vulnerabilities.

"Much of the problem, we believe, comes from managers seeing security as simply a matter of buying the right software, or tightening defenses, instead of taking steps to make safety a top priority for the whole company and strengthening the business so that it can withstand attacks and bounce back strongly."

Here's a look at six of those mistakes—and how to avoid them:

#### 1. • **Focusing on tech instead of employees**

##### **CONTINUED AT:**

<https://www.wsj.com/articles/company-mistakes-cybersecurity-11654279659>

By the way, the WSJ just published a podcast series that tells the story of a Russian hacker who was committing cybercrime and the U.S. officials who eventually caught him. Very interesting:

<https://www.wsj.com/articles/introducing-hack-me-if-you-can-a-new-podcast-series-11654892516>

## [Free Tool]: Is Your Organization Ready for a SOC 2 Compliance Audit? Find Out Now!

You already have challenging compliance requirements and having enough time to get your audits done is a continuous problem.

According to the most recent ACA Compliance Group Report, "Key Trends and Forces Shaping Risk Management and Compliance Management," 44% of firms are being asked to **show proof that security controls are in place** to protect customer data in the cloud.

The **Statement on Standards for Attestation Engagements no. 18 Trust Services Criteria (SSAE 18)** framework is designed to help you do just that. Often, organizations use this framework to obtain an **AICPA Certified Public Accountant (CPA) Statement on Organization Controls 2 (SOC 2)** certification.

If you're trying to wrap your head around how to best meet compliance requirements for the SSAE 18, you likely have a lot of questions. You want answers and need guidance on how to best meet the requirements. Get your organization ready for an audit - fast.

**Find out your organization's audit readiness now!**

KnowBe4's new **Compliance Audit Readiness Assessment (CARA)** is a free tool that helps you

your organization's readiness in meeting compliance requirements for the SSAE18 framework. The assessment guides you through a subset of specific **Control Components of the SSAE18 requirements** to help you identify areas within your current environment that may need attention.

CARA asks you to rate your readiness for each requirement and then provides an analysis of your results. It also provides guidance to help you create and implement controls to help **get your organization ready for a SOC 2 compliance audit**.

**Here's how CARA works:**

- • You will **receive a custom link** to take your assessment
- • **Rate your organization's readiness** for each requirement as Met, Partially Met, or Not Met
- • Get an **instant analysis and summary** of potential gaps in your cybersecurity preparedness
- • **Receive a personalized report** with control guidance suggestions to help you meet compliance
- • Results in just a few minutes!

**Take your first step towards understanding your organization's readiness for a SOC 2 compliance audit now.**

<https://info.knowbe4.com/soc2-compliance-audit-readiness-assessment-chn>

## [New APWG Report] Phishing Attacks Reach an All-Time High, More Than Tripling Attacks in Early 2022

Reaching more than 1 million attacks in a single quarter for the first time, new data on phishing attacks of 2022 show an emphasis on impersonation and credential theft.

The Anti-Phishing Working Group (APWG) collects data from a range of security vendors to provide the industry with insight into the current state of phishing attacks. It's latest quarterly report for Q1 2022 shows some "firsts" we've not experienced before in the explosive growth in phishing attacks. According to the report, in Q1 of this year:

- • The number of phishing attacks rose by 15% to over 1 million (1,025,968 total phishing attacks) for the first time
- • The number of unique phishing email subjects increased 25% to just over 53K, possibly indicating a greater focus on spear phishing attacks, tailoring email subjects to get the attention of their victim recipients

- The number of brands attacked has dipped below the previous record set in September of last year, but has been growing since a massive dip occurred in December, putting brand impersonation on track to surpass last year's number early
- Impersonation attacks on social media were up 74% from the prior quarter to represent nearly half (47%) of such attacks

**CONTINUED at the KnowBe4 blog:**

## AI Trained on 4Chan Becomes 'Hate Speech Machine'

This week, VICE reported something pretty horrible. A guy trained GPT using millions of 4chan posts, then turned the resulting monstrosity loose and let it post directly to the highly controversial message board.

Yannic Kilcher, an AI researcher and YouTuber, used more than three million recent 4chan threads from the /pol/ board, one of the most horrific portions of the already-notorious site. Kilcher wasn't exactly surprised by the results.

"The model was good in a terrible sense," Kilcher said in a video he uploaded last week. "It perfectly encapsulated the mix of offensiveness, nihilism, trolling, and deep distrust of any information whatsoever that permeates most posts on /pol."

AI researchers said it was an unethical experiment using AI. "This experiment would never pass a human ethics research ethics board."

**Here is the VICE article for a good shiver:**

<https://www.vice.com/en/article/7k8zwx/ai-trained-on-4chan-becomes-hate-speech-machine>

Let's stay safe out there.

Warm Regards,

Stu Sjouerman, SACP  
Founder and CEO

## Security News

### Old Dog, New Trick: Hackers Use Logons in URLs to Bypass Email Scanners

A new phishing method uses a decades-old special URL format to take advantage of how security software and email clients interpret URLs, tricking victims into clicking.

It's called the HTTP Authorization header and it's been around since 1999 as part of RFC 2616 which defines HTTP version 1.1. It specifies that an HTTP web request can contain a username and password in

just before the fully-qualified domain name. For example:

```
https://username:password@notarealdomainname.ext
```

Everything after the double forward slash and before the "@" is interpreted as authentication credentials. A new phishing method spotted by security researchers at Perception Point found that scammers were taking advantage of the "@," placing it in what would be perceived as the "middle" of a valid URL, only to trick email clients and scanning solutions into interpreting the URL as being benign, when it was anything but.

Take the idea of tricking a user into thinking they were going to be taken to the following URL:

```
http://www[.]office[.]com[/]login
```

But the URL actually reads:

```
http://www[.]office[.]com[/]login@maliciousdomain[.]com
```

**More details and links at the KnowBe4 blog:**

<https://blog.knowbe4.com/hackers-use-logons-in-urls-to-bypass-email-scanners>

## FTC Warns that Scammers are Turning to Cryptocurrencies

The U.S. Federal Trade Commission (FTC) has warned that people have reported losing over \$1 billion in crypto to scams since the beginning of 2021. The vast majority of these losses were due to investment scams, in which people are tricked into buying cryptocurrency with the promise of a large return.

Notably, younger people (aged 20 to 49) are more than three times as likely to fall for cryptocurrency scams than older people. When older people do fall for these scams, however, they tend to lose more money.

"Of the reported crypto fraud losses that began on social media, most are investment scams," the FTC said. "Indeed, since 2021, \$575 million of all crypto fraud losses reported to the FTC were about bogus investment opportunities, far more than any other fraud type. The stories people share about these scams describe a perfect storm: false promises of easy money paired with people's limited crypto understanding and inexperience."

"Investment scammers claim they can quickly and easily get huge returns for investors. But those crypto 'investments' go straight to a scammer's wallet. People report that investment websites and apps lead to losses."

track the growth of their crypto, but it's all fake.

"Some people report making a small 'test' withdrawal – just enough to convince them it's safe to go. When they really try to cash out, they're told to send more crypto for (fake) fees, and they don't get their money back."

The FTC offers the following tips to help people recognize cryptocurrency scams:

- Only scammers will guarantee profits or big returns. No cryptocurrency investment is ever guaranteed to make money, let alone big money.
- Nobody legit will require you to buy cryptocurrency. Not to sort out a problem, not to protect your money. That's a scam.
- Never mix online dating and investment advice. If a new love interest wants to show you how much they know in crypto, or asks you to send them crypto, that's a scam.

**New-school security awareness training can enable your employees to avoid falling for scam and other social engineering attacks. The FTC has the story:**

<https://www.ftc.gov/news-events/data-visualizations/data-spotlight/2022/06/reports-show-scammers-crypto-craze>

## What KnowBe4 Customers Say

"Good morning, we are now a week into our company-wide use of the PAB, (Phishing Alert Button) and we have since run several phishing campaigns. It has turned out to be a game changer, and our boss is now being stopped in the hall by employees providing positive feedback.

"Major move forward in our efforts here, and so far it has been implemented without any major issues. Great Friday!"

- W.J., Analyst, Information Protection

VALUE-BASED CARE CONFERENCE S  
SPONSORED BY

The Virtual Fourth National Medicare Advantage Summit will take place on April 11-14, 2023 as a purely virtual event. After consultation with the Summit planning committee, the decision was made to offer the Summit as a virtual event again because the majority of health care providers are in significant financial distress as they emerge from the pandemic, facing staffing shortages and expense increases and supply chain challenges.

#### KEYNOTE SPEAKERS

### Updated COVID-19 Vaccines During Final White House Briefing.

2M) reports NIAID Director Dr. Anthony Fauci, the US' "leading infectious-disease expert who has served under seven presidents, urged Americans to get updated coronavirus booster shots." He "announced he will leave government service next month, after 12 years at the National Institute of Allergy and Infectious Diseases, which he has led for 38 years." Fauci said, "My message and my final advice, for your own safety, for that of your family, get your updated covid-19 shot as soon as you're eligible to protect yourself and others."

12.7M) reports Fauci's "departure will conclude 54 years at the institute and 38 years as director." He said, "I gave my final advice to the control of the chamber in the next Congress, have vowed to investigate Fauci as part of a slew of investigations in the coming months. I will cooperate fully and testify before Congress."

reports "Fauci urged Americans to keep up with their Covid-19 vaccinations in his final briefing from the White House, despite GOP criticism of his pandemic-era advice."

, Hutzler, 2.44M) reports Fauci said, "I'll let other people judge the value or not of my accomplishments...but what I can say is that those years I've given it everything that I have and I've never left anything on the field."

---

reports Fauci "used his final White House briefing on Tuesday to denounce division and promote vaccines." He said "...not getting vaccinated for reasons that have nothing to do with public health, but have to do because of divisiveness. I don't want to see anybody hospitalized, and I don't want to see anybody die from COVID. Whether you're a far-right Republican or a far-left Democrat, we need to get vaccinated." During his final White House briefing, "Fauci suggested Tuesday that immunity from vaccination and prior infection could be enough to protect against COVID-19 this winter, despite a growing array of new variants." He said, "We're hoping that a combination of people who have been vaccinated and boosted and uninfected, that there's enough community protection that we're not going to see a massive wave." (M) reports, "White House officials lavished praise onto Dr. Anthony Fauci during his final appearance at the podium. Marine Jean-Pierre lauded Fauci's work to provide 'information and facts' to the American people throughout the COVID-19 pandemic, the effectiveness of vaccines, masks, and social distancing." The story are [NBC News](#) (11/22, Egan, 4.91M), [CNBC](#) (11/22, Kimball, 7.34M), [CNBC](#) (11/22, Kimball, 7.34M), [CNN](#) (11/22, Mahr, Cancryn, 6.73M), [The Hill](#) (11/22, Mueller, 5.69M), [HuffPost](#) (11/22, Date, 363K), the [New York Daily News](#) (11/22, Smith-Schoenwalder, 1.91M), [Axios](#) (11/22, Saric, 1.26M), the [Washington Times](#) (11/22, K) article.

### **to Increase COVID-19 Vaccine Booster Uptake Among Vulnerable Populations.**

(10.52M) reports on Tuesday, the White House "announced a six-week push ahead of the winter travel season to increase COVID-19 vaccine booster uptake among vulnerable populations, all of which have disproportionately suffered severe disease and death during the coronavirus pandemic." NIAID Director Anthony S. Fauci said that the coronavirus is an unusual foe because of the emergence of new variants every few months." Fauci "pointed to data showing that the recently authorized omicron-specific boosters protect against new variants." He said, "It is clear that we need to get more people vaccinated, and so going out and getting vaccinated right now is important." (M) reports White House COVID-19 response coordinator Dr. Ashish Jha said, "The data we've seen substantial increases late December into January, and so going out and getting vaccinated right now is important."

Owners of social media platforms should consider their personal responsibility regarding health disinformation, and that's something we need to do," Fauci said. "You can decide to trust America's physicians, or you can decide to trust the social media algorithms." Fauci said on Tuesday. He stated, "You can decide to trust America's physicians, or you can decide to trust the social media algorithms."

reports as the US "faces its third Thanksgiving with COVID-19, Fauci said the country was inching closer to an 'equilibrium' where the disease is no longer a major threat. "The message to you today is we can make that happen much sooner by vaccinating and by keeping updated on your booster. There are 'multiple actions' people can take to protect themselves – including masking and testing beforehand." Fauci said. "The Administration fact sheet states, 'With winter and holiday gatherings right around the corner, more Americans could be exposed to the virus. The six-week campaign will focus on reaching seniors and the communities that were hardest hit by Covid-19.' The campaign will be run through paid media."

(M) and [The Hill](#) (11/22, Weixel, 5.69M) also cover the story.

### **atory Illnesses.**

(10.52M) reports, "As the nation grapples with a surge in respiratory illnesses making very young children and babies ill, the CDC is urging parents to get their children vaccinated against influenza and RSV."

children are spending days and weeks in emergency rooms designed for short-term evaluation and treatment.” The Maryland and Virginia reporting the highest incidence of influenza-like illness...according to Centers for Disease Control Secretary Xavier Becerra to “declare an emergency to give providers and hospitals more flexibility to care for sick children.” (11/22, 6:41 p.m. EST, story 5, 2:30, Muir, 6.41M) reported CDC Director Dr. Rochelle Walensky said, “We are concerned we will see increases in the number of COVID-19 cases.” NIAID Director Dr. Anthony Fauci, who is retiring from the NIH, also said, “For your own safety, for that of your family, get your updated COVID-19 shot as soon as you’re eligible.” The story is in The [CBS Evening News](#)  [Video](#) (11/22, 6:41 p.m. EST, story 6, 2:20, O'Donnell, 3.8M), [NBC Nightly News](#) (11/22, Kekatos, 2.44M), [CBS News](#) (11/22, O'Donnell, 5.39M), [CNN Newsroom](#)  [Video](#) (11/22, 868K), [CNN](#) (11/22, Arrett, 262K), and the [Detroit News](#) (11/22, Rahal, Thompson, 1.16M).

### **Record High, Says HHS Secretary Becerra.**

The administration “announced Tuesday that it’s seeing a big uptick in the number of new customers buying private health insurance...nearly “3.4 million people...signed up for coverage.” HHS Secretary Xavier Becerra told The Associated Press, “When we look at the demographic details about the new enrollees, but Becerra said he hopes the agency is reaching people in marginalized communities, including a number of Black, Latino and Native Americans who sought coverage.” Axios reports HHS Secretary Xavier Becerra on Tuesday told Axios that enrollment through Affordable Care Act marketplaces is “on track” to ACA plans as employers and insurers grapple with higher premiums and higher out-of-pocket costs.” Almost a 17% increase to 19 – a 17% increase from last year, according to HHS data.” Becerra said, “I think we’re going to continue to see

[Axios](#) (11/22, 93K) reports that in 2021, “a record-breaking 14.5 million people signed up for 2022 healthcare coverage through the ACA.” For 2023, “92% of enrollees will have access to options from three or more insurance companies when they sign up.”

### **Guidance on Minimizing Risks Associated With Long COVID.**

A report from HHS suggests masking and social distancing as measures to protect against people developing long COVID. The report “calls for a broad range of government policies to help people who continue to deal with the lingering effects of COVID-19.” The report states that “learning from the experiences of long COVID patients is essential to accelerating understanding and breakthroughs.” HHS Secretary Xavier Becerra said, “Public spaces would help people avoid long COVID.” [Axios](#) (11/22, 93K) reports the analysis “was based in part on interviews with more than 60 people” and that included “patients with long COVID and health care providers.” Levine added, “many people with long COVID avoid public spaces and events due to a fear of infection and health impacts. Some may experience PTSD symptoms as a result of trauma they incurred during their acute illness.” [Axios](#) (11/22, 93K) reports the CDC “defines Long COVID as experiencing symptoms for three months after” patients’ initial COVID-19 symptoms.” Becerra “extended the [COVID-19 pandemic] public health emergency until Jan. 11, 2023.”

### **Federal Agencies To Permanently Extend Telehealth Flexibility To Prescribe Medication For Opioid Use Disorder.**

[Axios](#) reports that on Tuesday, DC Attorney General Karl A. Racine (D) “joined a bipartisan coalition of 45 attorneys general

---

s beyond the expiration of the coronavirus public health emergency for prescribing buprenorphine, an FDA-sanctioned substance. In a letter "to U.S. Attorney General Merrick Garland, Health and Human Services Secretary Xavier Becerra, DEA Administrator Michael S. Levine," explained in the letter that since the start of the pandemic...the DEA allowed audio-visual telemedicine services for buprenorphine prescriptions "once the public health emergency is lifted."

### **Promote Telehealth Amid Concerns Of Potential Abuse.**

Health Affairs (2021, 40K) reports, "States around the country are racing to find the best way to promote continued use of telehealth services." More than "two dozen states have introduced some form of 'payment parity'...in order to create incentives for providers to use telehealth." The number of telehealth visits conducted through telehealth in 2020 increased 63-fold, from about 840,000 in 2019 to 52.7 million, according to the U.S. Department of Health and Human Services for Planning and Evaluation." Former HHS Secretary Alex Azar is mentioned.

---

### **Addressing Baby Formula.**

Health Affairs (2021, 40K) reports, "During the spring and summer, many families were impacted by the nationwide baby formula shortage." The Arkansas Department of Health recommends that those struggling should reach out to their local health department for assistance in obtaining the formula their babies need."

---

### **"MPOX" In Effort To Destigmatize The Virus.**

The World Health Organization is planning to rename monkeypox, designating it as 'MPOX' in an effort to destigmatize the disease. This follows an initial agreement the WHO made over the summer to consider suggestions for monkeypox's new name." It is also "a sign of the WHO's commitment to change the name and suggested the U.S. would act unilaterally if the international body did not move forward with the story.

---

### **Vaccine Provides 78% Protection Against Virus, UK Data Show.**

A single dose of the monkeypox vaccine provides 78% protection against the virus, according to data from England released by the UK Health Security Agency. This "new analysis reviewed data for the Bavarian Nordic vaccine in England between July 4-Nov. 3, 2021." The vaccine was found to be 78% effective 14 days after being vaccinated, while a second dose is expected to offer even greater and longer lasting protection. The UK findings "echo a report from September from the U.S. Centers for Disease Control and Prevention, which also found 78% effectiveness." The CDC found "that people who were eligible for the vaccine but had not gotten the shot were 14 times more likely to get infected."

---

### **Optimistic US Is Better Prepared To Tackle Winter COVID-19 Surge.**

---

ere, Mueller, 20.6M) reports on its front page, "Federal health officials expressed optimism on Tuesday that the nation compared with a year earlier, and they renewed their pleas for Americans to get an updated booster shot ahead of the director Dr. Anthony Fauci "said the administration was hopeful that the combination of infections and vaccinations had "what we saw last year at this time" when a brand-new variant, Omicron, emerged seemingly out of the blue." For his said he was confident about the holiday season as long as Americans continued to get vaccinated and boosted." The

### **for COVID-19 Vaccination Drives.**

ication, 4K) reports HHS announced a new program aimed at supporting healthcare centers that provide COVID-19 \$350 million to such clinics across the United States, supports "mobile, drive-up, walk-up, and other community-b normally funded by the Health Resources and Services Administration.

n, Subscription Publication, 215K) reports Tuesday's "announcement comes one week after President Joe Biden ask data show that as of Nov. 15, "more than 228 million people had gotten their first two shots, and 35.3 million people

### **COVID-19 Booster Shots Offer More Protection Against Symptomatic Infection.**

mericans who got the updated COVID-19 booster shots are better protected against symptomatic infection than those first look at the new shots' real-world effectiveness shows they work, said Dr. Anthony Fauci, the nation's top infectious disease expert before he retires from the government at the end of year...said what 'may be the final message I give you from the updated COVID-19 shot as soon as you're eligible.'" CDC study lead Dr. Ruth Link-Gelles said that "people getting the original COVID-19 vaccine at least eight months earlier."

that "bivalent boosters were just 43% effective at preventing mild illness compared to receiving no vaccine in adults on study published Tuesday." According to the study, "in those aged 50 to 64 years, comparative protection against illness was 65 and older."

reports the study found that "when given eight months or more after a prior COVID shot, relative vaccine effectiveness against symptomatic disease was 56% among people aged 18-49 years, 48% among those 50-64 years, and 43% among persons aged 65 and older." The study "data were published in the *Morbidity and Mortality Weekly Report*."

cludes [NBC News](#) (11/22, Lovelace, 4.91M), [CNN](#) (11/22, Goodman, 89.21M), [The Hill](#) (11/22, Choi, 5.69M), [Roll Call](#)

### **Paxlovid.**

reports, "The game-changing antiviral" Paxlovid "swooped in during the pandemic's worst winter with the promise of saving lives...death rates have hardly budged." And according to the White House, "the problem is not the drug but the fact that more than one-third of America's 80-plus-year-olds with COVID ended up taking Paxlovid." Although one issue may be a lack of antiviral drugs." Gutman-Wei writes about discussions with physicians on who is not taking Paxlovid, and why, which is a political polarization. CDC Director Rochelle Walensky and White House Chief Medical Adviser Anthony Fauci are men

### **Negative COVID-19 Tests For Return After Thanksgiving.**

(D.52M) reports public schools in Washington, DC are requiring personnel and students to produce a negative COVID-19 test. The schools "started distributing coronavirus test kits on Thursday" and "families can also pick up test kits at any of the schools." The schools are not testing in schools but said campuses could consider testing." The schools report "the tests need to be taken on Sunday, Nov. 27, and results must be uploaded the same day to the D.C. Public Health Department." The schools, regardless of vaccination status, won't be allowed to return to in-person school activities until completing an isolation period, the schools also reports.

### **COVID-19 Restrictions For Visitors.**

The Chinese city of Shanghai has imposed new restrictions for people coming into the city over the next week. Visitors will be required to "stay" and those venues include "restaurants, pubs, shopping malls, supermarkets and wet markets." The restrictions are in effect until the end of the month.

### **Update On COVID-19 Pandemic.**

The World Health Organization (WHO) announced new COVID-19 pandemic statistics on Tuesday. The agency stated "the number of cases in China in the past three weeks and the daily average is rising." The increase in infections adds "to pressure on officials to get people back to their homes." A WHO spokesperson said, "some provinces are facing the most severe and complex challenges."

### **Additional Vetting For COVID-19 Test Manufacturer IPO Applications.**

The Chinese government announced stringent requirements for proposed public listings for companies that manufacture COVID-19 tests. The requirements for listing applications comes "in response to media reports voicing concerns over fundraising plans by beneficiaries of the COVID-19 relief fund." The government said, "We Biotech Co Ltd, have obtained the regulatory green light recently to sell shares publicly" but the stock exchange is still reviewing the application.

### **Workers Carrying Concerns About Contracting COVID-19.**

A new Gallup poll reveals worker sentiment toward COVID-19 risks. Gallup's new survey that the company published on Tuesday shows that "70% of workers are 'very' or 'moderately' concerned about COVID-19 exposure at their workplace." That represents "a decrease of 7 percentage points from the survey conducted in July" but also "a higher proportion of white-collar workers than blue-collar workers said they were worried about contracting the virus."

### **Millionaires Excluded From Expanded Unemployment Benefit Programs.**

New data from the Internal Revenue Service show that thousands of millionaires have received unemployment benefits. The IRS reported that "1.1 million in 2020 also collected jobless assistance that year" and "that included 4,500 people who earned between \$1 million and \$5 million in 2019." The IRS also reported that "the average benefit was \$13,900. Among the factors behind the data were "expanded benefits approved by Congress to fend off an economic downturn."

---

---

### **COVID-19 Pandemic Statistics.**

6M) reports new statistics regarding the COVID-19 pandemic in Michigan. As of Tuesday, "the Michigan health department reported 11 new fatalities. On Monday, "Michigan had a positivity rate of 11.2%."

6M) reports the seven-day average for new COVID-19 infections amounts to "a 30% decline from a daily average of 1,600 cases reported this last week." All public health departments in the greater Detroit area are adhering to CDC "guidelines that were updated last week." The U.S. Department of Health and Human Services and the Food and Drug Administration "signed off on updated versions of the mRNA vaccines developed by Pfizer and Moderna." The daily average for new cases in Michigan "dipped below 1,000 for the first time in seven months." However, "the rise in at-home testing."

### **Involving COVID-19 Pandemic Unemployment Benefits.**

Court has granted a motion to dismiss a lawsuit that sought to limit the power of the state's governor in terms of terminating unemployment benefits. The benefits, which came to \$300 per beneficiary and were initiated early on in the COVID-19 pandemic, were set to expire in September. The attorney for the plaintiffs stated "he will continue to fight in the state's lower courts for the benefits to be paid."

### **Diverge From Statewide Norms In Nebraska.**

According to the CDC (245K) reports the state capital of Lincoln represents somewhat of an outlier regarding the COVID-19 pandemic. In Lincoln, Nebraska, Lincoln's count was "down slightly from 273 the previous week" to 259. CDC data indicate "cases in Nebraska are down from 273 the previous week." Additionally, according to HHS, "there were 718 flu-related emergency room visits a week in Nebraska recorded the previous week."

### **Associated With Deadly COVID-19 Outbreak.**

Princess Cruise Lines has restored one of its ships to service that was associated with an outbreak of COVID-19 in March 2020 after COVID-19 infections "resulted in more than a dozen deaths and over 700 cases." On Tuesday, though, the ship was not yet back in service.

### **Approved For Premier Medical Laboratory COVID-19 Test.**

The Food and Drug Administration has issued an emergency use authorization for a COVID-19 test manufactured by Premier Medical. The test's evaluation of the results "may only be performed by CLIA-certified laboratories designated by Premier Medical."

### **COVID-19 Pandemic In Private Meeting With Chinese President.**

AP) reports the White House says President Joe Biden discussed fentanyl exports and the origin of the COVID-19 pandemic in a private meeting with Chinese President Xi Jinping. A spokesperson for the Biden Administration said "the President raised both" issues after "Republican members of Congress raised the issues." Biden said "we need to address the problems. CDC data indicate "the COVID-19 virus has killed 1,073,115 Americans."

### **COVID-19 Among Emergency Room Patients In 2020.**

AP) reports new CDC data indicate a lower occurrence of COVID-19 infections among emergency room patients in 2020 compared to 2019.

---

---

7% of hospital emergency room visits in 2020 involved any mention of COVID-19" and "among 131 million ER visits, 0.3% mentioned a suspected COVID-19 case." The National Center for Health Statistics further revealed "another 0.3% mentioned suspected COVID-19 cases of the virus." However, "the numbers cover 'the very early stages of the pandemic' before medical professionals were fully aware of the virus."

### **Testing Sites In DC Area.**

(626K) reports Curative is shuttering its COVID-19 testing sites in the Washington, DC area. Curative cites a pending lawsuit by health insurance plans. Starting Nov. 30, "all but one of the sites operated alongside Arlington County will close by Dec. 15."

### **Against Medical Disinformation.**

(476M) reports on disinformation and misinformation propagated on far-right websites regarding healthcare. The article discusses medical issues like the effectiveness of ivermectin against COVID-19, which the Food and Drug Administration has warned against. "Fauci stated, 'the people who have correct information, who take science seriously, who speak out against scientific misinformation.'" Fauci stated, "the people who have correct information, who take science seriously, who speak out against scientific misinformation, need to speak up more." Fauci and Surgeon General Dr. Vivek H. Murthy are addressing the alleged censorship of viewpoints on the pandemic on social media.

### **New Jersey.**

(476M) reports on an increase in COVID-19 cases in New Jersey. According to public health officials in the state, "New Jersey has seen a 10% increase in cases from a week ago." CDC standards for COVID-19 risks indicate "six New Jersey counties...have 'low' community transmission." Additionally, "the statewide positivity rate for tests conducted Thursday...was 8.03%," below the CDC's threshold of 10%.

### **Vaccines In Nursing Homes.**

(476M) reports the Centers for Medicare and Medicaid Services and HHS are urging opioid use disorder treatment and COVID-19 treatments and vaccines. New CMS guidance stated, "nursing homes, in particular, should review and reduce the risk of respiratory infections are more commonly transmitted." CMS data show "as of Nov. 6, only 24.4%" of nursing home staff are fully vaccinated.

### **South Carolina On The Decline.**

(476M) reports on updated COVID-19 pandemic statistics for South Carolina over the past week. As the state reported 2,800 new COVID-19 cases [for] the week of Nov. 19," it "also said there were 16 new deaths related to the virus and hospitalizations decreased 14 percent. COVID-19 declined 5 percent in South Carolina compared with the previous week, and hospitalizations decreased 14 percent. "Further mutation of the BA.5 strain of Omicron, now dominate among the COVID-19 viruses sequenced" in the United States.

### **New COVID-19 Testing Requirements For Residents.**

(476M) reports Shanghai in China has revamped mandatory testing protocols for its residents. According to city officials Tuesday, they "will require all residents to undergo a COVID-19 test every 7 days." The aim of the new testing is "to detect infected people as soon as possible, cut off the transmission chain, and curb the spread of the virus."

---

---

### **What United States Citizens Use Masks To Limit Risk Of Long COVID.**

(7.45M) says HHS' recommendation that Americans use masks to control their risks of suffering from long COVID is "not a silver bullet" and "not a winter" and government studies indicate the chance of developing long COVID is 7% plus "lower if you're vaccinated." HHS wants to let people decide for themselves."

### **At-Home COVID-19 Test Results.**

The National Institutes of Health at the Department of Health and Human Services has launched a website intended to improve MyTestCount.org, is intended to encourage the anonymous reporting of test results by providing users with a streamlined reporting process. The program is part of a new Rapid Access Diagnostic (RADx) technology program and was supported by the National Institute of Biomedical Imaging and Bioinformatics.

### **US To Repeal Vaccine Mandate For Healthcare Workers.**

Reports, "A coalition of attorneys general from 22 states have filed a petition under the Administrative Procedures Act to require healthcare workers to receive full COVID-19 vaccination and any related guidance." CMS in November 2021 announced "Healthcare facilities must ensure staff are fully vaccinated or risk losing Medicare and Medicaid funding." The petition "claims that the federal government is oversteering and infringing on the states' right to make their own laws, as well as exercise their policing power, including compulsory vaccination."

### **Weighing Risks Of Attending Holiday Gatherings.**

(5M) reports physicians "and public health experts who are caring for immunocompromised family members or who are traveling on crowded trains and planes, indoor dinners and big get-togethers for the third year in a row." Five health experts who are

### **Precautions During Holiday Season Amid Rise In COVID, Flu, RSV Cases.**

Experts say that the holiday season will make it "feel like a return to normalcy for many families," experts "say they don't want to see a resurgence of diseases like RSV and flu are making a big comeback." UC Davis Health's Dr. Dean Blumberg said, "We are seeing a rapid rise in RSV cases. It's good news that COVID isn't spiking right now." Before gathering with others, "Blumberg said one of the most important things is to wear a mask, ignoring it is not worth the risk."

---

### **Hemophilia B Gene Therapy.**

The Food and Drug Administration cleared" the first gene therapy Hemgenix, a "\$3.5 million one-time" IV treatment "for a rare form of hemophilia B." The company set a high price tag shortly after the FDA approval, saying its drug would ultimately reduce health care costs because patients would not need regular infusions. However, "the price appeared to exceed that of several other gene therapies priced upwards of \$2 million." The FDA's decision "represents an important milestone for patients with hemophilia B and represents important progress in the development of innovative therapies." The Australian drugmaker CSL Ltd said, "We are confident this price point will generate significant cost savings for the overall health system."

---

agency credits to the automated process it utilizes to determine eligibility for the program.” The improper payment rate was 21.69%.” CMS Administrator Chiquita Brooks-LaSure said the “low rate of improper payments in the Federally-facilitated program integrity, furthering the Biden-Harris Administration’s goal of maintaining the long-term sustainability of CMS’ fraud.

## Reduce Emissions.

scription Publication, 215K) reports, "The Agency for Healthcare Research and Quality has tips for how healthcare organizations can reduce greenhouse gas emissions." The AHRQ and the Institute for Healthcare Improvement suggest hospitals do these five things to meet that goal: "transition to energy-efficient solutions for pharmaceuticals and medical devices," minimize excess use and leaks of anesthetic gases,

## ic Receives \$400K IHS Grant To Address Alzheimer's Disease, Dementia.

pp, 587K) reports, "A Native American health clinic in North County [California] has received a \$400,000 grant" from patients living with Alzheimer's disease and dementia." The grant "will be used by Indian Health Council to hire a nurse cognitive decline."

## Republican Lawsuit Alleging Government Collusion With Social Media Companies To Sensor COVID-19-Related Content

ts, "Dr. Anthony Fauci will sit for a deposition on Wednesday as part of a Republican lawsuit against the Biden administration for censoring free speech related to COVID." Last month, a federal judge decided "that Fauci's high-profile public comments were 'inconsistent with the First Amendment' in Missouri and Louisiana." They "first filed the lawsuit in May, and accused top-ranking government officials of working to 'suppress the free use of combating misinformation' in order to achieve greater censorship."

Desrochers, 519K) and the St. Louis Post-Dispatch (11/22, Erickson, 694K) also cover the story.

**Communications Strategy.** The Center Square (IL) (11/22, Mueller) reports that on Tuesday, Fauci “defended and promoted his strategy to counter misinformation and disinformation is to do whatever you can, as often as you can, to provide correct information and disinformation seems to be tireless in that effort and it’s going to be very difficult.”

## Baucus's Final White House Briefing.

The New York Times (11/23, Bendix, 20.6M) reports on NIAID Director Anthony Fauci giving his final White House Briefing. Fallon said, "I think he's got it right. I mean, you can't go home and say, 'Well, I'm going to get some bleach, go nuts.'" Fallon added, "Dr. Fauci is 81 years old. Today, Biden was like, 'Congrats on your early retirement.' He's been doing this since the beginning of the coronavirus briefing before retiring at the end of the year. And you can tell he's kinda given up, because he gave the last one."

## Common During Holiday Season, Experts Say.

s that according to American Addiction Centers CEO Thomas Britton, the holidays can “lead to increases in stress, is accidents, and other adverse effects of large amounts of drinking.” Britton “and other experts say there are healthy ways to celebrate with you and having an exit strategy in case things get too tempting.” National Institute on Alcohol Abuse and Alcoholism “advise to limit yourself to standard drinks.” Koob “said the USDA recommends no more than two alcoholic drinks per day.”

---

### **House Pause Federally Funded Gain-Of-Function Research.**

“Senate Republicans are demanding that the White House pause all federally funded gain-of-function research, which is a major goal of the House. On Tuesday, five senators sent a letter to White House Office of Science and Technology Policy Director Dr. Arati Prabhakar demanding that the White House pause all federally funded gain-of-function research.” They wrote, “We are extremely troubled about the enduring culture of noncompliance at NIH and the alarming number of [gain-of-function] research projects, enforce grant requirements, or conduct appropriate research risk assessments.”

### **NIDA Director Says.**

“Safe consumption sites have proven useful in saving patients from overdosing, a top federal drug official said. “We need to look at it as a solution in context.” She also “stressed that clinics providing the service have reported success.”

---

### **Settlements.**

“Pfizer Inc. and Janssen Pharmaceutica Inc. have finalized the terms of settlements worth more than \$6.6 billion to resolve litigation over the marketing of opioid painkillers, the companies and lawyers for the governments said Tuesday.” Under the settlements, “Pfizer will pay up to \$2.37 billion, while Janssen will pay up to \$2.37 billion.”

### **Crisis Litigation Funds.**

“The report states that states are beginning the high-stakes task of deciding how to spend billions of dollars” worth of opioid crisis litigation funds. “The report also states that states and communities across the country that have borne the brunt of the opioid crisis.”

### **Tests By Distributing Fentanyl Test Strips Despite It Being Illegal.**

“Brittany Kelly has given away thousands of [fentanyl] test strips around the Fayetteville, Arkansas, community” even though “it is illegal to distribute fentanyl test strips.” Kelly “is aware that what she is doing is technically illegal, but insisted the tests can save lives.” She “plans to introduce legislation to change the law during next year’s session.”

### **Opioid Business.**

“The Wall Street Journal (WSJ) reports “a New York judge has confirmed Gil Kerlikowske, a former national drug czar in the Obama administration, will receive \$25,000 a month if the company reorganizes in bankruptcy court, it “will pay him up to \$25,000 a month, according to court documents.”

### **In Opioid Settlement Money.**

“The Wall Street Journal (WSJ) reports, “More than \$30 million in settlement money is coming to Louisville to help fight opioid addiction.” The Louisville Wellness Chief of Staff Taylor Ingram, “the money from the settlements will be used to go toward treatment and prevention services. “The goal is long-term recovery by funding transportation and housing for people working to recover from addiction and to support people in recovery.”

### **Experiencing Anxiety, Few Have Tried "Gold-Standard" Exposure Therapy.**

6M) reported that while "one in 11 American children has an anxiety disorder," a figure that has been "growing stea  
py, which is "considered a gold-standard approach for tackling anxiety, phobias and obsessive-compulsive disorder  
nths and has minimal side effects." However, "financial barriers and a lack of providers have kept the treatment out

---

### **illion Surprise Bills, Data Indicates.**

---

e, 93K) reports that up to “9 million surprise medical bills have been prevented since January due to the impact of the new law,” says the National Business Group on Health Insurance (NBHI).” Such claims “were subject to the protections of the law, which limit out-of-pocket costs for individuals with private health insurance to 5% of their income for in-network services.” The law also requires insurers to cover 9 million NSA eligible claims, or about 0.5% of all commercial claims. Of these, 275,000 were submitted to IDH for review. “We’re seeing a lot of savings for consumers,” says the law’s author, Sen. Ron Wyden (D-OR). “It’s a win-win for everyone.”

### **Discourage Health Benefit Cutoffs During Labor Disputes.**

Supports California assembly member Jim Wood “is hoping a new California law he authored will dissuade employers from cutting health benefits for workers to maximize state subsidies for coverage purchased through Covered California, the state’s health insurance marketplace.” The law, which was passed by the California Labor Federation, California Teamsters Public Affairs Council, and the Los Angeles County Federation of Labor, would require employers to cover workers as if their incomes were just above the Medicaid eligibility level.” However, “even when workers do qualify for Medicaid, they often lose their health insurance when they have a labor dispute. That’s a problem because health insurance is often the only way workers can get the care they need,” says Wood. “We’re hoping this law will encourage employers to keep their workers covered as if their incomes were just above the Medicaid eligibility level.” However, “even when workers do qualify for Medicaid, they often lose their health insurance when they have a labor dispute. That’s a problem because health insurance is often the only way workers can get the care they need,” says Wood. “We’re hoping this law will encourage employers to keep their workers covered as if their incomes were just above the Medicaid eligibility level.”

### **Support From Employers Rethinking Their Offerings For Women’s Health Benefits.**

Menopause – a condition that’s little discussed and poorly understood – is gaining more attention from employers rethinking their health benefits. “Experiencing telltale symptoms like hot flashes, fatigue and mood swings is becoming more essential after the pandemic,” says a spokesperson for a major employer. “It’s important to make sure our employees have the support they need to stay healthy and productive.” The support “dovetails with a reassessment of reproductive health benefits for younger workers, particularly those who are planning to start a family. It’s about covering treatments for hormonal changes, bone density, heart health and other symptoms associated with menopause.” Sen. Amy Klobuchar (D-MN) and Cindy Axne (D-IA) in September “introduced the ‘Menopause Research Act’ which would put \$100 million into

### **Limiting Abortion Ads.**

Sen. Mark Warner (D-VA) and Rep. Elissa Slotkin (MI-D) “on Tuesday urged Google to do more to ensure that ads only reflect what is actually offered.” In 2019, Google brought in a policy “that requires those advertising alongside search queries related to abortion to include a link to a website that provides information about the procedure. However, the legislators “expressed concern that the search giant does not consistently apply those rules, which can lead to misleading information being shown to visitors to keep their pregnancies.” A spokesperson for Google said its staff “regularly review our policies and have

### **Limitation Of Abortion Pills Using Wastewater Regulations.**

“Abortion opponents and their allies in elected office are seizing on an unusual strategy after suffering a wave of electoral defeats in recent years,” says a spokesperson for a major employer. “The two “pills mifepristone and misoprostol...have become the most common method of abortion in the U.S. for many years. Last week a petition asked the FDA “to require any doctor who prescribes the pills to be responsible for ensuring they are properly disposed of and treated as medical waste rather than flushed down the toilet and into the wastewater.” And “if the FDA ignores the petition, we plan to sue the agency with the conservative legal powerhouse Alliance Defending Freedom.” The Center for Drug Evaluation and Research (CDER) is currently reviewing the petition.

### **Lawsuit Bolsters Idea Of Term Limits For Supreme Court Justices.**

The [New York Times](#) (11/22, 20.6M), “The most striking detail in the recent investigation by The New York Times is that Justice Samuel Alito or his wife may have leaked information to conservative friends in 2014 about the outcome of” a lawsuit filed by a group of women against the Supreme Court.

---

h a number of Republican justices, Alito included, appear to have been the targets of a sophisticated and well-funded effort for moneyed and conservative interests as the justices were willing to give." Bouie says, "Long tenure – and in the process, an air of arrogance and contempt for the public." That is why most Americans currently support term limits for Supreme Court justices.

### **Supreme Court Must Focus On Professional Ethics.**

(11/22, 10.52M), Ruth Marcus says the "Supreme Court must get its ethics act together" following "a string of embarrassing incidents that suggest that justices, to step aside from involvement in any case in which their impartiality 'might reasonably be questioned.'" She says, "The Court is about their behavior...and the signals that," they are sending, "especially when they accept travel and entertainment from private parties."

### **Supreme Court On Alito Over Alleged 2014 Leak.**

(11/22, Subscription Publication, 8.41M) criticizes the political campaign against the US Supreme Court. The Journal says, "Samuel Alito leaked his decision in a lawsuit challenging the ACA's contraception mandate."

### **Another Leak May Cause Americans To Lose Trust In The Supreme Court.**

(11/22, 10.52M) op-ed, "The Supreme Court's reputation was already in question when The New York Times released an exposé about anti-abortion groups allegedly getting tipped off in 2014 about a yet-to-be-released blockbuster decision." Ziegler says the Supreme Court "seems convinced that it can continue on its current trajectory no matter how unimpressive its performance is," and the court will lose touch with the will of the people." Should that happen, it would prove "dangerous" to the institution.

---

### **Employees Allegedly Inappropriately Breached Patient Records.**

Kaiser Foundation Health Plan of the Mid-Atlantic States "has reported that it discovered unauthorized access to its electronic medical records for more than 8,500 individuals." Kaiser Permanente determined "that one of its employees inappropriately accessed patient records on a regular basis," and the employee is "no longer working for the company" following an internal investigation. No "social media posts" were found, and there is "no evidence that the accessed information" was "shared or used to commit fraud, the company said."

---

### **Supreme Court Decision Title 42 Before December Deadline.**

(11/22, 10.52M) reports, "Fifteen states have intervened to try to keep in place a pandemic-related policy that allows the government to push new security measures on the southern border." The motion to intervene aims to "delay a court order issued by the Supreme Court on Dec. 21." In May, a group of 24 Republican states secured an injunction "to maintain the expulsion policy" after the CDC determined that it was no longer needed to protect public health." A group of 15 conservative states "is making a last-ditch effort to keep in place a Trump-era public health rule that allows the government to keep migrants from seeking asylum at the border, based on the need to help prevent the spread of disease."

---

---

er enforcement as Republicans are about to take control of the House from the Democrats following midterm elections." ACLU lawyer Lee Gelernt said, "Title 42 is not about asylum general border enforcement but public health, and the

ports the states "argued in their Monday motion that they should be allowed to continue defending the Title 42 policy to represent the State's interests in the continued validity of Title 42." The filing said, "Federal Defendants have essential further arguments in support of it, let alone make all arguments that the States would press."

ers (11/22, Hesson, Cooke), the [Arizona Republic](#) (11/22, Perez, 1.05M), [The Hill](#), (11/22, Schonfeld, 5.69M) and the

### **Season Amid Higher Food Prices, Declining Donations.**

ports, "Food banks across the country will enter this holiday season with their resources strained as inflation continues. Many food bank warehouses are more thinly stocked than in recent years, said Katie Fitzgerald, chief operating officer for food banks across the country." In Feeding America's network, over 40% of food banks "are running a budget deficit

### **Services Draft Report Highlights Allegations Of Racial Bias Against Agency.**

0.6M) reports on allegations of racial bias against New York City's Administration for Children's Services. Now, it "turns equity audit the agency commissioned but never publicly released." A draft report based on "a 2020 survey of more than Brooklyn and the Bronx, along with many parents and advocates, described a 'predatory system that specifically targeted the report said, "Black and brown parents are treated at every juncture as if they are not competent parents capable

### **g Bike Lanes Hinder Safe Parking For People With Disabilities, Violating ADA.**

.52M) reports, "A lawsuit filed by two disabled women this week accuses the District of adopting protected bike lanes in violation of the Americans With Disabilities Act." The plaintiffs are "seeking to have the District Department of Transportation rethink its approach to the city." They allege that the "design makes it difficult for people who use wheelchairs or walkers to get safely from

### **Improving \$50M Paratransit Contract.**

6M) reports, "Detroit City Council approved then reversed its vote on a five-year, nearly \$50 million contract to provide paratransit service and responding to community complaints about the contractor." The current provider, "Transdev, would have to take on much of the administrative responsibilities that riders complained about previously." Multiple "paratransit riders and advocates contacted with Transdev or for a shorter contract period after facing multiple issues with the provider's service, such as late

### **abling Environment For People With Disabilities.**

1), Northwest Center Employment Transformation Collective Senior Director Nora Genster writes, "American employment is not designed for disabled, neurotypical and unchanging." However, "the reality is as many as 25% of job seekers and current employees are disabled." Americans cope with long COVID-19." She adds, "For many disabled people, inaccessible environments and workplaces

---

cludes, "To create an enabling environment, employers must prioritize a culture of accommodation."

---

### **Disproportionate Number Of TV Ads For Sugary Drinks, Snacks, Researchers Say.**

) reports, "Black and Hispanic consumers are targeted with a disproportionate amount of TV advertisements for sugary drinks and snacks, which are linked to more diet-related diseases such as diabetes, researchers found." Black "youth and adults see between 9% to 20% more ads for sugary drinks and snacks than white consumers. These ads "often feature rap and youth-oriented themes, according to the recent study."

---

### **Key Part Of Medicare Advantage Plan For Retired NYC Workers Unlawful.**

erfeldt, 2.51M) reports New York City "Mayor Adams' administration suffered another setback Tuesday in its effort to force retirees to join a Medicare Advantage plan. A federal appellate court upheld a ruling that deemed a key part of the plan unlawful." The effort was "contingent on the administration's ability to force retirees to stay on their traditional Medicare coverage instead of accepting the" Medicare Advantage plan. But in March, "Mayor Adams' administration ran afoul of" local law 12-126 "that requires the city to provide retirees with premium-free health coverage for life."

---

### **Large Medicare Overpayments In Medicare Advantage.**

26K) reports, "Government payments to Medicare Advantage plans are riddled with overcharges and errors, newly released audits show. The audits found \$650 million in net overpayments for about 18,000 patients, according to the audits obtained by Kaiser Health News through a Freedom of Information Act request. The government wants to recover \$650 million," although "that hasn't happened yet because the calculations haven't been finalized."

---

### **Wyoming Medicaid Expansion.**

40K) reports, "Lawmakers in the 67th Wyoming Legislature will decide whether to expand the state's Medicaid program. The House Health and Human Services Committee voted "to sponsor a bill that would allow the Wyoming Department of Health director, insurance commissioner, and the state health services to obtain a state amendment," which "would provide Medicaid coverage for all individuals described under the federal Medicaid law with income below a certain amount."

---

### **Hypocalcemia In Patients With CKD Treated With Prolia.**

ption Publication, 4K) reports the Food and Drug Administration "is investigating the risk of severe hypocalcemia with the use of the osteoporosis medicine Prolia in patients with advanced kidney disease on dialysis treated with the osteoporosis medicine Prolia." The "FDA review of interim results of a clinical trial found a higher risk of hypocalcemia, or low calcium levels in the blood, in patients with advanced kidney disease."

### **Significant Production Increase Of Biosimilars.**

"Generic drug makers Teva Pharmaceutical Industries and Sandoz say they are planning a significant ramp-up in production of generic versions of drugs for conditions such as rheumatoid arthritis and cancer – aiming to increase their share of an expanding market." Teva and Sandoz executives say they plan to increase production of Teva's top-selling arthritis drug, which came off-patent in Europe and is due to come off-patent in the U.S. next year. However, both Teva and Sandoz "face commercial and regulatory challenges," and the US "FDA typically expects additional data for a generic drug to be approved, particularly for a biologic, which would allow it to be automatically replaced with a biosimilar at the pharmacy counter."

### **Lawsuit Against Hikma Pharmaceuticals Over Generic Version Of Heart Disease Drug Vascepa.**

By Yasiejko, Griffis, Subscription Publication, 4K) reports, "Drugmaker Amarin Pharma Inc. asked the Federal Circuit to reverse a 2015, 9th Circuit court order clearing it to market a generic alternative to Amarin's heart disease drug Vascepa." Amarin is appealing the 9th Circuit's decision. A 4th district court opinion that found Hikma did not induce infringement of Amarin's patents with a 'skinny' label of its generic version of Vascepa.

### **Investor Interest Ahead Of FDA Decision On Lung Cancer Treatment.**

Reports, "Cancer drugmaker Mirati Therapeutics Inc. is attracting fresh takeover interest from large pharmaceutical companies, sources said." Mirati "has been weighing strategic options including a potential sale for some time, said the people, who asked not to be named."

Mirati has become a more attractive target for companies seeking to expand their cancer treatment offerings since large pharmaceutical companies are looking for ways to diversify their portfolios. "The company's decision to pursue a sale is due to the company's lung cancer treatment adagrasib by Dec. 14, and an approval will make the company more attractive," said a source on the report."

### **Keytruda Met Main Goal For Treating Type Of Gastric Cancer.**

Merck & Co Inc said on Tuesday its therapy involving cancer drug Keytruda in combination with chemotherapy met the main goal of a key study designed to show it was better than an existing treatment on the market, stoking hopes for approval. The combination "showed a 'statistically significant' and 'clinically meaningful' improvement in overall survival compared with chemotherapy as a standalone treatment, the drugmaker said." Merck cited the study and said the "treatment also helped reduce the risk of death."

Also reports the story.

### **Blood Cancer Drug Blenrep In US After Failing Key Study Goal.**

GlaxoSmithKline (GSK) will stop selling its blood cancer drug Blenrep in the United States, it said on Tuesday, in another setback for the British drugmaker. GSK said the drug failed the main goal of a key study designed to show it was better than an existing treatment on the market, stoking fears it would be withdrawn. On Tuesday GSK said it has begun the process to withdraw Blenrep's marketing authorisation...but would continue trial production in the UK for continued access to the treatment." GSK Chief Medical Officer Sabine Luik said in a statement, "We will continue to work on this important treatment option for patients with multiple myeloma."

### **Helps Hospitals Reduce Impact On Climate Crisis.**

As the world stares down the barrel of climate change, the health care system – which is responsible for about 9% of U.S. greenhouse gas emissions – has begun to take action. Hospitals “have held up telehealth as a prime strategy to cut down on carbon” by eliminating travel. “But while digital health is a promising tool, research into its impacts is still very nascent” and often focuses “on the marginal benefits of trading one form of emissions for another, such as electronic health records and e-prescriptions to online referrals and robotic surgery,” and emphasize the need to take a more holistic approach.

### **Help Slow Memory Decline, Study Says.**

A new study published in the *Journal of Nutrition* suggests that people who eat or drink foods with antioxidant flavonols could experience a slower rate of memory decline, according to a study of 1,000 people without dementia with an average age of 81,” found the flavonol kaempferol was “the most effective, according to the study. The *Journal of Nutrition* “suggests that increased physical activity, maintaining healthy blood pressure and practicing cognitive exercises may help slow cognitive decline rates.”

### **Study Links Lead Exposure To Educational Segregation And Lower Test Scores For Black Children.**

A new study published in the *Journal of Environmental Health Perspectives* (Jehp, 844K) reports lead exposure “has long been linked to poor educational outcomes,” and a “new study suggests that lead exposure may be a key factor in the educational achievement gaps in cities like Milwaukee.” The study “found an association between high levels of ‘racial segregation’ and lead exposure, while Black children “who had low lead levels and lived in highly segregated neighborhoods scored relatively similar to white children,” those who had “high lead levels and lived in very segregated neighborhoods had significantly lower reading test scores than those in more integrated neighborhoods.”

### **Nurse Accused of Sexual Assault, Allegations Cited For Serious Violations.**

A new report from the *Wisconsin State Journal* (WSJ, 844K) reports, “The nursing home in western Wisconsin where a nurse is facing felony elder abuse charges has been shut down by state regulators and failed to complete an investigation, according to a state inspection report.” Spring Valley Home Care, which has been operating since 1980, “has been cited for violations that fall into the most serious category, where a patient was in ‘immediate jeopardy.’”

### **Study Finds Benefits Of Acute Hospital-At-Home Technology.**

A new study published in the *Journal of the American Medical Association* (Jama, Subscription Publication, 215K) reports, “Health systems are increasingly investing in acute hospital-at-home technology to reduce the need for intensive care.” By equipping “patients’ homes with biometric devices, along with tablets and other ways to communicate with health care providers, acute hospital-at-home technology may reduce the need intensive care.” Some “safety groups and unions argue the tools, data and operational efficiency are insufficient to ensure patient safety.” However, “providers claim the technology, combined with in-person visits, has paved the way for a safe transfer of patients from the hospital to the home.”

### **Study Finds Disproportionate Risk Of Toxic Exposure Through Salmon.**

A new study published in the *Journal of Environmental Health Perspectives* (Jehp, 11/22, Schick, Miller, 235K) reports the Columbia River Basin is “contaminated by more than a century of industrial and agricultural chemicals,” and a “new study in the region “to weigh unknown health risks against sacred practices.” Tribes have “pushed the government to pay for more testing, but the federal government “has done so little testing for toxic chemicals in fish that even public health and environmental agencies admit they don’t know how much is safe to eat.”

---

ic about human health risks.” So Oregon Public Broadcasting and ProPublica did their own testing, and discovered “we face a disproportionate risk of toxic exposure through their most important food.” The testing showed concentrations in both Oregon and Washington’s health agencies deem unsafe at the levels consumed by many of the 68,000-plus today.”

### **Retooled eGFR Equation, Researchers Say.**

decades, health care providers have diagnosed kidney disease with blood tests that use an equation for estimating creatinine...in African Americans” until an expert panel in 2021 “recommended a retooled eGFR equation for a group of subjects.” The College of American Pathologists on Tuesday “published in the Journal of the American Medical Association that the country have adopted the new equation.” Within six months, a third of the surveyed laboratories “had already adopted the new equation by the end of the year.

### **Due To “Historical Hangups.”**

With so many potential viruses in play, it would be helpful if Americans had a way to distinguish between different ailments. Doctors decide when it makes sense to prescribe treatments like Tamiflu, which need to be started within two days of onset. “It’s not for lack of technology,” though “not for lack of technology.” The issue instead “comes down to historical hangups – and the need to find a way to get faster approval for over-the-counter tests like pregnancy tests.

### **Follow-Up Of Millions Who Have Had Preeclampsia.**

A growing subset of care providers is advocating for closer follow-up of the millions of people who have had preeclampsia or cardiovascular disease.” Considering “about one in three women in the U.S. have cardiovascular disease, better screening before they develop the disease in the first place.”

20.6M) reports jails “have become more fatal.” Deaths have “spiked in cities across the country, including New York, Ohio, and Georgia have also recorded statewide increases in deaths,” with COVID-19 only accounting for “part of the rising toll.” Jail health issues exacerbated by the pandemic and the repurposing of beds in solitary confinement, once available to the general public, jails “have also in many cases violated minimum safety standards or failed to provide adequate medical and mental health care to presumed innocent.”

### **Is Complicated.**

A care physician, writes in the New York Times (11/22, 20.6M) that the decision to start extracorporeal membrane oxygenation is “not without danger.” Patients on ECMO “cannot live outside the I.C.U. They need constant monitoring, often daily blood tests.” He concludes, “The greater ethical challenge comes in cases where ECMO could enable a patient to continue a life that might last for days or weeks or maybe even longer.”

### **Loss of Animals’ Humanity.**

---

acca, 20.6M) reports a "growing body of research suggests that farmed species are brainy beings: Chickens can and on one another's emotions." However, scientists "still know far less about the minds of chickens or cows than they r that has spent more than 35 years trying to end animal agriculture," has "always held that farm animals are sentient e group is now "trying to collect enough data to convince the general public of the humanity of animals."

### **bonuses To Executives.**

nedey, 855K) reports, "Bright Health Group is rewarding its executives with more equity awards, even as the compa a filing, the company disclosed that executives "will get 27.4 million restricted stock units (RSUs) as retention bonus

### **o Evaluate Pesticide's Impact On Endangered Butterflies, Bees.**

eral appeals court on Tuesday set a hard deadline for the U.S. Environmental Protection Agency to evaluate whether nblebees, which it called 'extraordinary' relief after the agency ignored an earlier ruling." According to the US Court 7 to evaluate the dangers of the insecticide cyantraniliprole, which it had registered without reviewing its impact on ensure its compliance with the Endangered Species Act (ESA)." subscription Publication, 4K) also covers the story.

### **sible Federal Sanctions.**

burn, Fallon, 388K) reports, "On the day the state-run Menlo Park veterans home faced possible federal financial sa team' to help fix problems with infection control and management amid an ongoing COVID outbreak." Murphy's act nursing home had placed its residents and staff in 'immediate jeopardy' of both a life-threatening illness and poten nclear whether Murphy's action will satisfy the U.S. Centers for Medicare and Medicaid Services, which imposed a d ould stop paying for new admissions."

### **Tobacco Companies Over Cigarette-Butt Litter.**

ity of Baltimore has launched what it called a 'first of its kind' lawsuit targeting tobacco companies Philip Morris, Alt discarded filters that cost millions to clean up every year." Baltimore's lawsuit "said the tobacco companies' refusal ut the dangers of discarded filters contributes to an estimated \$5.3 million annual bill for cleanup, paid primarily by ages from lowered property values and environmental harms." the story are the [Winston-Salem \(NC\) Journal](#) (11/22, Craver, 226K) and [WBAL-AM](#) Baltimore (11/22, Dacey, 6K).

### **on Flavored Tobacco.**

ch (11/22, 526K), guest columnist Molly Preston writes, "My son became addicted to nicotine four years ago, at the ted and scared as I am for my child, I realize that many other parents are in the same boat. Not only our high scho dds, "There's only one real solution for this health crisis, and that's to take this poison off the shelves and out of ou cco profits. I ask that our city's leaders do the right thing, the only thing, and end the sale of flavored tobacco in Co grocery store or a small vape shop, none of our retailers should be profiting from selling flavored tobacco products t

### **For Daughter's Gender Transition.**

A military veteran and his daughter filed a lawsuit on Monday challenging a federal rule they said prevents the daughter from receiving gender transition treatments. The lawsuit, filed anonymously through GLBTQ Legal Advocates & Defenders, "said the daughter has been denied treatments resulting from the exclusion of surgical treatments for gender transition in the military's medical coverage for the dependents of service members. When diagnosed with gender dysphoria and sought gender transition surgery to address the condition, the lawsuit stated, the military refused to pay for the surgery."

### **to Recover Healthcare Costs.**

A report from the Washington Post (4K) reports in a paywalled article, "An Arizona Native American tribe got another chance to receive funding for a health care program from the government, after a federal appeals court held that the relevant law doesn't preclude the payments. The Indian Health Care Act at least arguably requires the Health and Human Services Department to reimburse the San Carlos Apache Tribe for the costs of care for its members and third parties, the US Court of Appeals for the Ninth Circuit said."

### **Contract With Unionized Workers.**

The Philadelphia Inquirer reports, "Temple University's unionized health care workers secured a new contract this month that made its nursing staff feel more financially secure, giving them financial security to make them feel safer while working at the Philadelphia hospital." Temple's new contract "showcase[d] a more collaborative and aggressive." Now, other organized healthcare workers in the state are "looking to replicate their playbook." The report also mentions the issue of worker issues in health care, prompting a wave of resignations and retirements that strained an already thin workforce.

### **Hospitals At Risk Of Closure, Warns Health Official.**

The Associated Press reports, "More than half of the rural hospitals in Mississippi 'are at risk of closing immediately or in the near future, according to the state health secretary. He said 54% of the state's rural hospitals – 38 – could close." Edney said, "That is a situation that is intolerable from a public health perspective." Mississippi Hospital Association Board of Governors Chair Scott Christensen said, "The liabilities on the balance sheets of these hospitals are a huge burden on what we face."

The Associated Press (1/22, 352K) reports, "According to a memo written to employees last week, which was obtained by Mississippi Today, the state is considering a legislative session, which begins in January and could bring some aid."

### **Parkinson's Disease.**

The New York Times reports on the Parky app that "tracks symptoms of Parkinson's Disease, and it has just been approved by the FDA. The app relies on "Apple's Movement Disorder API and the watch's motion sensors to identify tremors and involuntary movements. The app is safe to use, Park's implementation of Apple's own movement disorder APIs suggests the recorded statistics are accurate. The app displays scores for weekly and monthly 'compliance,' as seen in H2o Therapeutics's pre-release app screenshots."

### **Despite Rise In STD Cases In 2021.**

The Associated Press (1/22, 352K) reports, "Public health authorities are confronting a rise in sexually transmitted infections in a world where COVID-19 is curbing the spread of disease." In 2021, the US saw "nearly 2.5 million cases of chlamydia, gonorrhea and syphilis, a 10% increase from 2020." People between the ages of 15 and 24." Data from a NIH-funded study showed that post-exposure prophylaxis "was effective in preventing HIV infection."

g clinical guidance to use the antibiotic for STD prevention in gay and bisexual men and transgender women who have sex with men." [NYT](#)

### **Contact Following Reports Of Unfulfilled Orders.**

ers (844K) reports the Brookfield-based medical device maker InControl Medical "has cut contact with customers." In 2022, "customers began reporting that items they had purchased on the company website never arrived, despite InControl Medical's assurances." The company sells products that aid with bladder leakage and incontinence.

### **Mass Measures To Reduce Smoking.**

[Indianapolis-Gazette](#) (11/23, 166K) says, "As Indiana's legislators consider raising the tobacco tax – and, ostensibly, taxing vapes – the CDC, "Medicaid annually spends about \$40 billion on health care for smoking-related diseases, more than 15% of the state's budget. It also loses an additional \$7.5 billion in lost productivity." Indiana Sen. President Pro Tem Rodric Bray (R) said, "We will be taking a hard look at changes to our public health funding and infrastructure." He added, "With that in mind, cessation efforts to help curb smoking are a priority."

### **Unlicensed Cannabis In NYC After Legalization.**

[NYT](#) (11/23, 166K) reports unlicensed cannabis stores in New York City "have proliferated since the state legalized cannabis last year." City regulators "have called for the shops to be shut down for fear they undermine the legal market. But supporters of the shops say they are helping to fill a gap in the market for retail locations that have been slow to launch." Regulators have "said they were tracking the shops across the state, but they have not taken any action yet."

### **Air Quality By Measuring CO2 Concentrations.**

[NYT](#) (11/23, 166K) reports tech firm OpenSensors builds "small, inexpensive sensors to monitor air quality and other conditions in homes and businesses." The firm uses IoT, technology, in which sensors publish real-time data over a network." Carbon dioxide concentration is used "as a proxy for air quality." The firm's sensors use a low-power, wide-area technology that transmits data over an unlicensed spectrum, similar to that used by radio-controlled cars and drones.

---

### **Children's Health Decades After Collapse Of Apartheid.**

[NYT](#) (11/23, 166K) reports on children's health in South Africa almost "30 years since the demise of apartheid." Among the "many devastating legacies of apartheid, one of the most persistent is the poor health of the black population." The report notes that "the health of the black population has not improved out," and it "remains that way today in the nation of more than 60 million, of whom 81% are black and 36% are under the age of 18."

### **Iran Faces Poor Air Quality.**

[NYT](#) (11/23, 166K) reports that "because of dangerously poor air quality, the country's state television said that schools in the Iranian capital of Tehran will close for a day because of dangerously poor air quality, the country's state television said." The report notes that "the air quality in Tehran, which has over 10 million residents, but now, increasing pollution is forcing the closure of all schools on Wednesday." The closure was announced for Tehran's neighboring Alborz province.

### **Patient Who Needs Medicinal Cannabis Treatment For Blood Cancer.**

---

nion's top court on Tuesday backed a Russian who is seeking to stay in the Netherlands because he needs a medicine. The Court of Justice "said the man should not be sent back home even though the Netherlands rejected his asylum request. It said 'that it would be contrary to human dignity,' among other things." The response came "to a question from a lawyer."

### **Marijuana Regulations Rally Against Possible Repeal Of Medical Marijuana Legalization.**

Reports that "around 200 backers of Thailand's liberalized marijuana regulations rallied Tuesday at Government House to protest proposed changes to the rules" or "rules that would restore tight restrictions." The legalization of medical marijuana was in June, "but the absence of a recreational market slowed the growth of a recreational marijuana industry." Already "cannabis shops have sprung up in many Bangkok neighborhoods. Last month police warned that consumption would only be allowed in private, and sales would not be allowed to youths or near schools. The psychoactive parts of the plant used to get high – to be put back on the narcotics list."

### **Novo Expands Facilities In Denmark.**

Reports, "Danish drug maker Novo Nordisk said on Tuesday it plans to invest 5.4 billion Danish crowns (\$744 million) to expand its production of diabetes drugs, Novo said the project is expected to be finalised in 2024 and create about 160 new jobs." Novo Nordisk is a global pharmaceutical company, the main biological active components of medicines, to supply its products. Novo Nordisk currently produces API at two facilities in Denmark and one in Clayton, North Carolina, in the United States." Reports the investment "will be used to build a new plant to supply active drug ingredients for the company's clinical trials. Novo Nordisk medicines, Novo said Tuesday." The "expansion does not appear to be related to ongoing Wegovy supply issues, which are being addressed separately."

### **China Bans Tampons.**

Chinese social media debate over "whether sanitary pads should be sold on railways," with some feeling "it provided a convenient solution to the matter and felt that women should come to trains prepared." And "for many people in China, a country that ranks 10th in the world for tampon use, it is still considered embarrassing to openly discuss menstruation or to take out sanitary pads in public." But for a growing group focusing on menstruation health and hygiene, the driving force behind this debate is gender inequality." And just as tampons were being sold on China Railway."

---

### **U.S. Considers Loan Payment Moratorium As It Seeks To Overturn Legal Blocks To Debt Forgiveness.**

Reports (bribe, 10.52M) reports the Administration "announced Tuesday that it will again extend a pandemic-era pause on payments on federal student loan program." The pause "had been set to end on Dec. 31. Officials had hoped to have forgiven some debt by then so that payments resumed." However, Education Secretary Cardona "said the department will extend the pause again until further notice."

Reports President Biden said in a video, "It isn't fair to ask tens of millions of borrowers eligible for relief to resume their payments on loan repayments "will extend until 60 days after the lawsuit is resolved." If the legal challenges to the loan forgiveness program are successful, the pause on payments "will extend until 60 days after the lawsuit is resolved." If the legal challenges to the loan forgiveness program are successful, the pause on payments "will extend until 60 days after the lawsuit is resolved."

---

## Or Face Possible Impeachment.

House Republican Leader McCarthy on Tuesday called on DHS Secretary Mayorkas to step down, "warning that the McCarthy "added that his colleagues will hold congressional hearings at the U.S.-Mexico border after taking control there first-hand." In comments to reporters after speaking with border officials in El Paso, McCarthy said, "Our. This is why today, I am calling on the secretary to resign. ... If Secretary Mayorkas does not resign, House Repub whether we can begin (an) impeachment inquiry." Roll Call (11/22, Simon, 130K) says McCarthy "added that he hadiciary Committee, and Rep. James Comer, R-Ky., the expected chairman of the House Oversight Committee. Both the der policies and an impeachment inquiry against Mayorkas."

59M) says McCarthy's comments "are his strongest words on impeachment to date, but they fall short of a promise of Mayorkas comes as McCarthy's speakership aspirations are under serious threat from his right flank, with five n they'll vote against him." His comments Tuesday "will be perceived as an attempt to stem the rising amount of naysay McCarthy had previously preached caution about starting impeachment proceedings for political reasons."

l/22, Sotomayor, Sacchetti, 10.52M) reports DHS officials said Tuesday that Mayorkas has no plans to resign. Spoke  
advance the noble mission of this Department, support its extraordinary workforce, and serve the American people. .  
ey should come to the table and work on solutions for our broken system and outdated laws, which have not been c

### thy For Speaker.

edom Caucus member Rep. Ralph Norman (R-SC) "announced he would not vote" for House Republican Leader McCrory. Norman said, "I will not vote against the California Republican, dismissing that he will either vote present or not attend the speakership vote to fix the national debt." Asked "if McCarthy could persuade him to change his mind if the Californian approached him about the national debt," Norman said, "It's too late right now." Norman also predicted "that more members would come out to

## Case Of Trump Tax Returns.

Tuesday, the Supreme Court refused to block the release of former President Donald Trump's tax returns to the House of Representatives. The Washington Post (11/22, A1, Barnes, 10.52M) explains that unlike recent presidents and candidates before and after him, Trump did not have a pre-arranged deal with the IRS. Private, a federal law empowers the House Ways and Means Committee to request any person's tax returns from the IRS. Litigation ensued. According to the Washington Post (11/22, A1, Barnes, 10.52M), lawmakers on the panel "said that they wanted to see Trump's returns for the year and the year after for comparison, to help evaluate the effectiveness of annual presidential audits." But, for his part, Trump "said he was not going to release the records." Additionally, "Trump's lawyers had told the Supreme Court that changes in congressional jurisdiction were designed to embarrass him politically." However, the New York Times (11/22, A1, Savage, 20.6M) says Tuesday's unsigned order, which "upheld the issue, and the "decision means the Treasury Department is likely to soon turn over six years of his tax returns to the House." Reports that in a statement after the decision, Ways and Means Chairman Richard Neal (D-MA) "vowed" his committee would release the records "within a few years." He added, "We knew the strength of our case, we stayed the course, followed the advice of counsel, and finally, the principle of oversight has been upheld, and today is no different." Bloomberg Tax (11/22) quotes Rep. Neal as saying, "At long last the charade should today be over and we should get these documents to the public." CNN (11/22, 89.21M) says on its website that, while a Treasury spokesperson said the department "will comply with the court's ruling," the

actually receive the documents. And [CNBC](#) (11/22, Mangan, 7.34M) reports on its website that the decision “sets the stage for the court’s decision before Republicans take majority control of the House.” Indeed, [Reuters](#) (11/22, Chung) says the panel “will have the final say on the court’s decision.”

also reports on the court’s decision. [ABC World News Tonight](#)  [Video](#) (11/22, 6:46 p.m. EST, story 7, 1:00, Muir, 3.8M), and [NBC Nightly News](#)  [Video](#) (11/22, 6:37 p.m. EST, story 3, 0:20, Holt, 5.46M) all covered the story.

the CA3 race, state Rep. Kevin Riley (R), “who became a conservative favorite for his pointed and relentless criticism of the state’s liberal establishment in northeastern California. With 83% of ballots counted, Kiley received nearly 53% of the votes to defeat Democrat Kerr (D).” [The Hill](#) (11/22, 6:30 a.m. EST, 20.6M) reports Jones, “who had served as a fellow in former President Barack Obama’s White House, garnered more support than any other conservative ideological figure.”

## **Grand Jury.**

Lindsey Graham (R-SC) “testified Tuesday before a special grand jury that’s investigating whether President Donald Trump’s 2020 election appearance “came after a drawn-out legal fight that went all the way to the U.S. Supreme Court as Graham tried to overturn the election.” In a statement that Graham’s office said in a statement, “Today, Senator Graham appeared before the Fulton County Special Grand Jury. He was treated with respect, professionalism, and courtesy. Out of respect for the grand jury process he will not comment further on the matter.”

[The New York Times](#) (11/22, Hakim, 20.6M) says Graham’s appearance “was a victory for Fani T. Willis, the district attorney in Fulton County, who is prosecuting a racketeering or conspiracy case.”

## **Changing Law To Ease A DeSantis Presidential Run.**

that Florida House Speaker Paul Renner (R) and Senate President Kathleen Passidomo (R) “say they are willing to change the state constitution to allow a governor to run for president in 2024.” Renner and Passidomo “agreed it would be a ‘good idea’ to make it clear that DeSantis would not have to resign if he runs for president. ... In an individual who is Florida governor is running for president, I think he should be allowed to do it. ... I really do. That’s the way it should be. ... Anyone running for a new office to put in an irrevocable letter of resignation ahead of qualifying if the terms of the constitution require it.” [The Washington Post](#) (11/22, 6:30 a.m. EST, 18.1M) reports on “DeSantis’ Reluctance To ‘Schmooze.’” In an online report, [CNN](#) (11/22, Warren, Contorno, 89.21M) says that since he won the 2022 election, DeSantis “has avoided ‘schmoozing’ at Republican Party functions” like last weekend’s Republican Jewish Coalition’s conference in Las Vegas and the Republican National Convention. “DeSantis’ reluctance to schmooze,” said, “he didn’t stick around to schmooze.” CNN says “some were left wondering how DeSantis might change his approach to fostering friendships among fellow Republicans.” Throughout his political career, DeSantis “has intentionally kept himself separate from the Republican establishment forces. ... Now, as some Republicans search for a new face who can usher them into a post-Trump period, DeSantis has gone it alone.”

## **Indication Of Coming Presidential Bid.**

that in “the latest indication that he’s prepping a White House bid that will pit him against his former boss, ex-President Donald Trump.” [The New York Times](#) (11/22, 6:30 a.m. EST, 18.1M) reports that Ali Kjeragaard, “a spokesperson for outgoing Nebraska Sen. Ben Sasse, has been tapped to serve as communications director for a new organization that is serving as the former vice president’s campaign-in-waiting.” Politico cites people “familiar with the effort” as saying that Kjeragaard “has been tapped to serve as communications director for a new organization that is serving as the former vice president’s campaign-in-waiting.”

be added sometime early next year. Pence's team is also looking to bring on fundraising aides." Politico says the hire

### **"Burn the House Down" If GOP Doesn't Support Him.**

that in a "scathing" op-ed (11/21, 7.45M) published in the New York Post Monday, former Attorney General William Barr wrote, "President Trump 'will burn the whole house down.'" In what the Post describes as a "blistering rebuke," Barr wrote, "Trump is burning the house down by leading 'his people' out of the GOP. ... Trump's willingness to destroy the party if he does not get his way is evidence of his inability to think of a political party as anything but an extension of himself – a cult of personality."

**Trump's "Unfitness," Offer A "Positive Alternative."** Jennifer Rubin writes for the Washington Post (11/22, 10.52M) that voters need to move "from...Trump if it wants to win in 2024," without "taking on Trump's unfitness directly and offering a positive alternative." Republican candidates "must tell voters why he shouldn't be given another term and the danger he poses. They should stop talking about the MAGA flag behind, here are all the wonderful things we can accomplish.'" To do that, they "would have to challenge the MAGA narrative and have the nerve to do." Trump's opponents "are displaying the same timidity Trump will use to belittle them and run roughshod over them. They only have themselves to blame."

### **Before Trump's Arrival.**

Post (11/22, 10.52M) that former Rep. Mike Rogers (R-MI) "is a snapshot of what his party looked like before the Donald Trump era." Rogers "is a senator with strong national-security experience." Rogers' "brand of mainstream conservatism" may have "a second life." Ignatius says Rogers "has been spending time recently in Iowa, New Hampshire, and South Carolina, even formally exploring a bid yet. As Iowa Republican public affairs strategist John Stineman, who's advising a Rogers campaign, says, 'Mike is one of the few other might-be candidates are hoping that after getting roughed up this month, the Republican family will turn to him in the Trump years.'"

### **Early Voting In Senate Runoff Allowed Saturday.**

AP (11/22, 10.52M) reports early voting in Georgia's Senate runoff election will be allowed Saturday "after an appeals court rejected a state Supreme Court decision that declined a request from the state to halt a ruling made by a Fulton County judge on Friday, which found voting on Saturday was illegal." Secretary of State Brad Raffensperger (R) "argued that early voting was not allowed that day because the preceding Thursday or Friday are state holidays. Thursday is Thanksgiving, and Friday is a Georgia holiday that was moved to the preceding day." The court "indicated that he would accept the appeals court's ruling."

**Walker To Have Abortion Challenges Him To Meet Publicly.** Reuters (11/22) reports that a woman who claims Republican Sen. Kelly Loeffler "aborted her 1993 on Tuesday challenged the Republican, who has said he opposes abortion with no exceptions, to meet her publicly to "challenge two weeks ahead of the Dec. 6 run-off contest" between Walker and Sen. Raphael Warnock (D-GA). The woman wrote, "I want to see you in the eye and tell me to my face that you don't know me and that none of what I just said is true? I'm looking for comment."

**Biggest Losers If Warnock Wins.** Greg Sargent writes for the Washington Post (11/22, 10.52M) that former President Donald Trump's "strategy" is "to signal the biggest losers" if Warnock wins the Georgia runoff election. With Trump "announcing his run for president, McCarthy is signaling a strategy of attacks designed to damage President Biden and discredit past and continuing revelations about Trump." But, having 5

control over investigations. If Democrats used that power wisely but aggressively, they could demonstrate to the country that they are acting in the public interest." Sargent says if Warnock wins, Democrats "should not refrain from maximally employing that authority."

### **Home Havasupai Gardens.**

Indian Garden in Arizona's Grand Canyon National Park is getting rid of its 'offensive' name. Indian Garden, a popular stop along the Grand Canyon Scenic Drive, is "an effort to right a historic wrong. Members of the Havasupai tribe, who had been there for generations, were displaced from the area nearly 100 years ago." Park Superintendent Ed Keable said, "The Grand Canyon National Park team was proud to have been able to preserve this culturally significant location."

### **Bounce False Election Narratives, Extreme Candidates.**

Washington Post (11/22, 10.52M) that the "Trumpist belief that the 2020 election was fraudulent was always rooted in fiction." In Arizona, "into this fantasy world they have ventured." Arizona "is home for many of the most fervent true believers in the election fraud narrative." Candidates for statewide office who contended that the election was stolen." Senate candidate Blake Masters has conceded defeat. "The secretary of state, 'have disputed the results and are pressuring the state's outgoing attorney general, Mark Brnovich, to challenge the results. But they cannot do so if they tout false election narratives and nominate extreme candidates."

### **Effort to Undermine Confidence In Supreme Court.**

Washington Post (11/22, 10.52M) editorial questions the veracity of the allegation that eight years ago, Supreme Court Justice Stephen Breyer was influenced by Hobby Lobby. The Journal says the claim is part of an effort to undercut public confidence in the Court by Democrats and the media. "The Supreme Court is the cornerstone of our democracy. It is not fair to undermine its confidence in the Court by Democrats and the media."

**Standards For Itself.** In an editorial, the Washington Post (11/22, 10.52M) says it is time for the Court "to set ethics standards for itself." "The Court has no less than its legitimacy, which has been battered by growing public doubts that it truly operates as an apolitical institution. The Court has a public reason for its mistrust, and take it upon themselves to restore faith in their impartiality."

**Agency.** In an editorial, the Wall Street Journal (11/22, Subscription Publication, 8.41M) says that after the latest round of executive orders, Biden could well again extend the moratorium after the current one expires. The Journal says the executive order "deserves to get slapped down" by the Supreme court as "the abuse of power it is."

Wall Street Journal (11/22, Subscription Publication, 8.41M) editorial questions the veracity of the allegation that eight years ago, Supreme Court Justice Stephen Breyer was influenced by Hobby Lobby. The Journal says the claim is part of an effort to undercut public confidence in the Court by Democrats and the media. "The Supreme Court is the cornerstone of our democracy. It is not fair to undermine its confidence in the Court by Democrats and the media."

In an editorial, the Wall Street Journal (11/22, Subscription Publication, 8.41M) says that as Apple Daily founder Jimmy Lai's case moves forward, the government attempts to create a narrative that Lai is a British citizen, which emphasizes how the government attempts to create a narrative that Lai is a British citizen. "The government may still go to the Standing Committee on the Rule of Law."

would confirm that Hong Kong courts are subservient to Beijing.

**to Regain Americans' Trust In Its Ethics."** In an editorial, the [Washington Post](#) (11/22, 10.52M) says it is time for the newspaper to actually work. At stake is no less than its legitimacy, which has been battered by growing public doubts that it truly is impartial. They have given the public reason for its mistrust, and take it upon themselves to restore faith in their impartiality."

**on Help Against Covid."** In an editorial, the [Washington Post](#) (11/22, Editorial Board, 10.52M) argues that Thanksgiving is a time to help and that "everyone should consider common-sense precautions such as wearing masks in packed public indoor areas." It notes that "many scientific reports about the efficacy of the new bivalent boosters have carried a hint of disappointment." The Post says that during the holidays, "the jab being a small price for any measure that can help keep covid at bay."

## GoodRx Over Allegations It Wrongfully Disclosed Patients' Health Data.

reports, "Millions of Americans have used GoodRx, a drug discount app, to search for lower prices on prescriptions on "say the app's coupons and convenience came at a high cost for users: wrongful disclosure of their intimate health findings, of sharing sensitive personal data about users' prescription medications and illnesses with companies like Facebook and Google." The lawsuit, filed in federal court in Washington, D.C., "tattle the case," but "said it disagreed with the agency's allegations and admitted no wrongdoing."

An order filed by the FTC, along with the Department of Justice, "seeks to ban GoodRx from sharing health data with Google and Facebook, to delete the data that was previously shared with them." Additionally, "GoodRx agreed to pay

s that in 2009, the newly-passed Health Breach Notification Rule “directed the FTC to create a rule in collaboration with HHS, the Department of Health and Human Services, which is the agency that governed by HHS or HIPAA, which sets privacy rules for medical providers.” According to that rule, “any entity not governed by HHS or HIPAA, which sets privacy rules for medical providers,” must tell consumers when there’s been a breach of their data or face action from the FTC.” Over the last year and a half, the FTC has been expanding its interpretation of the rule’s scope beyond companies’ cybersecurity practices to their marketing and advertising practices, which has heightened interest in protecting the privacy of health data online.”

### **ty Of Public Health Emergency To Boost Access To Abortion.**

Biden administration is weighing a possible public health emergency declaration that would free up resources to help with abortion. The piece adds that "HHS Secretary Xavier Becerra told Axios on Monday that scientific and professional assessments will guide his decision."

### **s FDA For "Repeated Failures" To Regulate E-Cigarettes.**

A bipartisan group of senators on Wednesday slammed the 'repeated failures' at the Food and Drug Administration (FDA) for allowing products to minors. "The senators 'sent a letter to Health and Human Services Secretary Xavier Becerra urging the agency to fix FDA's persistent leadership failures and prevent youth from a lifetime of nicotine addiction.'" While "the U.S. Food and Drug Administration has received more than 100 e-cigarette applications by Sept. 9, 2021...the agency has only completed reviews of about half of those e-cigarettes."

### **Medicare Advantage Audit Rule To Recoup Overpayments.**

Reports, "Payer organizations have expressed their disappointment for the Medicare Advantage Risk Adjustment Data Validation (RADV) rule, which they say 'have the 'potential unintended consequence' of harming beneficiaries.'" The new rule "will allow the federal agency to recoup overpayments to Medicare Advantage plans." In a statement, HHS Secretary Xavier Becerra said, "CMS has a responsibility to recoup overpayments to Medicare Advantage plans are no exception." However, "health insurer groups have bristled at the rule, insisting that the rule will harm beneficiaries."

### **ion Plan To End COVID-19 Pandemic Public Health Emergency.**

Steve Brozak writes about the pending end of the federal government's public health emergency for the COVID-19 pandemic. He notes a "advance warning" that HHS Secretary Xavier Becerra gave, the Biden Administration is placing "the burden on states to coordinate a national response." At this time, the Biden Administration is without several key staff that could direct such coordination. Dr. Anthony Fauci have both retired. Brozak argues that a complete lack of a nationally coordinated transition "will harm the economy."

es (2/1, 626K), Cheryl Chumley comments on the Biden Administration's plan for terminating the public health emergency. She notes a "surge of case counts." Chumley also questions why the Office of Management and Budget announced the termination of the emergency.

---

### **lowing Infant Formula Shortage, Says No Staff Will Be Fired Or Reassigned.**

The FDA "will undergo an overhaul in the wake of the nation's baby formula shortage, but no one at the agency will be fired," FDA Commissioner Scott Gottlieb said. He added a 'new, transformative vision' for the agency which will consolidate the regulators responsible for food safety and drug regulation. However, the components did not come with a specific plan to address the problems identified by an internal FDA review that highlighted the agency's lack of oversight. At a press conference, the commissioner said there were no plans to fire or reassign anyone involved for the agency's oversight of infant formula. (888K) reports, "As part of its new structure, the FDA will seek to modernize its data systems, provide increased oversight of infant formula, and improve the agency's response to the nation's baby formula shortage."

---

response systems.” Califf stated, “The proposed structures for both groups will have clear priorities that are focused on quickly adapting to an ever-changing and evolving environment.”

### **Infant Formula To Families In Need.**

WashPost (477K) reports, “Delaware can look out for 44,000 cans of baby formula headed its way.” The announcement, made by the state, comes as it is still feeling the strain of baby formula shortage in the United States.” The state “is gearing up to provide thousands of cans of formula to the state of Delaware.”

### **Infant Formula Shortage “A Major Disappointment.”**

WashPost editorializes that the FDA “vowed to make big changes to its food safety teams after the 2022 infant formula crisis exposed its weaknesses.” The FDA finally revealed its fix: creating a new deputy commissioner for human foods. This is a major disappointment because the new role will oversee all food safety and nutrition. Confusingly, there will still be a separate Office of Regulatory Affairs at the FDA that will handle the agency’s regulatory work. FDA Commissioner Robert Califf and Principal Deputy Commissioner Janet Woodcock spent 45 minutes trying to explain the new structure and how the Regulatory Affairs’ leader would exercise.”

### **NYC Outbreak Of Mpox Is Over.**

WashPost reports, “Citing ‘very low’ spread of Mpox,” formerly monkeypox, “for two consecutive months, New York City’s health department says the number of cases is now near zero – down from almost 75 during the outbreak’s summer peak, according to figures released Tuesday.” The NYC announcement “dovetails with the Biden administration’s similar decision last month not to renew August’s declaration of a public health emergency. Late in 2022, “‘Mpox’ became monkeypox’s new name,” and “the change, the CDC said in November, ‘will enhance the agency’s ability to respond to future outbreaks.’”

### **House Passes Resolution To End COVID-19 Pandemic Causes.**

WashPost (8.41M) reports Republican leadership in the United States House of Representatives has initiated a resolution to end the federal government’s COVID-19 national emergency. The two participating committees held their first meetings on Wednesday and are expected to call for testimony from the Biden administration.

### **House Passes Resolution To End COVID-19 National Emergency.**

WashPost reports, “On Wednesday, the US House approved a resolution to end the federal government’s COVID-19 national emergency. The measure would strip the Biden administration of the authority to declare a national emergency. The measure will likely not take up the measure. Regardless, Republicans passed the resolution to stress to the Biden Administration that they are serious about ending the emergency later.”

---

## **into COVID-19 Pandemic Relief Payments Fraud.**

Members of the United States House have initiated an inquiry into fraudulent behavior around COVID-19 pandemic relief payments. "Members convicted on federal charges" connected to such fraud, the US "House Oversight and Accountability Committee held a hearing. House leadership claims "too little attention was paid to the problems when Democrats" were in charge and charges the

626K) reports the United States Secret Service on Wednesday confirmed that organized crime organizations in China were involved in the pandemic relief payments. While a spokesperson for the Secret Service "declined to go into details" in testimony to the House, "led by the Chinese government," he stated the agency has "made the links based on financial data." Also, at this time, "the extent of the fraud" as "it will take years before that's known."

626K) reports United States Comptroller Gene Dodaro said "the recovery rate is likely to be about 10%" regarding the pandemic relief payments on Wednesday. Dodaro also pointed out that "a single Social Security number was used to apply for pandemic relief payments" of ongoing investigations into the fraud. Also, a Justice Dept. representative "pointed out that the fraud in unemployment benefits were blocked because a fraudster had already submitted their identity."

12 p.m. EST, story 6, 2:15, Holt, 5.66M) and [Forbes](#) (2/1, Erb, 10.33M) also report.

## **the COVID-19 Pandemic Public Health Emergency Ends.**

Maumann, Subscription Publication, 4K) reports advocacy groups like the Testing at Home Coalition want "US seniors and people with disabilities" public health emergency ends in May" due to concerns about costs rising beyond what such people can afford. A proposal by Rep. (D-Calif.)" who is "the top Democrat on the House of Energy and Commerce health subcommittee." Currently, Rep. E

Among the forthcoming potential changes are payments for COVID-19 test kits, which are currently covered by the federal government but "that will go away." At that time, "private insurance may not cover the full price of over-the-counter tests anymore, and people with disabilities will have no guaranteed access to tests or treatments" even though the Biden Administration says it "is working to ensure

## **Data Clarifying Who Should Continue To Receive COVID-19 Booster Shots.**

626K) reports, "Last week, an advisory committee to the Food and Drug Administration unanimously agreed that the vaccine is safe and effective. The version of the shot is offered and when and how often people should receive it." But "there was less consensus about how often people should receive the vaccine recommendations is a reflection of just how complicated and confusing they have become," especially after the emergence of the B.1.4/BA.5 Omicron subvariants, was rolled out in September 2022." But "the bivalent booster does appear to provide better protection than the monovalent booster" and "there is consensus that if you are at high risk, getting a vaccine booster at least annually, and possibly more frequently

## **Can Last As Long As Three Months After Positive COVID-19 Test.**

626K) reports, "A new study involving Yale New Haven Health and other medical centers has found the symptoms of COVID-19 can last for up to three months after a positive test for COVID-19." The study "is part of the ongoing project INSPIRE – Innovative Support for Patients with SARS-CoV-2 Infection." "Over the past four weeks, half of the study participants who tested positive and a quarter of those who tested negative had symptoms." "The study is open to the public, according to a Yale University statement." Yale School of Medicine associate professor of cardiology and of

ent for driving research and policy, but also for bringing light to people's experiences."

### **ns May Remain In Effect In Massachusetts.**

ports that although "the national COVID-19 public health emergency will end in May...some of its provisions may survive. State officials are still sorting through the effects of ending the emergency, as state laws, state decisions about Medicaid, and other policies. An assistant professor of health policy and management Jose Francisco Figueroa explained that "when it comes to Medicaid, there's still wiggle room on what the state can decide to keep versus not to keep." State officials "said it's not clear yet. There are many variables and the federal government may retain certain aspects."

### **nces Plan To Transition Out Of COVID-19 Emergency Phase.**

2.44M) reports, "Nearly three years after it became the first county in the nation to declare COVID-19 a public health emergency, Santa Clara County plans to transition out of the emergency phase of the pandemic by the end of February." This transition "includes the closure of all the COVID-19 treatment centers and the transfer of care to private health care providers, pharmacies or local clinics." Nearly "33% of all vaccinations in Santa Clara County since the shots were authorized in December 2020."

### **Nevada, Go Below 100 For First Time Since September.**

es, 372K) reports, "Daily new cases of COVID-19 dropped below 100 in Clark County for the first time since September 2020. The decline in cases is a sign of progress in the pandemic, according to data released by the state on Wednesday." According to Nevada Department of Health and Human Services, "Clark County's daily new cases dipped to 93 from the prior week's 104." And "statewide, the average declined to 123 from 132." However, "respiratory case numbers are significantly higher."

### **nations To Cede Viral Treatment Supplies To Less Affluent Countries.**

ports on the release of a draft accord from the World Health Organization. The proposal calls for global governments to agree to share viral treatment supplies with less affluent countries to avoid a repeat of the COVID-19 pandemic in the future. Additionally, the document calls "for international law to force pharmaceutical companies "to release details of any public contracts for vaccines and treatments during such a crisis." The accord is expected to be finalized by nations later this month and will continue throughout 2023.

### **Asian Cultures Despite Lack Of Mandates.**

.6M) reports on mask usage remaining prevalent in east Asian nations despite governments rescinding mask mandates. "In many Asian countries, mask wearing has become the force of habit and concern for transmitting illnesses to others among their reasons for their continued practice." "In South Korea are taking "advantage of the fact that they don't have to wear makeup or smile when they wear a mask." Further, "Asian governments continue to urge people to wear them" and many citizens are complying with those recommendations.

### **rhetoric On DeSantis' COVID-19 Pandemic Record.**

n Lowry writes about the brewing competition between former President Donald Trump and Florida Gov. Ron DeSantis. "DeSantis knows the Florida governor has outflanked him on the populist right." Regardless, Trump is "driving right at the governor." "If Trump wins, Trump will be hard-pressed "to counter the DeSantis brand on Covid" as he had Dr. Anthony Fauci "at his right hand."

---

...all that was wrong with the pandemic response.”

### **Federal Government's COVID-19 Pandemic Public Health Emergency.**

...tion Publication, 4K) reports on Dr. Anthony Fauci's comments regarding the end of the COVID-19 pandemic public health emergency. Dr. Fauci, Director of the National Institute of Allergy and Infectious Diseases, said on Wednesday, "if you look at where we are right now, compared to where we are a year ago, the United States is still seeing between 400 and 500 daily COVID-19 deaths and the CDC says less than 70% of the population has been vaccinated. I want people to get the impression that I think there isn't a lot more we can do. But we don't need the state of emergency anymore."

### **Study For Pregnant People In COVID-19 Pandemic's First Year.**

...reports a study suggests the mortality rate for pregnant people rose significantly in 2020. The study, which JAMA Network Open published, analyzed records for 4,528 people who were or had recently been pregnant at the times of their deaths and were "aged 15-44 years." The study found that pregnancy-associated deaths from drugs and homicide increased from 2019 to 2020 at faster rates than from 2018 to 2019, reflecting the onset of COVID quarantines in March 2020.

### **Study Shows Fewer Patients For Respiratory Disease Infections.**

...ore, 309K) reports on a drop in respiratory disease admissions and infections in Arkansas over the past week. The report notes that there are "fewer patients being admitted for COVID-19 and influenza. However, "health providers continue to recommend vaccination and testing for COVID-19 and influenza." The article also mentions that "the state's health department's claims in the article, "a report released Tuesday by the state Health Department again indicated 'low' numbers of COVID-19 cases." The report also states that "17,000 deaths, 280,000 hospitalizations and at least 25 million illnesses from influenza have been reported this season."

### **Study Calls For Transparency From Scientific Journals To Rebuild Public Trust.**

...ndall Lutter writes about strategies to restore public trust in public health agencies. As "the COVID-19 pandemic has shown, public health agencies must acknowledge that such doubt comes "from the lack of data transparency in the federal health journals shaping public policy." The article states that "federal and similar agencies use do not meet "the most modest transparency policies identified by Oxford University Press" and that "the lack of transparency is a defining characteristic of science...is that independent researchers using the same analytic methods reach different conclusions." The article also suggests that agencies should "adopt the transparency standards used by top private-sector journals, or continue losing public and scientific credibility."

### **Study Shows Hospitalizations, Infections Continue Downward Trend.**

...r, 519K) reports on a decline of COVID-19 infections and hospitalizations in Sacramento County, California. In the county's latest report, the number of patients hospitalized with confirmed COVID-19 fell by 42% as of Jan. 31. As a result, "masks are no longer required in most settings." The report also mentions that "California counties that have been "assigned to the CDC's low level in the federal agency's latest update." However, the report notes that "the county's health department is still monitoring the situation closely."

### **Study Shows College Students Received Aid From Biden Administration's COVID-19 Pandemic Relief Package.**

...7M) reports the Biden Administration says that almost 300,000 New Jerseyans benefitted from over \$500 million in federal aid. The report from the US Dept. of Education released Wednesday states "12.8 million students nationwide in 2021 received federal aid from the Biden Administration's COVID-19 pandemic relief package. Specific to New Jersey, "108 institutions...received federal aid."

---

### **Report Updated COVID-19 Pandemic Statistics.**

des, 1.47M) reports on new COVID-19 pandemic statistics from public health officials in New Jersey. On Wednesday, the state reported 1,373 new cases and 12 new fatalities. That puts the statewide "seven-day average for confirmed positive tests" at 1,373. That number indicates the state to have 'high' community levels of the coronavirus" and the latest statewide positivity rate for COVID-19 tests is at a high rate for such tests.

### **Workers Returned To Offices Last Week.**

ne, Subscription Publication, 8.41M) reports an analysis by Kastle Systems shows that over 50% of workers in several states returned to offices last week. It's the first time that office occupancy in this measurement has eclipsed the 50% threshold since before the COVID-19 pandemic.

### **WHO Declares Health Emergency For COVID-19 Pandemic.**

Health Organization will maintain the current global health emergency status for the COVID-19 pandemic. After "a meeting of the organization" the WHO declared "still considers the outbreak what it calls a public health emergency of international concern" but "the time being, the WHO recommends that nations keep their guard up as it lays "the groundwork for administrative measures to prevent the disease from spreading."

### **Study Suggests Molnupiravir May Be Fueling COVID-19 Mutations.**

ts Lagevrio, the brand name of Merck &Co.'s molnupiravir drug, is the subject of a new study that suggests the drug may be fueling COVID-19 mutations. Published on Friday by the medRxiv website, is still undergoing peer review. However, it used "viral samples taken from patients who had been treated with the drug "works by creating mutations in the Covid genome that prevent the virus from replicating in the body" but the study found "no evidence of a significant increase in the number of mutations" according to the study.

Some epidemiologists had raised concerns about the drug's potential to create problematic mutations even before the drug was approved for use. However, a spokesperson for Merck "called the worry 'an interesting hypothetical concern'" and said "the drug's limited benefit suggests it's no longer worth the risk" given that it could be less effective against XBB variant.

### **Georgia Bans COVID-19 Vaccine Mandate Extension.**

permanent extension of a Georgia statute that limits the ability of local governments to institute COVID-19 vaccine mandates. The Georgia Senate's Health and Human Services Committee advanced a bill that would enshrine the statute permanently. The measure would apply to all local governments within Georgia's borders. As of Wednesday, "the Georgia chapters of both the American Academy of Pediatrics and the American College of Obstetrics and Gynecology oppose the bill, arguing it would "harm Georgia's ability to fight future pandemics."

### **FDA Removes Testing Requirement For Lagevrio And Paxlovid.**

and Drug Administration has ended a testing requirement attached to prescriptions of two antiviral drugs used to treat COVID-19: Lagevrio and Paxlovid. While the positive test results are no longer mandatory for scripts of the drugs, "the FDA said the requirement was "not in the best interest" in the opinion of the attending physician.

---

---

### **By Over \$5B Due To Falling COVID-19 Therapy, Testing Kit Demand.**

turned on Thursday profits will decline in 2023 as falling demand for its COVID-19 therapy and diagnostics kits will knock out the years-long pandemic boost is ebbing." Instead, "sales and core earnings per share were expected to decrease at a 'low to mid-single digit' rate," the company said in a statement." And "revenue growth from new drugs, including its haemophilia treatment and multiple sclerosis drugs, will offset the decline." Everin Schwan said, "the underlying business is growing very strongly in the high single digits."

---

### **3.12% In MA Payments For 2024.**

Publication, 4K) reports, "Medicare managed care plans would see a slight average revenue increase of about 1.03% in 2024 compared to 2023 rates for next year." Shares of health insurers which offer Medicare Advantage plans fell following the announcement. "Under the current service they provide, MA plans receive a flat monthly payment for each beneficiary based on their health risk factors. CMS is not increasing it." The article mentions CMS Administrator Chiquita Brooks-LaSure and Meena Seshamani, CMS deputy administrator for Medicare.

The article reports CMS "released the advance notice of methodological changes for MA capitation rates and payment policies to a public comment and adjustment model." Seshamani stated, "The commonsense proposals in the Advance Notice, coupled with the proposals to increase MA payments, will ensure that MA plans continue to meet the healthcare needs of all beneficiaries." The agency "is expecting an effective growth rate of 3.12% in 2024, or a 3.12% average increase in plan risk scores." But "CMS has estimated a 3.12% decline in payments after taking in changes to the methodology." The story are [Modern Healthcare](#) (2/1, Berryman, Subscription Publication, 215K), [STAT](#) (2/1, Herman, 262K) and [The New York Times](#) (2/1, 100K).

### **Medicare Will Lose An Estimated \$2B Due To Limited Medicare Audits.**

The article reports, "Medicare officials made a clear statement four years ago about how best to audit the country's Medicare Advantage plans: 'We're not going to audit Medicare Advantage plans in the public interest.'" But now, "based on a final regulation published Monday, Medicare is...giving a free pass to Medicare Advantage plans for 2017," allowing insurers to keep \$2 billion in taxpayer money. Previously, "Medicare auditors intended to take a sample of medical records, and then extrapolate those results to a company's entire Medicare Advantage contract." Now the cost of the audit will be a "huge loss" based on the costs of the audit. Medicare's Center for Program Integrity Director Dara Corrigan is expected to announce the results of the audit.

### **Senate Committee.**

One of this year's more intriguing political developments is a change at the helm of the Senate health, education, labor and pension committee, "representing 'a milestone of sorts for American politics – and for Sanders himself.'" Sanders now "leads a committee that has big ideas about" education, healthcare, labor, and pension. For one, "Sanders plans to introduce Medicare for all legislation, which would be a top priority for the committee."

### **Allegations Of Internal Sexual Misconduct.**

The article reports that the World Health Organization's Assistant Secretary Loyce Pace "urged the World Health Organization to address allegations...that one of its senior officials had a sexual relationship with a WHO employee."

---

---

) reports on an upcoming study of dietary practices that might yield "insights that will allow experts to finally tailor diets to individual people." The study will involve 10,000 participants "to better determine the important factors involved in what is called precision nutrition." A second group of 500 people will be sent directly to their homes. And in the final phase, 500 people chosen from the larger group will eat while residing in a controlled nutritional study, which typically involves just few dozen participants, says Holly Nicastro, who will coordinate the study for Precision Health." Enrollees "will be selected from the NIH's All of Us health research program, which anyone can join."

### **Funds On Personal Travel Expenses.**

reports, "A university professor secretly used HIV research grants to bankroll his lavish lifestyle, which included numerous trips to Europe, according to federal officials." The professor, Jeffrey Parsons-Hietikko, who leads Hunter College's Center for HIV Education, was forced to turn over the grants to the government as part of a settlement announced on Jan. 30 by the U.S. Attorney for the Southern District of New York. "It was found that he had been inappropriately invoicing personal expenses to the National Institutes of Health (NIH) for years, according to the settlement. The settlement siphoned funds from the NIH grants to Parsons-Hietikko in the form of bonuses, officials said." Hunter College has since fired the professor.

### **The Ideal Home For ARPA-H.**

Montgomery County Economic Development Corporation (MCEDC), [Bethesda \(MD\) Magazine](#) (2/1, 3K) says, "The newly established ARPA-H is the cutting-edge biomedical and health research, moving discoveries from the laboratory to patients more quickly, supporting the growth of the health care industry in Montgomery County, Md., is uniquely positioned to support this crucial federal agency and the ideal home for ARPA-H," and already playing a "pivotal role in fueling ARPA-H's success." This includes "the National Institutes of Health...the U.S. Department of Health and Human Services, the Food and Drug Administration, Walter Reed National Medical Center and the Uniformed Services University." The area "will be able to collaborate with agencies working on related health research," and "would create a similar synergy for ARPA-H to the one that exists between the Pentagon and the Defense Advanced Research Projects Agency, which has its headquarters outside but near the Pentagon."

---

### **High Schools Will Be Allowed To Carry Naloxone.**

AP (AP) reports, "Students will be able to carry Narcan, a nasal spray that can reverse an opioid overdose, in Los Angeles schools, according to a new law. The law also allows for training and distribution of the drug to students. Experts say that having Narcan in schools and training could make a difference in teen deaths, experts say: Someone else was nearby in two-thirds of overdose deaths, according to a recent analysis by Centers for Disease Control and Prevention researchers." The drug "works by blocking or reversing their effects. The National Institute on Drug Abuse says naloxone should be given to anyone who shows signs of an opioid overdose or significant adverse reactions."

### **Representatives Spar On Fentanyl Drug Smuggling At US-Mexico Border.**

AP (AP) reports, "U.S. House Republicans on the Judiciary Committee blamed the Biden administration for fentanyl drug smuggling from Mexico. Democrats on the committee pushed back on the rhetoric from their Republican colleagues, arguing that most fentanyl is produced in the United States, and is not brought by migrants who are fleeing violence or economic hardship." Fentanyl was linked to the deaths of more than 100 people in the United States, according to the National Institute on Drug Abuse."

---

### **Big Drugmakers To Limit 340B Discounts Through Contract Pharmacies.**

Wall Street Journal (2/1, 215K) reports, "Bayer and EMD Serono told customers Wednesday they would limit 340B discounts to only those hospitals that offer 340B drug discounts to hospitals and their affiliates registered as 340B-covered entities." Both announcements are part of a "strategic victory on the issue" against the HHS, and make them part "of around 20 companies that restrict 340B discounts to only those hospitals that have ordered HHS to create a plan to correct underpayments made to 340B hospitals from 2018 to 2021 under a regulation that required Medicare and Medicaid Services cut 340B reimbursement by nearly 30% and redistributed the money to all hospitals."

### **Georgia Pushes For State Takeover Of ACA Health Insurance Marketplace.**

Wall Street Journal (2/1, Bluestein, 1.46M) reports, "Georgia GOP leaders have proposed a bill that they hope will lead to a state takeover of the ACA health insurance marketplace." Georgia state Senate Health and Human Services Committee chair Sen. Ben Watson (R) "said Wednesday evening that he would formally introduce the bill Thursday." The federal government has already rejected a similar proposal from Governor Brian Kemp, who "said a state-based exchange 'gives Georgians higher quality access and greater control in the insurance enrollment process'."

### **Georgia House Looks To Shift \$100M Into State Employee Health Plan To Reduce Health Insurance Premiums For Schools.**

Wall Street Journal (2/1, House Appropriations Committee "want to shift \$100 million into the state employee health plan to reduce the sting of rising health insurance premiums for schools." The committee, the Committee "included that change as it voted to approve House Bill 18," which "amends the state's budget" and "reduces the cost of health insurance for homeowners by \$100 million less than Kemp previously estimated, said House Appropriations Committee Chairman." The bill would stretch out to three years a 67% increase in health insurance premiums that districts would have to pay for in the next one year."

### **Humana Reports Strong Quarterly Profit As Investment Income Jumps.**

Humana...on Wednesday beat Wall Street estimates for quarterly profit as the health insurer's investment income jumped 15% from a year ago. The company's "fourth-quarter benefit expense ratio, or the percentage of payout on claims compared to its premiums, was 87.20%." The company's "costs were expected to decline on lower COVID-19-related hospitalizations, though there was a slight increase in the last quarter of 2022."

The story is covered by [CNBC](#) (2/1, Fima, 7.34M), [Forbes](#) (2/1, Japsen, 10.33M), and [Modern Healthcare](#) (2/1, Berryman, Substack).

### **Attorneys General Push To Distribute Abortion Pills By Mail In Their States.**

Attorneys general from 20 states wrote letters to executives at CVS and Walgreens warning the pharmacy chains against distributing abortion pills without a new Biden administration policy. "These letters rebuke recent guidance from the Justice Department – issued in an opinion that said the department did not prohibit the mailing of abortion pills." The DOJ's "opinion came ahead of the rollout of new rules from the Food and Drug Administration on abortion with a prescription, including by mail order."

Attorney General Andrew Bailey (R) stated, "I will enforce the laws as written. ... That includes laws protecting the right of life."

more than 20 years ago of the abortion drug mifepristone, which a growing number of patients use to terminate pregnancies.

### **Could Take Action To Unveil Supreme Court Leaker.**

[The New York Times](#) (2/1, Subscription Publication, 8.41M) op-ed that following an investigation lasting several months, the US Supreme Court leaked the draft opinion which overturned *Roe v. Wade*. Dershowitz argues that there is still a chance the leaker could be identified and taken action against the reporters who broke the story.

---

### **GAO Report Addressed Significant Number Of Security Weakness, Policy Oversights Against Potential Cybersecurity A**

A new report by the Government Accountability Office (GAO), "despite previous recommendations to help bolster federal cybersecurity, many recommendations issued since 2010 to secure federal systems remained unaddressed," and "identified a series of critical weaknesses in federal cybersecurity policies and procedures."

### **Ukrainian Websites Offline.**

A Russian hacker group Killnet claimed responsibility this week for a string of cyberattacks that took more than a dozen hours to resolve (including a distributed denial of service) attacks, which occur when hackers block legitimate users from accessing information systems. The attacks targeted websites that support and/or send resources to Ukraine.

### **Health Data Exchange Last Year.**

HEALTHeLINK, the health information exchange (HIE) for Western New York, worked on a total of 83 different projects in 2022. The organization released its "HEALTHeLINK 2022 Report to the Community." New exchange "offerings include emergency department summary of care, patient portal, and when a patient is registered at Erie County Medical Center's emergency department." The exchange "also launched a patient portal, analytics and provide custom metric reporting and community research support."

---

### **Public Health Emergency Could Also Result In End To Title 42.**

[The New York Times](#) (2/1, Subscription Publication, 8.41M) reports President Biden's plan "to lift the public health emergency for Covid-19 on May 11, ending free tests and travel restrictions, and ending a border policy that has been tied up in the nation's highest court." According to a White House official, should "the president lift the emergency, Title 42 on May 11. That means the end of the policy could come before the Supreme Court has ruled on a suit by

conservative Republicans in the House "overwhelmingly voted to pass a bill Tuesday evening to end the COVID-19 public health emergency. The measure would also terminate pandemic-related border restrictions that congressional Republicans support. The bill would end the emergency, which critics say is an overreach from the White House and stunted economic recovery from the pandemic." Yet, "tough-on-immigration policies remain in place in a stated effort to stem COVID-19 spread."

---

### tion, Border Security.

On Wednesday, Sen. James Lankford (R-OK) unveiled “two major pieces of legislation related to immigration and border security that would end the use of Title 42 expulsions, which have been used to quickly remove migrants from the country. The legislation would also ensure that the D-19 national states of emergency be fully lifted before the Biden administration ends the Title 42 public health order.”

## Child Care May Face Price Spike As Federal Funding Expires.

ports, "Families across the country are struggling to afford child care," but "later this year, federal funding for the industry will be cut, and force parents, many of them mothers, to make the tough economic decision to cut back work hours or leave jobs." The report also noted that "child care prices ranged" between "8% and 19.3% of the median family income per child, and above what the Department of Education's family's income." But "the situation is even worse for low-income families as well as divorced and single parents," and as part of its economic agenda, child care was ultimately cut from last year's spending package."

## Extra Benefits By March.

recipients nationwide will stop getting pandemic-era boosts after this month's payments, the Food and Nutrition Security Act says. "The maximum amount for their household size – whichever was greater." The emergency allotments are "ending now because the pandemic is over." "Maine is still providing the boost; there, benefits will return to pre-pandemic levels in March."

### **ses Bill To Expand Authority Of State Foster Care Advocate.**

Virginia's House of Delegates unanimously passed a bill Wednesday to expand the authority of the state foster care ombudsman. The bill, HB 1511, expands the authority of the Foster Care Ombudsman Pamela Woodman-Kaehler's office "has the authority to investigate deaths, abuse and neglect of foster care children, and to protect the identities of people providing confidential information during investigations, prohibiting the ombudsman and staff from disclosing confidential information in judicial or administrative proceedings." The bill "makes all memoranda, work product, notes and communications confidential, and not subject to discovery, subpoena or other means of legal compulsion."

### Of Potentially Spoiled Canned Meat, Poultry.

Conagra Brands is recalling some 2.6 million pounds of canned meat and poultry that were potentially spoiled due to a website that "states that a Conagra establishment notified it 'after observing spoiled and/or leaking cans from multiple batches.'"

According to the article, "there have been no confirmed reports of adverse reactions due to the consumption of these products."

The recall was first reported by CBS News (2/1, Singh, 5.39M), USA Today (2/1, Grantham-Philips, 12.7M), and the Miami Herald (2/1, Neale, 1.44M).

## Production Of Weight Loss Drug Wegovy To Address Shortages.

“The maker of the popular weight loss drug Wegovy,” Novo Nordisk, “said Wednesday that it is ramping up production.”

---

states.” Novo Nordisk “said on Dec. 28 that all dosages of the drug would be available again after supply issues, but at some centers.” While “there continues to be ‘pent up demand’ for Wegovy...Novo Nordisk expects this to become less of a problem in the next few months,” CEO Lars Jorgensen said.

### **Seeing Fast Food Chains Spawns Similar Proposals In New York, Virginia.**

A California bill that would create a council regulating everything from wages to working conditions at fast food chains has inspired similar legislation elsewhere, setting up a fight over how far unions and politicians should go in this battle.” State legislators in New York and Virginia have introduced similar bills. Opponents of the proposals “say they are too restrictive to protect workers.”

---

### **Medicare Advantage Clawbacks Rule.**

Humana Inc. said it needs more details to gauge the impact of a new Medicare policy that threatens to claw back billions of dollars in overpayments. “We’re very concerned,” Humana CEO said. “With over ‘5 million Medicare Advantage members, Humana is the second-largest seller of the private plans. We’re not alone in claiming overpayments.” In 2022, “administering health plans for the government program accounted for almost 80% of our operating income.”

### **Attorneys’ Fees In Status Change Row.**

American Medical Association (AMA) reports, “A class of Medicare patients isn’t entitled to recover attorneys’ fees and costs in a lawsuit to force the agency, change patients’ status from ‘in-patient’ to ‘observation’ without notifying them first.” The HHS maintains “that the agency’s position ‘was ‘substantially justified,’ even though it was ultimately rejected by the patients’ Equal Access to Justice Act motion.”

### **Medicare Advantage Plans Offered Supplemental Benefits In 2022 But CMS Received Limited Encounter Data From Plans, Report Finds**

A report from the Congressional Budget Office (CBO) says, “Nearly all Medicare Advantage plans offered supplemental benefits in 2022, but CMS received limited encounter data from many plans to determine how often beneficiaries used the benefits.” The office “analyzed plan benefit data for almost 4,000 Medicare Advantage plans across the country to determine how often beneficiaries used the benefits.” It “also reviewed CMS regulations and guidance and interviewed officials from CMS and the plans.”

### **House Budget Committee Warns of Long-Term Danger To Medicaid, Medicare.**

The [Houston Chronicle](#) (2/1, 982K), “Republicans in Congress...present a long-term danger to Medicaid and Medicare” as they push for cuts to the federal budget.” Tomlinson says, “If folks like Reps. Marjorie Taylor Greene of Georgia and Matt Gaetz of Florida, or Sen. Ted Cruz of Texas, or House Speaker Kevin McCarthy, allow the federal government to default on its debts or both.”

---

### **Medicaid Eligibility Now.**

---

---

s, "As of today, states can start reevaluating whether the millions of Americans who have remained covered by Medicaid, Megan Messerly reports." While "some GOP-led states are more than ready to pare down the program," others –

### **Keeping Medicaid Expansion, But Expresses Concerns Over Unsustainable Budget.**

Guido, 20K) reports, "The House Health and Welfare Committee is recommending Medicaid expansion remain in Idaho." The House committee "finalized its letter addressed to House Speaker Mike Moyle" (R) "Tuesday morning and it will send the letter," which "said members have concerns over the 'unsustainability of the current increased budget request' removed in 2018 and provides coverage to adults who made too much to qualify for traditional Medicaid health coverage."

### **Medicaid Expansion Bill.**

"More than 15 bills that would have expanded Medicaid to provide health care coverage to primarily the working poor in the House or Senate "held a hearing on those Medicaid expansion bills." Lawmakers "killed the bills as a worsening health care crisis in the healthiest states with the highest percentages of uninsured residents."

### **South Carolina Could Lose Coverage This Year.**

reports, "An estimated 300,000 South Carolina Medicaid recipients could lose their health coverage over the next year due to eligibility." In April, "South Carolina Health and Human Services...will be required to restart annual eligibility reviews to ensure the latest move as the country moves on from COVID-era restrictions and assistance."

### **Lose Medicaid Coverage This Year.**

,000 Tennesseans who enrolled in Medicaid during the COVID-19 pandemic are expected to lose their coverage this year as the state government-funded health insurance program." A TennCare spokesperson "said this week that no removals will occur until the reviews will begin in March."

### **Period Of Uninsurance Following Medicaid Disenrollment, Analysis Shows.**

reports, "In a year after Medicaid disenrollment, about two-thirds of people had a period of uninsurance, according to a new analysis. It found that 16 percent of people had another source of coverage sometime during that year, and 33 percent eventually regained coverage. Only 11 percent of Medicaid/CHIP enrollees maintained coverage during the full year after disenrollment, KFF reported."

### **Strategies Can Minimize Impact Of Transition After People Lose Medicaid Coverage.**

Pennsylvania Health System, and Madeline Bell, president and CEO of Children's Hospital of Philadelphia, write in the new report. "People will lose Medicaid coverage" on April 1 "despite still being eligible, a fate known as 'administrative churn,' which happens when people are unable to contact enrollees due to change of address, or other administrative hurdles." They say, "We must prevent this churn with targeted strategies, such as "targeted strategies" to "support individuals in transitioning to the Affordable Care Act marketplace." They conclude, "A multifaceted approach and a tool kit of strategies are needed to do right by Pennsylvanians."

---

---

access to health care for all.”

---

### **KD-Caused Anemia In Patients On Dialysis.**

The U.S. Food and Drug Administration (FDA) on Wednesday approved GSK Plc’s drug,” Jesduvroq, “as the first oral drug to treat anemia in patients on dialysis who have been on dialysis for at least four months.” Currently, “the wholesale acquisition cost has not yet been set for Jesduvroq.” “We are in the process of submitting the required documentation with Centers for Medicare & Medicaid Services (CMS) for coverage.” (Subscription Publication, 4K) also covers the story.

### **Artificial Tears Due To Bacterial Infections Linked To Permanent Vision Loss, One Death.**

(Subscription Publication, 8.41M) reports the CDC and federal health officials have warned against using EzriCare Artificial Tears, a multi-drug resistant bacteria, that have caused permanent vision loss, hospitalization, and one death so far. The artificial tears in question were imported from India by Aru Pharma Inc, and made by Global Pharma Healthcare Pvt. Ltd. (Subscription Publication, 0.52M) reports, “Most patients had used artificial tears before the onset of their condition, said the CDC, which is investigating the outbreak strain in open EzriCare bottles in two states and is testing unopened bottles to see whether they may be contaminated.” The artificial tears are “manufactured by India-based Global Pharma Healthcare, which sells the product under other brands.”

### **Considering Indoor Smoking Ban After Push From Breathe Easy NKY Coalition.**

(Subscription Publication, 0.52M) reports, “A second city in Northern Kentucky,” Bellevue, “is considering telling smokers to step outside to light up.” “Bellevue is the latest city in the area.” And while “Bellevue may be the latest Northern Kentucky city to consider a smoking ban, but it won’t be the last.” “The coalition is behind these smoking bans.” Local 12 “asked Northern Kentucky Chamber President Brent Cooper why the coalition is pushing for a smoking ban.” Cooper explained, “We feel like if they can see that momentum that started with Dayton [passing a smoking ban], we want to see that in Northern Kentucky and do the same.”

### **Failed FDA Trial For Gene Therapy May Not Be Worthwhile.**

(Subscription Publication, 0.52M) reports, “Taysa Gene Therapies hoped the trial design for its gene therapy for a rare neuromuscular disease,” giant axonal neuropathy, “would be successful.” “But FDA questions about the study mean that the path forward is almost certainly longer, and might not even be possible.” “Taysa is planning to conduct a randomized and placebo-controlled clinical trial to further evaluate the therapy, TSHA-120.” Taysa CEO said, “If we don’t get the right stats, doing the study really wouldn’t be a worthwhile endeavor.” The National Institutes of Health “is evaluating the study.” Taysa acquired the rights to the therapy in 2021.”

### **Smoking Cannabis Is Not Associated With Impaired Lung Function In Young Adults.**

(Subscription Publication, 0.52M) reports, “Smoking cannabis was not associated with impaired lung functioning for young adults in a new longitudinal study.” “The study suggests that smoking cannabis is more likely to cause emphysema than smoking tobacco.” Instead, researchers found that “smoking cannabis was associated with increased lung function.”

---

---

one was not tied to reduced airflow or impaired lung functioning.” However, “limitations in both studies suggest that the new study “examined whether chronic cannabis smoking was associated with damaging effects on the lungs of young people. With the normalization of teen cannabis use, “In this context, understanding more about the harms associated with long-term cannabis use is important.”

### **Verily To Drug Companies Conducting Clinical Trials.**

Verily, the high-profile Alphabet health unit, is laying off employees last month. A part of the trial’s goal “will be to recruit patients more remotely, and also to reduce the need for office visits unnecessarily.” The study “is part of a long-standing collaboration between Verily and the drug’s maker, Otsuka Pharmaceutical Co., a Japanese pharmaceutical company based in the United States.” Verily’s “business of providing services to drug companies that are conducting clinical trials is increasing.”

### **Novartis To Grow Again Ahead Of Sandoz Spin-Off.**

Novartis on Wednesday predicted that core operating income would grow in a ‘mid single digit’ percentage range in 2023 for its generics business. Core operating income for the full year “was broadly flat at \$16.7 billion, it said in a statement. Novartis also “said it was on track to spin off its generics unit Sandoz in the second half of the year as part of its effort to focus on its core pharmaceutical business.”

### **Novartis Helped By Sales Of Shingles Vaccine.**

Novartis on Wednesday beat fourth-quarter profit and sales forecasts helped by sales of its blockbuster shingles vaccine Shingrix. The company’s “strong Q4 results are the latest endorsement of chief executive Emma Walmsey’s spin-off last year of consumer products unit. Novartis reported a fourth-quarter profit of 25.8 pence per share on sales of about 7.4 billion pounds (\$9.11 billion).”

### **LeafLink \$100M In Latest Funding, Makes Leadership Changes.**

LeafLink said on Wednesday it has raised \$100 million in the latest financing round and added co-founder David Minson and serve as executive chairman.” With this “\$100 million in funding led by CPMG, L2 Ventures and Nosara. LeafLink has raised a total of \$100 million in financing after six rounds.”

### **Sherlock Bio Speeds Up Launch Of CRISPR-Based Handheld Diagnostic Tests.**

Sherlock Biosciences said on Wednesday it has acquired UK-based Sense Biodesign to speed up the launch of handheld diagnostic tests. Sherlock Bio “raised \$80 million nearly a year ago for development of diagnostics based on the CRISPR tool, and the company is now in financial terms of the deal with Sense.”

### **Novartis Financial Plan, Seeks To Recover After Charges Of Malpractice At Its Homes.**

Novartis announced a financial restructuring on Wednesday giving bondholders the lion’s share of control as the French nursing care company “will cut its debt by around 3.8 billion euros (\$4.13 billion) and receive a cash equity injection of 1.55 billion euros from the French government, the U.S. Centers for Disease Control and Prevention (CDC) and other investors.”

---

---

### **Hospital In Transgender Discrimination Case Affects All Patients' Access To Care.**

reports, "A federal judge recently ruled against the University of Maryland Medical System in finding that it discriminated against a patient who underwent a hysterectomy that was recommended by his physician to treat gender dysphoria." The judge's "ruling supports all patients' right to care from their doctors, rather than subject to arbitrary institutional policies."

### **Link Between Rising Temperatures, Increased Fungal Infections.**

Subscription Publication, 8.41M) reports fungal infections are increasingly spreading across the US, and a growing concern about their spread.

### **Consider Removing Fallopian Tubes To Prevent Ovarian Cancer.**

reports, "There is no reliable screening test for ovarian cancer, so doctors urge women at high genetic risk for the disease to have their fallopian tubes removed, usually around the age of 40." And on Wednesday, the Ovarian Cancer Research Alliance "broadly states that ovarian cancers originate in the fallopian tubes, not the ovaries...is urging even women who do not have mutations – that is, who are not at high genetic risk – to consider having their fallopian tubes removed if they are planning to have children and are planning a gynecologic operation anyway."

### **Addressing Gender Inequities Without Menopausal Hormone Therapy.**

(1, 20.6M), Susan Dominus writes, "Menopausal hormone therapy was once the most commonly prescribed treatment for women's health issues, but now it's being questioned because of concerns about hormone therapy and elevated health risks for women of all ages." She adds, "Hormone therapy carries risks...as do many other treatments." She notes that "studies since 2002 have provided reassurance that for healthy women under 60 whose hot flashes are troubling them, hormone therapy is a safe and effective treatment." "It is painful to contemplate the sheer number of indignities unnecessarily endured over the past 20 years. ... Maybe the good news I can hope is that it confirms the current trend toward research that reassures."

### **Increased Risk Of Cancer, Study Finds.**

(1, 20.6M) reports ultra-processed foods "may increase your risk of cancer – particularly ovarian or brain cancer, research has found." A study "assessed the diets of" 197,426 individuals "for a 10-year-period in the United Kingdom and found a 'higher consumption of ultra-processed foods was associated with an increased risk of dying from all causes, cancer and specifically ovarian and brain cancer.'" They also found that it "is associated with an increased risk of dying from cancer." "0.9 cancer-related deaths occurred." The researchers concluded, "For every 10 percent increase in ultra-processed food consumption, there was a 12 percent increase in overall cancer risk, a 13 percent increase for all-cause mortality, a 14 percent increase for overall cancer-related deaths, a 15 percent increase for brain cancer, and a 19 percent increase for ovarian cancer specifically."

### **Concussions Evolving Over Past Decade.**

(1, 20.6M) reports, "For years, the treatment protocol for children with concussions involved keeping them out of school to rest and avoid physical activity. But in the past decade, physicians "have been moving toward encouraging kids to return to school and light activity as soon as they can." "The new approach," finding "that an early return to school...benefited children age[d] 8 to 18, who had less severe symptoms and returned home longer."

### **Stress Can Alter How The Brain Processes Stress, Trauma, Study Finds.**

---

Successful experiences during early childhood – particularly economic strife – appear to act as a toxic stressor that can lead to a new study.” Investigators “found that Black children were impacted more than white children, largely because of the ‘adverse childhood experiences’ (ACE) scans” from NIH-funded Adolescent Brain Cognitive Development “to identify small differences in the volume of certain brain regions that may play a role in the later development of mental health problems.” This analysis “found that disparities in eight of 14 brain regions were linked to lower household income.” Researchers “found lower brain volume in these areas in children with lower household income – both Black and white.”

### **Data Can Improve Patient Care.**

Chief Technology Officer Jay Schnitzer writes about an effort launched by nonprofit organizations in 2019 “to develop a common data model [electronic health records] and used to capture the characteristics, treatments, and outcomes of every person with a health condition.” Health organizations and other stakeholders – including EHR vendors – who see the potential of learning from millions of patients’ data to improve patient care and research through [shareable] data are endless. ... Unlocking the potential of these proprietary systems is a challenge.

### **AI Can Improve Medical Care, But Physicians Must Use Caution.**

Higher-education students Rushabh H. Doshi and Simar S. Bajaj write on the pros and cons of ChatGPT chatbot and how it can help “medical students and physicians learn more efficiently, from creating unique memory devices...to explaining complex concepts.” They advise to use it “carefully and not use it as a primary source without verification.” The students conclude, “The release of a powerful tool like ChatGPT requires immediate action to evaluate its capabilities, mitigate its harms, and facilitate its optimal use.”

### **Screen Time Could Affect Cognitive Skills Later In Childhood, Study Suggests.**

A new study, “The amount of time babies spend watching computer, TV and phone screens in their first year of life may be indirectly related to their cognitive skills later in life,” researchers found that “babies who watched on average two hours of screen time per day performed worse later on, at ages 3 to 5.” The study “aimed to test and study brain waves at about 18 months and then connected the dots between how much screen time they had in the first year and their cognitive skills around the age of 9.” The results show “that the babies who had the most screen time...did the worst on attention and memory tests.”

### **Rural Nursing Homes Especially Hard.**

A new report, “Nursing Home Industry’s National Labor Shortage Has Hit Small Rural Nursing Homes Especially Hard,” (Publication, 4K) reports the nursing home “industry’s national labor shortage has hit small rural nursing homes especially hard, forcing them to turn away new admissions, which reduces their revenue.” Meanwhile, “low Medicaid payment rates, rising operating costs, and the impact of the COVID-19 pandemic have made it even harder for these facilities to stay afloat.”

### **Real Estate-Linked Companies Receive Millions.**

A new report, “Real Estate, Management, and Staffing Companies Financially Linked to Nursing Home Owners Throughout New York,” (Publication, 27K) reports that “nursing homes that hired these companies received an average of \$27 million in payments from Medicaid, while the nursing homes that hired them were strained by staff shortages, harrowing injuries, and mounting costs.” The report also notes that “Medicaid which is ‘due this spring is sure to spark debate about what homes can additionally afford to spend versus what they are allowed to spend.’” The state inspector general is investigating whether homes properly report related-party costs.”

### **More Funding To Fund Alzheimer’s Research, Prevention, Strategic Planning.**

A new report, “U.S. Sen. Susan Collins, R-Maine, is leading a bipartisan group of senators working to pass two bills to increase funding for Alzheimer’s research, prevention, and strategic planning.” (Publication, 174K) reports, “U.S. Sen. Susan Collins, R-Maine, is leading a bipartisan group of senators working to pass two bills to increase funding for Alzheimer’s research, prevention, and strategic planning.”

---

bat Alzheimer's disease." They "would reauthorize laws that are set to expire in 2025, including the National Alzheimer's Act, extending them until 2035."

### **Diversity, Study Finds.**

Researchers at Massachusetts General Hospital (MGH) discovered "the American Association of Cancer Research (AACR) a publicly available, international cancer registry, lacks sufficient representation of cancer distribution among racial and ethnic populations" by using the CDC's "Wide-Ranging Online Data for Epidemiologic Research (CDC-WONDER), which is not powered to detect differences by ethnic group for a given cancer type." Study lead Sophia Kamran, MD, said, "GENIE is not sufficiently powered to detect differences in cancer outcomes between White and non-White patients in even the most common cancer types."

### **Deny Gender-Affirming Care Documents.**

On Tuesday, US District Judge Robert Hinkle ordered Florida's "Agency for Health Care Administration (AHCA) to prohibit the use of gender-affirming care documents if such care cannot be covered under Medicaid because treatments are 'experimental and investigational'" by February 1, 2025.

### **Prevent Questioning New Health Commissioner On HIV Funding Cuts.**

Lawmakers in Tennessee on Wednesday continued to block Democratic lawmakers from questioning the newly appointed Health Commissioner Ralph Alvarado designed to prevent and treat HIV." Health Commissioner Ralph Alvarado spoke "in front of the House Health Committee. When Rep. John Ray Clemmons asked about the HIV funding decision, he was gavelled down by Republican Rep. Bryan Terry."

### **State Budget.**

The *New York Daily News* (2/1, Slattery, 2.51M) reports, "Gov. Kathy Hochul unveiled on Wednesday a \$227 billion state budget aimed at tackling some of the state's most pressing issues, including a major infrastructure crisis and a multiyear plan to salvage the finances of the city's ailing subway system." Her "budget proposal for the fiscal year 2025-26 includes a significant amount of increased spending on health care and public education." Hochul "proposed increasing taxes on cigarettes by \$1 per pack, expanding the state's current ban on flavored electronic cigarettes."

The *New York Daily News* (2/1, Slattery, 2.51M) also report.

### **Drinking, Smoking Are Unlikely To Succeed.**

The *New York Daily News* (2/1, Slattery, 2.51M), contributor Joseph Micallef writes that many countries and governments "have proposed regulatory changes designed to discourage or limit the consumption of alcohol and cigars are coming at a time when states are also considering legalizing cannabis and decriminalizing the recreational use of many narcotic and hallucinogenic drugs." He adds, "Continued efforts to restrict alcohol and tobacco consumption are simply an alternative way to reinstall a de facto prohibition on alcohol consumption. It didn't work the first time; it's unlikely to work now."

### **Young Women, Nonsmokers.**

The *New York Daily News* (2/1, Slattery, 2.51M) reports, "The face of lung cancer has changed," and "over the past 15 years, more women, never smokers and younger people are being diagnosed with the disease." The *New York Daily News* (2/1, Slattery, 2.51M) also report, "Researchers have said 'that while lung cancer rates have risen by 79% for women over the last 44 years, they decreased by 15% for men.' The study found that smoking cessation significantly reduced lung cancer risk in some patients with a strong history of lung cancer."

---

### **Hearing On Bill Banning Smoking In Atlantic City Casinos.**

"Senate Health, Human Services and Senior Citizens Committee will hold a hearing Feb. 13 in Trenton to discuss" a bill, according to Sen. Joseph Vitale, one of the measure's sponsors." The ban "would close a loophole in New Jersey's 2011 law that Gov. Christie had promised to sign the bill if it passes the Legislature."

### **Sunscreen Spray Due To Presence Of Cancer-Causing Benzene.**

Reuters, "Banana Boat is expanding a recall it issued last year over the presence of a cancer-causing chemical in its scalp sunscreen, after it was notified by the Food and Drug Administration in July because several "batches of Banana Boat's six-ounce 'Hair & Scalp' sunscreen spray contained benzene, a known carcinogen." "Benzene is not an ingredient in the sunscreen, the FDA said earlier this week. Rather, the chemical was detected in the propellant used to spray the product. The Centers for Disease Control and Prevention, the chemical is typically found in gasoline. The recall affects about 1.5 million cans of sunscreen, valued at about \$10.52M) also reports.

### **Support Of Cancer Moonshot.**

AP (12K) reports First Lady Jill Biden is scheduled to visit a Family Health Centers of San Diego clinic on Friday afternoon. The visit is part of the administration's commitment to cancer screenings and increase early detection in underserved communities." Additionally, on Saturday, she "will meet with cancer service providers and military family members connected to the clinic." The First Lady's "visit comes ahead of World Cancer Research Day." CNN (587K) reports the Biden Administration's "moonshot initiative, which Joe Biden spearheaded while vice president, aims to reduce death rates by at least 50 percent within 25 years." The Moonshot Initiative's "goals include resuming clinical cancer trials for more patients into clinical cancer trials."

### **Fossil Fuel Industry As Part Of Cancer Moonshot.**

AP (77K), Revolving Door Project researchers Dorothy Slater and Hannah Story Brown write that President Biden's Cancer Moonshot aims to "prevent, cure, and end cancer as we know it today." However, they say, success "will require more than funding research in the coming year. During National Cancer Prevention Month, it's worth acknowledging that cancer prevention requires different approaches than treatment. It's about changing the environment." The authors recommend that Biden "challenge the fossil fuel and petrochemical industries" as part of his cancer moonshot.

### **Autism Rates Tripled In New York-New Jersey Area Between 2000 And 2016.**

AP (1.2K) reports, "Researchers at Rutgers University recently published a study in the journal Pediatrics finding that autism diagnosis rates in the New York-New Jersey area between 2000 and 2016." Data from the Centers for Disease Control and Prevention indicate "roughly 1 in 44 children are diagnosed with autism." The explanation for the increase in ASD diagnosis rates "is greater awareness of its existence and complexities, as well as changes in diagnostic criteria."

### **App To Help Detect Common Stroke Symptoms.**

AP (1.1K) reports, "Researchers have developed an app called FAST AI to detect the most common stroke symptoms – facial drooping, arm weakness, and speech difficulty – using artificial intelligence algorithms," and will present "preliminary findings...next week at the American Heart Association's International Stroke Conference." The app's creator and study lead author Radoslav I. Raychev said, "Our goal is very simple. We want to detect stroke at onset." Current research shows that early detection and treatment can significantly reduce the risk of long-term disability and death.

---

---

able or to whom it will be marketed." Experts "said a smartphone app that can help detect stroke symptoms is a game-changer for patients and motivate them to call 911, not as a diagnostic tool."

---

### **Top Planned Raise In Drugmaker Revenue Repayment Rates.**

Pharmaceutical trade body on Thursday called for the government to scrap its plans to raise the repayment rates for drugs under part of UK's voluntary scheme agreement, which makes branded medicines affordable for people, are required to pay back. The Health and Social Care "plans to raise the revenue clawback rate to 27.5% from 24.5%." Association of the British Pharmaceutical Manufacturers (ABPI) "warns that such a move to such uncompetitive levels risks undermining the UK's offer to global life sciences companies." ABPI "asked for the government to be engaged for now to buy time for negotiations."

### **Hospital Visits, Hospitalizations Linked To Severe Alcohol Use During First Year Of Pandemic.**

CNBC (519K) reports, "As debate swirls around how much alcohol, if any, Canadians should be drinking, a new study reveals a link between alcohol use and hospital visits and hospitalizations during the first year of the pandemic. The study found that alcohol use was linked to severe alcohol use." And "the increase was the same for people with and without a history of alcohol abuse, CMAA's lead author and family physician Dr. Daniel Myran said, "This is not something that just happened amongst people who were already drinking. It appears to have impacted people who were not having this harmful pattern of drinking that required health care use before the pandemic. It appears to be partly driven by health care being delivered differently during the pandemic."

### **New Measures To Combat Drug Overdose Deaths.**

The Canadian province of British Columbia said it's decriminalizing small amounts of some drugs to help combat the rising number of drug overdose deaths. Starting this week, "no one 18 years and older will be charged if caught in possession of 2.5 grams of certain illegal drugs, including cocaine, heroin, and fentanyl." For the most part, "for the most part, individuals possessing such drugs, "police will offer information on available health and social supports and will not charge them."

### **Smoking Bans In Public Areas.**

CNBC (519K) reports, "As part of a council goal to promote a healthy lifestyle for residents and visitors to Banff, smoking is being banned in public areas, including in outdoor parking lots and alleyways." The Banff "Council debated removing ashtrays from areas where smoking is banned. The council also wants to update the bylaw about the new bylaw and where smokers are legally able to light up." A review of the smoking bylaw "will likely be released in the next few weeks."

### **Radioactive Capsule.**

CNBC (10.52M) reports that on Wednesday, Western Australia Emergency Services Minister Stephen Dawson announced that a radioactive capsule that went missing...has been found." Authorities do "not believe anyone had come into contact with the capsule."

CNBC (20.6M) reports, "The capsule, which is part of a sensor used in mining, was lost sometime between Jan. 12 and Jan. 15."

---

(2/1, 6:41 p.m. EST, story 6, 1:50, Muir, 6.95M) said there was a "a somewhat refreshing initial readout from this meeting at the White House calling that hour-long meeting straightforward and frank, but these are tough conversations, and right now we're in a tough spot." Peter Alexander reported for [NBC Nightly News](#)  [Video](#) (2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) that the White House said Joe Biden and Kamala Harris will continue the conversation. There are still several months until a potential default that economists warn could hurt the economy. (2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) also briefly reported on the talks in its coverage of the FBI search of the President's former office. (2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) says the "encounter likely marks the earliest stage of a messy political back and forth." The meeting "could set the parameters for future talks." The Post adds that expectations for the talks had been "low, but the pair's interactions over the next several months will have a significant impact on the economy."

(2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) column, Marc Thiessen questions why, when most Americans believe the economy is in bad shape and economists warn that a default could hurt the economy – and give [President] Biden the pretext to shift blame for his economic fiascos to them." Thiessen says the meeting "could set the parameters for future talks." The Post adds that expectations for the talks had been "low, but the pair's interactions over the next several months will have a significant impact on the economy."

(2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) runs a fact check on an array of claims being made during the debt ceiling debate.

### **Searching Biden's Rehoboth Residence.**

(2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) reports the Federal Bureau of Investigation "found no classified documents" while carrying out a search of the President's former office at the Penn Biden Center on November 2 and at a different location. (2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) says the search is one of at least three that have taken place in coordination with Biden's legal team and the discovery of classified material in the President's former office at the Penn Biden Center on November 2 and at a different location.

(2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) Wednesday's search "is the first publicly known time the FBI searched the Rehoboth residence." And [Bloomberg](#) (2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) "classified materials were discovered" at the site during prior searches. [Reuters](#) (2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) reports that according to a source, the FBI "did not have representatives present" during Wednesday's search. However, the [Washington Post](#) (2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) clear the 3-and-a-half hour search "took place...in coordination and cooperation with the President's attorneys." The [New York Times](#) (2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) y. And [Axios](#) (2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) says he called it "a further step in a thorough and timely [Justice Department] process."

(2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) it while Bauer did not mention former President Donald Trump by name, his statement "seemed aimed at juxtaposing the Justice Department efforts to recover all the classified records taken to the former president's Florida estate culminated in the discovery of classified documents and other items. Searches of Biden's former office and Delaware homes, by contrast, have all been done in coordination with the President's legal team." (2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) reports, "Biden and his team have consistently said there has been no wrongdoing when it comes to his handling of classified documents there there." Still, [The Hill](#) (2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) says, the Administration "has faced criticism" for not sooner revealing the results of the search.

(2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) [Hill](#) (2/1, 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) reports that after the conclusion of the search at Biden's Rehoboth property, the White House said the search was "a thorough and timely process."

at Biden's private properties. [Politico](#) (2/1, Cadelago, 6.73M) reports that Sams said the President "believes in giving" them access. "That's why he's moving quickly to give them the access to his home in Wilmington, to give them access to his information to move ahead in their review."

[L](#), 6:36 p.m. EST, story 2, 2:30, Holt, 5.66M) reported that the White House is "under the microscope over its level of transparency." [Evening News](#)  [Video](#) (2/1, 6:35 p.m. EST, story 2, 2:30, Brown, 4.19M) that Biden "ignored questions about the security of his properties." [Story 4](#), 2:00, Muir, 6.95M), showed that when pressed on "why the American people were informed about" Wednesday's review, "we've been pretty transparent from the very beginning with providing information as it occurs throughout this process." [Story 5](#), 2:27M) provides similar coverage.

**Probe Into Biden's Handling Of Classified Records.** [Bloomberg](#) (2/1, Strohm, 3.57M) reports that on Wednesday, newly appointed Special Counsel John Hur "will probe into whether President Biden 'broke any laws related to the mishandling of classified documents.'" Hur had "worked for the firm Gibson Dunn & Crutcher." Bloomberg adds, "Hur's work will proceed on a separate but parallel path to that of Special Counsel Robert Mueller, who is investigating whether former President Donald Trump broke laws and obstructed justice with regard to his handling of classified materials in the 2020 presidential election."

### **Omar From Foreign Affairs Panel.**

House Republicans are preparing to remove Rep. Ilhan Omar (D-MN) from the House Foreign Affairs Committee "over her inflammatory remarks." Far-right GOP lawmakers from committees for their incendiary, violent remarks." On Wednesday, a procedural vote "was taken to remove Omar from the committee for comments that she has said she came to understand were viewed as antisemitic. It was approved on party line."

[The Post](#) says GOP leaders "have worked for weeks to ensure that there were enough votes to pass a resolution removing Omar from the committee." The effort to oust Omar "emerged last month as four lawmakers signaled that they wouldn't support the measure, which would strip her of her committee seat (and her title as House speaker, if she were to be elected) when she was House speaker." However the Post says "the inclusion within the four-page resolution of a provision that would strip her of her committee seat (and her title as House speaker, if she were to be elected) at least one crucial voter, as Rep. Victoria Spartz (R-Ind.) announced Tuesday that she would now support the measure." [The Washington Post](#) (2/1, 10.52M) that "it was remarkable" to see Rep. Matt Gaetz (R-FL) "come to the defense" of Omar. As House Speaker, Gaetz "blurted out an uncomfortable truth about the GOP's effort. Republicans want to punish Omar 'because she's a Muslim.' He decided on whether to remove her, he correctly questioned the validity of doing this because 'I don't like your view of Islam.' He has gotten this one big thing right."

### **House Intelligence Committee.**

Rep. Jim Himes (D-CT) "will serve as the top Democrat on the House Intelligence Committee after Speaker Kevin McCarthy's announcement." On national security concerns, McCarthy last week denied seats on the committee to two California Democrats: Schiff, the top Democrat on the committee, and Rep. Amodeo.

Rep. Mike Quigley (D-IL) has lost his seat on the House Intelligence Committee "thanks to his own party." Quigley "said he was honored to have served on the committee" but is "disappointed to be hit by friendly fire." Politico says members are lining up to support Quigley. House Leader Jeffries "noted that Quigley had already served for four full terms." But Quigley "had privately backed [Rep. Amodeo's] bid for the seat."

---

at would have pitted him against Jeffries, prompting some Democrats to theorize that the Illinoisan's removal from

### **Manager To Subcommittee On "Weaponization" Of Federal Government.**

se Democrats "have tapped a former Donald Trump impeachment manager" to "sit on the select subcommittee on t  
several high-profile, controversial Republican probes – including a broad dive into the FBI and Justice Department." I  
ey Plaskett, a Democrat who represents the Virgin Islands, as the party's top member on the panel, putting her at t  
was part of House Democrats' impeachment team during the 2021 Senate trial in the wake of the Jan. 6 attack."

### **ook Funds From GoFundMe For Dog's Surgery.**

al law enforcement officials are investigating Navy veteran Rich Osthoff's allegations that Rep. George Santos (R-NY  
money." Osthoff "told CNN he spoke to a pair of FBI agents on Wednesday about the incident on behalf of the US A  
finances." Last month, Osthoff "told CNN...that in 2016 Santos promised to raise funds for his pit bull, Sapphire. ...  
hoff "said Santos became uncooperative when he tried to access the GoFundMe money." [Politico](#) (2/1, Sweet, 6.73M)  
to says, "The alleged fundraising scheme is one of many scandals plaguing the freshman Republican, who has refuse  
me to light in December shortly after he won a swing seat on Long Island." The [CBS Evening News](#)  [Video](#) (2/1, 6:  
ef report Wednesday evening, as did [ABC World News Tonight](#)  [Video](#) (2/1, 6:41 p.m. EST, story 5, 0:35, Muir, 6.9  
**To Pressure Santos Out Of Office.** The [Washington Post](#) (2/1, 10.52M) reports Robert P. Zimmerman, "the man who  
ents greet him with a sympathetic tilt of the head, as if to say: I'm sorry for our loss." The Post says residents of Ne  
powerless from the lack of speedy redress." Zimmer said, "Trust me: No one's more frustrated than me. ... There a  
tos choose to resign or is forced out of office, "Gov. Kathy Hochul (D) would call a special election. ... Zimmerman i  
ys he's focused squarely on what he calls 'a mission for justice': helping his fellow citizens pressure Santos out of o

### **Senate Commerce Committee.**

ate Minority Leader McConnell has removed Sen. Rick Scott (R-FL), "who tried to oust him as the Senate's top Repu  
ell also pulled Sen. Mike Lee (R-UT), "who supported Scott's bid to replace McConnell as leader," from the panel. WH  
hip reign personally," Politico says "the latest move sends a clear message to conservatives that challenging McCon  
nnell was the likely reason he was booted from the panel despite his relative seniority on the committee and exper  
who described Scott as "furious."

### **tial Bid On February 15.**

orts that former South Carolina Gov. Nikki Haley (R) is expected to announce that she is running for president "on F  
ans." [USA Today](#) (2/1, Jackson, Chambers, 12.7M) reports that "teasing her announcement on Twitter, Haley said: 'F  
uary 15th! And yes, it's definitely going to be a Great Day in South Carolina!'" [Politico](#) (1/31, Isenstadt, 6.73M) repo  
n 2021 that she wouldn't run for president if Trump did. But Haley telegraphed her change of plans in an interview  
ou're looking at the future of America, I think it's time for new generational change. I don't think you need to be 80  
reports the "daughter of two Indian immigrants who ran a successful clothing store in a rural part of the state, Haley

s issues of gender and race in a more credible fashion than many of her peers.” She has also “pitched herself as a s  
or to the United Nations under Trump from 2017 to 2018.”  
Early polls show her well behind the former president and Florida Governor Ron DeSantis, who’s widely expected to e  
ve to Trump. Haley polled at 4% in a survey released on Tuesday by Republican pollster Whit Ayres – equal with fo  
President Mike Pence.”

ermick, Subscription Publication, 8.41M) reports that a wide array of other Republicans also are considering joining t  
SM) reports that “increased uncertainty is rippling through the Republican Party over how to beat Donald J. Trump fo  
slowly toward challenging the politically wounded yet resilient former president.” With Haley getting in, “other poten  
leash attacks on Mr. Trump’s candidacy, and to begin their own.”

**s Will Need To Keep Field Small.** Jim Geraghty writes in the Washington Post (2/1, 10.52M) that New Hampshire Gov.  
idential candidate someday. But it’s hard to be fully enthusiastic considering the circumstances of this cycle.” His inte  
ow how Trump won the 2016 nomination. Sixteen other Republicans, most of whom (Rand Paul? Carly Fiorina?) had  
anti-Trump vote.” Geraghty argues, “To stop Trump in 2024, some Republicans with presidential ambitions will hav  
udes Nikki Haley (who apparently will soon no longer be merely a potential candidate), Mike Pence, Mike Pompeo, C

### **Sinema’s Potential Role In Three-Way Senate Race.**

) reports “progressives are betting that Arizona, a longtime Republican stronghold, has moved far enough to the left  
[I-AZ] to win.” Rep. Ruben Gallego (D-AZ) “launched his campaign for her seat last week, painting the race as a ch  
nger who would be a lobbyist for working families.” But, there are “several questions to be answered heading into n  
es says there is concern among some Democrats “about splitting the vote in a three-way race,” but “Gallego’s allies  
Republicans have tried to frame Gallego’s entry into the race as chaotic for Democrats.”  
says Gallego “is looking to build on the strong Latino support he has received in his Phoenix-area district – and he  
o typically don’t participate and are disillusioned and distrustful of politicians.”

### **For State Employees In New Florida Budget.**

ida Governor Ron DeSantis (R) “is pushing for permanent tax cuts and pay increases for state employees in the com  
widely considered a potential contender for the 2024 presidential nomination, unveiled his \$114.8 billion spending  
ly 1.”

### **Propose Banning “Latinx” From Official Documents.**

A group of Hispanic lawmakers in Connecticut has proposed that the state follow Arkansas’ lead and ban the term ‘La  
speakers.” The word “is used as a gender-neutral alternative to ‘Latino’ and ‘Latina’ and is helpful in supporting pe  
s.” But “state Rep. Geraldo Reyes Jr. of Waterbury, the bill’s chief sponsor and one of five Hispanic Democrats who  
a ‘woke’ term that is offensive to Connecticut’s large Puerto Rican population.”

### **ined By Success In Foreign Affairs.**

es (1/31, 20.6M) that when President Biden’s presidency is remembered 50 years from now, “what will matter...is

---

---

his presidency but reached new lows with the Taliban's victory in Afghanistan and Russia's invasion of Ukraine." Still, many see any Russia gains from its aggression. ... For Iran, the objective is to stop the regime from reaching a nuclear breakthrough against Chinese invasion while preserving a viable American option to intervene. On all this, the administration is a proponent. "He defeated Trump, and then he defeated Putin, Khamenei and Xi." Or it will be, "He defeated Trump, but then he can't defeat the others."

---

In an editorial, the [Wall Street Journal](#) (2/1, Subscription Publication, 8.41M) says that with Russia apparently preparing for war, more rapidly. The Journal particularly argues for equipping the Ukrainian air force with F-16s, and providing its air command. "In an editorial, the [Wall Street Journal](#) (2/1, Subscription Publication, 8.41M) characterizes the College Board's decision to cancel the SAT as a political move by Gov. Ron DeSantis (R).

**Inflation.**" In an editorial, the [Wall Street Journal](#) (2/1, Subscription Publication, 8.41M) questions markets' enthusiasm for the Fed's rate increases and that the Fed is not finished with rate increases.

**China's Response to the U.S. Trade Policy.** The [Wall Street Journal](#) (2/1, Subscription Publication, 8.41M) editorial argues Czech President-elect Petr Pavel's intention to seek a more assertive response from Beijing, which could further challenge Western governments' ability to hold China to account.

**FDA's Proposed Reforms Are Inadequate.**" The [Washington Post](#) (2/1, 10.52M) reports that the FDA "vowed to make deep reforms to address deep flaws in the agency's culture, technology and structure. On Tuesday, the FDA finally revealed its fix: creating a new agency, the Center for Drug Evaluation and Research." FDA Commissioner Califf "told us that splitting up the FDA 'deserves some due consideration.'" This sweeping reorganization the agency announced this week." How "many more crises – and infant deaths – will it take for lawmakers to act?"

**Police Reform with Bipartisan Support.**" A [Washington Post](#) (2/1, 10.52M) editorial says while President Biden "signed a modest law mandating mental health training to guide officers when they encounter people experiencing mental health crises" and issued an executive order requiring federal – though not state and local – officers who have disciplinary records ... there's only so much he can achieve without bipartisan support. "Despite pessimism, the ground for some compromise nevertheless feels fertile. Improvement by increments is still improvement."

**Healthcare-Only Reconciliation Package.**

---

that the White House called Monday "for senators to move forward with a slimmed-down, health care-only reconciliation bill on the cusp of beating the pharmaceutical industry." On Friday, President Biden "told senators to move forward with a health care bill" but "struck a blow to his agenda over its tax and climate provisions, which Biden said he will address through executive action." Biden's statement just recently, if the Senate doesn't act on that, and doesn't take action on climate, he has a contingency plan: "I'm going to make sure that climate change in a way that's going to be effective." However, [NBC Nightly News Video](#) (7/18, 6:35 p.m.) says "executive action...climate activists believe without Congress acting to speed up wind and solar installations and electric vehicle incentives."

AP (7/18, 10:00 a.m.) says "most but not all Senate Democrats" are "no longer betting on a climate and tax deal" with Manchin and "are ready to move on and accept what they know is feasible: party-line legislation lowering prescription drug costs and health care costs." "Senate Democrats" who "said it's time for the caucus to cut its losses after months of negotiation with their elusive centrist senator" criticized and blamed Manchin for abandoning talks with Senate Majority Leader Chuck Schumer that could have passed. Sen. Martin Heinrich (D-NM) "is openly calling for the revocation of his energy committee chairmanship. Most other Democrats say they can get."

AP (7/18, 10:00 a.m.) says Manchin's decision to oppose the tax and climate provisions "presents a dramatic but not necessarily fatal setback for a global climate catastrophe." Manchin "appeared to leave a sliver of hope for passing climate legislation this year, but the provisions he said he'll support are, according to nonpartisan climate scientists and policy analysts, inadequate to avert a global climate catastrophe."

AP (7/18, 10:00 a.m.) says even if Democrats could win Manchin's support, the Senate's "arcane budget rules threaten" their "plans to introduce legislation before November's midterm elections." Manchin "said he could support a broader tax and spending bill in September, but the late-night votes and other procedures required to push the legislation through." Schumer "is moving forward on the Medicare and Medicaid bills, but in the health-care bill, options – especially for tax legislation – get more limited."

AP (7/18, 10:00 a.m.) **Further Limit Democrats' Bill.** Meanwhile, a separate report from [Politico](#) (7/18, Emma, Scholtes, 6.73M) says Senate Republicans "are in a bid to eject more items from the ever-slimmer package Democrats once called Build Back Better." While the move is "likely quicker and less painful for the majority party now that Manchin has sworn off tax hikes," even "the central piece of the bill, drug prices – is at risk of dwindling further under the Republican onslaught."

## Of Biden's Term.

AP (7/18, 10:00 a.m.) reports, "Anthony S. Fauci, the nation's preeminent infectious-diseases expert who has served as the face of the White House since the start of President Biden's term after more than 50 years in government, he confirmed Monday." He said, "By the time I'm 80, I want to see the president for me to step down from this position."

AP (7/18, 10:00 a.m.) reports, "Even with the added clarity about the possible timing of his retirement, January 2025 is a long way off." "Fauci, 82, said he is not worried about any investigation, noting that Republicans, who have accused him of misleading the public about whether he is still working."

AP (7/18, 10:00 a.m.) reports that when Fauci was asked on CNN's "At This Hour" if COVID-19 "impacted his thoughts to retire he said, "I'm at a rather advanced age. ... I have the energy and passion to continue to want to pursue other aspects of my life."

Fauci, 81, was appointed director of the National Institute of Allergy and Infectious Diseases in 1984, and has led research for decades. In 2020, Fauci "was thrust even more into the spotlight at the height of the coronavirus pandemic under then-President Donald Trump," CNN reports. "Fauci played a key role in Trump's news briefings and on political TV shows during the early part of the pandemic. He was characterized as 'moving the goalposts' in terms of ending pandemic restrictions like lockdowns, mandatory masking and school closures." However, "after Biden was elected president in 2020, he appointed Fauci as his chief medical advisor." CNN (21M) reports, "Fauci said that he feels like he's established a good system at NIAID to facilitate a smooth transition to the next president." (18, Owerhohle, 6.73M), Fauci "spoke of his legacy, the hard truths about the country's pandemic response and his

percentage than the 23.7% reported out of stock for the week ending May 22, when the shortage dominated headlines.”  
Reasons for the persistent shortage – including hoarding by consumers, manufacturers prioritizing certain formula packaging, and limited supply of containers when they do go to the store.”

### **Shortage Of Monkeypox Vaccine In US.**

The shortage of the monkeypox vaccine nationwide has been hamstrung by logistical, bureaucratic and technical errors, leaving health officials and activists warn the government’s sluggish response may no longer be enough to contain the growing outbreak.” A recent report says, “The shortage may be surprising, since officials previously said the country has enough vaccines in the Strategic National Stockpile for ACAM2000 vaccine, which is approved for use against smallpox and can also be used for monkeypox.” On July 15, a CDC official said the shortage is ‘frustrating’ but said the administration is actively working to increase supply.”  
The article continues the story.

### **Challenges Facing Barriers Treating Monkeypox.**

A report from the CDC (7/18, Rouben, 10.52M) says physicians “treating monkeypox say they’ve faced ‘daunting’ paperwork and obstacles that may continue to encounter barriers with tests, vaccines and treatments.” Among the challenges, the FDA-approved antiviral treatment, TPOXX, is facing delays in its testing and “vaccine-sharing formula,” although CDC Director Rochelle Walensky said more progress has been made. She said the CDC “failed to contain” the spread of monkeypox, adding that the window for controlling and containing the virus “probably

### **Sexual Health Clinics Unprepared For Monkeypox Cases.**

Reports, “Sexual health clinics on the frontline of the monkeypox response are already financially stretched, leaving the CDC concerned since the COVID-19 pandemic.” According to infectious disease experts, “sexual health clinics...are best placed to identify and treat people at risk of sex with men.” However, “such programs are doing so largely without additional funding despite years of financial neglect and the resources needed to curb rising rates of other sexually transmitted diseases (STD).” Experts in both the US and UK

### **CDC’s Monkeypox Response.**

In a recent interview, former US Food and Drug Administration Commissioner Dr. Scott Gottlieb’s interview in which he criticized the federal government’s response, according to CDC Director Dr. Rochelle Walensky. On Sunday, Gottlieb stated “that it may be too late to control and contain the outbreak,” saying the US is making ‘a lot of the same mistakes,’ such as a lack of testing early on and not enough vaccine supply. He also said the CDC has expanded the monkeypox case definition to encourage health care providers to test for the virus.

### **High Cases Per Capita Across US.**

A recent report (7/18, 5.2M) reports, “D.C. has more cases of monkeypox per capita than any state, prompting public health officials to launch

---

## **s For US Cruise Ships.**

att, 10.52M) reports, a noticed posted on the Centers for Disease Control and Prevention website on Monday announced the end of a program that allowed the public to monitor the spread of the virus at sea." A statement from the CDC said it "depended upon each cruise line having the same COVID-19 screening testing standards, which may now vary among cruise lines." The report that the agency's website also states, "CDC has worked closely with the cruise industry, state, territorial, and local health departments to create a healthier environment for cruise passengers and crew. ... Cruise ships have access to guidance and tools to manage

9K) and [Forbes](#) (7/18, Kelleher, 10.33M) also report.

## **inst BA.5.**

) interview, White House COVID-19 response coordinator Dr. Ashish Jha discusses the new BA.5 fueled COVID-19 wave. The bottom line that people need to know, which is: the things that we know that have been working for us as a country – they all work for BA.5. Like, our tools continue to work, and if we use them effectively, we can continue to manage the wave. The CDC are mentioned. No reports.

## **mid BA.5 Fueled Wave.**

526K) reports, "Nearly half of all new reported COVID-19 cases in Ohio in recent weeks came from the BA.5 variant, which has jumped past 24,000 newly reported cases during the seven days ending on Thursday." Comparatively, "the state was reporting about 12,000 cases in May." However, due to at-home tests, reporting is unreliable. Currently, "COVID-19 hospitalizations, a more reliable measure, are rising in Ohio. Last Thursday saw the state break past 1,000 current hospitalizations, the first time since March 1."

## **a Counties Mask Up Amid COVID-19 Wave.**

80K) reports, "Residents living in 45 of South Carolina's 46 counties should mask up to reduce the spread of COVID-19." The CDC and Prevention's community levels map, there are now "32 counties with high levels of COVID-19" and "another 13 counties with high levels of COVID-19 use masks while indoors, including in schools and workplaces."

## **g In Los Angeles County, Less Falling "Seriously Ill."**

7M) reports the "super-contagious Omicron subvariants that can reinfect people within weeks are fueling a new wave of COVID-19 cases in Los Angeles County is moving toward an indoor mask mandate." Though, "this wave is different from previous ones in that hospitalizations are rising, patients are generally less sick, and intensive care units are less crowded than in previous waves. Changes with the virus itself, for the improvements." However, it "doesn't mean COVID-19 has become a toothless tiger." No reports.

## **ty's Mask Mandates For Schools.**

---

eta, 587K) reports, "Parents who have fought throughout the pandemic to reopen schools early, end school mask mandates for school boards across San Diego County." The article says "on Monday, a number of those parents – including parents of children with special needs – denounced the return of San Diego Unified's indoor mandate." While "the school district brought back its mask mandate, as defined by the Centers for Disease Control and Prevention," several "parents argue that government and schools are forcing students to wear masks."

### **Academic Gains Last Year, Reducing COVID-19 Learning Gap.**

Despite a year of disruptions, students largely made academic gains this past year that paralleled their growth pre-pandemic and are on track to close the learning gap, according to a report released Monday from NWEA, a nonprofit research group that administers standardized tests. "Researchers found 'gains across in math and reading' for students in elementary and middle school." However, "students in high-poverty schools had fallen further behind, making it likely they will need more time than others to catch up." The report is a "positive sign of hope for academic recovery from COVID-19. But sustained effort and investment in education remain crucial."

### **Vaccine Development, Variant Vaccines.**

Moderna Senior Vice President of Infectious Diseases Jacqueline Miller "says the company recognized early on that two new variants – Delta and Omicron – were identified in late 2020" and the original vaccines did not work as well against Beta. Miller says "the company is working on updating the vaccine to protect against the new variants." But "while the process of updating an mRNA booster" can take only four to six weeks, testing, manufacturing, and distribution can take longer. "However," she says she hopes the timeline will get shorter once the first variant-specific booster is out of the gate. "As omicron 'has become the dominant variant,' the company had 'more time to develop boosters against BA.4 and BA.5, after originally generating candidate boosters against the original virus.'"

### **Reviewed By CDC Advisory Committee.**

The New York Times (NYT, 587K) reports, "Gaithersburg's Novavax Inc. is on the cusp of rolling out its Covid-19 vaccine." The article says "the vaccine is expected to be approved by the Food and Drug Administration's panel must first 'review the biotech's protein-based vaccine' on Tuesday. The review is 'less than a week after the vaccine was approved for use in the U.S.' and the panel's recommendations will shape the CDC's 'guidance around the vaccine's use in adults for emergency use authorization does not equate to a full commercial approval – which Novavax...said it intends to seek,' but 'the vaccine is 'not yet approved for younger populations,' and is 'also developing a flu-Covid combination vaccine and an Omicron-specific vaccine.'"

### **Importance Of Developing Drugs To Treat Mild COVID-19 Symptoms.**

A shift is afoot in the search for COVID-19 therapies: some researchers are turning their attention towards drugs that treat mild symptoms, rather than severe disease. "Treating mild symptoms 'might sound indulgent, but drugs for mild disease could mark a turning point in the fight against the virus,' says a researcher. "It could 'help limit disease spread' and 'stem the rise of new variants.' But 'there are barriers to finding drugs for mild disease, including a lack of incentive to research mild disease. But US National Institutes of Health committee on COVID-19 treatment is working to find drugs to treat mild COVID-19, both because of broad public-health benefits and because long quarantine periods are a burden for many people.'"

### **Pediatric COVID-19 Vaccine In Europe.**

The European Medicines Agency on Monday started reviewing a low-dose version of BioNTech (22UAy. DE) and Pfizer's (PFE) COVID-19 vaccine for children. "The review is expected to take several weeks." In June, the US Centers for Disease Control and Prevention "cleared the way for use of the shot in children over 5 years old."

---

for approval in Europe in the age group on July 8, proposing a three-shot course with a 3 microgram dosage, which

### **Spray, Tablet COVID-19 Vaccines.**

that according to a recent study, "Injected vaccines against the coronavirus that causes Covid-19 have been hugely slowing the pandemic's death toll by an estimated 63%." But "even as vaccine manufacturers race to update the first-generation vaccines delivered via nasal sprays or tablets that would deploy more immune defenders to the body's front lines: the lining of the nose and throat, the lining of the gut." "The approach is promising for COVID-19, but "many scientists say the approach needs an injection of funding to accelerate the pace of development."

### **Curb Pandemic-Era Public Health Authority Through Litigation.**

DeJester) reports, "Through a wave of pandemic-related litigation, a trio of small but mighty conservative legal blocs has been fighting America's future battles against infectious diseases." Motivated "by what they've characterized as an overreach by the federal government into three overlapping spheres – conservative and libertarian think tanks, Republican state attorneys general, and religious freedom groups." "The litigation is being led by government agencies charged with protecting community health."

### **Surge Higher Than Winter's Omicron Wave.**

7M) reports, "New coronavirus infections in parts of California may be surging even higher than winter's Omicron wave." The article says "the concentration of coronavirus levels in San Francisco's wastewater is at even higher levels than last winter." "The professor in environmental health at Emory University." Indeed, "the wastewater data suggest many infections aren't being detected." "So many people are using at-home over-the-counter tests, which can be more convenient than getting tested at a medical facility."

### **More COVID-19 Antivirals Are Prescribed In Richer Zip Codes.**

3, Munro, 227K) reports, "Over four times as many prescriptions for COVID-19 treatment pills were filled in richer ZIP codes." "The Virginia Department of Health (VDH) COVID-19 task force leader of health care therapeutics coordination Alexis Page said the disparity is difficult to tell if the disparity exists because of actual need for the treatments or issues with access." The trend for fewer prescriptions for income, health, language and transportation....mirrors the situation nationally – where the rate of oral treatment is higher in wealthier areas. "The CDC had the largest number of sites to receive the medication, according to a June Centers for Disease Control and Prevention report."

### **"Ever-Changing" Guidance Hindering State Pandemic Response.**

reports that on Monday, Connecticut Gov. Ned Lamont (D) "admitted that the ever-changing guidance from the federal government, and now with President Joe Biden – has made it difficult for Connecticut health officials to adjust and respond during the pandemic." "Lamont spoke at a meeting in this city's central library, Lamont joined local leaders and state Commissioner of Public Health Dr. Manisha Juthi." "Lamont said he thinks the CDC has been a little slow and reactive and unclear going back during both administrations, from my point of view." "He said he's been working closely with the medical community, trying to give people a clear sense of where we're going and what we're doing."

### **COVID-19 Vaccinations For Children 4 And Under.**

---

) reports Maine's "Cumberland County is among the leading counties nationally in COVID-19 vaccinations for children. More than 1,700 children in the southern Maine county aged six months up through four years have received their first shot in that age group, according to Maine Center for Disease Control and Prevention data."

### **Pushes Mask Mandates Ahead Of Fall Elections.**

The report says, "A new wave of COVID-19 cases and rising hospitalizations ahead of an October election are creating fresh pressure for mask mandates in the Canadian province despite calls by some doctors to do so." The "global surge in cases, mostly in children, is pushing governments to consider mask mandates while trying to avoid extending or reintroducing unpopular restrictions." And "in Quebec, some now say the government's mask mandate is not going far enough."

### **Mass COVID-19 Testing.**

The Wall Street Journal (WSJ, 8.41M) reports that this week, two of China's largest cities ordered residents to undergo mass COVID-19 testing, leading to new and economically crippling lockdowns.

### **China's Lockdowns As Other Regions Extend Lockdowns.**

The report says, "Chinese cities including Shanghai are rolling out new mass testing or extending lockdowns on millions of residents. Shanghai reported 'an average of around 390 local daily infections in the seven days ending on Sunday, higher than about 340 in other parts of Asia. China is adamant about implementing its dynamic zero COVID policy of eliminating outbreaks as soon as possible in many of its 16 districts and in some smaller areas where new infections had been reported recently, after similar tests in other parts of the country."

### **Approval For Moderna Pediatric COVID-19 Vaccine.**

The report says, "The U.S. Food and Drug Administration (FDA) said late on Monday Australia's drug regulator Therapeutic Goods Administration (TGA) has provisionally approved the Moderna COVID-19 vaccine for children aged six months to five years." Spikevax "was provisionally approved in the country for individuals aged six years and older and for emergency use in children aged 12 years and older," the statement said. "The approval 'comes as Australia battles a major virus outbreak fueled by the highly transmissible new variant, with high levels in several states."

### **South Korea 'Finally Defuse' COVID-19 Crisis.**

The report says, "South Korea is on the path to 'finally defuse' a crisis stemming from its first acknowledged outbreak of COVID-19, the state news agency Yonhap said on Monday. The country has seen a surge in cases driven by Omicron subvariants." It "says 99.98% of its 4.77 million fever patients since late April have fully recovered, and 99.99% of those that proved positive." Reuters says "the World Health Organization has cast doubts on North Korea's claims, saying it is amid an absence of independent data."

### **Japan's Pediatric Clinical Trial For COVID-19 Vaccine Candidate.**

The report says, "Novartis and Sanofi's S-268019 & Co Ltd (4507.T) said on Tuesday it started a clinical trial of its COVID-19 vaccine candidate among children aged 12 years and older. The recombinant protein-based vaccine known as S-268019 will be carried out among 48 children in Japan." The vaccine "has been shown to be safe and effective in a phase 1 trial."

---

## Power Imbalance In Global Health.

ports, “A few months into the coronavirus pandemic, India and South Africa jointly petitioned the World Trade Organization for a moratorium on intellectual property rights for COVID-19 vaccines, treatments, and medicines, without fear of legal action, until herd immunity was achieved worldwide.” The article says “this is not a success story, however. If anything, it illustrates the injustice baked into the current system.” The article also says “the WTO’s decision is based on a number of counts, and will have a limited impact on bringing about an end to the world’s coronavirus nightmare.”

## es County Plans To Bring Back Mask Mandates.

20.6M) op-ed, California Today author Soumya Karlamangla writes that according to the Centers for Disease Control, "the most effective ways to reduce the spread of Covid transmission." However, "only one of them is planning to reinstate an indoor mask mandate." Nationally, during the current Covid wave, Los Angeles County health officials hope that asking people to mask up will curb the virus's spread as well as their approach and believe that mandates should be reserved for crises, which the BA.5 wave has not yet proved itself to reduce transmission just helps us reduce stress elsewhere. ... So anything you can do to sort of mitigate the steepness

**Past COVID-19 Emergency Declarations.**

piece, Carrie Sheffield, a senior policy analyst at Independent Women's Voice, writes "Dr. Anthony Fauci may be re-empowered by the President's Department of Health and Human Services quietly re-upped the public-health emergency determination for COVID-19." She says "Kavirer Becerra "is merely a top power-broker in a power-hungry, nanny-state administration." She says "Biden wants to surprise, of course, as his White House continues down the path of toxic policymaking that will harm more than it help Americans."

## Abuse Over Endorsement Of Gender Transitioning For Children.

s Assistant Health Secretary Rachel Levine is being criticized “for endorsing gender-transition treatments as a way to address gender dysphoria, much as Florida for enacting limits on transgender treatments for youth,” said policies must “support and empower the ability to get gender affirmation treatment in their state.” Journalists and lawmakers took to social media, calling the comments “a disservice to children.” Among them, Sen. Roger Marshall (R-KS) warned that “under the Biden Admin’s ‘gender care’ policies, the health of children is at risk.” The backlash followed Levine’s appearance.

## U.S. HHS \$240K To Settle Possible HIPAA Violation.

ption Publication, 215K) reports, "Houston-based Memorial Hermann Health System paid the Health and Human Services Department of the Health Insurance Portability and Accountability Act. " The health system "failed to respond to a patient's news release." This "disclosure from HHS came Friday as the office announced 11 resolved investigations from its reports.

---

## **S, Biden Administration To Penalize Drugmakers Ending, Reducing Discounts For 340B Program.**

372K) reports that in a July 15 letter, 181 House representatives “are demanding the Biden administration penalize drugmakers for “the latest fallout from an intensifying battle between the U.S. government and the pharmaceutical industry.” The representatives say the 340B Drug Discount program are increasing costs for hospitals and clinics and hurting patients.” Although “months ago, the Office of Inspector General of the U.S. Department of Health and Human Services has not taken action.”

## **Rep. Ritchie Torres (D-NY) Calls For Probe Into Federal Government’s “Lethargic” Response To Monkeypox.**

372K) reports that on Monday, Rep. Ritchie Torres (D-NY) called “for a Washington inspector general to probe the federal government’s “lethargic” response to monkeypox.” The representative, “who is gay, penned a letter to the inspector general stating that the ‘failed federal response’ to monkeypox has landed a ‘disproportionately destructive impact on the LGBTQ+ community.” Torres says he and his colleagues are closely monitoring this issue and will review the letter to determine the appropriate course of action once we have more information.

## **ARPA-H.**

372K) reports North Carolina is one of multiple states trying to land the headquarters for a new federal agency focused on research and innovation for Health – or ARPA-H. Members of the state’s Congressional Delegation sent a letter to HHS stating, “With an unparalleled focus on research, STEM, biotech, and business training programs to prepare for a workforce skilled in cutting-edge research, academic excellence, and innovation, a group formed under the North Carolina Biotechnology Center, ARPA-H in NC Coalition, is also advocating for the establishment of ARPA-H in North Carolina.” The group includes Duke Health, Duke Margolis Center for Health Policy, RTI International, SAS Institute, UNC Chapel Hill and the North Carolina Biotechnology Center.

---

## **Florida Declared A WMD.**

372K) reports, “Florida Attorney General Ashley Moody is calling for illicit fentanyl to be declared a weapon of mass destruction.” Moody says “the deadly drug” is “a weapon of mass destruction” and “is urging President Biden to either use executive authority or urge Congress to do so.” Moody says “if Americans are being murdered, the whole federal government and every tactic and capability that we have should be used to stop it.” Moody has also “urged President Biden to raise the issue with Mexican President Andres Manuel Lopez Obrador.” Biden says “we are accelerating our efforts to disrupt the trafficking of fentanyl and other drugs, that are literally killing people.”

## **Settlement, Federal Funds For Programs To Fight Opioid Addiction.**

372K) reports, “Nevada governments are planning to expand opioid treatment and addiction prevention services.” The funding “is slowly being distributed to cities and counties in “settlements the state made with drug manufacturers.” The funding “is slowly being distributed to cities and counties for treatment and support services.” Funding from the settlements “as well as some federal grant money are distributed to counties and some cities based on need.” State Department of Health and Human Services clinical program planner says “we have evidence to guide spending, invest in youth prevention, focus on racial equity, and develop a fair and transparent process.”

---

### **Of 988 Suicide Hotline.**

ts the new 988 suicide hotline launched nationally on Saturday as part of the National Suicide Prevention Lifeline Ne  
y risen – from 3.3 million in 2020 to 3.6 million in 2021. Experts say the new number, which is easier to remember,

ntal health advocates “expressed hope Monday that the launch of a three-digit mental health crisis hotline will help  
) to promote the service.

) reports advocates have questioned “whether the call centers could withstand the demand for mental health assista  
h (7/18, Cohn, 629K), the [Hampton Roads \(VA\) Virginian-Pilot](#) (7/18, Stone, 227K), and the [Portland \(ME\) Press He](#)

### **Price Legislation Facing Partisan Battle.**

y Leader Mitch McConnell is warning that Democrats’ plans to curb drug prices would insert ‘socialist price controls’  
er a shrunken economic package that President Joe Biden wants Congress to complete within weeks.” Last week, P  
an he’d sought at the beginning of his presidency,” and “said he wanted Democrats to quickly write and pass a mea  
buying health insurance and modestly reducing federal deficits.” Manchin “announced last week that those were the c  
t inflation.” Manchin’s “performance is clearly wearing on many,” and his “objections spiked most of Biden’s multitr  
raise taxes on the rich.”

### **es Tough Stand Against Minor Patent Changes In Drugs.**

, 262K) reports, “For the second time this month, the U.S. Patent & Trademark Office has taken a tougher stand to  
tend monopolies, which can result in medicines costing more.” The issue “has percolated for years amid complaints  
t protections and that the PTO has failed to act on those concerns.” But in 2021, “the matter gained traction...when  
were used ‘misused to inhibit or delay’ competition from lower-cost generic drugs.”

### **Improve Long-Term Care System.**

d Gleckman reports, “One would have thought that after more than 750,000 Covid-19 related deaths among older a  
g-term care facilities that Congress would act to improve the nation’s long-term care system.” He adds, “In an extra  
andoned any effort to improve a long-term care system.” Gleckman says, “Senate Democrats now appear to be look  
edicare to gradually negotiate drug prices and a separate bill to extend certain subsidies for buyers of health insuran

es are important, and reducing Medicare drug prices certainly would help many older adults, but they would do nothing to

## Loss Abortion Rights.

47M) reports Vice President Harris traveled to New Jersey on Monday "to address the NAACP's 113th national convention and access," and had meetings scheduled "with more than 20 New Jersey state legislators and local leaders to discuss the 50-year-old Roe v. Wade decision." Other speakers at the event include CMS Administrator Chiquita Brooks-LaSure and New Jersey Governor Phil Murphy.

## Have Increased Since Roe Overturned.

...reports, "Some clinics have stopped offering the pills to out-of-state patients fearing that state lawmakers could pass legislation banning "an FDA-approved drug, conservative lawmakers could still attempt to make abortion pills illegal, or make getting them more difficult. The law also provides similar coverage.

## na Abortion Ban.

0.52M) reports, "A Louisiana judge on Monday temporarily extended an order blocking the state trigger law but did not say whether the district court determines whether the near-total state abortion ban, with no exceptions for rape or incest, violates the Constitution. It is the first time in the weeks since the Supreme Court struck down *Roe v. Wade* and gave states the power to enact restrictions. Some federal district courts have blocked, unblocked and then reblocked the ban."

(7/18, Hilburn, 137K) says a Baton Rouge district judge may rule "as soon as Tuesday on whether he will extend a temporary injunction to block all abortions following Monday's hearing."

Reports that whatever the district judge decides, "Louisiana Attorney General Jeff Landry said he anticipates that the c

### tion Ban.

Kanawha County, West Virginia Circuit Court Judge Tera Salango on Monday blocked the state's "pre-Roe v. Wade" abortion ban at the University of West Virginia Health Center of West Virginia – to restart services." The abortion ban "made performing or obtaining an abortion illegal," she said. "The law has never been superseded by a slew of modern, conflicting laws." West Virginia Attorney General Patrick Morrisey criticized "the judge's decision" and said he would appeal the decision to the state Supreme Court.

The judge argued that West Virginia's law "dating back to the 1800s making performing or obtaining an abortion a felony" was unconstitutional. She said the law "violates the rights of women to make decisions about their own bodies."

### ana To Try To Implement Law Restricting Abortion Access For Minors.

## Offer Abortion Training To More Medical Students.

s, 3.37M) says, "California lawmakers have laid the legal groundwork for a range of health providers to provide abortion care, but scant opportunities for training have made it harder for them to do so."

no's Republican Party "adopted language to their platform" on Saturday "that supports the criminalization of abortion on son to get an abortion to save their life." State GOP delegates "approved changes to the party's platform that went point of conception. The new language backs criminalization of all abortions in Idaho."

reports some anti-abortion groups in Texas “are intensifying their efforts to shut down access for residents seeking employers and others trying to” ensure abortion access. One recent court filing shows that beyond providers, anti-abortion groups are targeting people who support them; people who volunteer time or give money to abortion providers; employers who support pregnant workers;

ports, "As states pass and revive legislation restricting abortion following the Supreme Court ruling that overturned *Roe v. Wade*, Florida could "surpass last year's total of out-of-state abortions, which was nearly 4,900, according to Florida Agency for Health Care Regulation and Licensure. The state "has the third highest abortion rate among states in the country, according to the CDC."

18, 6:44 p.m. EST, story 7, 2:20, O'Donnell, 3.48M) provided additional coverage.

### ask Complying With Both Federal, State Abortion Laws, Some Experts Say.

---

### **Michigan State Budget Funding For Adoptions.**

her, 2.16M) reports Michigan Gov. Gretchen Whitmer's (D) "office on Monday detailed more than \$20 million in line-items that would be cut if the governor signs it into law Wednesday." The majority "of the vetoed budget items in House Bill 5783...involve restrictions on the funding of adoption centers that promote alternatives to abortion." Whitmer "vetoed a \$2 million tax credit for adoptive parents" as well as "a \$1 million cut to adoption." "abortion."

### **Effect Of Supreme Court Decision Overturning Roe Closes.**

Mississippi abortion clinic at the center of a U.S. Supreme Court case that overturned Roe v. Wade has been sold and will be moved to Mexico City, the Associated Press on Monday." The owner "said the furniture and equipment from Jackson Women's Health Organization has been moved to Mexico City, Mexico."

### **Abortion Access In Federal Lands, Complicated, Legal Experts Say.**

In theory, clinics within federal enclaves could provide a loophole for abortion access in states with restrictive abortion laws, but in practice, providing abortion services on federal lands is complicated."

### **NIH Protects Reproductive Research Data After Overturn Of Roe V. Wade.**

Baumann, Subscription Publication, 4K) reports, "Reproductive health researchers shouldn't have to turn over their data to the federal government – although legal experts caution it's an added layer of protection and not a guarantee." The NIH program "will require researchers to disclose data from the legal process, making the data inadmissible as evidence unless the participant agrees to its disclosure, a policy that has been in place around since the 1970s, allowing researchers to study illicit drug use to guide evidence-based policies."

### **Estimated Number Of Mothers Choosing Adoption.**

AP (2.16M) reports that the overturning of Roe v. Wade is unlikely to lead to a spike in the number of mothers opting to give up their babies. The number of infants available for adoption will make an additional 10,000 infants available to adopt annually. That figure represents 9 percent of the estimated number of infants in the adoption waiting lists. Although there is no national source of reliable data, experts estimate the number of infants available for adoption is around 10,000 annually, according to the CDC and HHS.

### **Filibuster" Block Efforts To Provide Legal Abortion Access.**

AP's Vice President Harris "on Monday said she and President Biden 'will not let the filibuster stand in our way' on pro-life legislation ahead of November's midterm elections to protect 'our most essential rights and freedoms.'" Speaking at a NAACP convention, Harris said "the filibuster stand in our way of our most essential rights and freedoms."

AP (20.6M) reports Harris "put the issue [of abortion] in terms of religion, saying that supporting a women's right to choose is a religious belief. It just requires us to agree the government shouldn't be making that decision for her.'" According to the Times, Harris' statement "tends to obscure more nuanced positions held by critical components of the party's electoral coalition, including Catholics, who have long been a key part of the party's electoral coalition, including in the South, where the issue has helped push some Catholic voters toward Republicans." The article mentions the CDC and HHS.

### **Abortion Access Reportedly Among Biggest Users Of Phone Location Data.**

Many of the states rushing to ban abortion are also the biggest users of a surveillance tool that authorities could use to track people's phones." Supporters of abortion access "are expressing growing alarm about the potential uses that police or prosecutors could make, including to target abortion providers or the people seeking the procedure."

### **Ob-GYNs' Ability To Take Exams Virtually.**

Many OB-GYNs, including some who perform abortions, are celebrating a decision that allows them to avoid traveling to other states for gynecology. The Dallas-based medical group "had held virtual exams during the pandemic but planned to have the exams in person," saying the exams would be virtual," citing the Supreme Court decision to overturn Roe v. Wade.

### **Young Girls Highlighted.**

USA Today reports that following "the account a 10-year-old Ohio girl crossing state lines to get an abortion drew national attention, a new pregnancy is common in young adolescent girls say those pushing for very young girls to carry pregnancies to term are ignoring the child."

### **Healthcare Consolidation Attempts.**

USA Today, "Fresh off the Federal Trade Commission's successful challenges to four hospital mergers, the Biden administration is pushing for more consolidation in the health care industry than it has in past years." Last year, President Biden "ordered the FTC and other agencies to look for anticompetitive practices." According to the trade commissioners, "this is a key way to slow health care price increases; protect patients from unfair labor practices."

USA Today reports the FTC is also "interested in some legal theories of antitrust enforcement," which include "questioning whether vertical mergers, in which hospitals, insurers, or other types of health care companies seek to merge with companies that supply them with services."

### **4.8% Increase In 2023 Small Group Rates, 20.4% For Individual Market.**

USA Today, (Bordonaro, 22K) reports, "Health insurers planning to offer group and individual health plans in Connecticut in 2023 saw a 4.8% rate filings for traditional fully-insured plans, which cover 206,186 people in the state, contained an average requested rate increase (for workers) and 20.4% for the individual market."

### **21st Century Cures Act Not Greatly Impacted Clinician Time On EHR Documentation, Study Finds.**

USA Today, (The 21st Century Cures Act final rule mandating patient access to clinical notes has not meaningfully impacted clinician time on EHR documentation, a new study finds. The study "analyzed a national longitudinal dataset of all ambulatory care physicians and advance practice providers using a national survey. After the final rule went into effect, though the effect sizes are minuscule."

### **California's Limits On Healthcare Costs.**

USA Today, (Ibarra, 2.44M) reports, "California and the country are in the midst of a health care affordability crisis." However, California's limits on healthcare costs are not enough to address the crisis.

rocketing costs – its latest effort being a new Office of Health Care Affordability whose job will be to investigate the state budget was recently approved and “includes \$30 million to create the office, whose key responsibility will be to work with insurers and physician groups.” This office “is attempting to tackle the root of the issue: Providers can charge patients

### **t Among Americans, Survey Finds.**

that “a new survey of more than 1,000 U.S. workers with employer-sponsored health insurance shows that consumers are increasingly frustrated with their health insurance. From employee benefits company Optavise (formerly DirectPath), approximately one-third (35%) of respondents said they had pushed back, asking for a new, corrected bill.” Meanwhile, “some respondents paid the incorrect bill even though they knew the amount of the error wasn’t worth the effort to fix it, a substantial jump from 43% in a 2021 version of the survey.”

### **Texas AG’s Lawsuit Against Administration.**

supports the Texas abortion ban “contains exceptions to save the life of the mother or to prevent ‘substantial impairment of the mother’s health.’” The Post says Paxton is “either woefully ignorant of this lifesaving provision or thinks he can willfully defy it in pursuit of his extremist political goals.” The Post also notes that the law “underscores the obligations of physicians to their patients.” According to the Post, “Paxton professes to be pro-life, but to save a woman’s life, the doctor does not have a duty to save the woman’s life.” The Post calls on the courts to dismiss the lawsuit.

### **on Restrictions.**

es (7/18, 20.6M) that a proposed amendment to the Kansas state constitution that would “pave the way for tighter abortion restrictions” is on the ballot and “it is hard not to feel that the reproductive-rights side is a little overwhelmed.” Cottle describes “some of the challenges” and says they “are likely to pop up other places too, as the crucial battles on abortion shift to the state level.” Cottle says “it’s important to keep close tabs on the action. One day soon, a similarly intense, complicated fight may be headed their way.”

### **Losing The Abortion War.”**

g The Abortion) War,” Karen Attiah writes in the [Washington Post](#) (7/18, 10.52M) that “securing defeat is...an art,” and that “it’s important not to elegantly lose to their opponents and confidently expose our nation to danger.” Among them, Attiah writes, “Remain vigilant against a Supreme Court order signed 49 years ago, do not strengthen these rights in law, even though you hold the political high ground.” She says to “drain the motivation of your supporters and give them a sense of defeat, not a sense of victory over your opponent or safety for your people.” She says to “drain the motivation of your supporters and give them a sense of defeat, not a sense of victory over your opponent or safety for your people.”

### **untability For Increased Risk To Pregnant Women.**

/18, 10.52M), Jennifer Rubin says, “The Supreme Court’s overturning of Roe v. Wade is resulting in increased pain, suffering, and the media should “demand that Republicans face up to the consequences of their handiwork – and to demand that they take responsibility for the lives of the women who are being harmed.”

### **ortion Restrictions Threaten Lives Of “Both Parent And Child.”**

, 645K), 11 Tennessee pediatricians, internists, and OBGYNs argue that proposed tighter abortion restrictions in Tennessee “threaten the lives of both parent and child.”

---

condemn this decision to strip patients of their previously protected constitutional right to make their own reproductive choices.

### **Should Be On the Midterm Election Ballot.**

(7/18, 10.33M), in late June, the Food and Drug Administration “advised COVID-19 vaccine manufacturers to develop the shots will be ready by the fall.” But “that will probably be too late to stop BA.5,” and this late response is “partly a result of the COVID-19 crisis – and is threatening to repeat its mistakes with the ongoing outbreak of monkeypox. It’s long been bogged down by concerns about equity, armchair psychology, and an insatiable request for more data,” but instead of speeding up, it’s in even more red tape.” Pipes writes, “As midterm elections approach, FDA reform should be on the ballot.” The CD

### **Blueberries With Lead Contamination.**

its BrandStorm has recalled “two lots of its organic freeze-dried blueberry pouches due to ‘the presence or potential presence of lead in the products.” The company said the products “were distributed in the U.S. through retail and online stores services,” but the company has “not received any consumer complaints.” The recall is proactive recall.”

(Gibson, 5.39M), the [Miami Herald](#) (7/18, Neal, 647K), and [Food Safety News](#) (7/18).

---

### **Medicare Advantage Plans Can Disguise Profits As Costs.**

lays a new [report](#) from the USC-Brookings Schaeffer Initiative for Health Policy shows “parent companies that offer Medicare Advantage plans to disguise profits as costs in Medicare Advantage plans.” The report explained that “MLR rules do not apply to Medicare Advantage plans, allowing the profits to appear as costs in MLR reports for the Medicare Advantage plan.” For example, “there are substantial opportunities for net revenues to the parent company to be treated as costs to the health plans through Medicare Advantage plans.”

---

### **Medicaid Managed Care Nonprofit My Choice Wisconsin For \$150M.**

archen, Subscription Publication, 885K) reports Molina Healthcare will acquire Medicaid managed care organization My Choice Wisconsin, a nonprofit, “operating its existing Wisconsin core Medicaid and managed long-term services and supports business.” However, the nonprofit will be sold to Molina Healthcare. “My Choice Wisconsin.”

---

### **Discovering Tools To Help Manage Endometriosis.**

reports on “endometriosis, a chronic condition that affects 10 percent of women and girls, according to the World Health Organization. The lack of awareness about how to recognize and treat the disease can prevent patients from getting help.” The Times adds, “The

ing tools to manage the often debilitating pain that comes with the disease.”

### **That Will Only Cover Fertility Treatment For Employees In Opposite-Sex Marriages.**

Illinois-based Catholic hospital system” OSF HealthCare “that employs more than 24,000 people will only cover fertility treatment for employees in opposite-sex marriages. The policy could run afoul of federal discrimination laws.” Under this new “policy it transferred this year to a new third-party administrator the responsibility for a married couple of opposite sex spouses to conceive’ and said its coverage aimed to assist ‘married opposite-sex couples’ in fertility treatment.” The policy was approved by Bloomberg Law.”

### **Multiple States That Can Cause Serious Illness, Death For Infants.**

is, “The Centers for Disease Control and Prevention is warning” that the parechovirus (PeV) “that can cause serious illness in infants, including death, was found in a baby boy in Connecticut.” PeV “is common in children – most kids will get it by the time they’re in kindergarten, and it’s usually gone by the time they’re 3 months old.” The virus spreads in two main ways: “the respiratory route (like coughing or sneezing) and the fecal-oral route.” The CDC is urging parents to test for parechovirus if an infant has an unexplained fever, sepsis-like syndrome, or neurological problems.

### **Experience Higher Death Rates Than Democratic Ones.**

(3.1M) analysis, Lydia Denworth, a Brooklyn, NY-based science writer and a contributing editor for Scientific American, says that the health care system in the U.S. “has become increasingly polarized along political lines. Health became glaringly obvious. Democrat-leaning ‘blue’ states were more likely to enact mask requirements and vaccination mandates, while Republican-leaning ‘red’ states were more resistant to health measures.” The outcomes “of those differences emerged by the end of 2020, when rates of death from COVID-19 were significantly higher in red states than in liberal ones.” However, Denworth says “COVID is only the latest chapter in the story of politics and health. ... In the years prior to the pandemic, there was a growing gap in mortality rates for residents of Republican and Democratic controlled states.” She concludes that “a key takeaway from these studies is that the partisan mortality gap doesn’t have to keep widening.”

### **Collectively Earned More Than \$4.5B In 2021.**

The CEOs of approximately 300 health care companies collectively took home more than \$4.5 billion in 2021, according to a new study. While only 0.1% of the \$4.3 trillion U.S. health care economy, it still represents a vast amount of wealth for a small class of executives. “Indeed, “the lavish pay packages – which have swollen over time, as profits and stock prices have soared – tower over the relatively high salaries of health care’s rank and file.” As “more than 100 CEOs collected eight-figure paydays last year, while the industry struggled to ration medications, and devoured more of everyone’s paychecks.”

### **Children Allegedly Getting Lead Poisoning On Rental Properties.**

He has sued five more landlords who rent properties in which children with lead poisoning live, the state attorney general said. “In many cases, the landlords have failed to comply with state lead poisoning prevention laws, Attorney General Peter Neroni said. The laws require landlords to test for lead hazards, provide tenants adequate alternative housing during remediation, and penalties of up to \$5,000 per violation.”

### **A Saves Government Money Despite Contradicting Data.**

262K) reports that in June, “UnitedHealth Group’s top two executives, Andrew Witty and John Rex, told a crowd at a

---

program that outsources Medicare coverage to health insurance companies – saves the federal government money.”

### **CVS, Walgreens, 25 Other Store Brands Recalled For Bacterial Contamination.**

“The recall of a laxative sold as CVS’ store brand has been expanded to 30 brands of laxatives, including the store brand Navelbena.” CVS’ Navarro Vi-Jon “pulled one lot of CVS Magnesium Citrate Laxative Oral Solution Lemon Flavor from CVS and Navelbena.” According to the recall notice’s risk statement, written by Vi-Jon and posted by the FDA, “Immunocompromised patients caused by *Gluconacetobacter liquefaciens* that could lead to serious, life-threatening adverse health consequences.”

### **CVS Narcolepsy Drug Patent Infringement.**

Yasiejko, Subscription Publication, 4K) reports, “Jazz Pharmaceuticals Inc. filed a lawsuit alleging that a narcolepsy drug, Xyrem, is a generic version of Jazz’s Xyrem that Avadel, in a related case, has asked a Delaware federal judge to remove from Xyrem’s exclusivity.” On June 7 of the allegation that the patent’s claims are invalid, unenforceable, or wouldn’t be infringed by the brand. The lawsuit was filed July 15 in the US District Court for the District of Delaware.”

### **FDA Changed Approval Recommendation For Heart Drug Vascepa.**

“Members of an expert panel that recommended the Food and Drug Administration approve a fish-oil-based heart drug, Vascepa.” Their “concern stems from the suggestion that a substantial benefit the drug showed in a large clinical trial may not be in the study.” Data from “a new analysis published in the medical journal *Circulation* on June 28 indicated that in the study, Vascepa “may increase the risk of heart attacks and strokes.”

### **Declaring A National Climate Emergency Following Stalled Environmental Legislation Talks.**

52M) reports, “President Biden is considering declaring a national climate emergency as soon as this week as he seeks to advance his agenda, according to three people familiar with the matter who spoke on the condition of anonymity.” The potential “move” does not support his party’s efforts to advance a sprawling economic package this month that includes billions of dollars in new spending. “It could empower the Biden administration in its efforts to reduce carbon emissions and foster cleaner energy,” and two other people familiar with the matter said Biden “may also announce a slew of additional actions aimed at curbing planet-warming emissions.” However, “any new executive action on the climate would be a departure from the Biden administration’s current approach to environmental regulations.”

### **Examined.**

a paywall that “a few days after undergoing cosmetic surgery, Chelsea was in a Philadelphia emergency room with a severe allergic reaction. Her face was swollen, her lips were hardened and blistered. The burning sensation was so intense she was struggling to breathe.” The article reportedly described the procedure.

### **Health Infrastructure, Dating Apps Could Help Stop The Spread Of STIs.**

“A disease specialist, and epidemiologist, and a senior fellow and editor-at-large for public health at the Kaiser Family Foundation.”

---

---

health activist and data scientist with a specialty in forecasting, policy, and public health analysis write in a [STAT](#) (cross the United States." While "the meteoric rise of dating apps has led to more casual relationships," more "users" together." Gounder and Donnelly say "this is one of several factors that has helped propel rates of these diseases skyward." They write that "later this year, the CDC will be difficult to respond to both new and old infectious disease threats." They write that "later this year, the CDC will be they conclude that "this represents a rare opportunity to think broadly about all the data systems that might strengthen help users avoid sexually transmissible infections."

### **Antibiotic Infections Global Killer, Action Is Needed.**

Executive director of CARB-X and a professor at Boston University School of Law and Henry Skinner, the CEO of the AMR Assistance Foundation, are authors of the report. "Antibiotic-resistant infections, including MRSA, are a leading global killer." Just "last week the Centers for Disease Control and Prevention reported that antibiotic resistance has increased 15 percent in 2020, after years of steady declines." The authors write, "The current economics of" new antibiotics approvals in the past decade have gone bankrupt or shut down their antibiotic programs. This broken market for new antibiotics is "gaining traction globally is subscription models" where "governments pay a pre-determined fee for the successful development of a new antibiotic described in the first years after approval."

---

### **Heatwaves Of Deaths, Risk Of Drought.**

According to the [BBC](#) (89.21M) reports extreme heat has "engulfed parts of western Europe," as wildfires continue to burn in France. "The drought continues to deal with a "worsening drought." In Spain, Carlos III Health Institute estimated a cumulative total of 659 "mainly elderly people" had died in the previous seven days. Researchers at the EU Commission said Tuesday is "expected to be even hotter." The [New York Times](#) (20.6M) reports that UK "authorities placed most of the country under a 'red' warning for heat for the first time since 2019, but to a sweltering nation, that felt like a distinction without a difference." Consequently, "officials urged people to stay indoors on Monday and Tuesday – a plea reminiscent of the depths of the coronavirus pandemic." The [Washington Post](#) (10.52M), the [Wall Street Journal](#) (Subscription Publication), and the [New York Times](#) (Subscription Publication) are the

### **Healthcare Under Taliban Rule.**

The [New York Times](#) (Subscription Publication, 8.41M) reports that maternal and neonatal healthcare in Afghanistan are faltering due to the Taliban and international organizations. Hunger contributes to premature delivery and low birthrate, and the weakest part of the healthcare system is the

## ating At 62%.

ts website that in a new CNN poll conducted by SSRS, “nearly 7 in 10 say President Joe Biden hasn’t paid enough attention to the economy” while “his approval ratings for handling the economy (30%) are approaching, the poll finds no indication that Biden’s standing with the public is improving – and among some critical areas have softened by 13 points since the spring (from 86% in a late April through early May poll to 73% now).” His “approval rating for handling the economy has fallen from 71% this spring, down from 71% this spring). And on inflation, it is barely above water (51% of Democrats approve, 47% of Republicans disapprove).”

**Biden’s Handling Of The Economy.** CNBC (7/18, Liesman, 7.34M) reports on its website that the latest CNBC All-America Economic Survey shows Biden’s economic record has reached the lowest levels of his presidency and fallen further than that of either of his two predecessors. “Biden’s approval rating for handling the economy has dropped to 30%, down from 71% this spring. The president’s economic record is supported by just 6% of Republicans, 25% of independents and 58% of Democrats.” The survey also found that Biden’s approval rating for handling the economy “came in at 36%, 1 point lower than [former President Donald] Trump’s worst rating.”

## Says Rights Under Assault From “Extremist So-Called Leaders.”

Vice President Harris "told a gathering at a civil rights conference Monday that Americans' freedoms are under assault and enact voting restrictions." In her remarks, Harris said "We must recognize there are those who are fighting to undermine our democracy and assault our most fundamental freedoms." The Hill notes that Harris "didn't restrict access to abortion following the Supreme Court decision to overturn Roe v. Wade as well as voting restrictions that Republicans opposed to gun restrictions were infringing on Americans' rights to safety, noting that gun violence is a threat to safety." Harris "urged her audience to vote for Democratic candidates 'up and down the ballot'." The Hill reports that Harris also "urged efforts to invest in historically Black colleges and universities, eliminate racial discrimination in housing, and bolster

**ge Act On Tuesday.**

M) reports that as Democrats “try to preemptively protect other rights that could be at risk after the Supreme Court’s decision in *Dobbs v. Jackson Women’s Health Organization*,” the House “is scheduled to vote Tuesday on the Respect for Marriage Act, which would require states to recognize a marriage as valid if it was performed in another state.” The Post says that the new legislation “would also require states to recognize a marriage as valid if it was performed in another state,” and would “allow states to not recognize same-sex marriages performed in other states,” and would “overturn the *Windsor* ruling.”

5.69M) reports it would “address a national patchwork of marriage laws by requiring states to legally recognize same-sex marriages that were performed.” Sen. Susan Collins (R-ME), the GOP sponsor of the bill in the Senate, “said the proposed legislation is ‘another step to promote equality, prevent discrimination, and protect the rights of all Americans.’” According to the Washington Post, the bill “has the support of the House but will probably run into opposition in the evenly divided Senate” despite Collins’ support as a Republican.

ington Post (7/18, 10.52M) that the “overturning of Roe has energized Republicans, convincing them that they can ride the wave of conservative enthusiasm and win big in 2024. And even if most of them don’t want to outlaw same-sex marriage, the conservative base does – and they drive the agenda. It’s not about whether they want to break up families and make it illegal for millions of Americans to get married. Let’s see what they’re interested in pursuing, but that every American should be able to marry the person they love and make a pretty good idea of their real intentions.”

---

### **g Four Seats To Supreme Court.**

ght House Democrats “called for legislation on Monday that would add four seats to the Supreme Court, lamenting a  
abortion rights.” The Hill adds that while the 2021 Judiciary Act “has little chance of becoming law” because of “Rep  
among progressive Democrats about the court’s direction under three conservative justices nominated by former P

### **ons To Unionize.**

reports the staffers for “eight of the most progressive members of the House filed petitions on Monday to form union  
collectively to bargain for better work conditions.” The Times says their move “paves the way for House aides to beg  
e without the threat of retaliation – a right that other federal workers already enjoy.”

the petitions were filed as rules “that clear the way for many legislative branch staffers to collectively bargain” tool  
most significant expansion of workers rights for Capitol Hill employees in almost thirty years, with House staffers no

orts staff in the offices of Reps. Jesús “Chuy” García (D-IL), Andy Levin (D-MI), Ro Khanna (D-CA), Alexandria Ocasio  
, and Cori Bush (D-MO) have begun the unionization process. [The Hill](#) (7/18, Schnell, 5.69M) reports the Congress  
ssional staff and our democracy.” In a statement, the union said, “For far too long, congressional staff have dealt w  
es that prevent Congress from properly representing the communities and needs of the American people.” The Cong  
union will ensure we have a voice in decisions that impact our workplace.”

### **ty Sparks Warning From Burns.**

man, 20.6M) reports CIA Director William Burns issued a “warning to the agency’s work force last week after what a  
cy in Virginia, according to people familiar with the matter.” In the message, Burns “said that racism and racist sym  
ct was “found near a small agency facility located in a building that houses businesses and other organizations,” but  
as even meant to be a noose, or if whoever placed it there knew that the C.I.A. secretly operated in the building.” T  
oyee left the item, or that a foreign intelligence service was involved, according to some of those people briefed on  
l reported it, prompting the investigation and Mr. Burns’s note.”

### **tions To Trump, Others.**

ew York state residents “were charged with illegally using funds from Chinese and Singaporean investors to donate  
S. prosecutors said on Monday.” The move “was part of an effort by Sherry Li and Lianbo Wang to showcase politica  
w York, prosecutors said, adding that they raised \$27 million in investment, but never completed the project.” The Y  
he two were charged with making donations in their own names with money from foreign nationals. The Journal say

events seem to have occurred each day since Donald Trump announced he was running for president in 2016.” Rotundo says. “I’ve been wrong about the 2022 midterms. And I haven’t given up entirely on those old rules. But we live in such a crazy time that I have to change my mind.”

### **Dangerous Strategy In GOP Primaries.**

A [New York Post](#) (7/18, 10.52M) that the Democratic Governors Association’s efforts “to boost a Republican named Daniel L. Cox as a candidate for governor in Maryland, on the theory that Cox will be easier to defeat in a general election” is “part of a broader strategy to lure fringe figures over the GOP’s governing wing.” Hohmann says while the tactic “may have worked in a few places, it’s not working in Maryland.” Republicans, Hohmann writes, “barely have a grip on their own party’s many factions. Trying to fiddle with the GOP’s strategy is a recipe for disaster.”

### **Equal Pay Act.**

A [Washington Post](#) (7/18, Subscription Publication, 8.41M), former President Jimmy Carter (D) and former Secretary of State James Baker are expected to announce their 2024 presidential bids, which could lead to chaos in the 2024 presidential election.

### **Disinformation On The Rise Ahead Of Midterms.**

A [New York Post](#) (7/18, 10.52M) that “Spanish-language right-wing disinformation that spiked around the 2020 election on social media is back on the rise ahead of the fall midterms.” According to “social media researchers and Democratic political strategists...far-right disinformation is spreading on social media platforms but also on newer platforms, including TikTok, Signal and Telegram.” Alvarez says, “The problem is hardly new. Spanish-language radio, is still an effective megaphone for false narratives, particularly in Miami, where far right-wing hosts have long been a staple. Spanish-language Miami radio, conservative voices and disinformation have been almost indistinguishable.”

---

**China Competition.** A [Wall Street Journal](#) (7/18, Subscription Publication, 8.41M) editorial argues that the CHIP bill subsidizes production in China. The Journal says the measure will encourage other industries to cite China competition as a reason to seek government support. A [Wall Street Journal](#) (7/18, Subscription Publication, 8.41M) editorial says Illinois Gov. J.B. Pritzker’s recent trips to New York to promote his 2024 presidential bid, may be an effort to escape his record in Illinois, which has seen low GDP growth as well as high unemployment. Pritzker may move to other states.

**Climate Change.** A [Wall Street Journal](#) (7/18, Subscription Publication, 8.41M) says the heatwave is bringing the “predictable jargon of climate change.” The Journal says climate lobbyists and media and politics blame every turn in the weather on climate change. The Journal says European emissions, which have come at the cost of less reliable energy and greater vulnerability to Vladimir Putin. The Journal says that even if climate changes, further European emissions reductions will do nothing to alter global temperatures without larger cuts elsewhere.

**Kansas Lawmakers.** A [Wall Street Journal](#) (7/18, Subscription Publication, 8.41M) editorial lauds Kansas lawmakers for eliminating excise taxes on cosmetic procedures using a thin string to shape brows and pluck unwanted facial hair, from a state requirement that they be licensed.

---

---

**Tunisia's Slide Toward One-man Rule."** In an editorial, the [Washington Post](#) (7/18, 10.52M) argues that Tunisian President Kais Saïed "is determined to undermine the country's once-promising political institutions, established in the wake of a 2011 uprising against authoritarianism. Now, as he seeks to ratify in a referendum set for July 25, could deepen this political winter." The Post notes that leverage over economic aid and Tunisia's potential need for an International Monetary Fund bailout." The Post concludes by arguing that the international community must act to prevent Tunisia from becoming a one-man state."

**Texas Attorney General's Abortion Lawsuit."** The [Washington Post](#) (7/18, 10.52M) reports the Texas abortion ban "contains a loophole for 'medical emergencies, such as the prevention of major bodily function,'" but Texas Attorney General Ken Paxton (R) "is either woefully ignorant of this lifesaving exception or is ignoring it to achieve his political goals," as evidenced by his "legal challenge to a directive from the Biden administration that underscores the obligation of doctors to be pro-life. Yet he is saying that in cases where an emergency abortion is needed to save a woman's life, the doctor is not required to do so." The Post calls for the DOJ to dismiss his "harmful" lawsuit.

### **Rule To Strengthen Consumer Protections For Medicare Part D, MA Plans.**

On April 5, HHS, through CMS, finalized a "rule that, among other things, prohibits advertisements that do not mention the fact that they are not from the government." HHS Secretary Xavier Becerra said, "We are taking steps to protect Medicare beneficiaries from misleading marketing schemes by the health insurance companies that offer Medicare Advantage plans, those that offer Part D prescription drug coverage, and those that offer both. With this final rule, CMS is putting in place new safeguards that make it easier for people to understand the choices they are making, while also strengthening the Medicare Advantage and Part D programs." The Washington Post (4/5, Subscription Publication, 4K) reports the rule finalized Wednesday "strengthens consumer protections in Medicare's prescription drug coverage, requiring private Medicare Advantage plans to remain valid for the beneficiary's full course of treatment, and mandates that MA plan coverage determinations to be reviewed by professionals with relevant expertise." The New York Times (4/5, Subscription Publication, 8.41M), [HealthPayerIntelligence](#) (4/5, Bailey), [Medscape](#) (4/5, Herman, Subscription Publication, 262K).

### **EPA's New Rules Limit Emissions From Coal, Oil Power Plants.**

The Washington Post (4/5, Subscription Publication, 4K) reports, "Biden administration officials are ramping up regulations on coal, seeking stronger limits on mercury and other pollutants, as well as tighter controls on pollution and greenhouse gas emissions." On Wednesday, the EPA "said it expects it will reduce by more than 70% the amount of mercury and other toxic pollutants emitted by coal-fired power plants, as well as emissions of greenhouse gases from coal and oil-fired power plants." This "move is part of a broader effort to reduce emissions of toxic pollutants from power plants, and to move the electric power industry to cleaner fuels." The New York Times (4/5, Subscription Publication, 8.41M) reports the Administration's proposal "would require coal- and oil-fired power plants to reduce emissions of mercury and other toxic pollutants, as well as greenhouse gases." The EPA's rule "has two broad policy aims: Reduce dangerous toxins in the environment, while also promoting the use of cleaner energy sources like solar and wind." The Mercury and Air Toxics Standards rule "is one of several recent E.P.A. actions that could have that effect indirectly, by making coal plants too costly to operate." The Washington Post (4/5, Subscription Publication, 4K) reports, "The move follows a legal finding by [the] EPA in February that regulating toxic emissions under the Clean Air Act would be cost-effective." The New York Times (4/5, Subscription Publication, 8.41M) reports the rules aim "to eliminate up to 70% of mercury emissions and other toxic pollutants such as lead, nickel and arsenic." EPA Administrator Michael Regan said, "By leveraging proven, emissions-reduction measures available at reasonable cost, we are protecting our planet and improving public health for all." The EPA "estimates the new proposals will cost companies up to \$330 million, but yield up to \$1.9 billion in health benefits." The New York Times (4/5, Subscription Publication, 8.41M), [Bloomberg Law](#) (4/5, Hijazi, Subscription Publication, 4K), [CNBC](#) (4/5, Newburger, 7.34M), [CNN](#) (4/5, Fritz, Nil).

### **Of Pandemic Response Preparedness.**

broad outlines of an upcoming debate over a pandemic preparedness reauthorization bill” in the United States Congress. The article says that “Congress is taking stock of lessons learned from” the COVID-19 pandemic. Among the potential issues are funding for gain-of-function research, which the CDC says already exists. Also, as CDC Director Dr. Rochelle Walensky “has asked Congress for expanded data authority to deal with” HHS Secretary Xavier Becerra. The article mentions that the Food and Drug Administration is among the government agencies that are part of the debate.

### **U.S. Health Administration To Boost Access To Cost-Free Contraceptive Coverage.**

“New Jersey Attorney General Matthew Platkin is among nearly two dozen state attorneys general urging the Biden administration to restore access to cost-free contraceptive coverage for all employees.” Earlier this week, the coalition wrote to HHS Secretary Xavier Becerra asking for “a clear policy on reproductive health decisions of employees.” The coalition also wrote to the White House saying “it welcomes the White House’s proposal to restore access to cost-free contraceptive coverage for all Americans.”

### **U.S. HHS Criticizing Stance On Gender-Affirming Care.**

“The Washington Post (461K) reports, “Alaska Sen. Dan Sullivan” (R) “co-signed a March 29 letter to” HHS Secretary Xavier Becerra asking for “a clear policy on gender-affirming care.” The letter says that the HHS department’s guidance on the treatments could be “ideologically motivated.” A March 31 HHS department report “said that the guidance is “based on the best available evidence” and that such treatment can be medically necessary.” In a statement, Becerra said, “Everyone should be able to get the care they need, and shamefully not the case for transgender people. The Biden-Harris Administration remains deeply committed to protecting the rights of all Americans.” The statement said, “HHS will do everything in its power to protect transgender people’s right to health care, including access to gender-affirming care.”

---

---

in South Korea have announced that they will begin testing wastewater samples for COVID-19 viral loads. South Korea's "wastewater surveillance will" commence at 64 treatment facilities across the nation on a weekly basis. After local staff obtain results, "they will post the results on its website." A spokesperson for the Agency added that, to date, "its recent trial runs with cities and provinces have produced results largely aligned with infection trends in those areas."

### **COVID-19 Pandemic Regulations.**

Wired (2M) reports on changes to COVID-19 pandemic regulations in Los Angeles County, California. The county recently ended its "mandatory mask use" and "the county joined the rest of California's counties in having a low COVID-19 community level according to the CDC's tiered system." However, "the county has not issued masking orders for patients and visitors in healthcare settings." However, individual healthcare facilities may still require masks for people working in certain areas where people of advanced age or with compromised immune systems are receiving treatment.

### **COVID-19 Pandemic in Affluent, More Wealthy Parts Of Alabama.**

Wired (2M) reports on a case study of high school students in two school districts in Alabama. The districts are in Macon County, which has a median household income that is more than double that in Macon County. While testing results showed "students last year were almost a full grade higher in math and a half grade lower in reading" in the Macon County district, "the same analysis found that test scores had actually improved in the past year." Among the findings of the study are that COVID-19 pandemic school closures and shifts to remote instruction "did more harm than good" for students, according to the sources.

### **World Health Organization.**

Wired (2M) reports on the history of the World Health Organization as it nears its 75th anniversary. During that time, the WHO "has been instrumental in the United States and the Soviet Union" and the organization has developed "a consistent record for establishing its priorities and quality of vaccines and medicines." At the same time, "how the WHO operates and sets its priorities is also influenced by the amount of money it receives more money for its core mission" plus more respect.

### **COVID-19 Pandemic Trends In Juvenile Cases Of Long COVID.**

Wired (2M) reports on the effects of prolonged COVID-19 symptoms on adolescents and children. "Over the past year," researchers have found that "on average, parents of such juvenile report them experiencing 10 distinct symptoms. While "the majority of kids with long COVID have mild symptoms, the severity occurs can vary greatly. HHS Assistant Secretary for Health Rachel Levine said identifying why long COVID occurs is a priority. The National Institute of Allergy and Infectious Diseases is collaborating with HHS to study long COVID.

### **COVID-19 Pandemic In Forsyth County.**

Wired (2M) reports on the latest COVID-19 pandemic statistics in Forsyth County, North Carolina. The state's Department of Health and Human Services reported that Forsyth County "has two COVID-19 deaths last week" and that brings the county close to a threshold of 1,000 such deaths since the start of the pandemic. Forsyth remained at a near year-long low last week of 182." Furthermore, Forsyth County "remains listed in the low category for COVID-19 deaths."

### **COVID-19 Pandemic Benefits Among Working US Residents.**

---

---

the Mellman Group President Mark Mellman writes about recent cuts to nutritional aid benefits and healthcare coverage for the Medicaid Program...benefits," those cuts will affect "over 30 million people," most of which represent working families. Also, "the pandemic emergency" according to an HHS analysis. Mellman argues that "achieving true environmental justice requires addressing the issue."

### **Assessment Of Mask Requirements.**

Healthcare News (185K) reports Michigan's "Sparrow Health System announced Wednesday" that "it is easing its mask mandate in its outpatient facilities. Patients who are not required to wear a mask when visiting patients, seeking care for respiratory or COVID-19 symptoms including fever, cough, or sore throat. Patients who do not fit those descriptions will not "be required to wear a mask in public areas of its building." Furthermore, "care will be provided to patients if they're experiencing respiratory symptoms."

### **Applying Various Masking Rules.**

Healthcare News (154K) reported on disparate masking policies inside healthcare facilities in Ventura County, California. While St. Vincent's Medical Center in Ventura has mostly kept its regulations regarding mask usage "in place in most areas," other facilities have eliminated and maintenance of mask policies, as "policies hinge on local COVID risks" as assessed by the CDC.

### **Nebraska Governor Reveals His Business Received COVID-19 Pandemic Relief Funds.**

Healthcare News (154K) reports Nebraska Department of Economic Development," Anthony Goins, has resigned. His resignation comes "a day after the department announced the loss of grants from the agency he headed." According to the report in the Nebraska Examiner, the department "gave two-thirds of the grants to private equity ownership."

### **COVID-19 Bivalent Booster Shots Ranks Among Highest In US.**

Healthcare News (22K) reports, "While administration of the updated COVID-19 booster has slowed down since it was approved, it remains the highest in the country, data shows." FDA Center for Biologics Evaluation and Research Director Dr. Peter Marks says, "The vast majority of Americans are up to date with a bivalent COVID-19 vaccine."

### **Healthcare Industry As Public Health Emergency Winds Down.**

Healthcare News (91M) reports "the coming months carry broader health implications...with a number of regulatory shifts that expand the scope of the industry's role" amid the end of the federal government's public health emergency for the COVID-19 pandemic. Among "three major shifts" are "expanding health insurance coverage for as many as 15 million Medicaid and Children's Health Insurance Program enrollees." At the same time, "Medicaid telehealth flexibilities created during the pandemic have been extended through December 2024."

### **COVID-19 Cases, Infections To Counts.**

Healthcare News (154K) reports on new COVID-19 pandemic statistics out of New Jersey. Public health officials in the state on Wednesday confirmed that, "there were 355 patients with confirmed or suspected coronavirus cases reported across the state's 70 hospitals" and that "the state has 'low' community levels of the coronavirus" and "the statewide positivity rate for tests conducted April 1...was 3.1%."

---

---

### **Hospitalizations, Deaths, New Cases Remain Low.**

es, 372K) reports, "COVID-19 cases, hospitalizations and deaths remain at pandemic lows in Clark County" Nevada. The daily new confirmed cases in Clark County remains at 83, the same number as a week ago, according to data posted on the Nevada Department of Health's website. Throughout Nevada, "the number dipped to 109 from last week's 111," and hospitalizations also declined.

### **Shows Strong Immune Response In Hamsters.**

A new study" published Monday in the journal Nature Microbiology "has shown promising results for a nasal COVID-19 vaccine" from the Freie Universität Berlin in Germany." Freie Universität Berlin Institute of Virology head of diagnostics and study lead author Dr. Janine Hübner said, "The vaccine prevents virus replication – this could be a game changer in controlling SARS-CoV-2 transmission." Separately, a study illustrating the effectiveness of nasal COVID vaccines in hamsters."

### **Version Of Operation Warp Speed.**

h (4/5, 3.1M), Esther K. Choo and Scott Duke Kominers write, "From a public health perspective, the effects of long COVID are still being studied. At least 65 million people worldwide have already experienced it." The authors argue that we need a version of "Operation Warp Speed."

### **Avert Tragedy Of Future Pandemics.**

up the COVID-19 vaccines while at the National Institutes of Health, writes for the [Atlanta Journal-Constitution](#) (4/6, 3.1M). "We need to consider what has happened, learn from it and decide how the world – and our part in it – should operate." Dr. Hübner said, "The pandemic has shown us that health and wealth disparities widened. Biology became politicized. We are left with the burdens of long COVID and a mental health crisis. It is in everyone's best interest to recognize and solve regional problems before they become global ones. We need to avert the tragedy of future pandemics."

---

### **Obligations Amid Medicaid Eligibility Checks.**

opez, Subscription Publication, 4K) reports that HHS "is reminding state health officials of their civil rights obligations as they conduct Medicaid eligibility checks." In a statement Wednesday, HHS Office for Civil Rights Director Melanie Fontes Rainer said, "Effective communication obligations will go far to prevent people of color and individuals with [limited English proficiency] from being excluded from care and services."

### **Port Its Monitoring Of Drug Supply Chain Issues, Official Says.**

astronuovo, Subscription Publication, 4K) reports, "The FDA will need additional funding from Congress to build up its drug supply chain monitoring capabilities." Patricia Cavazzoni, director of the FDA Center for Drug Evaluation and Research, said, "If we are not able to obtain some FDA funding for our work toward shortages and shortage mitigation and surveillance, we will not be able to do it at a time where supply chains are not getting any stronger."

---

---

### **ers Of Drugs And Biologics In Post-Pandemic Era.**

cription Publication, 4K) reports, "Makers of drugs and biologics will need to continue notifying FDA at least six months before the COVID-19 public health emergency ends, according to revised draft guidance published Wednesday." The FDA intends "to ensure that the guidance applies to discontinued or interrupted manufacturing that could affect the US pharmaceutical supply chain until the emergency expires May 11." The guidance "applies to discontinued or interrupted manufacturing that could affect the US pharmaceutical supply chain so that the recommendations can continue to inform the agency's policy."

### **AI/ML-Enabled Medical Device Modification.**

s, "The Food and Drug Administration (FDA) released new draft guidance last week proposing an approach to ensure that AI/ML-enabled medical devices can be safely and rapidly modified in response to new data." The guidance seeks "to further develop a regulatory approach for AI/ML-enabled devices to increase patients' access to safe and effective AI/ML-enabled devices, in order to protect and promote public health."

### **Discuss Mental Health Crisis With Youth.**

ben, 1.22M) reports, "Creating a children's cabinet and improving access to mental health services in schools and communities are key goals of the plan. Bibb plans to support Cleveland area youth." Bibb shared some of "these ideas following a meeting on Wednesday between Bibb and Cleveland area high school students." Bibb also "invited Murthy to Cleveland to discuss what Murthy calls a 'growing mental health crisis' and how the COVID-19 pandemic has affected them." The story is covered by [Ideastream \(OH\)](#) (4/5, Morris, 2K), [WEWS-TV Cleveland](#) (4/5, LePard), [WKYC-TV Cleveland](#) (4/5, Buc

### **Of Drug Overdoses.**

eller) reports, "As telehealth use grew during the pandemic, it helped reduce the risk of drug overdoses, according to a new study. NIDA Deputy Director Wilson Compton said that as more people used telehealth, the need to expand equitable access to lifesaving treatment, including medication-assisted treatment, grew. "NIDA Deputy Director Wilson Compton said that as more people used telehealth, the need to expand equitable access to lifesaving treatment, including medication-assisted treatment, grew. "NIDA Deputy Director Wilson Compton said that as more people used telehealth, the need to expand equitable access to lifesaving treatment, including medication-assisted treatment, grew." "NIDA Deputy Director Wilson Compton said that as more people used telehealth, the need to expand equitable access to lifesaving treatment, including medication-assisted treatment, grew."

4/6) also reports.

### **Effort To Ending Cancer.**

93K) reports, "Positioned as a framework for society and the federal government to collaborate on ending cancer, the plan was announced this week, developed by the" NCI. The plan "was drafted by NCI and NIH in collaboration with the Cancer Moonshot Act. The plan "was drafted by NCI and NIH in collaboration with the Cancer Moonshot Act. The plan "was drafted by NCI and NIH in collaboration with the Cancer Moonshot Act."

### **Research Fund.**

ional Institutes on Aging "is launching a \$300 million research fund focused on Alzheimer's disease," which "aims to fund research on long-term health information of 70% to 90% of the population." NIA's initiative "will fund the project, with the platform for data collection and analysis."

---

---

ices, sensors and various government agencies.” Through “tracking health data, researchers are hopeful to make a difference after they are diagnosed.”

### **Why With So Many Posts Vacant.**

(10.52M) says, “At the tail end of a global pandemic that claimed more than 1 million American lives, there is still no administration “has nominated only 605 people for the approximately 1,200 government positions that now require Senate confirmation by the Senate, 91 are awaiting confirmation, and four are awaiting formal nomination.” But “many other crucial progress recently in nominating candidates for ambassadorial posts,” there “are still other important ambassadorships and these open positions “create the impression of a world power that cannot transcend partisan politics in its dealings with the world.”

### **Why Skeptic, Plans To Run For President.**

(10.52M) reports Robert F. Kennedy Jr., “a longtime vaccine skeptic,” who “linked childhood vaccinations to autism, a claim that has been widely discredited,” as a “Democrat” on Wednesday. He is “known most recently for his campaign to discredit coronavirus vaccines.” In fact, Kennedy’s “interests veered away from the Democratic mainstream in 2021.” Once a top environmental attorney, Kennedy’s “interests veered away from the Democratic mainstream in 2021.” Kennedy S. Fauci...and Bill Gates...conspired with drug companies to profit from vaccines.”

the story are the [Wall Street Journal](#) (4/5, Siddiqui, Subscription Publication, 8.41M), [Bloomberg](#) (4/5, Korte, 3.57M), and [The New York Times](#) (4/5, Lipton, 10.52M).

---

### **Why Encourages To Warn About Dangers Of Synthetic Opioids.**

(10.52M) reports (n. ET, story 10, 3:00, Holt, 5.02M) reported a new campaign by the Office of National Drug Control Policy is aiming to “reach young people.” C said, “It’s a lifesaving effort,” with the Administration “partnering with social media influencers to reach young people.” Gupta saying, “Know what is in the drug supply. All the young people that have died, if you look at the data, two-thirds of them are next to them. ... To me, as a physician, it’s really important to provide the tools and empower the youth of our country.”

### **Why Notes “Harm Reduction” In Effort To Stem Opioid Overdoses.**

(10.52M) reports (Pucci, 245K) reports, “Nearly 6,700 people died from accidental opioid overdoses in Allegheny County between 2008 and 2017. Coroners and medical examiners reported nearly 4,500 drug-related overdose deaths in 2018 alone – a 36% increase from 2017. Allegheny County, in part, thanks to a \$5.3 million grant from the” CDC. Allegheny County’s Health Department Housing, Food and Nutrition Services “notes ‘harm reduction’ – a dramatic shift in policy from the ‘Just Say No’ approach of the 1980s and early 1990s.”

### **Why To Overprescribing Opioids, Antibiotics.**

(10.52M) reports (Physician “burnout has been linked to overprescribing opioids and antibiotics, a new study” published in the British Medical Journal. “Physicians who work long hours are up to five times more likely to prescribe high levels of medications.” For the study, National Health Service Manchester surveyed 320 GPs over 57 practices between December 2019 and April 2020 for signs of burnout including fatigue, loss of interest in colleagues and patients.”

---

---

### **ing Opioid Addiction Treatment.**

ts, "The overdose crisis is prompting more hospitals to initiate opioid addiction treatment in emergency rooms – a  
ion among providers over who's really responsible for addressing the underlying problem of opioid misuse."

### **p Shipments Of Fentanyl.**

Mexican President Andres Manuel Lopez Obrador is calling for help from the Chinese communist regime to combat f  
makers who have called for more aggressive action against drug cartels over the crisis." Lopez Obrador, "who has f  
has written to Chinese President Xi Jinping asking him to stop shipments of the deadly drug coming from Chinese sh

### **viding Fentanyl-Laced Heroin To Actor Michael K. Williams.**

n drug dealer Irvin Cartagena "pleaded guilty Wednesday to providing 'The Wire' actor Michael K. Williams with fen  
g to distribute drugs was entered in Manhattan federal court" and "sentencing was set by U.S. District Judge Ronni  
ars in prison and the possibility of as many as 40 years."

### **decriminalize Fentanyl Test Strips.**

147K) reports, "Kansas Gov. Laura Kelly is calling for the state of Kansas to decriminalize fentanyl strips." On Wedn  
l health experts, as well as the family of a victim who lost their life to an accidental overdose."

### **Combat Opioid Epidemic On Gulf Coast.**

ports, "Drug overdoses are skyrocketing across the Coast," and "just over 160 fatal drug misuse cases on the Missis  
eaders are developing a plan." Mississippi's "monthly report activates a rapid alert by the Mississippi Public Health In  
ke Mississippi OD Free initiative is a multi-agency partnership designed for overdose prevention."

### **t Strips Available In Vending Machines.**

Washington, D.C., is making Narcan and fentanyl test strips available at vending machines in areas with high overdo  
ending machines will offer the opioid overdose reversal drug naloxone, specifically the brand name version of the m  
ess products, according to the joint announcement from DC Health, the Department of Behavioral Health and the D

ports.

### **se Of Xylazine.**

endoza, 224K) reports, "Florida Attorney General Ashley Moody warned Florida residents about the prevalence of th  
rd most Xylazine-related deaths in the state, she said." In 2016, Florida outlawed Xylazine, "but it is FDA-approved

---

arasota, Manatee, and DeSoto – “nearly 250 people died from fentanyl poisoning in 2021, a 485% increase since 2016.”

### **Address Fentanyl Crisis.**

Phillon and former DEA Deputy Chief of Staff Jim Crotty write for the [Dallas Morning News](#) (4/5, 772K), “No drug crisis is more acute than the effectiveness of today’s opioid crisis.” But “sadly...the Drug Enforcement Administration is now failing to perform one of its core functions through the annual publication of the National Drug Threat Assessment.” The authors say, “The U.S. has already fallen far behind without strong, forward-thinking leadership from DEA and the Department of Justice.” They conclude, “The Biden administration is working against future threats. This includes greater oversight and accountability for U.S. counterdrug agencies, with a focus on

### **People With SUDs Are Not The Solution.**

tesman (4/6, 299K), “As the father of a drug-addicted adult son...I know with every bone in my body that” people with substance use disorders “endangered my son in what my family and I called a free ‘community college’ for drugs and a life of crime.” But with Idaho’s “harsh sentences for the most egregious crimes.” He concludes, “If the power and resources of our government are used to provide individualized justice, and Idaho lawmakers should immediately consider HB233.”

---

### **House Bill Allowing Court-Ordered Outpatient Mental Healthcare For People With Persistent Mental Illness.**

ore Massachusetts lawmakers would let family members and mental health professionals ask courts to order outpatient care for people with a “history of serious physical harm to themselves or others.” According to state Sen. Cindy Friedman (D-MA), who authored the bill, “including a monthly assessment by a mental health professional to see if the person should remain in court-ordered care.” The bill is moving its way through the Legislature.”

### **For Meeting Youth Mental Health Needs In New Report Card.**

Hui, 396K) says, “North Carolina is getting failing grades for meeting the mental health needs of the state’s children.” The report card is issued every two years, and this year, “mental health is a major focus.” According to the report, “an ‘unprecedented’ decline in mental health contributing to the state’s F in mental health. Other failing categories include “school-based health, housing and economic

### **Depression, Anxiety, Distrust Of Certain Groups, Institutes, Expert Says.**

,” “According to many therapists and mental health professionals,” any people have reported experiencing “generational trauma or chronic stressors felt by their family or community.” According to Nonprofit BRIDGE Inc. CEO Gwendolyn VanSledright, “these symptoms can include depression, anxiety or distrust of certain groups or institutions.” Her nonprofit “worked with vaccine hesitancy and the effects of generational trauma firsthand.”

## Make Prices Worse, Harm Healthcare.

Philipson writes for the Wall Street Journal (4/5, Subscription Publication, 8.41M) that the Biden Administration's a value of drug research and will harm healthcare. Philipson argues that the Administration has not learned from issue left to the market to determine.

## Supreme Court Chance To Reduce Agency Power.

Wheeler writes for [Bloomberg Law](#) (4/6, Wheeler, Subscription Publication, 4K) behind a paywall, "Another challenge case out of Texas over the health law's free preventive care mandate is headed to the Fifth Circuit first, and raises another

## em Is Akin To A Jackson Pollock Painting.

on the U.S. health care system, the first thing that comes to mind is a Jackson Pollock painting: splashes of color channeled through care venues and resources; the white space represents the gaps across our system that prevent patients from gaining solutions have come to market in an effort to improve the delivery of health care." However, "most are aimed at fine-tuning care delivery among the splashes of color."

## te To Victory In Race For Wisconsin Supreme Court.

) reports, "The commanding victory on Tuesday by a liberal candidate in a pivotal race for the Wisconsin Supreme Court was a motivator for Democratic voters, as well as a continuing struggle among conservatives to put forward candidates." The election of Justice Bradley J. Liasiewicz, swept onto the bench by 11 percentage points, a staggering margin in an evenly divided battleground state, has transformed American politics. This "race centered squarely on abortion rights and political power, the court's new 4-to-3 liberal majority would reverse Wisconsin's 1849 abortion ban and overturn the state's far

ey, Itkowitz, Knowles, Wells, 10.52M) reports by "overturning a national right to abortion last summer, the U.S. Supreme Court. In the process, the justices also angered millions of Americans who have made their views known in key elections. In the Court election Tuesday, when a Milwaukee County judge won by 11 points to give liberals the majority after 15 years of conservative rule, voters ed relentlessly on abortion rights in a state that saw the availability of abortion disappear after the U.S. Supreme Court's high "court is now expected in the next year or two to overturn the...19th-century ban on most abortions."

o, Najmabadi, Subscription Publication, 8.41M) reports top Wisconsin Democrats characterized the race as a referendum on the issue, as well as some independents and Republicans, to vote for Protasiewicz.

also covers the story.

## tion Ban.

---

abortion ban that fueled one of the largest ballot drives in Michigan history was repealed Wednesday by Gov. Gretchen Whitmer. "The 'ban made it a four-year felony to assist in an abortion. Roe v. Wade had made the law null and void in the Supreme Court."

AP reports, "House Bill 4006 repeals two Michigan laws: one that makes it a felony to administer an abortion to a pregnant woman and another that makes it a misdemeanor to sell or advertise medication for an abortion."

Gov. Whitmer said, "Today, we're going to take action to ensure that our statutes, our laws reflect our values and our commitment to protecting everyone's ability to make their own decisions about their bodies, we can win."

The top stories of the day are [ABC News](#) (4/5, Kekatos, 2.44M), [Fox News](#) (4/5, Betz, 23.99M), [CNN](#) (4/5, Forrest, 89.21M), and the [New York Times](#) (4/5, 1.1M).

### **Idaho Bans Out-Of-State Abortions For Minors Without Parental Consent.**

AP reports, "Idaho on Wednesday became the first state to make it illegal for minors to leave the state to get an abortion. The law creates a crime called 'abortion trafficking,' carrying a penalty of two to five years in jail for anyone who helps a person travel out of state to get an abortion without the parent or guardian." The law "allows the filing of lawsuits against doctors who perform such abortions, even if the doctors are out of state. To enforce the new law, the Idaho attorney general will have 'sole discretion' to do so."

### **Lawsuit To Block Idaho AG's Ban On Referrals For Out-Of-State Abortions.**

The American College of Obstetrics and Gynecology and two doctors on Wednesday filed a lawsuit seeking to block Idaho authorities from punishing doctors who refer patients to other states for abortions. State AG Raul Labrador (R) "said in a legal opinion last week that the state's near-total abortion ban, enacted last year, applies to doctors who refer patients across state lines to access abortion services." The plaintiffs contend "Labrador's interpretation of the law violates the U.S. Constitution's guarantee of interstate commerce and the right to travel across state borders."

### **Pro-Life Groups Sue To Overturn Minneapolis Ordinance.**

A pro-life group sued the city of Minneapolis on Wednesday to overturn an ordinance that prohibits the obstruction of abortion clinics. The ordinance "prohibits the obstruction of free speech and freedom of religion." This "ordinance, which was enacted in November, was designed to protect abortion clinic sidewalk counselors who try to dissuade them from getting abortions." The plaintiffs, "Pro-Life Action Ministries and others, say the ordinance was a deliberate effort to stifle them."

### **Arkansas Approves Abortion Exemption.**

AP reports, "Arkansas' GOP-dominant Senate gave final approval Wednesday to legislation that would add a narrow exemption to one of the state's strict abortion laws. The bill requires doctors to get a second opinion from a physician before performing an abortion. The state Senate approved "the bill on a 26-1 vote, with several of the chamber's Democratic members opposing it. The exemption allows physicians "to use 'reasonable medical judgment' when determining an abortion is necessary to prevent the death of a woman or a major bodily function." Certain physicians "argue that is a harsher legal standard than before."

---

### **Victims Of Sex Trafficking.**

AP reports, "Maryland lawmakers on Tuesday passed a bill to protect child victims of sex trafficking in an about 100-0 vote. The bill would require prosecutors to prove that a child was trafficked into the state before they can be charged with a crime related to sex trafficking."

---

session last year.” The law, also “known as Safe Harbor, prohibits authorities from arresting and charging child victims of trafficking, such as trespassing, misdemeanor theft or prostitution.” Maryland joins “27 other states and the District of Columbia” across the country about the need for policies that reflect the manipulation and intimidation that traffickers employ.

### **Legal Practice Among Child Welfare Agencies To Seize Kids’ Social Security Money.**

is “widespread and ‘common among child welfare agencies’ nationwide to seize funds from ‘survivor’s benefits from the Social Security Administration” building to halt the practice, which advocates say has been in place for at least two decades.” A rising “number of states” have brought a court challenge and a bill set to be introduced in the state Legislature next week.”

### **Lack Of Special Street Crossing Signals For People With Visual Disabilities.**

2.51M) reports the DOJ “said Wednesday that Chicago has violated the Americans With Disabilities Act...for its lack of special street crossing signals for people with visual disabilities.” DOJ’s “ruling stems from a disability discrimination lawsuit filed in late 2019 by the American Council of the Blind of Metropolitan Chicago.” “Despite the long-known of the shortfall since 2006, the DOJ said.” However, only “fifteen of the 2,800 intersections were equipped with special signals – just 1%.” And “things have barely improved since, the feds said Tuesday.”

### **4% Cut To Assist With Immigrant Care Costs.**

2.51M) reports New York City Mayor Eric Adams (D) “has tried hotels, shelters and a cruise terminal to house an influx of migrants from the Caribbean and Latin America, but with no end in sight and strained services.” He eventually asked Gov. Kathy Hochul (D) to “convert the Javits Convention Center into a migrant shelter.” “But the state has no money to do so.” And “on Tuesday, city budget officials said they were forced to order 4% cuts to help cope with the costs of the influx.”

### **Child Victims Act Is Result Of His Personal Story.**

2.51M) reports that the night the Child Victims Act written by state Del. C.T. Wilson (D-MD) was about to be passed, it was “the night that C.T. Wilson had pushed the bill ‘for eight painful years’ and a ‘judge had cited the pending legislation in making public statements that drove him to wage this fight had defined his whole life and – many, many times – almost killed him.’” But telling his story “was not about their abusers whenever they’re ready to face them.” And it is also why he wrote a book on his experiences, “10,000 Hours.”

### **Prioritize Funding For Safety-Net Hospitals.**

2.51M) of Pediatrics Vice Chair of Education Dr. Ingrid Walker-Descartes writes for the [New York Daily News](#) (4/6, 2.51M), “New York City suffered from some of the highest rates of COVID hospitalizations, and the overall toll that it took on both the hospital and the community was staggering. We need to do more to help New York; now it is time for New York to help us.” She concludes, “As Albany is in the final stretch of negotiating a budget for safety-net hospitals like Maimonides that serve New Yorkers with the greatest needs, but fewest resources.”

---

### **Candy Maker To Stop Using Red Dye 3.**

2.51M) reports, “Consumer Reports, an advocacy and research nonprofit, is calling on the maker of Peeps candies to stop using Red Dye 3, a synthetic dye that has been linked to cancer in laboratory studies.”

---

---

Consumer Reports sent a letter to Just Born Quality Confections earlier this year – urging the candy manufacturer to n

### **Cost For Medicaid May Be Transferred To Covered California.**

en, 154K) reports, “Up to 50,000 low-income Ventura County” California “residents could lose Medi-Cal benefits that  
ut many can take steps to keep their coverage.” Currently, “counties are again checking eligibility and renewing cov  
ple who could be dropped from the program.” Ventura County Human Services Agency Deputy Director Jennie Pittm  
people “who are no longer eligible may be transferred to Covered California, the Affordable Care Act program.”

---

### **Limiting Gender-Affirming Care For Minors.**

ov. Eric Holcomb (R) “signed a bill banning all gender-affirming care for minors Wednesday, joining at least 12 other  
ned the legislation after Republican majorities in the Legislature approved it. The law will go into effect July 1, and t  
he year to stop doing so.”  
s the measure, “approved by the state legislature last month, prohibits healthcare providers from ‘knowingly’ provid  
nt surgeries, hormone therapy and drugs that block puberty.”  
nd [HuffPost](#) (4/5, S. Mitchell, 363K) also cover the story.

---

### **Criminalizes Gender-Affirming Care For Youth.**

evening, Idaho Gov. Brad Little (R) “signed a bill criminalizing gender-affirming medical care for transgender youth.  
der-affirming care for minors.” Almost “two dozen more are considering bills that would ban or restrict the care.” Th  
vide hormones, puberty blockers or other gender-affirming care to people under age 18.”  
law prevents minors “from undergoing transition-related surgery, though there is no evidence to suggest minors ar  
Boise.”  
ers the story.

---

### **Indiana's Ban On Gender-Affirming Care For Minors.**

Subscription Publication, 4K) reports on Wednesday, the ACLU "sued Indiana...to halt its enforcement of a new law that bans gender-affirming care." The lawsuit "filed in the US District Court for the Southern District of Indiana on behalf of clients S.E.A. 480."

reports the ACLU alleges in the lawsuit that "the statute violates patient rights. The national and Indiana state branch of the ACLU filed the bill that saw his state join at least 12 others that have restricted or banned such care."

Johnson, 626K) also covers the story.

### **Gender-Affirming Care For Minors.**

"Several Florida families are taking aim at the state's ban on gender-affirming care for minors, filing a lawsuit in a Tampa court to make medical decisions in their child's best interest." The lawsuit "takes aim at Surgeon General Joseph Ladapo, claiming their policy would harm transgender minors by forcing them to abide by an identity inconsistent with their gender."

### **Which Establishes Safe Haven For Transgender People.**

"New Jersey Gov. Phil Murphy (D) signed an order Tuesday aimed at protecting gender-affirming care, with the Department of Health grants protection to anyone providing or receiving gender-affirming care, and prohibits health insurers from denying coverage based on a person's gender identity or expression."

Johnson) also covers the story.

### **Litigation Settlement Offer Gains Support From Claimants.**

the company's shares...rose nearly 4% in early trading to hit a near two-month high of \$164.48 on Wednesday as the company announced a settlement offer to its shareholders. Claimants, easing an overhang on its plans to list consumer health unit Kenvue." Some analysts remained "positive about the offer, as they believe it could bring an end to the lawsuit." A "J.P. Morgan analyst...said in a note the settlement amount is reasonable."

### **Profit Decline In Profits In 2022.**

reports, "Independence Blue Cross's parent company on Wednesday reported a steep decline profits in 2022, as the company's earnings fell by 15% from a year earlier. Philadelphia's "biggest health insurer...had \$575 million in operating income last year, down from \$1.4 billion in 2021."

4/5, Subscription Publication, 875K) also reports.

### **Under Supervision.**

Subscription Publication, 215K) reports, "A year after Friday Health Plans began offering policies on the health insurance exchange in Oklahoma, the state's largest insurer Tuesday "by the Oklahoma Insurance Department came just weeks after its Texas counterpart took a similar action to place the company under supervision for failing to pay outstanding claims in at least these two states." Friday Health Plans needs to "obtain approval from Oklahoma regulators before it can resume business." The state issued Tuesday."

### **Trial Involving Children With Rare Cancers.**

therapy, "a novel treatment using supercharged immune cells, appears to work against tumors in children with a rare cancer." In the Italian study had no sign of cancer six weeks after the treatment, although two later relapsed and died."

### **Survivors Four Times More At Risk Of Late Mortality.**

(CNBC, 7/5, Kennedy, 288K) reports, "Childhood cancer survivors are four times more at risk of late mortality – a death occurring after the age of 15 – than the general population, even 40 years after diagnosis, according to a new study in medical journal The Lancet." The NCI-funded study found that causes of death in cancer survivors are similar to the leading causes of death in the U.S. population, including liver and kidney disease, heart disease, and cancer. "Cancers tend to occur at an earlier age in cancer survivors." Led by researchers at St. Jude Children's Research Hospital, the study offers some reasons for hope."

### **Analyst Lowers Profit Expectations Due To \$150M Expense For IPR&D.**

Analyst on Wednesday lowered its full-year and first-quarter profit expectations, citing a \$150 million hit from acquired intangible assets. The analyst lowered the "estimated first-quarter adjusted earnings to be between \$2.31 and \$2.41 per share from an earlier range of \$2.31 to \$2.41 per share, and \$11.02 per share, compared with its prior forecast of \$10.70 to \$11.10."

### **Study Shows Drug Combo Imfinzi, Lynparza Meets Main Goals For Treating Ovarian Cancer.**

Analyst reports, "AstraZeneca on Wednesday said a combination of its cancer drugs Imfinzi and Lynparza met the main goals of a phase 3 trial. Lynparza, jointly developed with U.S.-based Merck &Co, was approved last year by the U.S. Food and Drug Administration."

### **Suit Filed Against Duke University, Allergan Over Patent Infringement.**

Analyst (CNBC, 7/5, Subscription Publication, 854K) reports, "A jury in Colorado has decided the pharmaceutical company Sandoz is not infringing a patent related to the drug Latiss. The lawsuit 'centers on a patent owned by Duke and licensed to Allergan. Latiss was FDA-approved in '2008 and launched in 2009,' and Sandoz 'followed this with a generic version of the drug in 2014. The suit seeks damages to decline by around 50 percent in Texas – where the suit was originally filed.'"

### **Company Announces Financial Recapitalization, Debt Restructuring Amid Increasing Competitive Pressure.**

Analyst (CNBC, 7/5, Subscription Publication, 875K) reports, "Facing continued competitive pressures on its portfolio of generic drugs, Lannett is considering a potential recapitalization or restructuring of its debt." So far, "at the end of fiscal 2022, Lannett had \$654 million in debt, including \$350 million in senior secured notes." However, based on positive "late-stage testing of its biosimilar insulin glargine, the company believes that biosimilar insulin glargine represents a significant commercial opportunity, and our team is diligently focused on bringing it to market."

### **Study Shows Need To Administer That Physicians Need Training.**

Analyst (CNBC, 7/5, Subscription Publication, 8.41M) reports that for many new drugs, the main obstacle to their success and use is that they require specialized training. Physicians will need training to give them to patients. For example, Kite's FDA-approved CAR T-cell cancer therapy Yescarta requires specialized training for physicians to administer."

---

engineering cells to be administered.

## **82% Effective Preventing Severe Infections In Infants.**

A new experimental respiratory syncytial virus (RSV) vaccine was 82% effective in preventing severe infections in infants, according to trial details published on Wednesday that confirm preliminary data from the study published in the New England Journal of Medicine. The vaccine is currently under review by health regulators in both the United States and Europe. "The FDA is expecting the first maternal vaccine available to prevent the disease in infants."

Reports, "A decade ago a research team at the National Institutes of Health figured out a key mechanism of RSV after which they used that knowledge to create safe vaccines that would recognize the virus when it invaded the body and trigger the body to fight it off." BioPharma Dive (4/5, Alvarado) also cover the story.

## **Drug Shortages Drawing New Attention From Legislators, Others.**

STAT (4/5, 262K) reports that the issue of persistent cancer drug shortages due to the global pharmaceutical supply chain crisis has drawn new attention as legislators, health advocates, and members of the health care industry call for action to address the problem. "In January 2022, 30% of the top 100 cancer drugs were in shortage, soaring to their highest level in nearly five years, according to a report released by the Senate Homeland Security Committee. "The new wave of attention as legislators, health advocates, and members of the health care industry call for action to address the problem. "If all drugs are part of the free market, the FDA cannot force any company to make any medication, no matter how life-threatening the shortage. "The Center for Drug Shortages, who...has been tracking and charting the national drug shortages since 2001."

## **Influenza B Cases.**

CDC data show that influenza B cases have been on the rise in the United States recently. According to nationwide surveillance data, the rate of influenza B has increased to 0.36%. In January, that rate was 0.12%. However, "since the beginning of the year, the rate has increased to 0.36%." "The CDC's weekly flu vaccination dashboard" reveals that "about 48 million people have been vaccinated against influenza B since the week ending March 25."

## **Prevalence Of Alpha-Gal Syndrome.**

Patients suffering from alpha-gal syndrome due to tick bites. Alpha-gal syndrome is caused by a sugar bearing the same name as the tick. "Alpha-gal syndrome can cause an allergy to red meats and even dairy products" which can result in symptoms like "chest pains, abdominal pain, and hives." "Alpha-gal syndrome is closely associated with Lyme disease, which is carried by the black-legged tick and afflicts about 40,000 Americans each year." "Warmer summers" put people at greater risk of contracting alpha-gal syndrome as well.

STAT (4/5, 262K) reports norovirus "is on the rise in California." As a result, the Calif. Dept. of Public Health has issued a notice urging residents to be vigilant. "At least 25 outbreaks of norovirus since Feb. 1" in the state. Complicating the issues is that according to the CDC, "a large number of people are unaware of. For that reason, public health officials recommend regular hand washing."

## **Long-term Effects of Air Pollution on Dementia, Meta Analysis Finds.**

STAT (4/5, 262K) reports, "Breathing in microscopic air pollutants may raise the risk of developing dementia, according to a new meta-analysis of 10 studies." "The meta-analysis found that for every 10 micrograms per cubic meter increase in PM2.5, the risk of dementia increased by 8%."

---

### **Screen All Newborns For CMV.**

STAT (2022) reports cytomegalovirus (CMV) "appears in 20,000 babies born each year in the U.S. and leaves an estimated 1 in 100,000 children with hearing loss or vision problems. Those infected "carry the virus throughout their lifetime." However, infants are rarely tested for it, nor is there a standard screening panel for CMV." In 2015, he began lobbying Minnesota legislators. In 2018, "one proposal for CMV education made it into a session law." Dr. Weiss campaigned for another bill that would require an outreach program for congenital CMV education among prospective parents. In 2021, the Minnesota Department of Health's newborn screening advisory committee to consider adding CMV to the state's screening panel." Legislators "agreed to the recommendation." Minnesota became "the first state to screen all newborns for congenital CMV."

### **Obesity May Be Tied To Highest Risk For Obesity In Offspring, Researchers Say.**

STAT (2022) reports, "Researchers grouped pregnant women based on specific metabolic traits and found that insulin resistance was linked to a higher risk of offspring obesity, even when other traits such as high cholesterol and triglycerides." The researchers analyzed data from "1,325 women and their children." They found that "the risk linked to insulin resistance was even higher than that associated with prepregnancy obesity, defined as a BMI of 30 or higher."

### **Lung Cancer Risk May Not Involving DNA Mutation, Study Finds.**

STAT (2022) reports, "Air pollution can cause lung cancer without mutating cells, a new study found." Researchers "analyzed the protein levels in the lungs of people who had died of lung cancer." They found that, instead of causing mutations, the exposure to pollution resulted in inflammation which fostered tumor growth. "The researchers found "some of the immune cells that flocked to the lungs expressed an inflammation-promoting protein." This suggests that "pollution may be promoting lung cancer by reducing their incidence of lung cancer."

### **Physicians Reduce Paperwork, Improve Relationships With Patients.**

STAT (2022) reports, "Glass Health, a technology startup co-founded by Dr. Dereck Paul, which offers AI-driven chatbots to assist healthcare providers, could dramatically reduce the paperwork burden physicians face in their daily lives, and dramatically improve the patient experience." Dr. Paul says, "The challenge to incorporate the latest AI technology into medicine could lead to errors and biased outcomes that might harm patients." Glass Health has integrated a chatbot and developed a program called Glass AI which "uses a virtual medical assistant to help physicians with their paperwork." He "believes Glass AI helps with a huge need for efficiency in medicine," and "helps them get their lives back on track."

### **Recruiting Struggles Related To Obesity Among Young Americans.**

STAT (2022) reports, "The Air Force is now allowing recruits to have a higher percentage of body fat as it struggles to find new members." According to Air Force Recruiting Service Spokeswoman Leslie Brown, "male recruits are now permitted to have up to 26% body fat, up from the previous max of 28%." These changes follow Air Force Secretary Frank Kendall's statement in 2021 that the service "needs to meet its recruiting goal by 10% this year, after dipping into a pool of delayed-entry applicants to meet last year's goal." He added, "We need to ensure the security of our nation, stating that just over one out of every three young adults aged 17-24 are too heavy to serve in the military."

### **Gun Violence In US, Data Suggest.**

---

a record number of people are dying from firearm injuries in the US, and new research suggests that shootings are becoming more frequent. "In 2021, 10,000 people died from firearm injuries, up 9% since 1999." Researchers analyzed "data from the US Centers for Disease Control and Prevention on firearm injuries."

### **Present-Day Stroke Risk For Some NYC Communities, Study Finds.**

The research found "structural racism in the form of housing discrimination is associated with modern-day stroke risk for some NYC communities." Researchers used weighted scores for historical redlining using the average proportion of original redlined territory overlapped with modern-day stroke prevalence. They found how redlining compared with other social determinants of health when it came to modern-day stroke prevalence. The study found that from 1934 to 1968 that segregated areas in cities based on housing conditions and racial or ethnic composition."

### **Healthcare Funding Fuels Debate Between Lawmakers.**

On the surface, providing veterans the health care they need is one of the most bipartisan issues in Congress' appropriations process. "Lawmakers have signaled that veterans funding will be protected." However, "a debate over how that funding should be prioritized, especially in the face of rising costs for medical services, is emerging as an early flashpoint in the fiscal 2024 process."

### **AI Offers New Way For The Future.**

Researchers at University College London Centre for Computational Science Director Peter Coveney and Science Museum Group Scientist Dr. Sarah-Jane Leslie have created a "digital twin" of a real heart "that still pounds inside a patient's chest." A "digital twin" has "100 million patches of simulated cells" and can be used to test treatments like drugs and implants. The duo adds, "This worldwide effort to create virtual cells, tissues, and organs is a major step forward." Doctors try to figure out what is the best treatment for their patients by assessing past clinical trials on subjects who have similar conditions. They conclude, "Ultimately, the rise of digital twins could pave the way for methods to enhance your body and your health."

### **Higher Risks Of Pregnancy Complications Regardless Of Local Vulnerability, Study Finds.**

A new study released Monday from a team of researchers found that Black mothers disproportionately live in counties with high levels of vulnerability. "The researchers 'quantified racial disparities to find the counties with the highest levels of vulnerability, including high rates of death, low birth weight and preterm birth.' They 'concluded that mothers being more exposed to high community level of vulnerability and disparity between white and Black mothers exists at all vulnerability levels.'"

The study, "Researchers looked at 13 million births from Black and white women aged 10-44, comparing vulnerability score to birth outcomes."

### **Study Links Health Effects To Excess Sugar Consumption.**

Previous research has shown the negative effects of excessive sugar intake on health, which has informed recommendations to limit added sugars to less than 10% of daily caloric intake." In a "review of 73 meta-analyses – which included 8,601 studies – high consumption of added sugars was linked to poor health outcomes, including diabetes, gout, obesity, high blood pressure, heart attack, stroke, cancer, asthma, tooth decay, and more." The authors, led by experts from Sichuan University in China, said these findings – combined with existing World Health Organization guidance – suggest reducing the consumption of added sugars to below 25 g/day, approximately one serving a week."

---

11M) also reports.

### **105,615 Settlement With Juul.**

reports, "The Kenosha Unified School Board has approved a mass-action vaping lawsuit settlement following a disclosure by Weiss was informed by legal counsel from Franz Law group and attorney Lori Lubinsky that the district is eligible against Juul Labs Inc., according to school board documents." Additionally, "the school board approved to join a lawsuit against Juul Group in a 6-1 vote."

### **Improving Cigar Lounges To Governor.**

Turley, 49K) reports North Dakota "House of Representatives and Senate approved House Bill 1229, which makes revised legislation "specifies that licensed establishments could only allow the indoor smoking of cigars if their buildings meet certain standards." Burgum's "spokesman declined to comment" on whether the bill would be signed.

### **Need To Stop Alarmism Over Nonexistent Youth Vaping Epidemic.**

Stroud (4/5, Stroud, 626K), Taxpayers Protection Alliance's Consumer Center Director Lindsey Stroud writes, "A recent survey found that among American adults currently using electronic cigarettes, 40.3% had formerly smoked cigarettes. ... It also confirms the term 'youth vaping epidemic.'" Stroud says, "There is no youth vaping epidemic. ... The percentage of youth using e-cigarettes has declined by 53% between 2019 and 2022." Stroud adds, "It's time for American public health leaders to drop the alarmism."

### **Recall Process Is So Challenging, Failing Parents.**

on the experience of Erika Richter "whose 2-week-old daughter Emma died in 2018 due to asphyxia, or the inability to breathe, after choking on a recalled toy." Emma was recalled twice within 6 years and is linked to at least 40 infant deaths. In 2022, the US "had the highest number of infant deaths from choking on toys and clothes – since 2013, according to a report released this month by" the nonprofit Kids in Danger. But "the real challenge is to recall a baby product once it hits the market, according to Nancy Cowles, executive director of Kids in Danger."

### **Deaths In US Are Dying At Scene Of Shooting Before They Can Reach Care.**

A new study has found that fatalities from gun violence in the U.S. have increased over time, with more victims dying at the scene of the crime than in medical facilities." The study "published Wednesday in the Journal of the American Medical Association, examined gun violence deaths from self-inflicted injuries and unintentional injuries and unknown intent." Using CDC data, "researchers discovered the proportion of deaths at the scene of the crime has increased over time."

### **Governor Urging To Veto Marijuana Bills.**

writes in a letter to Gov. John Carney (D-DE) on Friday, March 31 published by the [Delaware News Journal](#) (4/6, 477K) "urging Carney to veto any marijuana bills. Last year you showed great leadership and courage to veto similar bills." While "the dangers associated with marijuana are real...the dangers are real." Richardson highlights the dangers over marijuana in his letter and writes, "According to a study, people who tested positive for marijuana had 55% more industrial accidents, 85% more injuries and 75% greater absenteeism."

### **Prohibit Discrimination Based On Person's Weight, Height.**

20.6M) reports on "a bill that would prohibit discrimination in New York City based on a person's weight or height in the workplace." Although the bill has not been scheduled for a vote, it has the support of a majority of the City Council, with 34 co-sponsors. Councilman James (D), "said on Wednesday that he was supportive of the bill and was still reviewing the details." The bill "is part of a trend among lawmakers in New Jersey and Massachusetts considering similar measures banning the practice." Currently, both "Michigan, Wis., and Washington, D.C."

### **Vote On Vape Product Ban.**

Henson, 49K) reports, "The debate over selling vaping products in one North Dakota city will continue." Even though the city "voted to ban vaping products for kids," the "city commissioners on Wednesday, April 5, gave the law another look before approving a motion to

### **India's Drug Exports In Africa To Continue Drug Exports After Deaths In Gambia, Uzbekistan.**

India's drug exports are in contact with foreign authorities and have held meetings in Africa to ensure its drug exports do not suffer, the government "said" 70 deaths in Gambia and 19 deaths in Uzbekistan. Although "India's drug industry is one of the biggest in the world," the "World Health Organization and other agencies showed toxins in the cough syrups." When an Indian lawmaker asked "if the government was working on the matter," the "trade and industry minister said that various agencies were working on the matter."

### **AstraZeneca Royalties For Total Sales Of Ovarian Cancer Drug Zejula.**

abong) reports, "A UK court on Wednesday ordered GSK's Tesaro to pay rival AstraZeneca royalties on total sales of the ovarian cancer drug Zejula." Tesaro "had argued the royalty was payable only on sales that are for uses claimed or covered by the licensed patents, after subtracting sales from Zejula." However, the "High Court of Justice Business and Property Court of England and Wales said on Wednesday that Tesaro must pay royalties on total sales of Zejula in each country in which there are licensed patents from the first commercial sale in that country," siding with AstraZeneca. The article also covers the story.

---

### **President Biden's Ireland Tour Next Week.**

The White House on Wednesday announced President Biden "will visit Ireland and Northern Ireland on April 11-14 to mark the 25th anniversary of the Good Friday Agreement and visit his ancestral home on the other." Biden "will travel to Northern Ireland from April 11-12 to mark the 'triumph of the spirit' to support Northern Ireland's 'vast economic potential,' the White House said in a statement." The [AP](#) (4/5, Miller) reports that Biden "will visit the towns of Drogheda, County Louth and County Mayo, where he will deliver an address celebrating the 'deep, historic ties between the United States and Ireland.'" Biden will address Ireland's version of parliament on April 13 and attend a festival in County Mayo on April 14, where he will be joined by Vice President Joe Biden and John Kirby."

---

M) reports Irish Prime Minister Leo Varadkar in a statement "said it would be 'a privilege and a special moment' to visit Ireland." Varadkar added, "Over many decades, and to this day, he has supported the cause of peace in Ireland and the G7 nations to continue working together as true partners to fulfill the potential of all the people who call this island their home." The Hill adds that Biden visited the White House for St. Patrick's Day, where the two hinted at a possible Biden visit to Ireland." The Hill adds that Biden is "inspired by the Irish poet William Butler Yeats."

(4/5, Wagner, Pager, 10.52M) reports that Biden's trip comes the week before "a host of top leaders – including King Charles III and former secretary of state Hillary Clinton – plan to be in Belfast for the official anniversary celebrations of a deal brokered by Biden and an announced meeting with Charles, whose realms as king include Northern Ireland," nor "the coronation of Charles III in the United Kingdom." According to [Fox News](#) (4/5, Gillespie, 23.99M), White House Press Secretary Karine Jean-Pierre "stumbled over Biden's decision not to attend the coronation of King Charles III." Fox News claims Jean-Pierre "fumbled her words" while discussing the president's 'good relationship' with the king while avoiding directly answering why he decided not to attend." (4/5, Hordern, 3.57M) reports Jean-Pierre later announced King Charles "invited...Biden to the United Kingdom for a state visit and that the visit would take place, but said it would be "in the near future."" Reuters adds that Jean-Pierre revealed the invitation was "the first of its kind" in which Biden informed the king that U.S. first lady Jill Biden would attend his coronation in May." According to Reuters (4/5, Hordern, 3.57M), Biden's decision not to attend the coronation of King Charles III was "a surprise."

## **Taiwan's President In California.**

(4/5, Wilkie, 7.34M) reports House Speaker McCarthy on Wednesday "hosted a carefully choreographed series of meetings with Taiwan's President Tsai Ing-wen in California as the United States as it tries to confront an increasingly aggressive China without precipitating a military crisis around the Taiwan Strait." The Hill adds that the meeting "unfolded as China is expanding its global influence," and adds that it "was a political and diplomatic coup for the U.S. government reception a Taiwanese president has enjoyed on U.S. soil, but still fell short of an audience with the president." (4/5, Sotomayor, Shepherd, Nakashima, Wang, 10.52M), McCarthy's meeting with Tsai "marks the culmination of an effort to strengthen relationships with countries that share democratic values with Taipei, even if they do not have formal diplomatic ties." The Hill adds that McCarthy is "a political leader in the line of presidential succession on U.S. soil since the United States opened diplomatic relations with Taiwan in 1979." (4/5, Hordern, 3.57M) reports the Speaker "emerged from [their] meeting...stressing the importance of the relationship between the U.S. and Taiwan." Berg adds neither McCarthy nor Tsai "mentioned China in their joint public remarks," and as such the [AP](#) (4/5, Mascarenhas, 1.26M) adds that the meeting "is a confrontational stance toward China in defense of self-ruled Taiwan." Nonetheless, [Politico](#) (4/5, Adragna, 6.73M) characterizes the meeting as "a concrete step in furtherance of one of McCarthy's top priorities: pushing back on the influence of China." (4/5, Hordern, 3.57M) reports McCarthy told reporters that the bipartisan meeting "underscored Congressional unity in supporting Taiwan's fight against the Chinese Communist Party in Beijing to overtake the island," and [Bloomberg](#) (4/5, Hordern, 3.57M) reports McCarthy in the meeting "also said he wanted the US to speed arms sales to Taiwan to strengthen the island democracy's military deterrence." (4/5, Elkind, 23.99M) that China must not be allowed to "dictate" who US lawmakers can meet with and [Axios](#) (4/5, Knutson, 1.26M) that US lawmakers "will relentlessly stand up for freedom and with Taiwan, and we will continue to stand with Taiwan." (4/5, Hordern, 3.57M) reports "more than a dozen Republican and Democratic lawmakers" to join McCarthy at the meeting, while Ernst met with Tsai. (4/5, Hordern, 3.57M), "The meeting gave both Tsai and McCarthy a prominent platform to highlight US-Taiwan ties." CNN adds that the meeting was a "highly anticipated event that marked a show of democratic solidarity in defiance of threats from China." While Elizabeth Warren (4/5, Hordern, 3.57M), likewise labeled the meeting as "a show of democratic solidarity," [CNBC](#) (4/5, Wilkie, 7.34M) says the meeting was "a show of democratic solidarity."

## To Biden.

anti-vaccine activists Robert F. Kennedy Jr. (D) "is running for president. Kennedy filed a statement of candidacy with the FEC, challenging to President Biden "a long shot." While he was "once a bestselling author and environmental lawyer who worked on a belief that vaccines are not safe. He emerged as one of the leading voices in the anti-vaccine movement, and his own family as misleading and dangerous." A brief [CBS Evening News](#)  [Video](#) (4/5, 6:40 p.m. ET, story 4, 0:25, O'D

## ors.

Former President Donald Trump is reaching out to Florida Gov. Ron DeSantis' (R) donors "directly in an effort to steal the election." Tuesday evening sought to paint the former president as the inevitable nominee and urged DeSantis' donors to jump on huge numbers and Governor Ron DeSantis' collapsing numbers. ... Now is the time to demonstrate your support and loyalty. Page memo written by Trump campaign pollster John McLaughlin. McLaughlin summarizes recent surveys showing that Trump is the favorite in New Hampshire, a key early nominating state."

**ent. Bloomberg** (4/5, House, 3.57M) reports Rep. Thomas Massie (R-KY) "became the first congressional Republican to endorse Trump. He didn't mention the former president in his Wednesday endorsement but said the US needs a leader 'who respects the Constitution, is decisive, respects the Constitution, understands policy, puts family first, and leads by inspiring. ... That's why I'm endorsing him." **Air Time Amid Trump Indictment.** The [AP](#) (4/5, Kinnard) reports Republicans "vying against...Trump for the White House this week as the GOP front-runner's indictment and arraignment dominate headlines." DeSantis "kept up a brisk week-long campaign in New York." Former Arkansas Gov. Asa Hutchinson "used the historic moment to announce his own 2024 Republican presidential campaign." "visit to the U.S.-Mexico border," and "former Secretary of State Mike Pompeo made a trip to Ukraine." But "most of the GOP didn't criticize Trump. In fact, most voiced support for the former president," and "carried on with schedules that had been disrupted by the grand jury had indicted Trump."

## Six Weeks Of Her Campaign.

The [Post](#) reports former UN Ambassador Nikki Haley "raised more than \$11 million in the six weeks after launching her White House bid." The [Post](#) adds that the former Trump Administration official "finished the first-quarter fundraising period, which ended on April 1, with \$11.5 million in donations, according to her campaign." The [Post](#) says Haley's campaign "framed the amount as more than the \$9.5 million that Trump raised in his first quarter since declaring his own reelection bid." The [New York Times](#) (4/5, O'Brien, 20.6M) does the math and says Haley "was able to raise during the same period after announcing his candidacy."

The [Post](#) says Haley "is polling in a distant third place in the Republican race, according to a Reuters/Ipsos poll released on Monday." The poll shows 48% of voters would vote for Haley...versus 48% for Trump and 19% for Florida Governor Ron DeSantis, who has not yet entered the race.

## rage Presidential Run.

The [Post](#) interviewed "roughly a dozen Senate Republicans" about Sen. Tim Scott's (R-SC) "possible 2024 presidential run." O'Rourke (Texas) – said they have outright encouraged Scott to run for the White House, while two others – Sens. Kevin Cramer (ND) and closed doors about his potential run. Almost every other senator spoke glowingly of the South Carolina Republican's potential.

ate.” Thune said, “I think he’d be a great candidate. I’m excited about it. I’ve been encouraging him. ... I think he’s d respected and I think he’d be a really interesting candidate for president, and in a field that kind of could be fairly

### **Seeking His Endorsement In Wisconsin Supreme Court Race.**

former President Donald Trump “took aim at Daniel Kelly, the losing Republican candidate for the Wisconsin state Sup foolish man’ for not seeking the former president’s endorsement.” In a post on his Truth Social platform Wednesdayn’t give it – which guaranteed his loss. ... How foolish is a man that doesn’t seek an Endorsement that would have closely watched race in Wisconsin that flipped the court to a liberal majority for the first time in 15 years. ... Kelly sa ump.”

**Protasiewicz An Advantage In Wisconsin Supreme Court Race.** [Politico](#) (4/5, Montellaro, 6.73M) reports Protasiewicz “cr opened on Tuesday. At least 435,000 people voted early, either by mail or in-person. Democratic Party officials esti ote advantage” as a result. Democrats “have embraced a big mail and absentee voting strategy in the past few cycl practice from...Trump. But it comes at a cost. Republicans are increasingly finding themselves in the hole before Ele ge financial and get-out-the-vote disadvantage” and “after Tuesday’s blowout, some in the party are renewing calls **Elections Could Be Democrats’ Template For 2024.** [Politico](#) (4/5, Kapos, Cadelago, 6.73M) says Democrats “were brim President Joe Biden was handed a template for crucial battlegrounds once he moves forward his reelection bid.” Top that again leans heavily into shielding abortion rights and doesn’t shy away from taking more nuanced approaches at on the Wisconsin Supreme Court “had emboldened their belief that voters were more repelled by the GOP brand.

analysis calls the “double-digit victory by the liberal candidate in Wisconsin’s state Supreme Court race” a “promising nism and abortion rights has political staying power.” Protasiewicz ran a campaign “that sounded quite similar to the ineers embraced by former president Donald Trump in Arizona, Georgia, New Hampshire and Pennsylvania.” Meanw r by tying the law-and-order moderate Democrat, Paul Vallas, to a GOP donor who supported Trump and to Florida r of Police, a major Vallas backer, served as a wedge in the traditionally Democratic city.” Johnson said during the c

, 20.6M) says Johnson’s victory “injected confidence in the Democratic Party’s most liberal wing – and may have po alked back some of his most progressive positions, including budget cuts to Chicago’s police force,” he “never disav power must take a fundamentally different approach to public safety.”

[nal](#) (4/5, Subscription Publication, 8.41M) points to the Wisconsin results as evidence that abortion continues to be a ir position on the issue in line with voters’ views or they will face more defeats in 2024.

[tton Post](#) (4/5, 10.52M) that “the victory that liberals just pulled off in Wisconsin’s Supreme Court race,” suggests “ es who stood up for abortion rights – and emphasized that protecting democracy is critical to safeguarding those rig

[Washington Post](#) (4/5, 10.52M) that the election results in Wisconsin and Chicago’s mayoral runoff “sent the messag ate – even at a moment when many voters are petrified by crime and when the Democratic Party continues to sort

## Attention To Rural America.

interview with [Roll Call](#) (4/5, Saksa, 130K) why Vermont dairy farmers are supporting “guys like you and Bernie Sanders,” he said, “I guess the biggest thing is the size of Vermont – it’s really small and intimate. Both Bernie and I spent a lot of time there. It moves past the red state/blue state, ‘whose team are you on?’ I get an opportunity to reach out and show my people that we’re going to pay much more attention to rural America, to connect.”

## Reelection.

Sen. Jacky Rosen (D-NV) “announced Wednesday that she will seek reelection...ahead of a challenging 2024 Senate race. She’s one of the toughest in the country,” Rosen said in a video announcement.” According to Politico, “Rosen’s reelection campaign is one of the most aggressive in the Senate. She has yet announced plans to take on Rosen.” The [AP](#) (4/5) notes that “the November 2024 election will come two years after she was defeated by Maz Hironaka, who eked out a reelection victory over Republican Adam Laxalt, even though the GOP managed to flip the governor’s seat.”

## Seek Reelection.

With Senate Democrats facing “a brutal electoral map in 2024 that puts them on defense in 23 states,” it “appears that Casey is in the saddle in a critical swing state: Bob Casey [D-PA].” Casey “has not yet announced whether he will seek a fourth term, but he is running a fully operating campaign-in-waiting. He is in deep discussions about who will serve as his national finance director and who will be his top campaign manager. To Democrats familiar with the events,” Casey has also “selected a ‘finance council,’” which “held its first meeting on Wednesday. Democrats are treating him announcing another run as a mere formality.”

## Primary In Bid To Defeat Tester.

Montana legislators “are advancing legislation that would alter next year’s U.S. Senate primary in an apparent bid to thwart Tester’s reelection in a swing state.” A measure that would “allow the top two candidates in the primary, no matter their party, to win slots in the Senate by a 27-23 vote on Tuesday.” Tester in January “announced his bid for a fourth term in a seat that has been held by the state’s last remaining Democrat to hold a statewide political office in Montana after the GOP dominated recent elections.”

## Democrats Struggling With Who Qualifies As “Progressive.”

Reports that California “has become almost a caricature of the left’s war not only on Republicans, but on centrism in the party,” and that “former liberal, centrist senator, Dianne Feinstein, to retire.” But, now that she has announced her retirement, the primary race is “less a matter of left versus center, as it was in the 2020 presidential primary, but a skirmish over who represents the party. The 2020 presidential election was a setback for progressives, with Joe Biden defeating the likes of Sanders and Warren in a landslide. It was something else entirely – the sheer number of Democrats claiming to represent the brand.”

## Go.

Arizona state Sen. Raquel Terán (D) on Wednesday was “officially launching her campaign to replace outgoing Democratic Sen. Mark Finchem. Terán stepped down as the Arizona state Senate’s minority leader in March after just two months on the job in her first term. She served nearly two years in the state Senate and almost three in the state House and a concurrent stint as chair of the Arizona House of Representatives.”

---

## ate Race, Giving GOP A Supermajority.

Wisconsin state Rep. Dan Knodl (R) defeated attorney Jodi Habush Sinykin (D) "to win an open Senate seat in Tuesday's special election. The seat will be used to impeach Democratic Gov. Tony Evers and other office holders." The 8th District seat "represents Milwaukee and surrounding areas. The Republican incumbent Alberta Darling decided to retire in November." Knodl's victory "gives Senate Republicans 20 seats in that house."

## ties, Giving GOP A Statehouse Supermajority.

North Carolina state Rep. Tricia Cotham, who was "elected as a Democrat," announced Wednesday that she is "crossing the aisle" to join the Republican Party in the state's legislature. Cotham "cited her treatment by Democrats as her motivation." Cotham said at a news conference, "I don't want to leave you, but I don't want to leave me." She "said the turning point in her decision was when she faced backlash for using the American flag and a

ci, Vigdor, 20.6M) says Cotham's "startling defection...upended the balance of power in North Carolina." Cotham's " Carolina." Her decision "helps Republicans cement razor-thin but complete control over a second chamber of the legislature a glide path for their legislative agenda. Republican leaders have indicated a desire to seek new restrictions on abortion

ry Democrats" called for Cotham's resignation, "because the voters in her liberal-leaning district expected her to support a news conference that Cotham's decision is "a deceit of the highest order. It is a betrayal to the people of Mecklenburg and the entire state of North Carolina." The Wall Street Journal (4/5, Calfas, Subscription Publication, 8.41M) provides similar editorial (Subscription Publication, 8.41M) editorial says political parties generally try to be big tents for a reason, and Cotham's defection

## Denver Mayor's Race.

h and Mike Johnston, "two of the more moderate candidates for Denver mayor in the unusually large and divergent  
ults hold, Brough and Johnston "could be pushed to a runoff election. They would leave behind the more progressive

## Missouri As Storms Continue To Impact US.

(2, 20.6M) reports "five people died and others were injured in southeast Missouri early Wednesday after at least one  
to watches and blizzard warnings across many regions." Bollinger County Sheriff Casey Graham "confirmed the death  
ns were still underway." Missouri State Highway Patrol Public Information Officer Sgt. Clark Parrott "said earlier on W  
e impact at the scene."

ports five people "were injured, State Highway Patrol Superintendent Eric Olson said at a news conference." The sup  
Missouri Gov. Mike Parson (R) "toured the storm damage area Wednesday and said President Joe Biden had called to  
efforts, he said." Reuters (4/5, O'Brien, Clifford) reports "Parson said the state would aid people who lost their homes  
ough damage to be eligible for public disaster relief." Parson said, "This is going to be weeks upon months to be ab  
i, Dance, Samenow, 10.52M) reports the tornado in Bollinger County "was one of numerous tornadoes that hit Miss

a between northern Arkansas and southwest Michigan on Tuesday night and Wednesday morning." As officials "begin to deliver another round of dangerous thunderstorms across the Tennessee and Ohio valleys and eastern Great Lakes region, similar coverage.

### **...y, Lobbying Firms.**

...ner Sen. Roy Blunt (R-MO) "says he doesn't miss Congress after 26 years," but he "can't entirely pull himself away, ... advisory group, he said in an interview, where he will offer the same kind of counsel that he gave House speakers and ... advice for free for a long time. And generally people have been willing to take it and it worked out pretty well." A former ... y clearance and is also working on projects with Director of National Intelligence Avril Haines that he declined to elaborate about that I'm going to be helping her with."

130K) reports former Rep. Jim Moran (D) "spent more than two decades in the House, representing northern Virginia ... now the largest caucus in Congress." This week, "he is launching Moran Global Strategies, a lobbying firm that will focus on local work in two politically consequential states, Virginia and Florida."

### **Ranked-Choice Voting.**

...publication, 8.41M) editorial welcomes the decisions by Idaho, Florida, Tennessee, and South Dakota to ban ranked-

...ns." In an editorial, the Wall Street Journal (4/5, Subscription Publication, 8.41M) points to the Wisconsin results and warns that Republicans need to bring their position on the issue in line with voters' views or they will face more defeat. *President.*" A Wall Street Journal (4/5, Subscription Publication, 8.41M) editorial asserts Pelosi's praise for McCarthy signals a shift for both parties. The Journal expresses hope that the US do more to help Taiwan strengthen its defenses against a potential *Democratic Defector.*" A Wall Street Journal (4/5, Subscription Publication, 8.41M) editorial says political parties generally demand ideological purity, they sometimes get it.

...ce Voting." A Wall Street Journal (4/5, Subscription Publication, 8.41M) editorial welcomes the decisions by Idaho, Florida, and Tennessee as confusing and has yielded questionable outcomes.

...iently With So Many Posts Vacant." In an editorial, the Washington Post (4/5, 10.52M) says that the Administration has filled positions that now require Senate confirmation, according to Post data." Of those nominated, "510 have been confirmed by the Senate." But "many other crucial positions remain unfilled." While Biden "deserves credit for making crucial progress," "are still other important ambassadorships, such as to Italy, that sit empty with no nominee on the horizon." The Administration "must not transcend partisan politics in its dealings overseas."

...ee. *He May Be One Obstacle.*" A Washington Post (4/5, 10.52M) editorial says the "bipartisan infrastructure law devoted

ports” and the Inflation Reduction Act “is supposed to pump tens of billions more into renewables and other energy i  
ne country needs to sustain Americans’ quality of life and reduce planet-warming emissions: protectionist clauses su  
ergy, broadband lines and new miles of track is the top priority...the Biden administration will liberally waive Buy Am  
e economy into one in which the federal government directs investment to domestic industries.” Building US supply  
The country should not spend more than necessary as the planet warms and other needs go unmet.”

**Subject:** HHS R5/R7 FYSA: 2022 Recycling Warehouse Fire, Madison, IL (Update #2)

**Date:** 2022/08/10 17:32:36

**Priority:** Normal

**Type:** Note

UNCLASSIFIED//FOR OFFICIAL USE ONLY

### **HHS R5/R7 FYSA: 2022 Recycling Warehouse Fire, Madison, IL (Update #2)**

**BLUF:** FEMA R7 reports multiple fire departments from the Metro East and St. Louis and St. Louis County, MO have responded to a large industrial fire at Interco Recycling located at 10 Fox Industrial Dr. in Madison, IL (pop. 2,941). Madison, IL is approximately 9 miles east of St. Louis, MO (pop. 304,709)

**CISA reports the warehouse fire caused the collapse of two buildings resulting in one injury.**

- • • **The Office of Emergency Management issued a red alert, asking residents nearby to turn off their air conditioning and close windows.**
- • • **Officials report magnesium is burning at the site.**
- • • **Open sources reports the fire started around 1130ET and a large plumes of smoke can be seen for miles and could potentially be hazardous to residents in St. Louis, MO.**
  - • • **The fire reportedly began when magnesium in the plant came in contact with water.**
  - • • **The building is one of five on the 40-acre Interco campus.**
  - • • **Illinois Environmental Protection Agency, said the agency has teams at the fire and they are trying to determine what is burning.**
  - • • **Smoke has reportedly risen higher than 5,000 feet.**
  - • • **The Granite City Police Department stated anyone who resides from 17th Street towards Madison to shelter in place until the hazards can be understood and mitigated.**
- • • **Wind direction is currently blowing SW and is not expected to change in the next 48 hours.**
- • • **One hospital, Gateway Regional Medical Center in Madison, IL (288 beds) is approx. 1.5 miles NE of the incident location.**
- • • **Madison County EMA reported shelter in place order will be for half-mile around the warehouse until further notice.**

#### **Federal:**

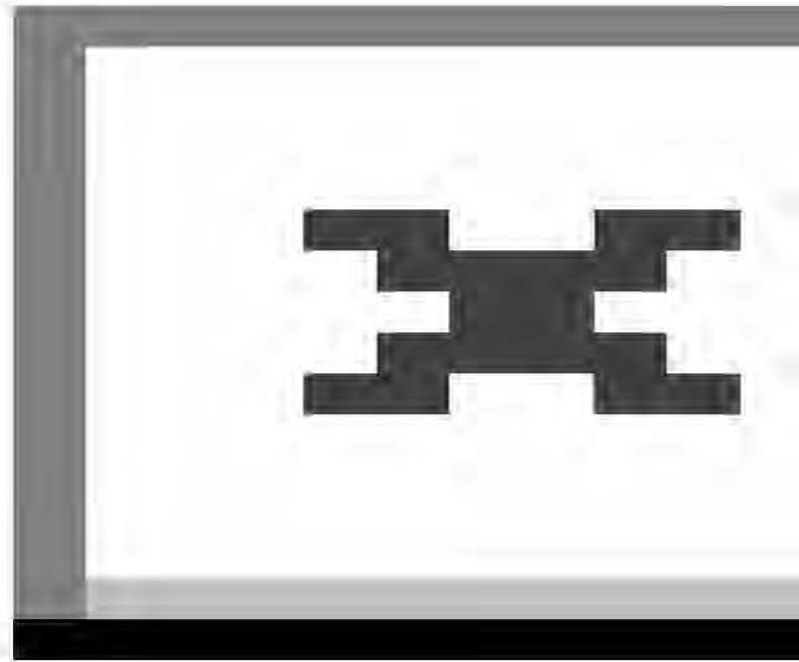

- • • **DTRA has activated its Interagency Modeling and Atmospheric Assessment Center (IMAAC) to support the incident.**

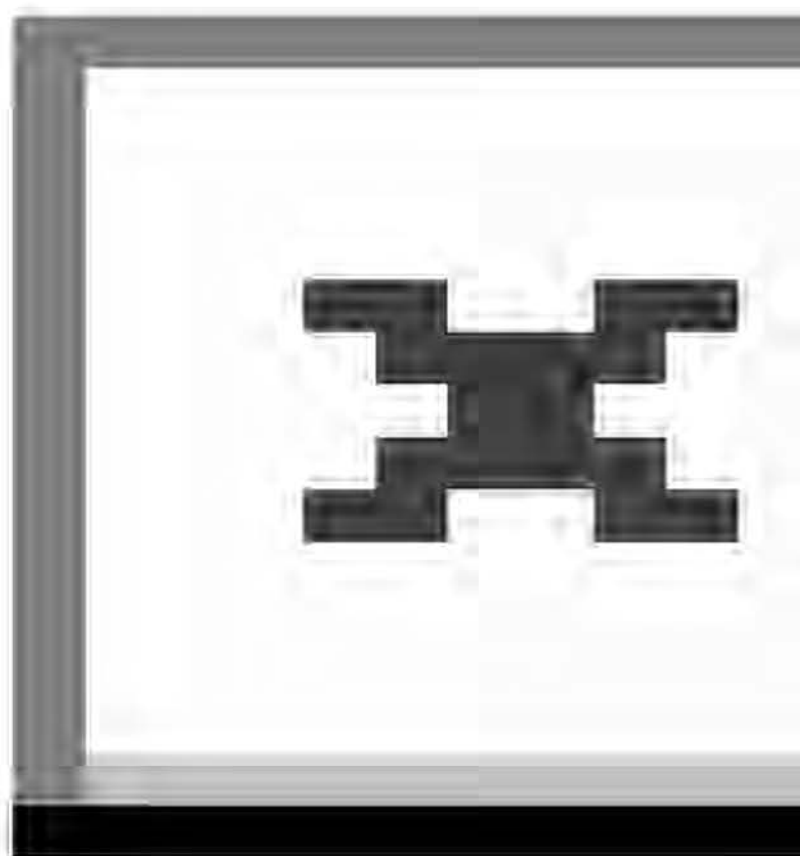

- • \* The soot from the fire is projected to go towards the south southwest, initially turning southerly in 24 hours.
- • \* EPA R5 is on scene and will be conducting air monitoring.
  - • \* The warehouse contains: aluminum, brass, copper, lead, stainless steel, metallic powder, lithium ion batteries, **hazardous material, and propane tanks.**

**ESF-8 Assessment:** The SOC is in communications with ASPR R5 and R7 who will advise of any impacts to health facilities in the area. Hazards consisting of lithium ion batteries can exacerbate a fire and release toxic gases CO, CO<sub>2</sub> and hydrogen fluoride. A lithium battery fire will be difficult to extinguish and may pose a localized explosive hazard. There are currently no requests for Federal ESF-8 assistance at this time.

**Graphic Courtesy of ASPR GIAV:**

**Image Courtesy of GeoHealth:**

**Actions/Follow-Up:** SOC notified ASPR R5, ASPR R7, CIP, CBRNE Response Team, and CISA Central. The SOC and ASPR R5/R7 will continue to monitor this incident and report as needed. ASPR GIAV has provided an updated graphic that includes the IMAAC plume modeling for this incident. *This message was sent to the SOC FYSA and ASPR R5/7 Distribution Lists. **Subject:** RE: Vaccine Safety Briefing with ADM Levine - October 31 at 11:00 AM

**Date:** 2022/10/27 11:19:46

**Priority:** Normal

**Type:** Note

Hi Valerie and all,

CDC would like to provide a few read aheads for this meeting on Monday. Please see the below paper and two related media articles. CDC plans to walk through this timely example to highlight successes, challenges, and ongoing needs in the vaccine safety landscape and demonstrate the connection to our recent work together. Nicole Coffin will be our primary speaker and others from CDC will chime in to support her as needed.

- Study: [Association Between Aluminum Exposure From Vaccines Before Age 24 Months and Persistent Asthma at Age 24 to 59 Months \(elsevierhealth.com\)](#)
- Media article: [Study tries to see if child vaccines and asthma are linked | AP News](#)
- Media article: [Study examines tie between aluminum in kids' vaccines, risk of asthma \(statnews.com\)](#)

Regards,

Seth

**Subject:** Vaccine Safety Briefing with ADM Levine - October 31 at 11:00 AM

Dear Colleagues,

We look forward to meeting with you on Monday, October 31, 2022, at 11:00 AM to brief ADM Levine on vaccine safety initiatives across the Department.

The briefing will follow the same format as the April meeting, with vaccine safety updates from each agency (updates, challenges, opportunities for ASH engagement).

As a reminder of the last discussion, Haley captured the attached high-level summary.

Please let me know if you intend to present slides.

Kind Regards,  
Val

<b>Subject:</b>	RE: Net Zero Event
<b>Date:</b>	2022/05/30 13:02:04
<b>Priority:</b>	Normal
<b>Type:</b>	Note

Admiral Levine and team,

Thank you again for your offer to join us in our commitment to Net Zero. I wanted to provide a couple of updates and confirm if you're still available for an event in Oakland in June.

First off, we have completed our internal reviews and set to commit to a decarbonizing goal of 50% reduction by 2030 and aiming for Net Zero by 2050. With that, we are happy to sign on to the HHS Climate Pledge. My team will be going to the HHS site and signing on before the June 3 deadline.

As mentioned previously, we would like to hold an event to announce our goal and use the opportunity to delve further into issues of climate and health equity. If you are still available on the dates Adam mentioned below, we would welcome the chance to host you at our office in Oakland for a discussion. We are envisioning holding a fireside chat with you that could be livestreamed. If at all possible, June 9 would be the ideal date but we could also try June 8 if the 9th isn't particularly good. Of course, we can provide further details on the overall plan for the event.

This is an exciting time to discuss how we and the healthcare sector work and partner to drive climate action and center health equity. Thank you for your partnership.

---

Hi, all. We'll be in California June 7-14 – we start in the Bay Area and fly to L.A. on the afternoon/evening of Saturday, June 11. If you're considering holding this in Oakland or thereabouts, our best open times are the afternoons of that Wednesday, Thursday and Friday, though I should say that we have other some other commitments and we'll need to coordinate. Let us know what your timeline is and whether we can make this work.

Admiral Levine,

I would like to invite you to join Kaiser Permanente as we finalize our commitment to a net zero goal and to the HHS pledge focused on decarbonization.

Kaiser Permanente has a long-standing history and commitment focused on environmental stewardship. In 2020, we were the first health system to achieve carbon neutrality, building on broad actions focused on environmental sustainability. Since that time, we have completed a full GHG inventory, inclusive of Scope 3, and are now ambitiously working on achieving a net carbon reduction goal.

In addition to driving carbon reduction in our environmental footprint, we hope to catalyze sector change by showcasing leadership and sharing best practices through our actions and coalition building. We would like to hold a forum at a date and time that works with your calendar and bring together key stakeholders to help advance the cause and share learnings. We invite you in

joining us at that forum, where we think your voice could help drive action and further galvanize practices around decarbonization.

We look forward to continuing to collaborate across sectors to make progress in decarbonizing and ensuring equitable health for our communities. We appreciate the efforts of HHS, OCHE and all the agencies needed to work on climate change.

If you are open to participating, John Vu on my team here at Kaiser Permanente can coordinate with your office.

(Please keep in mind that we are still finalizing our commitment to Net Zero and it's not public yet).

Bechara

Bechara Choucair, MD  
SVP & Chief Health Officer

Kaiser Permanente

**Subject:** URGENT: Kaiser Permanente Visit -- Updated Question Set

Good morning – Bechara built in a few additional questions should time allow and I wanted to share the full set below. They align with what we discussed on Thursday and I know the Admiral is well versed in all these topics; however if there is a certain question we should pull, just let us know. Thanks so much!  
Tara

- • HHS Climate Pledge
  - • Admiral Levine, we are so excited to share this news with you and work in partnership with the Office of Climate Change and Health Equity in its mission.
  - • **Q: Can you tell me more about why HHS decided to create this climate pledge and why it is so important that the health care sector decarbonize?**
  - • **Q: What are the next step after the climate pledge closes tomorrow?**
- • New HHS Office of Environmental Justice
  - • Last week's announcement of the new HHS Office of Environmental Justice was another major milestone for HHS and their commitment to address health disparities.
  - • **Q: How will this office work to protect the health of frontline communities and how will it work together with OCCHE?**

- • Centering Health and Health Equity
  - • In addition to building a low carbon, more resilient US health care system, health equity is a crucial aspect of OCCHE's work. I know that during your trip here to California, you are focused on visiting communities that are facing unequal environmental impacts.
  - • Q: How is HHS identifying communities facing disproportionate exposures to climate harms and addressing these disparities?
  - • Q: How is OCCHE planning to work with these communities? What do you see as the opportunities for HHS to identify and assist the communities who need the most help?
  - • Q: As you know, Kaiser Permanente is deeply committed to community health and addressing health disparities. How can the health sector work with HHS to connect the dots between community health initiatives and the disproportionate environmental harms impacting the health of low-income communities and communities of color?
- • New Vision of Healthcare
  - • With HHS expanding its focus to include climate change and address the health disparities caused by unequal exposures to health harms, there is an evolution in thinking about how health care must approach patient care, community health, and care delivery.
  - • Q: What final thoughts do you want to share about this and the HHS vision for protecting individuals and communities from the health impacts of climate change?

**Subject:** Final Details For Kaiser Permanente Visit

Hi Adam...I hope you have/had a safe trip to California and we are looking forward to hosting Admiral Levine, you and the team on Thursday. We wanted to check in on a few items:

- Let us know if you have any open questions re: logistics, run of show, etc. Note: John will be at the curb of 1950 Franklin to meet the team tomorrow at 12:30. His cell is (b)(6) should you need it. Tara's cell is (b)(6)
- COVID protocols: Everyone will be masking as required by our organization and the county of Alameda except when filming the event. (We will have the Admiral and Bechara six feet apart). We also will follow the six feet apart protocols for the meet/greet. **QUESTION:** Should people refrain from shaking hands with Admiral Levine or are there other protocols she prefers? We can let participants know of her preferences.

- See below a list of invitees for the meet/greet. We recognize we only have ~15 minutes with the Admiral. Our thinking is the flow could be as follows: Introduction by Bechara; A few opening remarks by Admiral Levine; Quick intro by KP leaders and their role in our Net Zero strategy; Close.
- We will update the list of attendees as we finalize RSVPs

Please let us know if you need anything. John/Tara

***Kaiser Permanente Net Zero – Pre-event Meet and Greet Attendees (12:30 – 12:45)***

<b>CONFIRMED</b> (as of 5:00pm, 6/7/22)	
Admiral Rachel Levine	Assistant Secretary of Health

**Subject:** HHS R5/R7 FYSA: 2022 Recycling Warehouse Fire, Madison, IL (Update #1)

**Date:** 2022/08/10 16:24:59

**Priority:** Normal

**Type:** Note

UNCLASSIFIED//FOR OFFICIAL USE ONLY

### **HHS R5/R7 FYSA: 2022 Recycling Warehouse Fire, Madison, IL (Update #1)**

**BLUF:** FEMA R7 reports multiple fire departments from the Metro East and St. Louis and St. Louis County, MO have responded to a large industrial fire at Interco Recycling located at 10 Fox Industrial Dr. in Madison, IL (pop. 2,941). Madison, IL is approximately 9 miles east of St. Louis, MO (pop. 304,709)

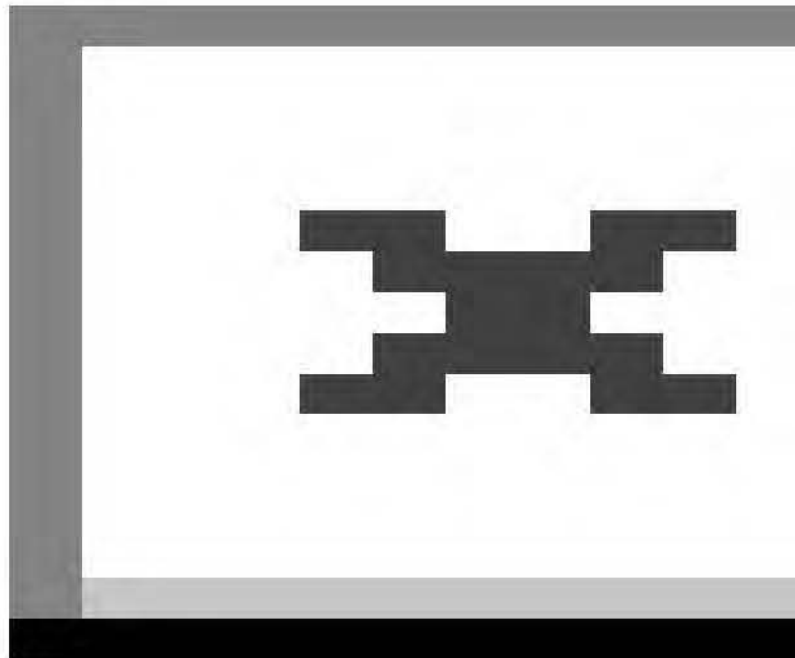

- • \* Open sources reports the fire started around 1130ET and a large plumes of smoke can be seen for miles and could potentially be hazardous to residents in St. Louis, MO.
  - • \* **Smoke has reportedly risen higher than 5,000 feet.**
  - • \* **Nearly 200 firefighters are on the scene of this 5-alarm fire.**
  - • \* **The Granite City Police Department stated anyone who resides from 17th Street towards Madison to shelter in place until the hazards can be understood and mitigated.**
  - • \* **One employee has been hospitalized after being burned by the flames, severity of injuries are unknown.**
- • \* Interco is located approximately 4.25 miles northeast from the center of St. Louis, MO.
- • \* Wind direction is currently blowing SW and is not expected to change in the next 48 hours.
- • \* One hospital, Gateway Regional Medical Center in Madison, IL (288 beds) is approx. 1.5 miles NE of the incident location.
- • \* **Madison County EMA reported shelter in place order will be for half-mile around the warehouse until further notice.**

#### **Federal:**

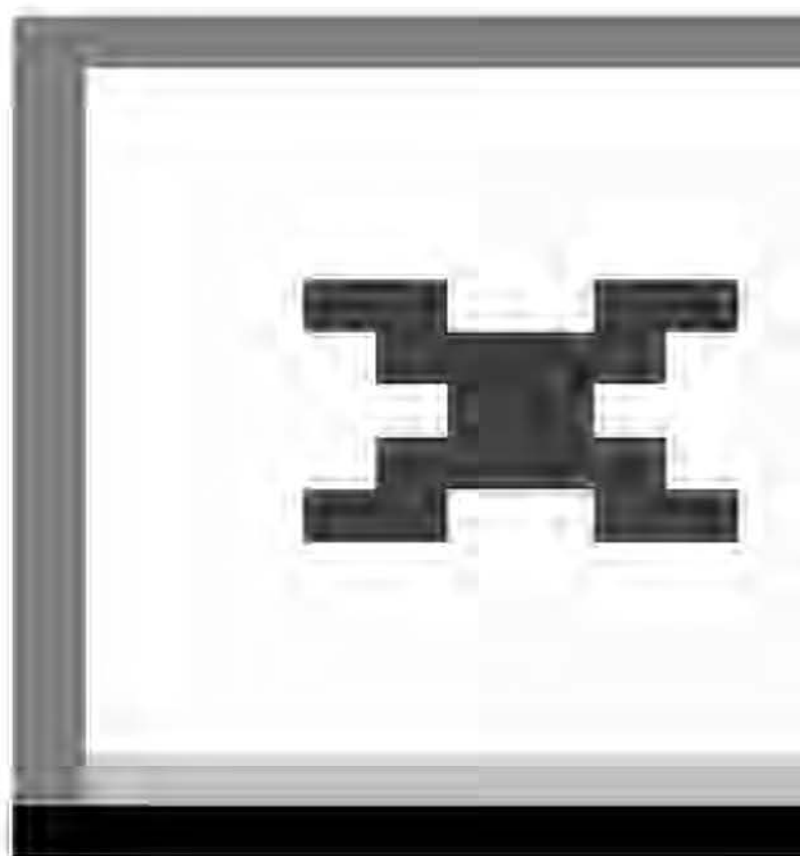

- • \* DTRA has activated its Interagency Modeling and Atmospheric Assessment Center (IMAAC) to support the incident.
  - • \* **The soot from the fire is projected to go towards the south southwest, initially turning southerly in 24 hours.**
- • \* **EPA R5 is on scene and will be conducting air monitoring.**
  - • \* **The warehouse contains: aluminum, brass, copper, lead, stainless steel, metallic powder, and lithium ion batteries.**

**ESF-8 Assessment:** The SOC is in communications with ASPR R5 and R7 who will advise of any impacts to health facilities in the area. **Hazards consisting of lithium ion batteries can exacerbate a fire and release toxic gases CO, CO<sub>2</sub> and hydrogen fluoride. A lithium battery fire will be difficult to extinguish and may pose a localized explosive hazard.** There are currently no requests for Federal ESF-8 assistance at this time.

**Graphic Courtesy of ASPR GIAV:**

**Image Courtesy of GeoHealth:**

**Actions/Follow-Up:** SOC notified ASPR R5, ASPR R7, CIP, CBRNE Response Team, and CISA Central. The SOC and ASPR R5/R7 will continue to monitor this incident and report as needed. **ASPR GIAV has provided an updated graphic that includes the IMAAC plume modeling for this incident.** *This message was sent to the SOC FYSA and ASPR R5/7 Distribution Lists. <b>Subject:</b>	RE: Net Zero Event
<b>Date:</b>	2022/05/30 13:01:31
<b>Priority:</b>	Normal
<b>Type:</b>	Note

Admiral Levine and team,

Thank you again for your offer to join us in our commitment to Net Zero. I wanted to provide a couple of updates and confirm if you're still available for an event in Oakland in June.

First off, we have completed our internal reviews and set to commit to a decarbonizing goal of 50% reduction by 2030 and aiming for Net Zero by 2050. With that, we are happy to sign on to the HHS Climate Pledge. My team will be going to the HHS site and signing on before the June 3 deadline.

As mentioned previously, we would like to hold an event to announce our goal and use the opportunity to delve further into issues of climate and health equity. If you are still available on the dates Adam mentioned below, we would welcome the chance to host you at our office in Oakland for a discussion. We are envisioning holding a fireside chat with you that could be livestreamed. If at all possible, June 9 would be the ideal date but we could also try June 8 if the 9th isn't particularly good. Of course, we can provide further details on the overall plan for the event.

This is an exciting time to discuss how we and the healthcare sector work and partner to drive climate action and center health equity. Thank you for your partnership.

---

Hi, all. We'll be in California June 7-14 – we start in the Bay Area and fly to L.A. on the afternoon/evening of Saturday, June 11. If you're considering holding this in Oakland or thereabouts, our best open times are the afternoons of that Wednesday, Thursday and Friday, though I should say that we have other some other commitments and we'll need to coordinate. Let us know what your timeline is and whether we can make this work.

Admiral Levine,

I would like to invite you to join Kaiser Permanente as we finalize our commitment to a net zero goal and to the HHS pledge focused on decarbonization.

Kaiser Permanente has a long-standing history and commitment focused on environmental stewardship. In 2020, we were the first health system to achieve carbon neutrality, building on broad actions focused on environmental sustainability. Since that time, we have completed a full GHG inventory, inclusive of Scope 3, and are now ambitiously working on achieving a net carbon reduction goal.

In addition to driving carbon reduction in our environmental footprint, we hope to catalyze sector change by showcasing leadership and sharing best practices through our actions and coalition building. We would like to hold a forum at a date and time that works with your calendar and bring together key stakeholders to help advance the cause and share learnings. We invite you in

joining us at that forum, where we think your voice could help drive action and further galvanize practices around decarbonization.

We look forward to continuing to collaborate across sectors to make progress in decarbonizing and ensuring equitable health for our communities. We appreciate the efforts of HHS, OCHE and all the agencies needed to work on climate change.

If you are open to participating, John Vu on my team here at Kaiser Permanente can coordinate with your office.

(Please keep in mind that we are still finalizing our commitment to Net Zero and it's not public yet).

Hi, Sarah—

Providing follow-up on your question about childhood vaccines that contain aluminum--

Per CDC, the following vaccines contain aluminum adjuvant. Highlighted in yellow are vaccines that are used in children. Note that the Japanese encephalitis vaccine, while used for protection for travel for children, is not routinely recommended.

Anthrax

DT (no trade name)

DTaP (Daptacel)

DTaP (Infanrix)

DTaP-IPV (Kinrix)

DTaP-IPV (Quadracel)

DTaP-HepB-IPV (Pediatrix)

DTaP-IPV/Hib (Pentacel)

Hep A (Havrix)

Hep A (Vaqta)

Hep B (Engerix-B)

Hep B (Recombivax)

HepA/Hep B (Twinrix)

HIB (PedvaxHIB)

HPV (Gardasil 9)

Japanese encephalitis (Ixiaro)\*

MenB (Bexsero, Trumenba)

Pneumococcal (Prevnar 13)

Td (Tenivac)

Td (Mass Biologics)  
Tdap (Adacel)  
Tdap (Boostrix)

\*Not routinely recommended

FYI,  
Kaye

<b>Subject:</b> Event Invite – Join KP & WEF on June 7 in DC
<b>Date:</b> 2023/05/09 17:19:46
<b>Priority:</b> Normal
<b>Type:</b> Note

Admiral Levine--I hope you can join us on **Wednesday, June 7, 11am-12:30pm ET in DC**, as Kaiser Permanente and the World Economic Forum launch "Connecting Climate Change and Health" – a series of high-profile events where we will highlight topics such as air quality, extreme heat, and extreme weather, all in the context of the impact on individual and community health and health equity. In this first event, we will be joined by special guests who will discuss how national business leaders across different industries can prioritize health and health equity as part of climate action planning. It would be great to have you there in person.

Please look for the formal invitation this week with additional details (including a virtual option if you can't make it in person). Let me know if you have questions.

#### **Upcoming Secretary Engagement**

- ***September 28: White House Conference on Hunger, Nutrition & Health***
  - Topic: Hunger, Nutrition & Health
  - Memos: TBD (OASH Leading)
  - Members: Senators Booker, Braun and Congressman McGovern - (potentially more)
  - Staffing: TBD
- ***TBD: Calls on IHS Advance Appropriations***
  - Topic: IHS Advance Appropriations
  - Memos: TBD
  - Staffing: Rose, Maddie
- ***TBD: Call with Congressman Llyad Doggett***
  - Topic: CICIP
  - Memos: TBD
  - Staffing: Rose

#### **Upcoming HHS Principal Engagement with Members of Congress**

- ***Thursday September 22<sup>nd</sup>: Administrator Carole Johnson Meeting with Chairman Ron Wyden***
  - Topic: Intro Meeting/MIECHV
  - Memos: HRSA
  - Staffing: HRSA/Leslie

### Upcoming Secretary Travel

- **September 23 (All Day): Madison, WI**
  - Topic: Cancer Moonshot & Mental Health
  - Members Attending: Congressman Mark Pocan
  - Notecards: Yes, due Thursday September 24<sup>th</sup>

### Upcoming HHS Principal Travel

- **Monday September 19<sup>th</sup> and Tuesday September 20<sup>th</sup>:** Surgeon General Murthy Travel to NYC
  - Notifications sent to NY delegation
- **Tuesday September 20<sup>th</sup> and Wednesday September 21<sup>st</sup>:** ADM Levine Travel to Durham, NC
  - Notifications sent & invite to Price made
- **Tuesday, September 29<sup>th</sup>:** Deputy Secretary Travel to Atlanta, GA
  - Invitations will be sent to GA Senators, Reps. Johnson, Williams

### Upcoming Hearings

- **Tuesday, September 20<sup>th</sup>:** Ways & Means Committee Markup
  - Topic: Resolutions of inquiry and social security legislation

### Nominations Updates

- N/A

### This Week's Policy Announcements

- **ACF (TBD):** Field Guidance
  - ASL Role: TBD
- **HRSA (Tuesday):** HRSA awards over \$5 million to 11 HRSA-funded health centers across seven states (CA, FL, KS, OK, TN, TX, and VA) to increase equitable access to life-saving cancer screenings and referral for care and treatment. **Aligns with Cancer Moonshot Initiative and Unity Agenda**
  - ASL Role: HRSA OL
- **FDA (Tuesday):** Infant Formula Report
  - ASL Role: FDA OL
- **Secretary/HHS (Wednesday):** Secretary Becerra participates virtually in the United States Mission to the United Nations Universal Health Coverage Meeting
  - ASL Role: None, FYI only
- **HHS/HRSA (Wednesday):** HHS Invests \$266 Million in New Programs to Expand and Strengthen the Community Health Worker and Public Health Workforces (ARP funding.) HRSA is awarding \$225.5 million to 83 grantees as part of the Community Health Worker Training Program, which is a new, multiyear program that will support training and apprenticeship to support new community health workers. Also \$40.7 million to 29 grantees through the Public Health Scholarship Program, which will incentivize individuals to pursue training and careers in public health, including as epidemiologists and other positions critical to community public health needs.

- ASL Role: HRSA OL
- **Secretary/HHS (Thursday):** HOLD: Monkeypox Press Call with Latino Press
  - ASL Role: None
- **CMS (Thursday):** CMS approves a postpartum coverage extension state plan amendment (SPA) for state in the south.
  - ASL Role: CMS OL
- **SAMHSA (Thursday):** HHS releases WH Recovery Event grant bundle - Grants to Expand Substance Abuse Treatment Capacity in Adult and Family Treatment Drug Courts, \$7.1M - State Opioid Response Grants, \$1.440B - Tribal Opioid Response Grants, \$55M – Rural Community Opioid Response Programs, \$104 million.
  - ASL Role: SAMHSA OL
- **HRSA (Friday):** HRSA announces awards of more than \$104 million across three Rural Community Opioid Response Programs (RCORP), part of HRSA's RCORP initiative to address the barriers to treatment for substance use disorder, including opioid use disorder, in rural communities.
  - ASL Role: HRSA OL
- **CDC (Friday):** CDC and Kaiser Health authors publish a study in *Academic Pediatrics*: Association Between Aluminum Exposure from Vaccines Before Age 24 Months and Persistent Asthma at Age 24-59 Months. Summary: In a large observational study, a positive association was found between vaccine related aluminum exposure and persistent asthma.
  - ASL Role: CDC OL
- **WH/CDC (Friday):** Twitter Spaces with Dr. Daskalakis and Dr. Mena from the CDC to talk about monkeypox
  - ASL Role: None, FYI only

#### **Tomorrows Briefings**

- **NIH (Tuesday at 11:00am):** Alcohol Associated Liver Disease Congressional briefing with NIAAA
  - ASL Staff: Lauren

**Erin Lunsford** (she/her)

**White House says ignoring judge's abortion pill ruling would set 'dangerous precedent'**  
(back)

By Kierra Frazier

The White House said on Monday that it would be a “dangerous precedent” for the administration to ignore a federal judge’s decision last week blocking the sale of an abortion pill.

“But I’ll say this, you know, as a dangerous precedent is set for the court to set aside the FDA’s and expert judgment regarding a drug’s safety and efficiency, it will also set a dangerous precedent for this administration to disregard a binding decision,” White House press secretary Jean-Pierre said at her briefing on Monday. “We are ready to fight this. This is going to be a long fight. We understand this. We stand by FDA approval of mifepristone.”

Jean-Pierre's comments came after a federal judge in Texas ruled on Friday to suspend the FDA's approval of mifepristone, a drug that can be used in tandem with another to induce an abortion. Though it isn't set to take effect for a week, the decision virtually bans the sale of the pills across the country.

On Friday, Democrats such as Rep. Alexandria Ocasio-Cortez of New York said the Biden administration should ignore the ruling, and GOP Rep. Nancy Mace of South Carolina agreed on Monday.

"It's not up to us to decide as legislators or even, you know, as the court system whether this is the right drug to use or not," Mace told CNN.

On Monday, the Justice Department asked an appeals court to put on hold the Friday ruling.

"We get the frustration regarding this decision. Absolutely," Jean-Pierre said on Monday. "And that's why we were quick to act. That's why you saw DOJ take action."

## **The \_\_\_\_ will see you now: How the pandemic could change who treats you ([back](#))**

By Daniel Payne

State lawmakers have introduced nearly 200 bills this year to change who should be allowed to provide certain types of care.

That tops most years since 2015 when the National Conference of State Legislatures began tracking the topic, and speaks to how providers — from pharmacists to nurse practitioners to psychologists — looking to do more feel that ongoing workforce shortages and the wind down of pandemic responses are buttressing their case to state and federal lawmakers.

Bills introduced in several states would allow pharmacists to prescribe hormonal contraceptives and administer vaccines or give optometrists the authority to inject local anesthetics before minor surgery.

Others would reduce the supervision required for some care, including bills in Colorado, Connecticut, Florida, Iowa and Montana that would center collaboration over supervision in the relationship between physician assistants and doctors. Eight people leading health organizations fighting for or against the proposed changes told POLITICO many health workers see the effort as their best chance to influence policy. Some are relying on growing public concern over provider shortages and a weakened public health system to advance their arguments while others are pushing patient safety as their key focus.

The shortage of health workers has grown to be many providers' biggest concern about the future — from financial and care perspectives alike. Health policymakers on the Hill have also cited workforce issues as a key challenge, making it a top priority for the coming months.

The legislation can significantly impact how health care is delivered, as it can determine not only how much training or doctor supervision is required to perform procedures or prescribe drugs but also how accessible care is for patients.

Provider groups representing doctors, nurses, pharmacists and everyone in between recognize that. Utah state Sen. Curtis Bramble, who recently led a bill to lessen regulations on non-physician providers, said touching scope of practice policy is like touching “a third rail.”

Money is partly to blame for that, he said. The legislation has the potential to shift some revenue from physicians to other types of providers if they are allowed to offer care and bill insurers for services that had been under the purview of doctors.

“That is the challenge that we have, is how do you identify whether it is economics — is it concern about erosion of a revenue base — or are there legitimate credible concerns about public safety?” Bramble, who has served as president of the National Conference of State Legislatures, said.

Some groups have argued the pandemic, which led to loosened rules allowing some clinicians to do more than they were previously permitted, proved their ability to provide additional care safely. And they're using that argument to change the rules permanently.

“Right now, we are seeing a lot of focus on codifying the temporary authorities that were gained during the public health emergency,” said E. Michael Murphy, a state governments adviser for the American Pharmacists Association, which is tracking more than 100 bills related to scope of practice. “It's really about increased access.”

Safety vs. access

Physician groups, while acknowledging the need for more access, are working to stop expanded authorities they say would endanger patients.

And they have significant sway at the state and federal level, proving for years that they can persuade lawmakers to abandon changes to scope of practice laws — defeating proposals across states for decades.

The Texas Medical Association, one of the largest provider groups in the country, listed scope of practice as its top legislative priority for the year.

“There's a lot of folks who want to do what Physicians do without doing the training or acquiring the experience that we have,” said Gary Floyd, president of the TMA, adding he and other physicians were against some of the scope of practice changes made during the pandemic, like pharmacists being at the center of test-to-treat protocols.

Understanding some of the new fights that came up because of the pandemic, Floyd said scope of practice has topped the TMA's list of priorities for years, pointing to the longstanding debate among providers.

Still, other doctors groups see a new trend emerging from that history.

"These trends that we're seeing, and just a general sense by the non-physician community that they can do anything that a physician can do, is going to only continue to expand," Manuel Bonilla, chief advocacy and practice officer at the American Society of Anesthesiologists, said at an American Medical Association panel on fighting efforts to allow non-physicians to do more.

Other clinicians, however, point to how they performed since the pandemic began as evidence that they can do more without the watchful eye of an MD.

"We've had removal of supervision for the last three years, and clearly there has not been a problem with that or we would have heard about it," said Angela Mund, president of the American Association of Nurse Anesthesiology. "We're looking at making it permanent."

Mund, like other clinician group leaders, noted now was a time for "all hands on deck" to address high patient volumes and health worker shortages in the pandemic's wake.

"We have so many problems with rural health care and access to health care that everybody should be working into the top of their education and training and in order to just take care of people," she said.

A federal approach

Scope of practice is increasingly becoming a federal issue, too, as the Department of Veterans Affairs looks to set its own standards and the Senate HELP Committee takes on workforce shortages.

The VA plans to finalize and implement scope of practice standards for over 50 types of health providers in the coming months, continuing the process through early 2024, according to internal agency slides obtained by POLITICO.

Those standards would apply for all VA clinics, regardless of state regulations and will be open to public comment before the final policy is released.

"We are being deliberate. We are not rushing to any judgment on any profession," Ethan Kalett, senior adviser at the Veterans Health Administration's Office of Regulations, Appeals and Policy, said in an interview. "We are going to take every comment very seriously."

Providers in the private sector see the VA's move as an opportunity to influence state laws.

"They tend to be a trendsetter and a forward thinker when it comes to providing health care," said Jennifer Orozco, president and chair of the board of the American Academy of Physician Associates. "I think the VA is going to continue to expand services because they know they can't take care of everybody."

Orozco and other clinicians looking to expand what they're allowed to do under the law emphasized that they don't want to go beyond their education and training. Instead, they said they want to change outdated laws that are keeping them from helping patients they have the skills to treat.

"We did it during the pandemic because we were forced to," she said. "We can't just do it in times of crisis. ... You have this workforce. You have to tap into them."

To the Hill

The fight is also in Congress, where several lawmakers are looking to solve health workforce shortages.

HELP Committee Ranking Member Bill Cassidy (R-La.) said during a hearing last month that solutions to the health workforce shortage should include using the current workforce more efficiently, though he doubted federal legislation is the only way to achieve that.

"Scope of practice has traditionally been state-based, and I personally think it should continue to be state-based," he said in an interview with POLITICO. "But as a rule, I am very much for everybody practicing to the upper limit of their license."

Though mostly an issue decided at the state level, provider groups are taking their arguments to Congress and the administration in hopes of parlaying federal wins into nationwide success.

And for some lobbying for changes to scope of practice, the federal government is getting more interested in the issue.

"What I sense this year over the other years is the momentum and the support," April Kapu, president of the American Association of Nurse Practitioners, said after a recent push on the Hill. "A lot of nodding heads and engaging questions — it felt like more than ever before."

## **Top 5 takeaways from POLITICO Pro's briefing on health care ([back](#))**

By POLITICO Pro Staff

Reporters from POLITICO's health care team hosted a briefing Thursday for POLITICO Pro subscribers to dive into the most significant developments surrounding the FDA, pharmaceuticals and more.

Reporters David Lim, Katherine Ellen Foley and Ben Leonard pulled from their recent stories and their notebooks to give readers insights and perspectives on the implementation of the Inflation Reduction Act, the transition to the commercial market for Covid-19 treatments, and the withdrawal of the approval of Makena, a drug approved under the accelerated approval pathway to reduce the risk of preterm birth in women pregnant with one baby who have a history of spontaneous preterm birth. They also discussed the effort to ban quality-adjusted life years in

Congress, the potential impacts more broadly of a court ruling on mifepristone, FDA funding and insights from the World Vaccine Congress this week.

**Here are five takeaways from the call:**

**1. The future of Covid-19 vaccines** — Drugmakers and regulators have their eyes on the next iteration of Covid-19 boosters, which will likely include another updated shot this fall. Regulators are slated to decide the strain they'd like to see included in fall vaccinations by June.

**Katherine noted** that at the World Vaccine Congress last week, industry representatives, academics and government officials had high-level discussions of additional types of Covid-19 vaccines, including pan-coronavirus vaccinations and those with alternative administration routes, including intranasal and oral vaccines.

**2. FDA approval and CMS coverage of Alzheimer's drugs** — In the last two years, two new Alzheimer's drugs have hit the market via the FDA's accelerated approval pathway. These drugs are the first of their kind to eliminate the deformed amyloid protein in the brains of Alzheimer's patients. But the Centers of Medicare and Medicaid Services have opted not to cover these drugs — which cost more than \$26,000 per year — unless patients are enrolled in a clinical trial, of which there are currently none enrolling.

**Katherine explained** that CMS limited coverage of the entire class of anti-amyloid Alzheimer's drugs after Biogen's Aduhelm was first approved because of conflicting data on the drug's benefit to patients. Now that a similar drug, Leqembi, has been brought to market, patient advocates like the Alzheimer's Association are pressing Congress to force CMS to update its coverage of these drugs in the hopes that patients can better access the drug before their symptoms progress.

**3. David explained the timeline for CMS' implementation of the Inflation Reduction Act** — The agency issued a draft document outlining how Medicare will select and negotiate drugs in the coming years last month and asked drugmakers and other stakeholders to give feedback on the plan. The comment deadline for those developing policy thoughts is April 14.

**4. FDA documents keep coming** — The FDA is pumping out draft and final guidance documents to give industry advice on a variety of policy topics, including patient-focused drug development and how to notify the agency of a discontinuance or interruption in manufacturing medical products or active pharmaceutical ingredients.

**5. Keep an eye on QALYS** — Ben has been tracking Energy and Commerce Committee chair Cathy McMorris Rodgers' push to ban the use of quality-adjusted life years in federal programs. The metric, known as QALYs, measures how valuable a treatment may be given its impact on length and quality of life. Rodgers, a Washington State Republican, and proponents of the ban argue it discriminates against people with disabilities.

Democrats have also said the metric is discriminatory, and a bipartisan deal aimed at assuaging committee Ranking Member Frank Pallone (D-N.J.) has appeared close at times. But Pallone has continued to raise concerns that such a ban could prohibit other measures of cost-effectiveness.

The bill passed the full committee earlier this month on party lines. If Pallone gets on board, the prospects of a deal get much better.

## **Blue states are buying up abortion medication amid legal uncertainty ([back](#))**

By Rachel Bluth

SACRAMENTO, Calif. — California and other blue states are rushing to stockpile abortion medication amid uncertainty at the federal level about the status of the drugs.

Gov. [Gavin Newsom](#) said [Monday](#) that California had secured 250,000 misoprostol pills and negotiated the purchase of up to 2 million — the latest move by a state that has repeatedly tried to shore up abortion access in the face of restrictive laws elsewhere. The announcement follows a [Texas judge's decision to invalidate the Food and Drug Administration's approval for mifepristone](#), another medication commonly used in the procedure.

"We will not cave to extremists who are trying to outlaw these critical abortion services," the Democratic governor said in a statement. "Medication abortion remains legal in California."

California contracted with ANI Pharmaceuticals through the state's drug affordability initiative to pay a little over \$100,000 for the first 250,000 doses on hand, with an option to purchase more at the same price of around 43 cents per pill, according to Deputy Legal Affairs Secretary Julia Spiegel. Pharmacies who cannot find the drug on their own [can request some from the state's supply](#).

The details have been shared with other states who may want to take advantage of the same deal. "We wanted to be very mindful about not creating any kind of run on the market or uncertainty in other states," Spiegel said.

Newsom is not the only Democratic governor buying abortion medication in bulk. Last week, Washington Gov. Jay Inslee announced [his state had purchased 30,000 doses of mifepristone](#) through the correctional system and 10,000 doses through the university system. Massachusetts Gov. Maura Healey announced Monday that [her state would be purchasing roughly 15,000 doses of mifepristone](#) through the state university system and setting aside \$1 million to help clinicians that contract with the state purchase the pills.

The initial batch cost about \$675,000 and is expected to last for more than a year. "I know the odds in this case," Healey, a former attorney general of Massachusetts, said at a news conference Monday. "I know the legal landscape, which is why what this judge [in Texas] did is a sham and I am not the least bit concerned about [legal] liability."

New York Governor Kathy Hochul on Saturday told CNN she would push legislation that would require insurance companies to cover misoprostol. "We're trying to figure out all the different ways we can get ahead of this," she said.

Newsom and fellow Democrats have long proclaimed California to be a "reproductive freedom state," launching a website to connect abortion seekers with services, appropriating money to help people with the costs of getting an abortion and teaming up with other states to secure abortion access.

Misoprostol works by causing contractions, so the uterus expels any products of conception and passes a pregnancy. It's usually taken 24-48 hours after mifepristone, a drug that blocks the hormone progesterone and terminates a pregnancy.

Mifepristone was the subject of two federal court rulings on Friday that could complicate patients' access. A judge in Texas ruled that the FDA's 20-year-old approval of the drug should be blocked — a decision the Justice Department immediately vowed to appeal. Secretary of Health and Human Services Xavier Becerra said the Biden administration may simply ignore the decision. But on the same day, a federal judge in Washington ruled in a separate case against blocking mifepristone.

Misoprostol can also be used by itself to end a pregnancy, which could provide a backstop if mifepristone suddenly becomes unobtainable.

"Given the uncertainty and fear with the ongoing litigation and conflicting court opinions, it's hard enough for those in the weeds of it to follow what's happening," Spiegel said. "We purchased this stockpile to ensure Californians know that they have ongoing access to medication abortion no matter what is happening in the courts."

**The abortion pill rulings are scaring the FDA and drugmakers. Here's why. [\(back\)](#)**

By Katherine Ellen Foley, David Lim, Megan Messerly and Alice Miranda Ollstein

A Texas judge's decision to rescind the FDA's approval of the abortion pill could jeopardize access to the most popular method of terminating a pregnancy.

And many in government and inside the pharmaceutical industry fear that it could also undermine the agency's broader authority to regulate medicines, opening the door for courts to

question approvals of anything from birth control pills to new treatments for debilitating diseases.

HHS Secretary Xavier Becerra suggested insulin, vaccines and new Alzheimer's drugs could conceivably all come under scrutiny if U.S. District Court Judge Matthew Kacsmaryk's ruling is upheld.

While Kacsmaryk stayed his decision until Friday and the Biden administration has already appealed to the 5th U.S. Circuit Court of Appeals, the ramifications from Friday's decision for the FDA and the drug industry could be felt for decades regardless of how this case is ultimately decided.

Here's what we know:

**Will the decision turn the FDA approval process "upside down"?** Experts disagree.

Kacsmaryk's ruling focused on the procedures around mifepristone's approval and the FDA's delayed response to petitions from anti-abortion organizations asking the agency to reconsider. It did not directly address FDA's approval authority, said Greer Donley, an associate professor at the University of Pittsburgh law school.

"The stay itself has no other impact on any drug other than mifepristone," she said.

The concern, she said, is that the precedent, in this case, could be used to implicate other drugs should groups choose to challenge the procedures surrounding their approval.

Jane Henney, who was FDA commissioner when mifepristone was approved, said Monday that "this ruling sets a very dangerous precedent for the FDA's authority in terms of other new medications."

"Clearly, we would be entering totally uncharted territory in that regard," she said during a call with reporters.

Becerra's worry that other medical products are at risk was echoed by leaders in the pharmaceutical industry.

Pfizer CEO Albert Bourla was among the dozens of pharmaceutical executives to sign a letter calling for an immediate reversal of the ruling, citing the "uncertainty for the entire biopharma industry."

"If courts can overturn drug approvals without regard for science or evidence, or for the complexity required to fully vet the safety and efficacy of new drugs, any medicine is at risk for the same outcome as mifepristone," the letter said.

And William Schultz, former deputy commissioner for the FDA and former general counsel for HHS, said the decision "could allow virtually anyone to challenge any FDA drug approval decision with a good chance of succeeding."

"Any FDA drug approval involves hundreds of judgments by the agency. If a court feels free just to kind of take a fresh look at each of those, there's a chance that a court will find one of those judgments is wrong," Schultz said.

HHS did not immediately respond to a request for comment on Monday.

### **What happened in Washington state and how does it affect the Texas ruling?**

Just after Kacsmaryk's ruling, U.S. District Court Judge Thomas Rice in the Eastern District of Washington issued a conflicting order that blocks the FDA from rolling back access to the pills in the dozen blue states and Washington D.C. that brought the lawsuit. This seeming contradiction is one reason many believe the case is headed to the Supreme Court.

The Department of Justice on Monday asked the judge in Washington state to clarify the injunction while Danco, which manufactures and sells mifepristone under the name Mifeprex, and the Department of Justice have filed appeals to the conservative-leaning 5th U.S. Circuit Court of Appeals.

Donley noted that it is technically possible for the FDA to comply with both rulings by using its enforcement discretion to look the other way if companies distribute a drug that no longer has the agency's approval.

"The only way for the FDA to comply with both orders is to allow the drug to become unapproved ... but then issue a guidance document or something similar saying 'We are not going to enforce the Food, Drug and Cosmetic Act against the manufacturers and distributors of mifepristone, so long as those manufacturers and distributors follow these carefully articulated rules,'" she said.

### **Would that work?**

Andrew Pincus, a visiting lecturer at Yale Law School and an experienced Supreme Court and appellate attorney, said that may not be enough assurance for manufacturers and other potentially liable entities.

"It's not clear that enforcement discretion is a route to give them the assurance they need," Pincus said.

### **What would happen if mifepristone is removed from the market?**

Misoprostol, the second drug in the two-pill regimen used for medication abortions, will still be available for patients across the country even if mifepristone is banned. The drug isn't subject to the FDA's drug safety program like mifepristone because it's used for many non-abortion purposes, including treating stomach ulcers, making it harder to challenge and ban. Although the drug is commonly used alone for abortions in other countries, it has slightly higher rates of requiring surgery to complete an abortion than using misoprostol and mifepristone together.

"It would be devastating from a lot of different perspectives and there would be a lot of patients who would be left with a less-optimal regimen to manage pregnancy loss and abortion care,"

Jennifer Villavicencio, an OB-GYN and member of leadership at the American College of Obstetricians and Gynecologists, told reporters on Monday.

In theory, Danco — or any other drug maker — could also resubmit an application for mifepristone's approval. However, it could take two to three years for a drug maker and the FDA to go through another approval process, said Kirsten Moore, the director of the Expanding Medication Abortion Access Project, on a press call.

**Why are drugmakers so concerned?** The pharmaceutical industry said the Texas lawsuit could curb drug development in the U.S. and throw the regulatory framework FDA uses to approve drugs into question if the case is upheld by higher courts.

“This decision has ramifications that extend well beyond this case, setting a dangerous precedent for undermining the FDA and creating regulatory uncertainty that will impede the development of important new treatments and therapies,” Biotechnology Innovation Organization interim CEO Rachel King said on Saturday.

If the Supreme Court upholds Kacsmayk's decision, the industry would likely push Congress to pass legislation to cement the FDA's authority, according to John Murphy, chief policy officer and deputy general counsel of healthcare at BIO.

“If that were to survive through sort of a theoretical SCOTUS challenge, you really have to look at Congress to ensure we get back to having FDA in the driver's seat here,” Murphy said.

### **What are Democratic governors doing to support mifepristone access while the case winds its way through the courts?**

Massachusetts Gov. Maura Healey announced Monday that she has requested UMass Amherst and state-contracted health care providers to stockpile mifepristone and issued an executive order “confirming protections for medication abortion under existing state law.”

The university purchased about 15,000 doses last week to ensure coverage for more than a year, with more doses expected to be purchased, and Healy is also allocating \$1 million to help providers who are contracted with the state Department of Public Health purchase the drug.

The move comes on the heels of an announcement from Washington Gov. Jay Inslee who is having his Department of Corrections purchase a three-year supply of mifepristone. State lawmakers have introduced legislation to allow the department to sell mifepristone to licensed health providers across the state.

And in California, Gov. Gavin Newsom announced the state has secured an “emergency stockpile” of up to 2 million misoprostol pills, with 250,000 pills having already arrived in the state.

## **New York stockpiles abortion pills after FDA approval suspended ([back](#))**

By Maya Kaufman

NEW YORK — New York state will create a stockpile of the abortion pill misoprostol to ensure continuing access to medication abortions after a Texas judge invalidated federal approval of mifepristone, another drug commonly used in medication abortions.

The New York State Department of Health will immediately begin efforts to stockpile 150,000 doses — a five-year supply — to meet anticipated needs, Gov. Kathy Hochul announced Tuesday. While the purchasing process is currently being finalized, preliminary estimates for the five-year supply of Misoprostol come to approximately \$100,000, according to the governor's office.

Hochul said the state is prepared to devote an additional \$20 million to support abortion providers should the mifepristone ruling stand, building on a [\\$35 million investment](#) launched last year in the wake of the Supreme Court's decision overturning the constitutional right to an abortion.

She and the state Legislature are also working on a bill that would require private insurers to cover misoprostol when prescribed off-label for abortion and ensure that providers do not lose medical malpractice coverage or face higher rates for coverage due to prescribing the drug off-label.

Misoprostol is FDA-approved for use as an ulcer drug, not a standalone abortion pill, but it can be prescribed off-label for medication abortion and other purposes.

Medication abortions are typically performed using both mifepristone and misoprostol, but experts say a misoprostol-only regimen is a safe and effective alternative.

“Judges have made it clear that they won't stop at any one particular drug or service, so it's going to ensure that New Yorkers will continue to have access to medication abortion no matter what,” Hochul said at a press conference hosted by Planned Parenthood of Greater New York.

Hochul's initiative to create a state misoprostol stockpile follows in the footsteps of California and other Democrat-led states that are [stocking up on abortion pills](#) amid uncertainty about the legal status of mifepristone.

The ruling by U.S. District Court Judge Matthew Kacsmaryk in Amarillo, Texas, an appointee of former President Donald Trump, is slated to go into effect Friday.

California Gov. Gavin Newsom said Monday the state had purchased 250,000 misoprostol pills and negotiated the purchase of up to 2 million more, and Washington Gov. Jay Inslee said last week that the state bought 40,000 doses of mifepristone.

Massachusetts plans to purchase roughly 15,000 doses of mifepristone through the state university system and set aside \$1 million to help state-contracted clinicians obtain the pills, Gov. Maura Healey said Monday.

Kacsmark's ruling that suspends the FDA's approval of mifepristone — combined with a conflicting order from a Washington state judge that blocks the FDA from rolling back access to the medication in certain states — created uncertainty around the drug's legality.

But abortion providers in New York are already preparing in the event that Kacsmark's ruling goes into effect.

Mayor Eric Adams said NYC Health + Hospitals, the municipal health system, is prepared to switch to the misoprostol-only regimen. And Gabriela Aguilar, medical director for Planned Parenthood of Greater New York, said the organization will shift to using just misoprostol if it is forced to stop administering mifepristone.

### **Appeals court keeps abortion pill on the market but sharply limits access ([back](#))**

By Kyle Cheney, Josh Gerstein and Alice Miranda Ollstein

A federal appeals court ruled late Wednesday that an abortion pill can remain on the market but only under strict conditions that prohibit its use beyond seven weeks of pregnancy and bar its distribution by mail.

In a [42-page decision](#), a three-judge panel of the 5th Circuit Court of Appeals agreed to temporarily block the central aspect of a Texas-based federal judge's ruling that [suspended the FDA's 2000 approval](#) of the drug, mifepristone. But by a 2-1 vote, the panel permitted other aspects of that ruling to take effect that would block a seven-year effort by the FDA to widen access to the drug.

Among the policies temporarily blocked by the appeals court's decision: the FDA's decision to expand mifepristone's availability until the 10th week of pregnancy; authorization for retail pharmacies to dispense the drug; eliminating the requirement for in-person office visits to obtain a mifepristone prescription and allowing physicians to prescribe the pills via telemedicine; allowing non-physicians to prescribe or administer the drug; and ending a requirement for prescribers to report "non-fatal adverse events" related to mifepristone.

Reining in the drug's availability while keeping it on the market is likely to dramatically diminish its usefulness to patients seeking to terminate pregnancies in Republican-led states where severe restrictions on abortion kicked in or were passed after the Supreme Court overturned the federal constitutional right to abortion last June. The decision will also significantly hamper access in blue states that have sought to maintain broad access to the pills — both for their own residents and for the surge of patients traveling across state lines to terminate their pregnancies.

Mifepristone has been used for decades in combination with another drug, misoprostol, to induce abortions in the first trimester of pregnancy. It now accounts for more than half of all abortions in the United States.

The Biden administration and abortion rights activists have sought to ease access to abortion medication by mail as an alternative to surgical abortion, which is easier for states to restrict as a practical matter.

Anti-abortion groups, aware that mifepristone is being used to circumvent state bans, sued to revoke the 23-year-old federal approval of the drug as well as the FDA's more recent policies to expand its access. Last week, Judge Matthew Kacsmaryk, a Texas-based appointee of former President Donald Trump, suspended both the original approval and the expanded-access policies, setting up what is likely the most consequential legal battle over abortion since the high court's 5-4 decision last June overturning *Roe v. Wade* after nearly half a century.

The Justice Department confirmed Thursday that it will ask the Supreme Court to intervene immediately.

"The Justice Department strongly disagrees with the Fifth Circuit's decision in *Alliance for Hippocratic Medicine v. FDA* to deny in part our request for a stay pending appeal," Attorney General Merrick Garland said in a statement. "We will be seeking emergency relief from the Supreme Court to defend the FDA's scientific judgment and protect Americans' access to safe and effective reproductive care."

Alliance Defending Freedom, which represents the anti-abortion groups seeking to block access to the medication, told reporters on a call Thursday that they see the appeals court's decision as a "significant victory" and have "no immediate plans" to appeal it.

But Erin Hawley, ADF's senior counsel in the case, stressed that they will continue pushing to have the FDA's original approval of mifepristone overturned.

"We anticipate that we might be able to persuade the Fifth Circuit on a fuller briefing that the 2000 ruling is in play," she said. "But for now, we've got a great victory in the fact that there are now three required doctor visits to make sure women are safe, and the FDA complies with the rule of law."

Danco, the manufacturer of the brand name version of mifepristone, said the company "remains unchanged in its commitment to do all that we can" to protect access to the drug. Danco intervened in the lawsuit to help defend the FDA's approval of the drug.

If the Supreme Court does not step in, the 5th Circuit's ruling limiting access to the drug will take effect at the end of this week. The appeals court panel consisted of Judges Andrew Oldham and Kurt Engelhardt, who are both Trump appointees, and Judge Catharina Haynes, an appointee of former President George W. Bush. Haynes indicated she would have kept Kacsmaryk's entire ruling on hold until a subsequent panel had a chance to consider the merits of the case.

Oldham and Engelhardt said suspending the original approval of mifepristone would have untenable consequences, but in a ruling issued shortly before midnight on Wednesday, they defended their decision to allow the other portions of Kacsmaryk's ruling to stand.

"This is an exceedingly unusual regime," the judges wrote, referring to the FDA's relaxation of restrictions around the drug. They said the agency "chose to cut out doctors from the prescription and administration of mifepristone." And they disputed the agency's contention that the drug is just as safe as ibuprofen.

The Justice Department defended the drug's safety record earlier this week in court papers. "FDA made those changes after fifteen years of adverse event data that showed 'known risks occurring rarely,'" the government's lawyers wrote. "By that point, mifepristone's 'well-characterized safety profile' was firmly established. Serious adverse events were 'exceedingly rare,' as demonstrated by eleven different studies and data from 'well over 30,000 patients.'"

The appeals court opinion — like Kacsmaryk's ruling last week — frequently deployed language more commonly associated with anti-abortion advocates, such as referring to the medication as "chemical abortion" and the follow-up procedure sometimes needed after a patient takes the pills in the first few weeks of pregnancy as "remov[ing] an unborn child."

Kacsmaryk's ruling appeared to be the first time that a judge ever suspended the FDA's approval of a drug, according to legal experts. Few conservative legal authorities stepped forward to defend the ruling, which the the Justice Department faulted for an "extravagant" interpretation of legal standing.

At an event Wednesday focused on reproductive rights, Vice President Kamala Harris said Kacsmaryk's decision amounted to "what could very righteously be considered a nationwide ban."

Flanked by Attorney General Merrick Garland and Health and Human Services Secretary Xavier Becerra, Harris stopped just short of accusing Kacsmaryk of acting for political, rather than legal, reasons.

"We have, in effect, a situation where politicians and politics have driven lawyers to go to a court of law where a judge who is not a medical professional is making a decision to undo the ruling 20 — over 20 — years ago of the FDA that declared a specific medication safe and effective for the American people," the vice president said.

Garland also warned that permitting judges to second-guess drug approval decisions would invite future challenges going far beyond the abortion drug in question.

"This could happen to any medication that Americans rely on, no matter how essential it is. And no matter how long ago it was approved," the attorney general said.

The president of the American Medical Association, Jack Resneck Jr., issued a similar warning Thursday morning in response to the 5th Circuit's ruling, saying the decision "would still roll

back mifepristone access, favor ideology and pseudoscience over facts, harm patients and establish dangerous precedent of judges without scientific training overriding FDA expertise.”

Anti-abortion groups cheered the middle-of-the-night ruling as an endorsement of their core criticisms of the FDA.

“From a pro-life perspective, this very evidence-based rejection of Biden's weakened health and safety standards for chemical abortion pills is good news for women,” Kristi Hamrick, the spokesperson for Students for Life, said in a statement. “A sloppy, Roe v. Wade mentality allowed the drug to proceed as it impacted the preborn in the first months of life. But those issues are being looked at now.”

Kacsmark's decision last week was handed down just minutes before another federal judge, who sits in Spokane, Wash., issued an order requiring the FDA to maintain current procedures for access to the drug in 17 states and Washington, D.C. U.S. District Court Judge Thomas Rice acted at the request of state attorneys general who filed a suit challenging the FDA's remaining restrictions on mifepristone as unnecessary and unjustified.

The dueling decisions appeared to pull federal authorities in different directions, although it was unclear whether they were in direct conflict.

On Monday, Justice Department attorneys asked Rice to clarify his order in light of the ruling from Texas. He has not yet responded to the request.

The 5th Circuit panel said Rice's order did not impact their ruling. “We cannot embrace an argument that would, in effect, allow the decision of an out-of-circuit district court to impel us towards ‘extraordinary’ relief that would be otherwise inappropriate,” the appeals court panel's majority wrote.

Abortion providers around the country say they are preparing to administer medication abortions using misoprostol alone if courts cut off access to mifepristone. While misoprostol-only abortions have been common in other countries for many years and groups including the American College of Obstetricians and Gynecologists consider them safe and effective, they carry a higher rate of complication and more severe side effects than the two pills used together.

**Sanders, Cassidy postpone drug pricing markup to get expert feedback ([back](#))**

By Megan R. Wilson

The Senate HELP Committee had hoped to hold a hearing on a bipartisan drug pricing bill shortly after the spring recess, but it appears it's being postponed as the panel gathers intel and hears privately from industry experts.

The panel, led by Sen. Bernie Sanders (I-Vt.), hoped to mark up the yet-to-be-seen legislation focused on pharmaceutical middlemen and generic drug policy on April 19, POLITICO previously reported.

But closed-door roundtables with experts and representatives from the pharmacy benefit manager and generics industries are prolonging the timeline, according to committee documents and a congressional aide familiar with the process.

While it's unclear exactly what the legislation will say, policymakers have a number of bipartisan options to pull from as they craft the bill — including some provisions from a 2019 offering introduced by former Sen. Lamar Alexander (R-Tenn.), who chaired the health panel at the time, and Sen. Patty Murray (D-Wash.).

The committee is hosting a private roundtable with biosimilars experts on Wednesday afternoon and held one to hear from generics industry experts on Monday, according to documents obtained by POLITICO.

“We are still waiting on a significant amount of technical assistance, which is not unreasonable with the compressed timeline, but we are still making good progress on a bipartisan basis,” said a Republican HELP Committee staffer granted anonymity to discuss internal process for the markup.

Sanders spokesperson Freeland Ellis declined to comment when asked when the committee plans to hold the markup.

Here's the guest list for Wednesday's biosimilars roundtable:

- **Eric Foster**, the managing principal of market access consulting and analytics at research organization IQVIA
- **Hans Sauer**, the deputy general counsel and vice president for intellectual property at the Biotechnology Innovation Organization, the industry group for biotechnology companies
- **Eva Temkin**, a partner in the FDA and life sciences practice at King & Spalding, a law and lobbying firm, and former director for policy at the FDA's Office of Therapeutic Biologics and Biosimilars
- **Mark Trusheim**, a consultant for biotech companies who is a visiting scientist at the MIT Sloan School of Management and strategic director of the MIT New Drug Development Paradigms Initiative

And Monday's roundtable of experts:

- **Rena Conti**, a researcher and associate professor at Boston University's Questrom School of Business

- • **David Gaugh**, interim CEO of the Association for Accessible Medicines, the industry group representing the makers of generic drugs and biosimilars
- • **Scott Gottlieb**, former commissioner of the Food and Drug Administration and senior fellow at the American Enterprise Institute
- • **Erika Lietzan**, a law professor at the University of Missouri School of Law and former partner of the food and drug group at law and lobbying firm Covington & Burling

**Why it matters:** The effort to craft the bill has already been on a tight timeline.

In mid-March, top health staffers for Sanders and Sen. Bill Cassidy (R-La.), the HELP Committee's ranking Republican, reached out to other committee member offices, notifying a planned markup for a bipartisan drug pricing bill focused on generic drugs and PBMs “early in the next work period” — meaning soon after the April break.

The legislative push comes amid efforts to increase access to cheaper generic medicines and critiques about the lack of transparency of the business practices of pharmacy benefit managers, the middlemen that negotiate discounts with pharmaceutical companies and decide which drugs insurance plans will cover.

### **Future uncertain at generic drug lobby as cuts threaten its influence ([back](#))**

By Megan R. Wilson

Simmering tensions inside one of the nation’s leading trade organizations for generic drugmakers could threaten its lobbying clout at a crucial time for the industry.

The Association for Accessible Medicines has lost some members or reduced dues to keep others, contributing to the need for budget cuts that culminated in layoffs of top public affairs, trade policy and advocacy executives, as POLITICO previously reported.

The slimdown is happening while the organization attempts to raise its profile with the public and policymakers and is still without a permanent CEO after its former leader stepped down at the end of 2022.

And its challenges come as the \$93 billion generics industry, which is financially outgunned by brand-name drugmakers, is also trying to convince Congress and state legislatures to help expand access to generic and biosimilar medicines.

Ten people with knowledge of the association’s inner workings said the turmoil imperils the industry’s position in Washington. The people — including former employees, people who’ve worked in association management and lobbyists who’ve represented generic drugmakers — were granted anonymity to discuss the sensitive topic.

“In baseball, there’s something called the golden sombrero — it’s when a guy strikes out four times in a game. It’s really embarrassing,” said an executive who has worked at several health care trade associations and was given anonymity to speak about the situation. “Their golden sombrero is a dysfunctional board, no money, no staff, no agenda. That’s a pretty bad combination.”

In an email to POLITICO, AAM broadly disputed the characterization, saying the organization is “right-sized” and its board is united in its defense of an industry critical to American medicine, accounting for 91 percent of drugs sold in the U.S. but 18 percent of spending on medicines.

“No other sector helps patients afford their health care as much as the generic and biosimilar industries,” the association said in the email.

Further, the group is still active on Capitol Hill. This week, interim CEO David Gaugh was part of a small, closed-door roundtable of experts advising the Senate HELP Committee as it works to draft drug pricing legislation covering generic drugs and pharmacy benefit managers.

Several of the people who spoke to POLITICO said that AAM — and its new board chair, Christine Baeder, a Teva Pharmaceuticals executive — has a promising vision for elevating the generic and biosimilar drug industries. However, they worry the group may be too under-resourced to execute it. Teva didn’t respond to requests for comment.

The association has tried to cut costs and scale down its budget, especially after generic drugmaker Mylan, now Viatris, left in 2020 and took a hefty portion of dues with it.

This year, AAM is slashing its budget by more than \$4 million, according to four people familiar with the figure — an almost 20 percent cut that would bring the group’s war chest to roughly \$19 million, the lowest in seven years. The association disputed those amounts but declined to provide figures to correct them.

Top executives — head lobbyist Erik Komendant, top communications staffer Allen Goldberg and the person in charge of trade and international issues, Jonathan Kimball — were laid off as part of the cuts, and their positions eliminated, Gaugh, who has worked at AAM for more than a decade, told board members in an email first reported by POLITICO.

Almost all of AAM’s revenue comes from member dues, tax disclosures show. That’s not uncommon for industry groups, but AAM in particular relies heavily on its larger members, including Teva, the association’s largest dues payer.

Most of AAM’s 23 members are small or medium-sized companies, and two-thirds are based overseas, some of which only have small U.S. operations — a dynamic multiple people said also leads to some of them underappreciating the need to invest in Washington.

That leaves AAM potentially vulnerable to its larger members such as Teva or Sandoz having an outsized impact on the trade group’s revenue, should they decide to depart. Three smaller companies departed the association, according to the list on AAM’s website. It added one new member.

Leslie Pott, a spokesperson for Sandoz, said a strong industry association in Washington and the states is crucial because “one member company cannot do this alone,” calling this year “a watershed year for biosimilars.”

“We are confident that the association is on the right path, is being thoughtful in leadership choices and priority choices (which we all own as member companies), and will be effective in the future strategies and campaigns we decide to put our muscle behind together,” Pott wrote in an email.

The generics industry is lobbying the federal government to help with a myriad of issues including supply chain problems that have led to shortages of popular drugs including amoxicillin, generic Adderall, children’s acetaminophen — the generic version of Tylenol — and albuterol sulfate, the medicine in asthma inhalers.

#### ‘An inflection point’

Several high-level staff left AAM last year, including Food and Drug Law Institute CEO Christine Simmon, who led AAM’s Biosimilars Council, and lobbyists Polly Webster and Joe Russo, who both took jobs on Capitol Hill. Then-CEO Dan Leonard resigned in December after a tumultuous two years at the helm. Leonard declined to comment about his tenure.

The association is now down to 19 people after the departures, layoffs and the exit of Steve Selde, the former director of its Biosimilars Council, who departed for the Centers for Medicare and Medicaid Services in March to help implement the Inflation Reduction Act.

There are two federal lobbyists in AAM’s government affairs shop, Katherine Raab and Peter Kelbel, and three lobbyists handling state issues. AAM told POLITICO it wants to add a third lobbyist to its federal team and will be filling positions in other areas. However, its stable of lobbying, public relations, research, advertising and legal firms is likely to shrink, said five people familiar with the situation.

AAM wouldn’t disclose which firms have been cut but told POLITICO it has “made deliberate and sound financial decisions for the association, in partnership with our board, and landed where we need to be.”

“AAM is at an inflection point which has led us to right-size the organization,” AAM’s email said. “The right positions are in place; the right staff are in those positions; and the right resources — both internal and external — are in place.”

A diminished trade group for generics and biosimilars could have negative consequences for its members: Only eight of its 23 member companies employ in-house lobbyists in Washington, outside firms or both. Three others disbanded their lobbying representation in recent years, disclosures show.

“This is an industry that was born from government action, with Hatch-Waxman,” said one of the people knowledgeable about the group’s inner workings, referring to the law named after former Sen. Orrin Hatch (R-Utah) and former Rep. Henry Waxman (D-Calif.) that established the generic drug market. It “should be super sensitive to how the government can affect their business and the need to stay engaged. Instead, it’s gone the opposite way.”

'The trade association it deserves' Manufacturers operate on ultra-thin margins that don't incentivize production or investments in generic medicines. Several people familiar with the industry noted that the intense, sometimes zero-sum competition can cause friction among member companies.

"They need to be able to look at [the policy landscape] with a broader prism," said one of those people. "A lot of them lack that. As a result, the board doesn't have cohesiveness."

Additionally, one-third of the board seats are filled by company executives below the president or CEO level, which six people knowledgeable about association management said can be problematic because chief executives are the ultimate decisionmakers at their companies — everyone has to check with them.

"There's an old saying at trade associations: Sometimes the board of directors gets the trade association it deserves. And if you don't have the right people sitting at that table, then the stability of the association can come under stress" because there's a risk of "not having the level of buy-in you need from your leading members," said one of the six people, another executive who has worked at health care industry groups.

Board members "are selected by their company's leadership and receive their full support," regardless of their position at the company, AAM said in its emailed statement. "In all instances, the AAM board member ably represents the company."

AAM also refuted the idea that it has a discordant membership — all of which have a board seat — saying that they are, and have been, in agreement about the association's decisions about policy priorities and how it allocates its resources.

"As is the case with most trade associations, and AAM is no different, individual members have a unique set of business objectives and bring their own value to the table, but they share a common purpose," despite having "substantial continued pressures facing our industry and the market around us," the group said.

'An important voice'

AAM is now trying to capitalize on the message that the industry lowers Americans' health care costs, recently unveiling a social media campaign meant to remind people how generics "do so much for them for so little money," Baeder, AAM's new board chair, said of the debut at its February conference.

But while companies are enthusiastic about the concept — urging people to use the hashtag #4GRxANTED on posts talking about things they take for granted but shouldn't — the backstory of its branding efforts is an illustration of the group's struggles.

It had been pushed by Amneal CEO Chirag Patel, who'd circumvented the normal succession process to chair AAM's board last year by calling member executives — sometimes going above the person from a company already on the board — and asking to lead it, said five people with knowledge of the situation.

Patel, who people described as intently focused on the initiative, insisted on retaining his preferred branding consultant — a choice that riled some board members and AAM employees, the five people said. Amneal didn't respond to requests for comment.

Amneal's senior vice president of regulatory strategy and policy took over the company's spot when Patel stepped down from the board, as he'd planned, after his one-year term as chair.

AAM said Amneal, and Patel specifically, have been "an important voice" at the association since 2007. It acknowledged Patel "spearheaded this effort" after "generously donating his time" to chair the board, noting he "was unanimously voted into that position by the full board."

"Bringing in an outside reputation consultant was one step in a thoughtful and deliberate process to build a successful campaign," AAM said, of the #4GRxANTED initiative, which so far hasn't gained much traction on social media. The group says it will "kick off, in full," this month.

## **White House says a horse sedative is an 'emerging threat' to public health [\(back\)](#)**

By Carmen Paun

The White House Office of National Drug Control Policy said today that the horse sedative xylazine is showing up in an increasing number of fentanyl overdoses and is an emerging threat to public health.

The designation, which Congress created in [a 2018 law](#) aimed at combating the opioid epidemic, obligates the administration to form a plan to combat it.

Because xylazine, also known as Tranq, is not an opioid, it makes it harder to reverse fentanyl overdoses with opioid antagonists like naloxone.

Furthermore, those who survive taking Tranq-laced fentanyl can develop severe wounds and rotting human tissue requiring amputation.

The number of overdose deaths where xylazine was detected increased by more than 1,000 percent between 2020 and 2021 in the South, according to the Drug Enforcement Administration, with several-hundred-fold increases in other parts of the country.

**Why it matters:** An emerging threat designation obligates the administration to take steps to combat the drug.

Rahul Gupta, director of the drug control policy office, said the White House will:

— Increase testing capacity for xylazine, which is uneven across the U.S. and makes it hard to get a countrywide picture of the threat. "We also need to develop a point-of-care xylazine test, usable for real-time testing and care," Gupta said.

- Create a comprehensible data system, updated regularly, to inform the national picture and local response.
- Develop health interventions. The Office of National Drug Control Policy will bring together experts to identify the most promising approaches in clinical stabilization, withdrawal management and treatment protocols.
- Attack the illicit supply chain of xylazine, by having public health and public safety officials learn more about the drug's trade routes so law enforcement can disrupt them.
- Regulate the drug. The Biden administration will look at whether scheduling xylazine or the broader class of substances used to adulterate fentanyl makes sense, Gupta said, adding: "We also must maintain the legitimate supply of xylazine that's needed for veterinary medicine."
- Conduct research. "We need an approved xylazine antidote and to determine the best possible treatment for it," Gupta said.

**What's next:** The White House has 90 days to publish its response plan.

**Subject:** Week 4: the Final Table

Good Afternoon,

H.R.5376, the Inflation Reduction Act was passed by a roll call vote of 50-50, with the Vice President voting in the affirmative.

Looking ahead, the Senate will hold pro-forma sessions with no business conducted on the following dates and times:

Tuesday, August 9th at 9:00 a.m.;  
Friday, August 12th at 9:00 a.m.;  
Tuesday, August 16th at 8:00 a.m.;  
Friday, August 19th at 2:30 p.m.;  
Tuesday, August 23rd at 10:30 a.m.;  
Friday, August 26th at 10:00 a.m.;  
Tuesday, August 30th at 10:00 a.m.; and  
Friday, September 2nd at 9:00 a.m.

Cloture has been filed on the following nominations:

1. John Z. Lee to be United States Circuit Judge for the Seventh Circuit
2. Andre B. Mathis to be United States Circuit Judge for the Sixth Circuit

The Senate will next be in full session at 3pm on Tuesday September 6<sup>th</sup>.

At approximately 5:30pm, the Senate will vote on the motion to invoke cloture on the Lee nomination.

- Tillis MTC To Judiciary to recapture 75,000 employment-based visas from 2020 and 2021(7)
- Tillis MTC To Judiciary to hire 2,500 ICE officers to focus on removal operations (8)
- Tillis MTC To Judiciary to hire 2,500 ICE officers for removal of sex offenders, rapists, child molesters (9)
- Tillis MTC To Judiciary to hire 2,500 ICE officers for removal of identify theft, benefit fraud, unlawful employment (10)
- Tillis MTC To Judiciary to hire 2,500 ICE officers for removal of gang, felony, drunk driving (11)
- Tillis MTC To Judiciary to hire magistrate and district judges and increase illegal crossing prosecutions (12)
- Tillis MTC To Judiciary to amend standard for frivolous asylum claim to "willfully blind" (13)
- Tillis MTC To Finance to prohibit IRS from targeting religious nonprofits & protect their tax-exempt status (14)
- Sasse MTC To Finance to ensure children born alive during an abortion receive same level of care (15)
- Sasse MTC To Finance to prohibit clean tech manufacturing tax credit from being used in China (16)
- Rubio MTC To HELP for Pregnant Students Rights Act (17)
- Rubio MTC To HELP to define pregnancy (18)
- Rubio MTC To ENR for permitting reform; prioritize Mountain Valley & Northern Lights Expansion Pipelines (19)
- Rubio MTC To Judiciary for pre-trial detention of dangerous criminals (20)
- Rubio MTC To Finance to support domestic IP and supply chain for pharmaceuticals against China (21)
- Tillis MTC To Banking to expedite distribution of CDBG disaster recovery funds by state grantees (22)

- Tillis MTC To Ag to limit CCC funds to only direct support to producers and ag processors (23)
- Tillis MTC To HELP to allow livestock producers to use H-2A visas (24)
- Tillis MTC To HELP for private and charter schools (25)
- Tillis MTC To HELP to protect state's jurisdiction to authorize charter school openings (26)
- Tillis MTC To Finance to increase the dependant care assistance program limitation (27)
- Tillis MTC To Finance to allow equal access to child care options, including family and faith-based (28)
- Tillis MTC To VA to help address staffing shortages at VA health care facilities (29)
- Tillis MTC To Finance to extend the life of the Federal Hospital Insurance Trust Fund (30)
- Tillis MTC To Finance to protect long-term investments in medical research (31)
- Tillis MTC To HELP to ensure that people who like their health insurance can keep it (32)
- Tillis MTC To Finance to waive 15% minimum tax for companies building in US/reshoring supply chain (33)
- Tillis MTC To Banking to place limitations on who can serve as acting chair of the FDIC (34)
- Tillis MTC To Finance to pair increased funding to IRS with increased penalties for leaking information (35)
- Thune MTC To Indian Affairs to move tribal climate resiliency funds to tribal public safety and justice (36)
- Thune MTC To Finance to prevent tax increase on incomes of \$400,000 or less (37)
- Thune MTC To Finance to reallocate \$80 billion in IRS funds to provide tax relief (38)
- Thune MTC To HELP to prevent the president from forgiving student loans for high-income people (39)
- Thune MTC To Finance to reallocate \$43 billion in tax enforcement funds to USCBP (40)
- Rubio MTC To Judiciary to ensure prosecutors and law enforcement are addressing violent crime (41)
- Ernst MTC To EPW to prevent methane permitting requirements on farmers and ranchers (42)
- Ernst MTC To HELP to waive the FDA application fee for regular, routine oral contraceptives (43)
- Romney Amendment to Income cap on temporary increase in premium tax credit (5196)
- Cramer MTC To EPW to have GSA identify and sell unused government office space (44)
- Cramer MTC To HSGAC to fund the completion of the southern border wall between the U.S. & Mexico (45)
- Cramer MTC To Finance to strike provisions that preclude administrative/judicial review in DPNP (46)
- Lankford MTC To Finance to ensure conscience protections for health care providers (47)

- Lankford MTC To Finance to assess a user fee on electric vehicle operators and provide to Hwy. Trust Fund (48)
- Lankford MTC To ENR to increase domestic oil and gas exports to Europe (49)
- Lankford MTC To Finance to treat all energy companies equally under minimum tax provisions (50)
- Lankford MTC To Finance to prevent tax increase on domestic manufacturers (51)
- Lankford MTC to To Finance to prevent business tax increases if borne by workers or consumers (52)
- Lankford MTC To Finance to incentivize new drug development (53)
- Lankford MTC To Finance for generics in Medicare part D (54)
- Lankford MTC To Finance to prevent funding for gender transition procedures on children (55)
- Lankford MTC To ENR to increase domestic oil and gas production (56)
- Lankford MTC To ENR to build pipeline infrastructure and capacity (57)
- Lankford MTC To Finance to ensure no tax benefits for forced labor in Xinjiang (58)
- Lankford MTC To Finance to ensure IRS improves privacy protections and stops illegal disclosure (59)
- Lankford MTC To HSGAC to study causes and costs of the border crisis (60)
- Lankford To Finance to ensure Medicare savings not used for non-Medicare spending (61)
- Cruz To HSGAC to ensure no covid vaccine mandate in DC schools (62)
- Cruz MTC To Finance for no IRS funds to target religious nonprofits (63)
- Cruz MTC To Judiciary to prevent DOJ from directing fines to parties other than parties to the case or the U.S. (64)
- Cruz MTC To Finance for tax credit for remediation of covid learning loss (65)
- Cruz MTC To Judiciary to prevent DOJ targeting parents as "domestic terrorists" (66)
- Cruz MTC To HELP to physically secure elementary and secondary schools (67)
- Cruz MTC To Finance to repeal Title I if inflation is above 1.4% in one year (68)
- Cruz MTC To Finance to ensure no tax increases for people making \$400,000 or less (69)
- Cornyn MTC To HSGAC to achieve full operational control of the southern border (70)
- Cornyn MTC To HELP to require background checks for all members in UAC placement households (71)
- Moran MTC To Finance to reduce inflation and create economic growth (72)
- Lankford Amendment To require the United States Postal Service to conduct a publicly available cost-benefit analysis to analyze costs versus savings of the purchase of electric delivery vehicles compared to internal combustion engine delivery vehicles, and to ensure that the purchased electric delivery vehicles are placed in areas and on routes that make the most economic sense. (5197)
- Lankford Amendment To limit the procurement of drugs manufactured with waived intellectual property rights unless the President certifies that the United States will not support any measure that weakens any provisions of the Agreement on Trade-Related Aspects of Intellectual Property Rights relating to a pharmaceutical, therapeutic, diagnostic, or other biotechnology commodity produced in the United States. (5198)

- Lankford Amendment to suspend the distribution of funds appropriated under this Act until all Afghan nationals living in the United States who appear on the biometrics-enabled watchlist have been apprehended. (5199)
- Lankford Amendment to prohibit the provision of support and incentives under provisions relating to the Committee on Agriculture, Nutrition, and Forestry to certain foreign persons. (5200)
- Lankford Amendment to strike the repeal of the prescription drug rebate rule. (5201)
- Lankford Amendment to require qualified manufacturers to certify that no forced labor was utilized in the production of specified property (5202)
- Lankford Amendment to strike section 60107 (regarding the low emissions electricity program). (5203)
- Lankford Amendment to strike the provision on the high-efficiency electric home rebate program. (5205)
- Lankford Amendment to limit the obligation or expenditure of amounts provided under the bill until other funds previously made available are expended. (5206)
- Sanders Amendment to establish a Civilian Climate Corps. (5209)
- Sanders Amendment to Cap costs for prescription Drugs under Medicare parts B and D (5210)
- Sanders Amendment to Cover dental, hearing, and vision under Medicare. (5211)

**Subject:** Week 4: the Final Table

Happy Saturday,

The Senate is back in session. We will have two votes at approximately 12:30pm.

Approx. 12:30pm – 2 roll call votes:

1. Motion to discharge the nomination of David M. Uhlmann to be an Assistant Administrator of the Environmental Protection Agency
2. Confirmation of Constance J. Milstein to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Malta.

Please see Sen. Schumer's remarks about the Inflation Reduction Act:

**Senator Schumer Floor Remarks**

**August 6<sup>th</sup>, 2022**

We approach the culmination of one of the most productive stretches in recent Senate memory. It began almost two months ago, when in the wake of unimaginable bloodshed in Buffalo and Uvalde, the Senate came together and passed the first gun safety law in nearly thirty years.

A few weeks later, in the face of a damaging semiconductor shortage, the Senate approved the largest investment in American manufacturing and scientific research in decades.

This week, we finally told American veterans with cancer, lung disease, and other terrible ailments that their wait for their benefits was over, by passing PACT Act.

And a few days ago, as Russian aggression towards Ukraine continues, we swiftly approved the accession of Sweden and Finland to the NATO alliance.

Gun Safety, Chips, veterans, NATO, all of this we got done in under six weeks, and now we have one more groundbreaking item left: the Inflation Reduction Act. Passing any one of these bills in a summer would be significant, but we are on the verge of getting all of them done before the August state work period.

In a few hours, we will formally begin the process of passing the Inflation Reduction Act of 2022 by voting on the motion to proceed.

Our meetings with the parliamentarian have now largely concluded, and we have a bill before us that can win the support of all fifty Democrats.

I am happy to report to my colleagues that the bill we presented to the parliamentarian remains largely intact. The bill, when passed, will meet all of our goals: fighting climate change, lowering health care costs, closing tax loopholes abused by the wealthy, and reduce the deficit. This is a major win for the American people and a sad commentary on the Republican Party as they actively fight provisions that lower costs for families.

As the Inflation Reduction Act works its way through the floor, the American people are going to learn an unmistakable truth about our package: it was written, first and foremost, with them in mind.

For seniors who've faced the indignity of rationing medications or skipping them altogether, the Inflation Reduction Act will lower prescription drug costs and finally cap out of pocket expenses.

For families that have fallen behind on the electric bill while trying to stay cool through a heat wave, this bill will lower energy costs and provide the largest investment in clean energy in American history.

For every child deprived of clean air and a neighborhood where they can play safely outside—away from smog and exhaust fumes—this bill will help reverse air pollution and help clean up communities that have endured under the shadow of congested highway and industrial sites. And

as the most significant action on climate change in decades, it will help deliver our children and grandchildren the planet they deserve.

The Inflation Reduction Act was written with the American people in mind: families struggling to pay the bills, kids who struggle with asthma and pollution, seniors who can't afford lifesaving medications. This bill is for them.

For years, many in Washington have promised to address some of the biggest challenges facing our nation, only to fall short. Many have talked about the need to act on climate change, and the need to hold drug companies accountable, and make the tax code fairer.

But where previous efforts have fallen short, this Senate Democratic majority on the verge of succeeding.

After years of trying, we will finally empower Medicare to negotiate the prices of prescription drug costs.

After years of trying, we will finally cap out of pocket expenses and make vaccines free for our seniors on Medicare.

And after years of trying—after years of Americans calling for action—Congress will pass the largest clean energy package ever.

We'll cut emissions by roughly 40% by 2030, helping us avert the worst consequences of a warming planet.

We'll prevent nearly 4,000 deaths and 100,000 asthma attacks a year by reducing air pollution.

We'll save Americans money on their utility bill by making it easier for them to tap into clean energy, and expand incentives for utility companies to explore cleaner ways to generate power. We will make it easier to finally usher in the era of greater solar and wind power, battery storage and EVs, and bring manufacturing of this technology back to America.

We will restore our coastlines, regenerate our forests, and shield communities everywhere from the dangers of droughts and sweltering heat waves.

Through it all, we will create more than 9 million jobs over the next decade—an average of nearly 1 million each year.

From the moment Democrats announced the Inflation Reduction Act, Senate Republicans have fruitlessly tried every approach under the sun to lay a glove on our bill.

First, they said our bill will make inflation worse, only to give up on that once everyone from Larry Summers to Hank Paulson said it would do the opposite.

Then they tried calling our bill a taxes hike on the middle class, before changing their minds and admitting our bill actually contains no tax rate increases at all for the middle class.

And at every turn they've resorted to that decades-old talking point of calling our bill nothing but wasteful spending, conveniently ignoring that our bill in fact lowers the deficit and is completely paid for.

I will grant my Republican colleagues their task is not easy: by one measure over 65% of Americans support the policies in the Inflation Reduction Act, and other polls reflect the same. Republicans haven't been able to get around the fact that Americans like that we are letting Medicare negotiate the price of prescription drugs.

They like that we will close tax loopholes that allow billion dollar companies pay zero in taxes.

And voices across the country--from Nobel-winning economists to former Treasury Secretaries to even Republican movie star ex-governors--have all praised the Inflation Reduction Act as an inflation-fighting, climate-saving, job-creating piece of legislation.

At a time of seemingly impenetrable gridlock, the Inflation Reduction Act will show the American people that when the moment demands it, Congress is still capable of taking big steps to solve big challenges.

We will show the American people that, yes, we are capable of passing a historic climate package, and rein in drug companies, and make our tax code fairer. We are able to make big promises and work hard to keeping them as well.

We all know that Republicans will continue their mightiest to try and smear our work before this bill is passed. This isn't our first time going through the reconciliation process, and nobody is going to be surprised when the other side comes up with wild, misleading, and wholly partisan amendments that have nothing to do with our bill.

Those efforts will not deter us. No matter how long it takes, the Senate is going to stay in session to finish the bill.

This is one of the most comprehensive and far-reaching pieces of legislation that has come before the Congress in decades. It will help just about every citizen in this country and make America a better place.

We are not leaving until the job is done. The American people deserve nothing less, so let us get to work today.

**Subject:** RE: Week 4: the Final Table

Good Afternoon,

S.J.Res.55 passed by a vote of 50-47. The nomination of Roopali H. Desai to be United States Circuit Judge for the Ninth Circuit was confirmed by a vote of 67-29.

Leader Schumer announced that the Senate will convene next on Saturday at noon. He then moved to discharge the nomination of David Uhlmann to be Assistant Administrator for Enforcement and Compliance Assurance, Environmental Protection Agency. We expect to vote on the motion to proceed to the Inflation Reduction Act on Saturday afternoon.

Rough transcript below:

MR. SCHUMER: MADAM PRESIDENT, FOR THE INFORMATION OF SENATORS,  
THE SENATE WILL NEXT CONVENE ON SATURDAY AT NOON. THE NEXT VOTE  
WILL BE AT 12:30 P.M. ON SATURDAY ON A MOTION TO DISCHARGE A  
NOMINATION.  
WE EXPECT TO VOTE ON THE MOTION TO PROCEED TO THE  
RECONCILIATION LEGISLATION ON SATURDAY AFTERNOON.

**Sent:** Wednesday, August 3, 2022 9:33 PM  
**To:** Simmons, Maalik (Durbin) <Maalik\_Simmons@durbin.senate.gov>  
**Subject:** Week 4: the Final Table

Good evening,

The Senate will come back into session at 12pm tomorrow.

At approximately 1:45pm, the Senate will proceed to two roll call votes:

1. Passage of S.J.Res.55, providing for congressional disapproval under chapter 8 of title 5, United States Code, of the rule submitted by the Council on Environmental Quality relating to "National Environmental Policy Act Implementing Regulations Revisions".
2. Confirmation of Roopali H. Desai to be United States Circuit Judge for the Ninth Circuit.

We could see additional roll call votes during Thursday's session of the Senate.

The votes on confirmation of the following nominations will occur at times to be determined by the Majority Leader in consultation with the Republican Leader:

1. Cathy Ann Harris to be Chairman of the Merit Systems Protection Board.
2. Constance J. Milstein to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Malta.

**To:** Simmons, Maalik (Durbin) <Maalik\_Simmons@durbin.senate.gov>  
**Subject:** RE: Week 4: the Final Table

The Senate agreed to the motion to concur (passage of the PACT Act) by a vote of 86-11.

At 1:30pm tomorrow, the Senate will proceed to Executive Session to consider Calendar Number 5 treaty document 117-3. The treaties will be considered as having advanced through the various parliamentary stages up to and including the presentation of the resolution of advice and consent to ratification. There will be 3 hours for debate, equally divided between the two Leaders, or their designees, on the treaties and resolution of advice and consent to ratification. The only amendments in order to the resolution of advice and consent to ratification are the following:

1. Sullivan #5192 (re: spending benchmark)
2. Paul #5191 (re: declaration of war)

Following debate, the Senate will vote in relation to the amendments in the order listed. Upon disposition of the amendments, any committee conditions, declarations, or reservations will be agreed to as applicable, and the Senate will vote on the resolution of advice and consent to ratification, as amended, if amended, with no intervening action or debate. If the resolution of advice and consent to ratification is agreed to, the motion to reconsider be considered made and laid upon the table, and the President will be immediately notified of the Senate's action.

Wednesday, August 3<sup>rd</sup> at approx. 4:30pm – up to 3 roll call votes:

1. Sullivan amendment #5192 (re: spending benchmark) (*possible voice vote*)
2. Paul amendment #5191 (re: declaration of war)
3. Adoption of the resolution of ratification with respect to Calendar Number 5 treaty document 117-3 (NATO).

**To:** Simmons, Maalik (Durbin) <Maalik\_Simmons@durbin.senate.gov>  
**Subject:** RE: Week 4: the Final Table

Good Afternoon,

Earlier today, the Senate confirmed the nomination of Elizabeth Hanes to be a Judge for the Eastern District of Virginia by a vote of 59-37.

Senator Schumer just locked in the following agreement to complete consideration of the PACT Act:

At approximately 5pm, the Senate will proceed to the following votes {all set at a 60 vote threshold}:

1. Paul motion to concur with amendment #5184 (60 Vote Threshold)
2. Toomey motion to concur with amendment #5186 (60 Vote Threshold)
3. Blackburn motion to concur with amendment #5185 (60 Vote Threshold)
4. Motion to concur in the House amendment to S. 3373 {Passage} (60 Vote Threshold)

Rough transcript below:

MR. SCHUMER: I HAVE GOOD NEWS. THE MINORITY LEADER AND I HAVE COME TO AN AGREEMENT TO VOTE ON THE PACT ACT THIS EVENING. THERE WILL BE THREE AMENDMENT VOTES, A 60-VOTE MARGIN ON THE TOOMEY AMENDMENT, ON THE PAUL AMENDMENT, AND A THE BLACKBURN AMENDMENT AND 60 VOTES FOR THE BILL. I'M VERY OPTIMISTIC THAT THIS BILL WILL PASS. SO OUR VETERANS ACROSS AMERICA CAN BREATHE A SIGH OF RELIEF. THE TREATMENT THAT THEY DESERVE AND HAVE NEEDED BUT HAVE BEEN DENIED BY THE V.A. BECAUSE OF ALL KINDS OF LEGAL BARRIERS AND PRESUMPTIONS WILL NOW BE GONE. VETERANS WHO WERE EXPOSED TO THE TOXIC FUMES OF BURN PITS WILL BE TREATED BY THE V.A. LIKE THEY SHOULD HAVE BEEN FROM THE VERY BEGINNING. SO THIS IS GOOD NEWS. IT TOOK US A WHILE TO GET HERE, BUT I'M GRATEFUL FOR THE BIPARTISAN COOPERATION AND SUPPORT THAT WILL ALLOW US TO MOVE FORWARD TODAY. AND A LITTLE BIT MORE OF GOOD NEWS. THE FACT THAT WE CAN FINISH PACT TODAY GIVES US A REAL OPPORTUNITY TO DO THE TREATIES THAT WILL ALLOW FINLAND AND SWEDEN TO JOIN NATO. AND THAT CAN HAPPEN TOMORROW IF WE CAN COME TO A TIME AGREEMENT. I'M VERY HOPEFUL THAT THAT CAN HAPPEN AS WELL.

SO I ASK UNANIMOUS CONSENT THAT AT 4:00 P.M. TODAY, THE SENATE PROCEED TO LEGISLATIVE SESSION AND RESUME CONSIDERATION OF THE HOUSE MESSAGE TO ACCOMPANY S. 3373 WITH THE TIME UNTIL 5:00 P.M. EQUALLY DIVIDED. FURTHER, THAT IT BE IN ORDER TO CONSIDER AND VOTE IN RELATION TO A PAUL MOTION TO CONCUR WITH AMENDMENT NUMBERED 5184, TOOMEY MOTION TO CONCUR WITH AMENDMENT 5186, AND A BLACKBURN MOTION TO CONCUR WITH AMENDMENT 5185.

THAT AT 5:00 P.M., THE SENATE VOTE IN RELATION TO THE MOTIONS IN THE ORDER LISTED, THAT FOLLOWING DISPOSITION OF THE MOTIONS TO CONCUR WITH AMENDMENTS NUMBERED 5184, 5186, AND 5185, THE MOTION TO REFER AND THE AMENDMENTS PENDING THERETO AND THE MOTION TO CONCUR WITH AMENDMENT 5148 AND THE AMENDMENT PENDING THERETO BE WITHDRAWN AND THE SENATE VOTE ON THE MOTION TO CONCUR IN THE HOUSE AMENDMENT TO S. 3373. THAT THE PAUL, TOOMEY, AND BLACKBURN MOTIONS AND THE MOTION TO CONCUR BE SUBJECT TO A 60-VOTE AFFIRMATIVE THRESHOLD WITH TWO MINUTES FOR DEBATE EQUALLY DIVIDED PRIOR TO EACH VOTE. AND THAT ALL VOTES AFTER THE FIRST VOTE BE TEN-MINUTE VOTES, ALL WITHOUT INTERVENING ACTION OR DEBATE.

THE PRESIDING OFFICER: IS THERE OBJECTION?  
WITHOUT OBJECTION.

---

**From:** Simmons, Maalik (Durbin) <Maalik\_Simmons@durbin.senate.gov>

**Sent:** Monday, August 1, 2022 8:22 PM

**To:** Simmons, Maalik (Durbin) <Maalik\_Simmons@durbin.senate.gov>

**Subject:** Week 4: the Final Table

Good Evening,

The Senate will return to session at 12p tomorrow.

The Senate will recess from 12:30pm until 2:15pm to allow for the weekly caucus luncheons.

At approximately 2:15pm, the Senate will vote on confirmation of the nomination of Elizabeth Hanes to be a Judge for the Eastern District of Virginia.

We could see additional roll call votes on Tuesday.

Discussions continue regarding several pieces of legislation that could see floor time this week including but not limited to: the Pact Act, NATO Treaty, Kigali Treaty, Sullivan CRA on NEPA Regulations (SJRes55), etc.

By unanimous consent, the Senate will proceed to a roll call vote on confirmation of the following nomination at time to be determined by the Majority Leader in consultation with the Republican Leader:

- Cathy Ann Harris to be Chairman of the Merit Systems Protection Board.
- Constance J. Milstein to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Malta.

Earlier today, Senator Schumer reiterated that the Senate will soon consider the Inflation Reduction Act.

The motion to proceed is nondebatable and subject to a majority vote threshold. Once the motion to proceed is adopted, we expect Sen. Schumer to offer a substitute amendment which would be the text of the Inflation Reduction Act.

Under the rules of reconciliation, there are up to 20 hours for debate equally divided and controlled between the Majority and Minority.

Time on first degree amendments is limited to 2 hours equally divided.

Time on second degree amendments and debateable motions and appeals are limited to 1 hour equally divided.

The Senate could vote in relation to amendments during the 20 hours of debate.

Upon the use or yielding back of time all time, there is no further debate, but amendments are still in order to be offered and voted upon thus beginning the votearam portion of the process. Typically we get consent for 2 minutes for debate equally divided prior to each vote in the series to give the sponsor and opponent time to explain the amendment and to advocate for their position.

When there are no further amendments, the Senate would vote on the substitute, as amended, if amended, and on passage of the bill, as amended.

Once the votearama begins, the Senate is expected to be in session and voting around the clock until passage.

We expect noon convene times during the week as long as there are Byrd Bath sessions in the mornings.

The Byrd Bath will likely continue throughout consideration of the bill and could happen in real time.

---

**From:** Simmons, Maalik (Durbin) <[Maalik\\_Simmons@durbin.senate.gov](mailto:Maalik_Simmons@durbin.senate.gov)>  
**Sent:** Monday, August 1, 2022 4:12 PM  
**To:** Simmons, Maalik (Durbin) <[Maalik\\_Simmons@durbin.senate.gov](mailto:Maalik_Simmons@durbin.senate.gov)>  
**Subject:** Week 4: the Final Table

Good Afternoon,

Last week Senator Schumer filed cloture on the nomination of Wilson Hanes to be a Judge for the Eastern District of Virginia. At 5:30pm, the Senate will vote on the motion to invoke cloture on the Hanes nomination. If cloture is invoked, there would be up to 2 hours for debate prior to a vote on confirmation. If cloture is invoked, the confirmation vote will likely take place on Tuesday.

Please see Leader Schumer's remarks about the week's agenda.

**CES Floor Remarks**  
**August 1, 2022**

The Senate gavel in for what will be a consequential week for this chamber and for our country. Later today, we will vote on the nomination of Elizabeth Hanes to serve as a District Judge for the Eastern District of Virginia. If confirmed she will be the 75<sup>th</sup> judge that this Senate Majority has confirmed since the start of President Biden's term.

In the coming days the Senate will also finish its work passing the PACT Act, the largest expansion of veteran health care benefits in decades, and a piece of legislation that should sail through this chamber with overwhelming bipartisan support.

Over the past few days, the Capitol steps have been the site of something we should never see in this country: dozens of veterans, braving heat and heavy rain, protesting through the night demanding that the Senate take action on their health care benefits. They are there right now, as we speak. No veteran who has sacrificed for our country should ever have to resort to spending the night on the Capitol steps to secure their benefits, but sadly in this case they have.

It is unfortunate that our Republican colleagues chose to block quick passage of this bill last week, even though this is the exact same piece of legislation many of them supported in June, with one small technical fix.

In the coming days, we are going to give Senate Republicans another chance to do the right thing, to work with us so we can send this bill to the President's desk A-S-A-P.

Since 9/11, nearly three and a half million veterans have been exposed to toxic burn pits in the line of duty, leading to complications like cancer, lung disease, and other illnesses.

But instead of getting the care they need without delay, many veterans have had to hire lawyers and jump through hoops just to prove to the VA that they are truly sick. They have wasted years fighting the VA just to get the care they need, when they should have spent that time treating their illnesses. It's equal parts tragic and infuriating.

Our veterans have already given it their all to defend our nation from threats abroad; they shouldn't have to fight a second war here at home just to get the health care benefits they rightfully deserve.

These brave Americans sacrificed everything—they risked life and limb—and the very least we can do as a country is ensure they receive top care.

I urge both sides to work together to pass the PACT Act so we can send it to the President's desk ASAP.

This week, Senate Democrats will take action on a groundbreaking piece of legislation: the Inflation Reduction Act of 2022.

Over the coming days, both sides will continue conversations with the Parliamentarian in order to move forward with the bipartisan "Byrd Bath" process. Our timeline has not changed and I expect to bring this legislation to the Senate floor to begin voting this week.

Already, leading experts have confirmed that the Inflation reduction Act lives up to its name:

- The head of the Committee for a Responsible Federal Budget—by no means a liberal group—affirmed that “Almost every one of [this bill’s] policies, in and of itself, will fight inflation. And on net, the entire package most certainly will.”

- Former Treasury Secretary Larry Summers – recently the Republican Leader’s favorite economist said “this bill is fighting inflation” and that “this is disinflationary policy that’s also going to make the economy more efficient.”
- And Mark Zandi, Chief Economist at Moody’s—again, hardly a liberal authority, someone who actually served as an economic advisor to Senator McCain—writes that our bill will have a “material beneficial economic impact” and said that the Inflation Reduction Act “will push inflation lower.”

In short, M. President, the Inflation Reduction Act is going to be JUST what the doctor ordered for bringing costs down for American families. We are excited and eager to pass this bill through the Senate as soon as we can.

By a significant margin, our bill will also be the largest package on climate change ever passed by the US Congress. By our analysis this bill will cut greenhouse gas emissions by approximately 40% by 2030, and independent studies agree.

According to a new study by the nonpartisan group Energy Innovation, the Inflation Reduction Act could not only create at least 1.5 million new jobs by 2030, it also affirms that our bill will achieve approximately forty percent greenhouse gas reduction by the end of the decade.

Let me repeat that last part again: this independent analysis says that our bill, if enacted, could cut greenhouse gas emissions by approximately forty percent!

That is a very, very big deal. Without this bill, the US is on track to cut emissions only by about 25% by the end of the decade, far short of the president’s climate commitment.

But with this bill, we are going to put our country on track to meet the climate goals we need to preserve our planet for our children and grandchildren.

Now, cutting emissions is not just about protecting our planet’s health; it is about protecting our kids’ health too.

If we slash emissions, that means cleaner air for everyone, which in turn means fewer people will suffer health complications that arise from pollution.

It means less strain on our health care system.

It means that communities long exposed to harmful emissions can, quite literally, breathe easy at last.

-

In fact, the same study from Energy Innovation found that our bill could avoid as many as 3,900 premature deaths and 100,000 asthma attacks annually by 2030.

3,900 fewer premature deaths! 100,000 fewer asthma attacks! These are benchmarks every single one of us should aspire to, regardless of party.

Put simply, this legislation will save lives, create jobs and reduce costs.

Now, over the past few days, we've heard Republicans resort to the same timeworn attacks they use against virtually any Democratic policy.

They've sounded the alarms that this bill will raise taxes on American families, but here is the plain truth: this bill will NOT raise any taxes on families making under \$400,000 a year. Instead, it will close loopholes long exploited by the largest corporations that essentially give them lower tax rates than many nurses, firefighters, and teachers. You won't hear Republicans admit that, because they know that their tax policies are utterly toxic in the minds of the American people.

Republicans should have learned after 2017 that the American people don't trust them when it comes to taxes:

- They promised that their tax bill would be a "middle class miracle," and instead it became a boondoggle in favor of the ultra-rich.
- They promised their tax bill would unleash a tsunami of economic activity, but instead it led to record corporate stock buy backs.

So when Republicans talk about cutting taxes, what they really mean is cutting taxes for the richest of the rich.

Our bill, meanwhile, will close loopholes in our tax code and not touch ANYONE making under \$400,000 a year.

That, M President, is common sense.

At the end of the day, the American people want us to do a few straightforward things:

- they want us to lower the costs of daily expenses like health care
- they want us to lower energy costs and protect our planet for future generations,
- and they want us to make sure everyone plays by the same rules and that we close loopholes long exploited by powerful corporations.

That's what the Inflation Reduction Act will do, and soon Senate Democrats will take action to pass this bill and deliver on our promise to make better the lives of the American people.

# U.K. medicines tax forcing cheaper drugs off

BY HELEN COLLIS 01/17/2023 01:44 PM EST

Manufacturers of copycat versions of expensive medicines with expired patents argue that without the large profit margins enjoyed by B  
Images

LONDON — Medicines manufacturers are calling on the U.K. government to drop a new tax hike, warning of widespread market withdrawals.

One company is mulling closing all British operations after the tax rate for 2023 was set at 26.5 percent under a new government contract. This is on top of existing corporation tax.

Manufacturers of copycat versions of expensive medicines with expired patents argue that without the new tax cut, their U.K. operations are no longer viable.

Such medicines drive down the National Health Service medicines bill; [data from July shows](#) they provide

The warning comes as the U.K.'s NHS is on the brink of collapse from surging demand for winter care.

As health workers demand more pay and care providers call for greater investment, manufacturers of generic and patent medicines — warn that the NHS will lose out on billions of pounds in savings from their products.

A recent report commissioned by the British Generic Manufacturers Association found that the major manufacturers would downsize or end supplies and possibly also operations in the U.K.

“We have the largest pipeline of biosimilar medicines globally,” said Matthew Eddleston, commercial director of Sandoz U.K., which has five pipelines already in the U.K. But its pipeline of 20 biosimilars won’t be launched if this tax rate continues.

“We are looking at reducing the portfolio, reducing the products that are available to the U.K. And the loss of 30 jobs, Eddleston told POLITICO.

Sandoz, the generics and biosimilars arm of Novartis that is being divested, is cutting U.K. allocations. DiGangi Treweek, Sandoz U.K. Trench, country head and general manager of Sandoz U.K.

That’s down to a “perfect storm” of surging demand for medicines in Europe and elsewhere, and the loss of the competitive edge of biosimilars,” she told POLITICO. “The industry has to make rational decisions to allocate supply.

The current Voluntary Scheme for Branded Medicines Pricing and Access (VPAS) contract applies the current budget growth rate of 2 percent a year. The agreement between the U.K. government, NHS England, and the pharmaceutical industry aims to encourage uptake of innovation. This five-year deal finishes at the end of the year; a new deal is being negotiated.

From 2019 to 2022, the tax rate was 9.6 percent, 5.1 percent and 15 percent. The hike is due to increased spending on medicines in 2022, compared with just 3 percent growth in spending on generics and biosimilars, said DiGangi Treweek.

Meanwhile, manufacturers also fear that their concerns are also falling on deaf ears. Celltrion, Sandoz and others are in talks to resolve the issue.

Sandoz said letters to the Treasury, business and health departments requesting meetings had failed to date. The company declined “due to ongoing diary commitments”; the Treasury said in October the request was still being considered.

Only Michael Gove, Sandoz’s local MP in Surrey Heath, has agreed to meet the company at its Camberley headquarters.

Meanwhile, Celltrion met with the Department of Health and Social Care in December, but it was clear no deal was struck, Eddleston said. Now, Celltrion’s focus is on ensuring a new drug pricing contract, to take over from the current one, he said.

The company is pushing for the GBMA to be at the negotiating table for the next drug pricing contract, rather than the British Pharmaceutical Industry, which has historically represented all of the medicines industry.

A Department of Health and Social Care spokesperson said that companies are allowed to leave the scheme if they wish.

In addition, they said: “We are open to ideas about how the next scheme should operate, after the current one ends, to engage with industry to understand the impact on companies.”

Health Minister Will Quince will be holding a roundtable with industry to discuss the impact of VPAS on companies.

### **U.K. medicines tax forcing cheaper drugs off the market** [\(back\)](#)

By Helen Collis

LONDON — Medicines manufacturers are calling on the U.K. government to drop a new tax hike, warning it has rendered cheaper drugs loss-making and will lead to widespread market withdrawals.

One company is mulling closing all British operations after the tax rate for 2023 was set at 26.5 percent of branded medicines' sales for companies signed up to the government contract. This is on top of existing corporation tax.

Manufacturers of copycat versions of expensive medicines with expired patents argue that without the large profit margins enjoyed by Big Pharma, some of their U.K. operations are no longer viable.

Such medicines drive down the National Health Service medicines bill; [data from July shows](#) they provided £1.2 billion in savings over three years.

The warning comes as the U.K.'s NHS is on the brink of collapse from surging demand for winter care, huge pandemic backlogs and chronic understaffing.

As health workers demand more pay and care providers call for greater investment, manufacturers of generic and biosimilar medicines — cheaper copies of off-patent medicines — warn that the NHS will lose out on billions of pounds in savings from their products if the market is no longer viable for them.

A recent report commissioned by the British Generic Manufacturers Association found that the majority of generics and biosimilar companies affected by the tax rate would downsize or end supplies and possibly also operations in the U.K.

“We have the largest pipeline of biosimilar medicines globally,” said Matthew Eddleston, commercial and operations director at Celltrion Healthcare U.K., which has five pipelines already in the U.K. But its pipeline of 20 biosimilars won’t be launched if this tax rate continues, he warned.

“We are looking at reducing the portfolio, reducing the products that are available to the U.K. And the final piece would be withdrawal from the U.K.,” with the loss of 30 jobs, Eddleston told POLITICO.

Sandoz, the generics and biosimilars arm of Novartis that is being divested, is cutting U.K. allocations for “two major biosimilar products,” said Diane DiGangi Trench, country head and general manager of Sandoz U.K.

That’s down to a “perfect storm” of surging demand for medicines in Europe and elsewhere, and the loss-making scenario in the U.K. “There’s a limited supply overall of biosimilars,” she told POLITICO. “The industry has to make rational decisions to allocate supply to where we can make a reasonable level of profit.”

The current Voluntary Scheme for Branded Medicines Pricing and Access (VPAS) contract applies the tax to NHS spending over and above a capped medicines budget growth rate of 2 percent a year. The agreement between the U.K. government, NHS England, and the pharmaceutical industry is designed to control the NHS drugs bill and encourage uptake of innovation. This five-year deal finishes at the end of the year; a new contract will be negotiated this year.

From 2019 to 2022, the tax rate was 9.6 percent, 5.1 percent and 15 percent. The hike is due to increased spending on innovative branded medicines of 18 percent in 2022, compared with just 3 percent growth in spending on generics and biosimilars, said DiGangi Trench.

Meanwhile, manufacturers also fear that their concerns are also falling on deaf ears. Celltrion, Sandoz and the BGMA have written to the government asking for talks to resolve the issue.

Sandoz said letters to the Treasury, business and health departments requesting meetings had failed to deliver results. Business Secretary Grant Shapps’ office declined “due to ongoing diary commitments”; the Treasury said in October the request was still being considered; and the health department has not replied.

Only Michael Gove, Sandoz's local MP in Surrey Heath, has agreed to meet the company at its Camberley office.

Meanwhile, Celltrion met with the Department of Health and Social Care in December, but it was clear that the tax rate would not be changed for this year, Eddleston said. Now, Celltrion's focus is on ensuring a new drug pricing contract, to take over from next year, does not penalize competitive and lower-cost drugs, he said.

The company is pushing for the BGMA to be at the negotiating table for the next drug pricing contract, alongside the branded pharma lobby the Association of British Pharmaceutical Industry, which has historically represented all of the medicines industry.

A Department of Health and Social Care spokesperson said that companies are allowed to leave the scheme if they wish.

In addition, they said: "We are open to ideas about how the next scheme should operate, after the current agreement runs out at the end of 2023, and will continue to engage with industry to understand the impact on companies."

Health Minister Will Quince will be holding a roundtable with industry to discuss the impact of VPAS on the U.K. industry.

### **Moderna reports 83.7 percent efficacy for RSV vaccine in older adults [\(back\)](#)**

By Katherine Ellen Foley

Moderna announced Tuesday that an early analysis of a late-stage clinical trial for its respiratory syncytial virus vaccine in older adults met its primary endpoint, with 83.7 percent efficacy against RSV lower respiratory tract cases presenting with at least two symptoms.

"Today's results represent an important step forward in preventing lower respiratory disease due to RSV in adults 60 years of age and older," Stéphane Bancel, Moderna's CEO, said in a statement.

Moderna's Phase III trial for its RSV vaccine candidate is ongoing with no major safety concerns from the vaccine, the company said. It includes about 37,000 adults over 60 in 22 countries.

Researchers conducted a preliminary analysis of the vaccine candidate's protection after 64 people developed RSV with at least two symptoms. There were 55 cases in the placebo group compared to nine in the vaccinated group. The vaccine also appeared to have an 82.4 percent efficacy against RSV with three or more symptoms.

**Background:** RSV is a mild virus in healthy adults, but can cause severe illness in older adults and babies.

**What's next:** The company said it would file for FDA approval in the first half of this year and that it will publish complete data from its Phase III trial in a scientific journal.

## **Medicare, patient advocates at odds over coverage for an expensive new Alzheimer's therapy ([back](#))**

By Katherine Ellen Foley

For the second time in two years, government officials and public health advocates are grappling with how to make a newly approved Alzheimer's drug affordable for millions of desperate patients.

The FDA approved a new Alzheimer's treatment earlier this month under its accelerated approval pathway, but a Medicare coverage decision means that of the millions of adults potentially eligible for the novel treatment, only those who can afford the \$26,500 annual price tag will be able to access it.

Unless or until the Centers for Medicare and Medicaid Services changes its coverage determination that only patients in trials can get the drug paid for by Medicare, the treatment may remain out of reach financially for many Americans. Eisai and Biogen, developers of the drug, have no plans for further trials. Meanwhile, the Alzheimer's Association, the powerful advocacy group, is in the process of a full-court press to meet with every lawmaker in the House and Senate, urging them to pressure CMS to change its coverage decision.

"There is rapidly growing pressure on CMS to reconsider their decision, even with the evidence available now at the time of the accelerated approval," said Sean Tunis, a senior fellow at the Center for the Evaluation of Value and Risk in Health at Tufts Medical Center.

A host of smaller advocacy groups argue against the drug's widespread distribution because trial data shows that its benefits are at best modest for early-stage patients while the risks of severe side effects, like brain swelling and bleeding, are troubling. But those findings don't deter patients willing to pay almost anything for any hope of relief from the inevitable and devastating cognitive decline caused by the disease.

Late last year, the Alzheimer's Association formally asked CMS to reconsider its coverage of these drugs. The agency said it is working on a response, though it's unclear when it will issue a final decision.

"CMS is very concerned about the growing and devastating impacts of Alzheimer's disease and is committed to making effective treatments available to people with Medicare," said a CMS spokesperson in a statement to POLITICO. "[The agency] encourages any stakeholder to send relevant data to assist in a reconsideration of the current coverage."

CMS' decision to limit coverage of Alzheimer's therapies like Leqembi, an antibody that targets amyloid proteins thought to cause progressive neurodegeneration over time, follows the FDA's contentious approval of Aduhelm, a similar drug from Biogen and Eisai, in 2021. The agency elected to cover Aduhelm, which also received accelerated approval from the FDA, for patients enrolled in a randomized clinical trial designed to generate efficacy and safety data. CMS also said that it would cover anti-amyloid antibodies that received traditional approval for patients enrolled in a patient registry.

The coverage decision, which was met with pushback from patient advocacy groups, reflected CMS' assessment that Aduhelm's conflicting clinical trial data didn't demonstrate that the drug was "reasonable and necessary" — the criteria the agency uses to determine whether it would cover an intervention for beneficiaries.

Biogen is conducting a Phase IV randomized trial for Aduhelm that is expected to wrap up in 2026. But the drug's limited coverage played a role in its bust: despite being the first new Alzheimer's drug in nearly two decades, sales hit only \$3 million after the drug's first year on the market, and Biogen shut down its marketing programs for the drug the following year.

The FDA granted Leqembi accelerated approval based on two clinical studies. Eisai and Biogen published the results of a third late last year that showed the drug modestly slowed disease progression while clearing amyloid proteins from the brain — though that came with the risk of side effects, including brain swelling and bleeding. The companies have applied for Leqembi's traditional approval with the updated data, but don't plan to further study the drug. Nor does Eli Lilly, the maker of a similar Alzheimer's drug candidate the FDA is expected to make a decision on next month.

"Americans living with Alzheimer's disease are entitled to FDA-approved therapies, just as are people with conditions like cancer, heart disease and HIV or AIDS," said Robert Egge, the chief public policy officer of the Alzheimer's Association. "People are losing the opportunity, they're losing days, weeks, months and memories. They're losing time, and it is unacceptable."

Advocacy groups are meeting with CMS, HHS and White House officials to push for a change in coverage. Eisai is also meeting with Medicare representatives. "Eisai is currently working with CMS to determine the most expeditious pathway to Medicare coverage," Christopher Vancheri, a company spokesperson, wrote in an email to POLITICO.

But not all patient groups are convinced that expanding Medicare coverage of anti-amyloid therapies is the right move for patients.

Diana Zuckerman, president of non-profit health policy research group National Center for Health Research, said the data behind Leqembi doesn't show the drug meaningfully slows progression of the disease. In an 18-month Phase III trial, patients who received Leqembi declined an average of 1.21 points on an 18-point scale measuring cognitive health; those who received the placebo declined 1.66 percent.

"These small increases can be statistically significant, but they don't mean anything," Zuckerman said. "People vary day to day."

Zuckerman also noted that if CMS elected to cover Leqembi without restrictions, Medicare would incur massive costs. “If it doesn't bankrupt Medicare, it could once again result in substantial [Medicare] premium increases,” she said.

The National Center for Health Research and 12 other advocacy groups wrote to CMS administrator Chiquita Brooks-LaSure on Jan. 6, the day Leqembi received accelerated approval, urging the agency to keep its limited coverage of the drug. “We understand that CMS is under pressure from industry-backed groups and providers to reconsider this policy and instead provide coverage based on preliminary results from a clinical trial regardless of the quality of the evidence regarding safety or clinically meaningful benefits,” they wrote.

“We will continue to expeditiously review the data on these products as they become available and are committed to timely access to treatments ... that improve clinically meaningful outcomes,” LaSure said in a statement issued later that day.

The same Leqembi Phase III trial showed that roughly 14 percent of patients taking the drug experienced side effects, which included brain bleeding or swelling, compared to 11 percent who received the placebo. Though most of these side effects were mild, five patients required medical attention. Additionally, three patients in an extension of the Phase III trial who received the drug passed away — though it's not clear if Leqembi was the cause of death.

Alzheimer's patients are eager to be treated with Leqembi given the dearth of options for the fatal disease. “Something that significantly slows down the course of the disease is extraordinarily welcome,” said George Vradenburg, the chairman and co-founder of UsAgainstAlzheimers. “The patient community is pretty excited about this and recognizes this is not a cure.”

And there is optimism that CMS could reverse its initial coverage decision. “I think Medicare will cover it,” said R. Scott Turner, the director of the Memory Disorders Program at Georgetown University Medical Center. “I don't see how they could decide not to.”

## **GAO questions HHS oversight of ‘gain-of-function’ research ([back](#))**

By Ben Leonard

The watchdog arm of Congress on Wednesday called on the Department of Health and Human Services to better oversee its funding of research into “enhanced potential pandemic pathogens,” adding fuel to a contentious debate in Washington over so-called gain-of-function research.

That research, in which scientists sometimes try to make viruses more dangerous to learn how to control them, has been a hot-button issue during the pandemic. Some scientists have said that HHS-funded research at China's Wuhan Institute of Virology could have led to a lab leak that caused the Covid-19 pandemic.

The Chinese government denies that, and the Biden administration issued an unclassified report in the summer of 2021 finding that the origins of the virus are inconclusive. The intelligence community is split on whether it came from a lab accident or spread to humans via an animal host. China hasn't fully cooperated with efforts to investigate.

Republicans in the House have promised to hold oversight hearings examining that question this year and the watchdog report's findings may fuel GOP furor over the research.

In its report, the Government Accountability Office, which helps Congress oversee the executive branch, raised concerns about HHS oversight of the research, calling the department out for a lack of transparency about its monitoring of its grantees, and for not providing sufficient "assurance" that it flags pertinent research for review.

Agency regulations require extra guardrails for proposed research involving modified pathogens that have pandemic potential, sometimes referred to as "gain-of-function" research.

**The details:** HHS is supposed to review research grant proposals that are "reasonably anticipated" to involve enhanced pathogens that could cause a pandemic. But, as the GAO noted, there isn't a standard for what "reasonably anticipated" means. The lack of a definition leaves the door open to subjectivity, the GAO said.

"Consequently, HHS cannot ensure that funding agencies are referring all proposed research involving enhanced potential pandemic pathogens for departmental review," the report said.

The watchdog also said that making public more information about the review process would boost confidence in the process' effectiveness.

House Energy and Commerce Chair Cathy McMorris Rodgers (R-Wash.) said in a statement that the GAO report "affirms many of my concerns" with HHS grantmaking and oversight.

"Whether or not the U.S. government played any role — directly or indirectly — in the creation of COVID-19, our committee's investigation is uncovering a host of issues that require more attention," she added. "We will continue pushing for more accountability and oversight to start rebuilding public trust in these research agencies."

And House Oversight and Accountability Chair James Comer (R-Ky.) told POLITICO in a statement that his panel will conduct "robust oversight" of HHS research funding. "Congress and the American people need to know how taxpayer dollars are being used on gain-of-function research, the decision-making process for approval, and how [the National Institutes of Health] conducts oversight."

**CDC program questioned:** The GAO also raised concerns about how the CDC keeps its list of high-risk pathogens in the agency's Division of Select Agents and Toxins program. Pathogens on that list get extra CDC scrutiny, but adding them to the list also could slow the public health response to an emerging disease by adding new reporting and inspection requirements for diagnostic and medical countermeasures.

“CDC officials told us they have had discussions with HHS leadership concerning needs and challenges regarding the DSAT program, including the need for proposed legislative solutions. However, HHS leadership did not provide further details, leaving it unclear if HHS is considering possible changes to the DSAT program,” the report said.

**The GAO made three recommendations:**

— HHS should develop standards to determine when it can be “reasonably anticipated” that a pathogen could cause a pandemic.

— HHS should make public more “non-sensitive” information on the review process for research on dangerous pathogens.

— CDC should “assess and document the risk posed by the limitations of the existing DSAT exemptions for public health emergencies and seek legislative authority as needed.”

**HHS’ response:** HHS didn’t agree or disagree with the first two recommendations and agreed with the third. The department didn’t immediately respond to a request for comment.

## What is CQ Budget?

Did you know that CQ Budget is more than just this valuable newsletter? Take a look at what else CQ Budget offers [in this quick video](#).

### FULL BRIEFING

#### 1. Risk to military

A congressional stalemate over lifting the debt ceiling could have serious consequences for the U.S. military even if a breach never occurs, defense industry analysts and lawmakers are warning.

Swirling economic uncertainty makes it difficult for the Pentagon and defense industry to execute their long-term plans, and questions over military pay and benefits could discourage people from joining the military amid an ongoing

recruiting crisis, advocates say. More broadly, lawmakers argue that risking a never-before-seen breach would project weakness to adversaries like Russia and China as the U.S. races to aid Ukraine in its war against Russia and deter Chinese aggression.

The U.S. could miss payments by August if Congress doesn't lift the debt ceiling, according to economists at Moody's Analytics, though the Treasury Department currently can't guarantee it will be able to pay all the nation's bills beyond early June. Republicans are seeking fiscal policy changes to pair with a debt limit increase, but Democrats say they won't bargain on such conditions and are insisting on a clean bill.

Negotiations have progressed little since Republicans took over the House majority in January. Earlier this month, Speaker Kevin McCarthy, R-Calif., and President Joe Biden exchanged letters doubling down on their positions.

But defense-minded lawmakers are hoping that national security concerns will jumpstart talks by highlighting an issue that generally gets bipartisan support. And a looming debt limit crisis has also caused anxiety within a defense industry that is already struggling to show it can meet the demands of the war in Ukraine and competition with China. Caroline Coudriet has the full story.

## **2. "Defunding" debate**

Republicans, who have accused Democrats of trying to defund the police, are now waging their own defunding campaigns.

Angered by the indictment of former President Donald Trump, some key House Republicans joined Trump in calling for defunding the Justice Department and the FBI. And Democrats smell blood.

Senate Majority Leader Charles E. Schumer, D-N.Y., said he will bring a resolution to the floor next week condemning the GOP defunding push and praising federal law enforcement. "The former president and his allies in Congress must not subjugate justice and public safety because of their own personal grievances," Schumer wrote in a letter to colleagues Tuesday announcing the planned resolution.

Trump began the GOP call for a defunding effort earlier this month with an all-caps post reacting to his indictment on 34 felony counts stemming from hush money he paid to two women who alleged sexual affairs. House Judiciary Chairman Jim Jordan, R-Ohio, echoed that call, telling Fox News that Congress should try to defund federal agencies that he thinks are interfering with elections.

Story Photo

Jordan, at center (Tom Williams/CQ Roll Call file photo)

"We control the power of the purse, and that's, we're gonna have to look at the appropriations process and limit funds going to some of these agencies, particularly the ones who are engaging in the most egregious behavior," Jordan said, as Michael Macagnone reports [here](#).

While a defunding push will go nowhere in the Democratic-controlled Senate - if it ever makes headway in the GOP-controlled House, where it's not clear how much support the effort has even among Republicans -- Democrats sense a political opening. Many are eager to fight back after getting bashed on the campaign trail on allegations of trying to defund local police that most Democratic lawmakers never supported.

Schumer's resolution could force Republican senators to choose between standing by Trump or backing federal law enforcement. And the House Majority PAC, a super PAC aligned with House Democratic leadership, is already using the issue to target Republicans in politically vulnerable districts. Ryan Tarinelli has more [here](#).

### **3. Carbon border tax eyed**

Lawmakers from both parties have expressed a budding interest in a border tax on carbon-intensive goods, but for different reasons.

In the Senate, Louisiana Republican Bill Cassidy is writing a preliminary bill, expected in a few months, to place a fee on foreign products brought into the country that are made with more pollution than similar American products.

Republicans Kevin Cramer of North Dakota and Lindsey Graham of South Carolina and Democrats Sheldon Whitehouse of Rhode Island and Chris

Coons of Delaware are broadly supportive of such a concept, generally called a carbon border adjustment mechanism.

And Rep. Scott Peters, D-Calif., is working on his proposal and conferring with colleagues, said spokesman Paul Iskajyan. Peters and Coons introduced legislation last Congress to implement a tax on a range of imported commodities, specifically steel, aluminum, cement, iron and the three fossil fuels: coal, oil and gas.

The uptick in congressional interest comes as the European Union, the world's largest trading bloc, is on track to implement the first phase of a carbon border scheme in October. The policy will impose fees on certain imported goods, including iron and steel, cement, fertilizer, aluminum and electricity.

Greg Bertelsen, CEO of the Climate Leadership Council, an advocacy group that supports carbon pricing, said the origins of Republicans' interest in carbon border adjustment tools typically stems from economic or trade reasons, while the climate upside is secondary. For Democrats in Congress, it's often the reverse. Benjamin J. Hulac has the full story.

#### **4. Tax credits for Japanese cars**

The U.S. struck a trade deal with Japan that aims to allow Japanese cars to qualify for a new electric vehicle tax credit and push China out of their critical mineral supply chains.

But it's not clear if Japanese automakers can shake off China in time to meet the increasingly strict sourcing rules.

And top trade and tax leaders in Congress, which passed the subsidy in last year's climate spending package (PL 117-169) with the goal of loosening China's control of electric vehicle critical minerals while shifting the supply chain to U.S. and friendly countries, argue the agreement has no teeth.

"It's clear this agreement is one of convenience," Ways and Means ranking member Richard E. Neal, D-Mass., and Senate Finance Chair Ron Wyden, D-Ore., said in a statement. "Even among allies, the United States should only enter into agreements that account for the realities of an industry, learn from past agreements, and raise standards."

Congress has been critical of the Biden administration's implementation of electric vehicle subsidy sourcing rules, since it can take years to build out aspects of mineral supply chains. Sen. Joe Manchin III, D-W.Va., who reserved support for the package unless it added new sourcing rules to favor the U.S. and its allies, has especially pressed Treasury to adhere to a stricter interpretation of the law that brings more manufacturing jobs stateside. Valerie Yurk has the full story.

## **5. IRS spending plan**

The IRS unveiled a 10-year plan for going after upper-income households and bigger businesses that dodge taxes while also becoming a more nimble agency with top-tier customer service.

The agency mapped out how it plans to use \$80 billion that Democrats passed in August (PL 117-169) to pad its coffers after years of stagnant funding. It devoted the bulk of money to bolstering enforcement of the tax code.

The long-awaited plan to beef up IRS funding, which spans 150 pages, has been a partisan flashpoint on Capitol Hill and in last fall's midterm elections.

To Democrats, the plan is a salve for a battered tax agency that has seen its funding and staffing decline by roughly a fifth since fiscal 2010. What's more, they say, cracking down on wealthy tax cheats will help reduce federal deficits.

But Republicans have warned the plan would weaponize the IRS with an "army" of new auditors that would inevitably lead to increased enforcement against struggling middle-class families -- a claim denied by the Biden administration. Laura Weiss has

**IRS hearing:** IRS Commissioner Danny Werfel will defend his agency's fiscal 2024 budget at a Senate Finance Committee hearing on April 19, with the new \$80 billion spending plan likely to become a chief focus. The tax agency emphasized in its plan that its goals for the \$80 billion rely on annual funding coming in at the fiscal 2022 enacted level plus growth for inflation. The IRS received \$12.6 billion in fiscal 2022 appropriations, then saw a decrease in fiscal 2023.

#### **BUDGET BRIEFS**

**Deficit tally:** The budget deficit for the first six months of fiscal 2023 was nearly \$1.1 trillion, or \$430 billion higher than the prior year's first-half total, the Congressional Budget Office reported. The new figure for the six months ended in March is consistent with the CBO's full-year estimate of a \$1.4 trillion shortfall between spending and revenue, the agency said, up from roughly \$1.3 trillion in fiscal 2022. April tax receipts typically mean a surplus in that month; combined with higher cash flows in other months, the full-year deficit usually isn't double that of the first-half tally.

**EPA targeted:** Six conservative House Republicans, led by Rep. Chip Roy of Texas, sent a letter to top appropriators seeking a 36 percent cut to the EPA's budget in the coming fiscal year, amounting to a \$3.6 billion reduction. They said the EPA is a "prime example" of a "federal bureaucracy that is weaponized against American freedom and economic growth."

**Wexton's diagnosis:** Rep. Jennifer Wexton, D-Va., announced Tuesday that she has been diagnosed with Parkinson's disease, an illness that affects the nervous system. The 54-year-old House Appropriations Committee member said the disease has primarily affected her speech, manner of walking and balance, but she plans to remain in Congress as she undergoes treatment, as Aidan Quigley reports.

**Access to food stamps:** Sen. Edward J. Markey, D-Mass., sent a letter Tuesday to Agriculture Secretary Tom Vilsack and Social Security Administration acting Commissioner Kilolo Kijakazi commending their efforts to strengthen their partnership to ensure eligible Social Security recipients can access Supplemental Nutrition Assistance Program benefits, or food stamps. But Markey and 11 other Democratic senators who signed onto the letter also expressed concerns about ongoing challenges for recipients to obtain those benefits.

**Staff departure:** Christopher Knight, formerly the deputy communications director to Senate Appropriations ranking member Susan Collins, R-Maine, has taken a new role as the communications director for the American Trucking Associations. The ATA is the largest national trade association for the trucking industry.

**Economic address:** Speaker Kevin McCarthy, R-Calif., announced Tuesday that he will deliver a speech on the economy Monday at the New York Stock

Exchange. McCarthy's speech comes amid a stalemate between the parties over raising the debt limit.

**Hospital aid questioned:** House Oversight Chairman James R. Comer, R-Ky., and Rep. Nick Langworthy, R-N.Y., announced an investigation Tuesday into the Department of Health and Human Services' use of pandemic funding provided in three pieces of legislation (PL 116-136; PL 116-139 and PL 116-260) to keep hospitals and health care providers open. Comer and Langworthy asked HHS Secretary Xavier Becerra for more information and expressed concerns about profitable hospitals receiving funding.

**Online tax reporting:** House Ways and Means Chairman Jason Smith, R-Mo., and Oversight Subcommittee Chairman David Schweikert, R-Ariz., sent a letter to the Government Accountability Office requesting a study on the impact of a lower \$600 threshold triggering tax reporting for online transactions on sites like eBay, Etsy, Uber and Airbnb, which is set to take effect this year. They seek information on how effective the IRS is at leveraging information returns it currently collects for better tax compliance, and on challenges that taxpayers, online platforms and the IRS face in collecting information for the expanded tax reporting requirements.

**New markets tax credit:** House Ways and Means Tax Subcommittee Chair Mike Kelly, R-Pa., and panel member Claudia Tenney, R-N.Y., led introduction of a bipartisan bill with Democrats including Terri A. Sewell of Alabama and Danny K. Davis of Illinois to make the new markets tax credit permanent and index program funding to inflation. The program offers a tax break for investors that finance projects in lower-income communities, and it currently expires after 2025.

**Health savings accounts:** Sen. Marco Rubio, R-Fla., and Rep. Jake LaTurner, R-Kan., led introduction of legislation to expand health savings accounts and flexible savings accounts, which allow funds to be tucked away tax-free to pay medical expenses. Groups that lobbied on the bill in the past include the Consumer Healthcare Products Association, which represents makers of over-the-counter drugs, and America's Health Insurance Plans Inc., a trade association for health insurance companies.

*Aidan Quigley, Laura Weiss and your Budget Tracker compiled this report.*

Briefing

CQ Morning

By Megan Mineiro, CQ

*Good morning. Here's your CQ Morning Briefing for Wednesday, June 1. With Congress in recess, we'll next publish Monday, June 6.*

**Listen up:** You can catch this morning's top stories on the go. Listen to the CQ Morning Briefing podcast [here](#) and subscribe on [Apple](#) | [Spotify](#) | [Amazon](#).

#### TOPLINES

1. • **Gun votes.** A House panel holds a rare recess markup on a slate of gun control proposals.
2. • **Stuck subpoenas.** Some Jan. 6 subpoenas may not be fully enforced before a series of public hearings this month.
3. • **On the radar.** House Republicans have a new bill that would make Supreme Court leaks a federal crime punishable by time behind bars.

**Labels are needed and the EPA keeps them uniform.**

Through federal preemption, the Environmental Protection Agency (EPA) helps keep millions of Americans safe by setting standards and creating uniform labels and packaging for pesticides. In addition, EPA scientists help protect consumers by reviewing data on pesticides in accordance with the agency's high standards. [Learn more](#)

## **SCHEDULES**

**White House:** Biden will participate in the Coast Guard change-of-command ceremony. In the afternoon, he will meet virtually with infant formula manufacturers to discuss accelerating production and importation of formula.

**House and Senate:** Not in session. Both hold pro forma sessions Friday.

**Committees:** Senate Indian Affairs has a field hearing led by Sen. Brian Schatz, D-Hawaii, on funding and access to innovation programs for Native Hawaiians (*4:30 p.m. EST, Honolulu*). Check CQ Schedules for up-to-date info on committee meetings.

## **FULL BRIEFING**

### **1. House panel to mark up gun control proposals**

### Story Photo

Demonstrators attend a rally to demand the Senate take action on gun safety. (Tom Williams/CQ Roll Call)

The House Judiciary Committee will hold a rare recess markup Wednesday (*10 a.m., 2141 Rayburn*) in what will be the first legislative action on gun control since the mass shooting at an elementary school in Uvalde, Texas.

But the suite of proposals that Democrats hope to advance faces an uncertain future in the 50-50 Senate, where they would have to gain support from at least 10 Republicans to overcome a filibuster, Michael Macagnone reports.

A panel vote would tee up potential House floor action when lawmakers return next week, a spokesman for the committee said.

The measure includes proposals that would raise to 21 the eligible age to purchase some semi-automatic rifles, establish a federal ban on new high-capacity magazines, and create a new federal firearms offense for gun trafficking and straw purchases, among other proposals. Read the full story [here](#).

President Joe Biden told reporters Tuesday he plans to "meet with the Congress on guns," but did not indicate support for any specific legislative proposal, or when such a meeting would take place.

Rep. Carolyn B. Maloney, D-N.Y., chair of the House Oversight and Reform Committee, also plans to hold a hearing on gun violence on June 8. That panel has requested information from five gun manufacturers on their methods for manufacturing, marketing and selling certain firearms.

## **2. Subpoenas may go unanswered ahead of Jan. 6 hearings**

The House select committee investigating the Jan. 6, 2021, attack on the Capitol may not be able to enforce all its subpoenas before a series of public hearings expected to begin next week.

The committee intends to showcase what it uncovered in months of work on the events surrounding the attack, such as the more than 1,000 interviews it has conducted and thousands of documents it received from even recalcitrant witnesses.

Yet the plodding pace at which committees can enforce congressional oversight means some major players and key records remain out of reach. That appears to include testimony from House Republican Leader Kevin

McCarthy of California and four other Republicans who received subpoenas nearly three weeks ago.

The committee has spent much of the last year fighting out more than a dozen court cases and seeking contempt of Congress charges to try to add testimony or documents to a broad investigation of the attack.

But experts say any effort to use the court system to force testimony may drag on after the committee's planned public airing of findings. Michael Macagnone has the full story.

#### **ON THE RADAR: REPUBLICANS ISSUE BILL TO MAKE SCOTUS LEAKS A CRIME**

Story Photo

(Tom Williams/CQ Roll Call)

**Leak case:** House Republicans criticizing the leak of a Supreme Court draft opinion that would overturn Roe v. Wade earlier this month unveiled legislation to make such an unauthorized release a federal crime.

The draft bill, out Tuesday, would make the leaking of "any confidential information" punishable by up to five years in prison.

It defines such information as internal notes, communications between justices, a draft opinion, a final opinion prior to its public release, and justices' personal information not publicly available -- but leaves the door open for a broader definition by empowering the chief justice to designate additional information as confidential.

It's led by GOP Conference Vice Chairman Mike Johnson, R-La., with 12 Republican co-sponsors including the conference chair, Elise Stefanik, R-N.Y. "This bill is a commonsense response to a horrible situation to ensure it never happens again," Johnson said in a press release.

**Section 232 tariffs:** The White House issued separate proclamations announcing the June 1 effective date for a March agreement the U.S. and the United Kingdom reached that converts Section 232 tariffs on U.K. steel and aluminum to duty-free quotas as long as the volumes do not exceed preset levels.

**Subject:** ASL Day Ahead - September 23rd, 2022

**Date:** 2022/09/23 11:07:51

**Priority:** Normal

**Type:** Note

#### Upcoming Secretary Engagement

- **September 28 (2-5PM): White House Conference on Hunger, Nutrition & Health** Moderated Q&A with Senator Stabenow & Chairwoman DeLauro
  - Topic: Hunger, Nutrition & Health -
  - Memos: Leslie putting together due tomorrow 9/23
  - Members: Senators Booker, Braun and Congressman McGovern (additional in event memo)
  - Staffing: TBD
- **TBD: Call with Congressman Lloyd Doggett**
  - Topic: CICP
  - Memos: TBD
  - Staffing: Rose

#### Upcoming HHS Principal Engagement with Members of Congress

- N/A

#### Upcoming Secretary Travel

- N/A

#### Upcoming HHS Principal Travel

- **Tuesday, September 29<sup>th</sup>:** Deputy Secretary Travel to Atlanta, GA
  - Invitations will be sent to GA Senators, Reps. Johnson, Williams

### Upcoming Hearings

- N/A

### Nominations Updates

- Roselyn Tso confirmed as IHS Director!

### This Week's Policy Announcements

- **HRSA (Friday):** HRSA announces awards of more than \$104 million across three Rural Community Opioid Response Programs (RCORP), part of HRSA's RCORP initiative to address the barriers to treatment for substance use disorder, including opioid use disorder, in rural communities.
  - ASL Role: HRSA OL
- **CDC (Friday):** CDC and Kaiser Health authors publish a study in *Academic Pediatrics*: Association Between Aluminum Exposure from Vaccines Before Age 24 Months and Persistent Asthma at Age 24-59 Months. Summary: In a large observational study, a positive association was found between vaccine related aluminum exposure and persistent asthma.
  - ASL Role: CDC OL
- **WH/CDC (Friday):** Twitter Spaces with Dr. Daskalakis and Dr. Mena from the CDC to talk about monkeypox
  - ASL Role: None, FYI only

### Today's Briefings

- **ASPR (Friday, September 23rd)** Briefing with staff of Rep. Harris on SNS Contracting
  - ASL Staff: Kris
- **ACF (Friday, September 23rd):** House Committee on Education & Labor SRAE TPP Briefing
  - ASL Staff: Jonathan

**Healthcare-Only Reconciliation Package.**

---

that the White House called Monday "for senators to move forward with a slimmed-down, health care-only reconciliation bill on the cusp of beating the pharmaceutical industry." On Friday, President Biden "told senators to move forward with a health care bill" but "struck a blow to his agenda over its tax and climate provisions, which Biden said he will address through executive action." Biden's statement just recently, if the Senate doesn't act on that, and doesn't take action on climate, he has a contingency plan: "I'm going to make sure that climate change in a way that's going to be effective." However, [NBC Nightly News Video](#) (7/18, 6:35 p.m.) says "executive action...climate activists believe without Congress acting to speed up wind and solar installations and electric vehicle charging stations."

MSNBC's (7/18, 6:35 p.m.) says "most but not all Senate Democrats" are "no longer betting on a climate and tax deal" with Manchin and "are ready to move on and accept what they know is feasible: party-line legislation lowering prescription drug costs and health care costs." "Senate Democrats" who "said it's time for the caucus to cut its losses after months of negotiation with their elusive centrist senator." "Senate Democrats criticized and blamed Manchin for abandoning talks with Senate Majority Leader Chuck Schumer that could have passed a bill." Sen. Martin Heinrich (D-NM) "is openly calling for the revocation of his energy committee chairmanship. Most other Democrats are silent." "Manchin can get."

MSNBC's (7/18, 6:35 p.m.) says Manchin's decision to oppose the tax and climate provisions "presents a dramatic but not necessarily fatal setback for a global climate catastrophe." Manchin "appeared to leave a sliver of hope for passing climate legislation this year, but the provisions he said he'll support are, according to nonpartisan climate scientists and policy analysts, inadequate to avert a global climate catastrophe."

MSNBC's (7/18, 6:35 p.m.) says even if Democrats could win Manchin's support, the Senate's "arcane budget rules threaten" their "plans to introduce a bill before November's midterm elections." Manchin "said he could support a broader tax and spending bill in September, but the late-night votes and other procedures required to push the legislation through." Schumer "is moving forward on the Medicare bill, but in the health-care bill, options – especially for tax legislation – get more limited."

**Further Limit Democrats' Bill.** Meanwhile, a separate report from [Politico](#) (7/18, Emma, Scholtes, 6.73M) says Senate Republicans "are in a bid to eject more items from the ever-slimmer package Democrats once called Build Back Better." While the report says "it's a lot quicker and less painful for the majority party now that Manchin has sworn off tax hikes," even "the central piece of the bill, lowering drug prices – is at risk of dwindling further under the Republican onslaught."

## Of Biden's Term.

MSNBC's (7/18, 6:35 p.m.) reports, "Anthony S. Fauci, the nation's preeminent infectious-diseases expert who has served as the face of the White House since the start of President Biden's term after more than 50 years in government, he confirmed Monday." He said, "By the time I'm 80, I want to see the president for me to step down from this position."

MSNBC's (7/18, 6:35 p.m.) reports, "Even with the added clarity about the possible timing of his retirement, January 2025 is a long way off." "Fauci's friends are urging him to step down before January 2023, when Republicans may well control one or both houses of Congress." Several "of Dr. Fauci's friends" "said he is not worried about any investigation, noting that Republicans, who have accused him of misleading the public about whether he is still working."

MSNBC's (7/18, 6:35 p.m.) reports that when Fauci was asked on CNN's "At This Hour" if COVID-19 "impacted his thoughts to retire he said, "I'm at a rather advanced age. ... I have the energy and passion to continue to want to pursue other aspects of my life."

---

Fauci, 81, was appointed director of the National Institute of Allergy and Infectious Diseases in 1984, and has led research since. Later, Fauci "was thrust even more into the spotlight at the height of the coronavirus pandemic under then-President Trump." Reports, "Fauci played a key role in Trump's news briefings and on political TV shows during the early part of the pandemic, characterized as 'moving the goalposts' in terms of ending pandemic restrictions like lockdowns, mandatory masking and school closures." However, "after Biden was elected president in 2020, he appointed Fauci as his chief medical advisor." (7/18, O'Connell, 2.1M) reports, "Fauci said that he feels like he's established a good system at NIAID to facilitate a smooth transition to Biden's administration." (7/18, O'Connell, 2.1M, O'Connell, 6.73M), Fauci "spoke of his legacy, the hard truths about the country's pandemic response and his

Post (7/18, 1.26M), and the Financial Times (7/18, Stacey, Subscription Publication, 1.48M).

---

### **Extending South Carolina Children Health Insurance.**

(7/18, Corwin, 299K) reports, "A federal moratorium on booting people off Medicaid has extended health insurance for millions of South Carolinians." The article adds, "US Secretary Xavier Becerra extended the Public Health Emergency declaration for another 90 days." The article adds, "In 2020, states were essentially offered a deal: They could receive a 6.2 percent increase in Medicaid funding from the federal government in exchange for maintaining Medicaid coverage while the Public Health Emergency was in effect."

### **Ensuring Methotrexate Access Concerns Following Overturning Of Roe.**

At so far, methotrexate "prescribing issues affecting patients with arthritis do not appear to be affecting patients with rheumatoid conditions have reported that they can no longer get their prescriptions" for methotrexate filled following the Supreme Court's decision. Health Services Secretary Xavier Becerra said, "We are committed to ensuring that everyone can access health care, free of financial barriers, and other types of care."

### **Abortion Advocates Peddling "Misinformation."**

Health and vice president of legal strategy Ryan Bangert writes for The Hill (7/18, 5.69M), "Abortion advocates have long claimed that the Supreme Court's decision is a 'basic and essential part of health care.'" Such "statements, which ignore the uniquely deadly procedure, doubly qualify as 'misinformation' under the abortion advocates' capacious standard."

---

### **Formula Shortage, Market Research Firm Finds.**

(7/18, 1.2M) reports, "The ongoing shortage of baby formula across the United States has become more acute in recent weeks, according to a new report from market research firm IRI." The report found "28.3% of powdered baby formula produced in the United States is now in shortage across the world over the past two months."

more than the 23.7% reported out of stock for the week ending May 22, when the shortage dominated headlines.”  
Reasons for the persistent shortage – including hoarding by consumers, manufacturers prioritizing certain formula packages, and limited inventory of containers when they do go to the store.”

### **Shortage Of Monkeypox Vaccine In US.**

The shortage of the monkeypox vaccine nationwide has been hamstrung by logistical, bureaucratic and technical errors, leaving health officials and activists warn the government’s sluggish response may no longer be enough to contain the growing outbreak.” A recent report says, “The shortage may be surprising, since officials previously said the country has enough vaccines in the Strategic National Stockpile for ACAM2000 vaccine, which is approved for use against smallpox and can also be used for monkeypox.” On July 15, a CDC official said the shortage is ‘frustrating’ but said the administration is actively working to increase supply.”  
The article continues the story.

### **Challenges Facing Barriers Treating Monkeypox.**

A report from the CDC (7/18, Rouben, 10.52M) says physicians “treating monkeypox say they’ve faced ‘daunting’ paperwork and obstacles that may continue to encounter barriers with tests, vaccines and treatments.” Among the challenges, the FDA-approved antiviral treatment, TPOXX, is facing delays in its testing and “vaccine-sharing formula,” although CDC Director Rochelle Walensky said more progress has been made. “We failed to contain” the spread of monkeypox, adding that the window for controlling and containing the virus “probably

### **Sexual Health Clinics Unprepared For Monkeypox Cases.**

Reports, “Sexual health clinics on the frontline of the monkeypox response are already financially stretched, leaving the public health system vulnerable since the COVID-19 pandemic.” According to infectious disease experts, “sexual health clinics...are best placed to identify and treat people at risk of sex with men.” However, “such programs are doing so largely without additional funding despite years of financial neglect and the resources needed to curb rising rates of other sexually transmitted diseases (STD).” Experts in both the US and UK

### **CDC’s Monkeypox Response.**

In a recent interview, former US Food and Drug Administration Commissioner Dr. Scott Gottlieb’s interview in which he criticized the federal government’s response, “according to CDC Director Dr. Rochelle Walensky. On Sunday, Gottlieb stated “that it may be too late to control and contain the outbreak, saying the US is making ‘a lot of the same mistakes,’ such as a lack of testing early on and not enough vaccine supply.” He also said the CDC has expanded the monkeypox case definition to encourage health care providers to test for the virus.

### **High Cases Per Capita Across US.**

A recent report (7/18, 5.2M) reports, “D.C. has more cases of monkeypox per capita than any state, prompting public health officials to launch

---

munities." On Friday, the DC area public health departments reported "122 positive cases in D.C., 44 in Virginia and ...  
rts, "The city has approximately 8,300 applicable vaccine doses on hand, with about 2,600 of those already adminis  
er (D) said the District would need 100,000 total doses to meet the demands of the current 'target population.'"

### **Government For More Monkeypox Vaccine Supply.**

) analysis says, "New York is the epicenter of the country's monkeypox outbreak, and its leaders are calling on the  
ay, Gov. Kathy Hochul "said that the state and city had received more than 28,000 doses, and that another 32,785  
and Mental Hygiene "has decided to switch to a single-dose strategy to account for the rapid increase in cases."

### **Monkeypox Messages Addressing Gay Men.**

.6M) reports, "The spread of monkeypox has ignited a debate within the New York City Health Department over who  
rtners during this summer's outbreak." Some "epidemiologists say the city should be encouraging gay men to tempo  
argue that approach would stigmatize gay men and would backfire." New York City Health Commissioner Dr. Ashwin  
nt to be very clear there are certain activities and one of them is intimate sexual contact that places you at higher ri

### **Monkeypox Vaccine in Massachusetts.**

vaccine is now available at 11 sites around Massachusetts, state public health officials said Monday." According to th

### **San Francisco Office Over Government's "Anemic" Response To Monkeypox Outbreak.**

omb, 2.44M) reports, "Several San Francisco LGBTQ advocacy organizations descended on the U.S. Department of H  
was the federal government's anemic response to the growing monkeypox outbreak and the lack of available vaccine  
San Francisco Department of Health requested 35,000.

### **Monkeypox Vaccine From Bavarian Nordic.**

Monday, the European Commission announced "it has secured about 54,000 additional doses of the monkeypox va  
the disease amid a spike in cases." This "deal follows an initial contract signed in June, when the European Union or  
mission, "under the initial order, the EU has so far delivered around 25,000 doses to six member states."

### **Truth About Monkeypox.**

ost (7/18, 10.52M), contributor Benjamin Ryan writes numerous public health experts have stated that "anyone can  
ox risk to a simplistic binary equation, public health leaders are prioritizing fighting stigma over their duty to directly  
ak." Ryan says, "In particular, they are failing to properly convey the seriousness of this burgeoning crisis to gay an  
ch about monkeypox so we can take action accordingly. ... Please be honest with us."

---

---

## **s For US Cruise Ships.**

att, 10.52M) reports, a noticed posted on the Centers for Disease Control and Prevention website on Monday announced the end of a program that allowed the public to monitor the spread of the virus at sea." A statement from the CDC said it "depended upon each cruise line having the same COVID-19 screening testing standards, which may now vary among cruise lines." The report that the agency's website also states, "CDC has worked closely with the cruise industry, state, territorial, and local health departments to create a healthier environment for cruise passengers and crew. ... Cruise ships have access to guidance and tools to manage

9K) and [Forbes](#) (7/18, Kelleher, 10.33M) also report.

## **inst BA.5.**

) interview, White House COVID-19 response coordinator Dr. Ashish Jha discusses the new BA.5 fueled COVID-19 wave. The bottom line that people need to know, which is: the things that we know that have been working for us as a country – they all work for BA.5. Like, our tools continue to work, and if we use them effectively, we can continue to manage the wave. The CDC are mentioned. No reports.

## **mid BA.5 Fueled Wave.**

526K) reports, "Nearly half of all new reported COVID-19 cases in Ohio in recent weeks came from the BA.5 variant, which has jumped past 24,000 newly reported cases during the seven days ending on Thursday." Comparatively, "the state was reporting about 12,000 cases in May." However, due to at-home tests, reporting is unreliable. Currently, "COVID-19 hospitalizations, a more reliable measure, are rising in Ohio. Last Thursday saw the state break past 1,000 current hospitalizations, the first time since March 1."

## **a Counties Mask Up Amid COVID-19 Wave.**

80K) reports, "Residents living in 45 of South Carolina's 46 counties should mask up to reduce the spread of COVID-19." The CDC and Prevention's community levels map, there are now "32 counties with high levels of COVID-19" and "another 13 counties with high levels of COVID-19 use masks while indoors, including in schools and workplaces."

## **g In Los Angeles County, Less Falling "Seriously Ill."**

7M) reports the "super-contagious Omicron subvariants that can reinfect people within weeks are fueling a new wave of COVID-19 cases in Los Angeles County is moving toward an indoor mask mandate." Though, "this wave is different from previous ones in that hospitalizations are rising, patients are generally less sick, and intensive care units are less crowded than in previous waves. Changes with the virus itself, for the improvements." However, it "doesn't mean COVID-19 has become a toothless tiger." No reports.

## **ty's Mask Mandates For Schools.**

---

eta, 587K) reports, "Parents who have fought throughout the pandemic to reopen schools early, end school mask mandates for school boards across San Diego County." The article says "on Monday, a number of those parents – including parents of children with special needs – denounced the return of San Diego Unified's indoor mandate." While "the school district brought back its mask mandate, as defined by the Centers for Disease Control and Prevention," several "parents argue that government and schools are forcing students to wear masks."

### **Academic Gains Last Year, Reducing COVID-19 Learning Gap.**

Despite a year of disruptions, students largely made academic gains this past year that paralleled their growth pre-pandemic and are on track to close the learning gap, according to a report released Monday from NWEA, a nonprofit research group that administers standardized tests. "Researchers found 'gains across in math and reading' for students in elementary school through high school." However, "students in high-poverty schools had fallen further behind, making it likely they will need more time than others to catch up." The report is a "positive sign of hope for academic recovery from COVID-19. But sustained effort and investment in education remain crucial."

### **Vaccine Development, Variant Vaccines.**

Moderna Senior Vice President of Infectious Diseases Jacqueline Miller "says the company recognized early on that two new variants – Delta and Omicron – were identified in late 2020" and the original vaccines did not work as well against Beta. Miller says "the company is working on updating the vaccine to protect against the new variant." But "while the process of updating an mRNA booster" can take only four to six weeks, testing, manufacturing, and distribution "can take longer." However, she hopes the timeline will get shorter once the first variant-specific booster is out of the gate. "As omicron 'has become the dominant variant,' we had 'more time to develop boosters against BA.4 and BA.5, after originally generating candidate boosters against the original virus.'"

### **Reviewed By CDC Advisory Committee.**

Reuters (Reuters, 897K) reports, "Gaithersburg's Novavax Inc. is on the cusp of rolling out its Covid-19 vaccine, but the U.S. Food and Drug Administration's panel must first 'review the biotech's protein-based vaccine' on Tuesday. The review is 'less than a week away' and the panel's recommendations will shape the CDC's 'guidance around the vaccine's use in adults for emergency use authorization does not equate to a full commercial approval – which Novavax...said it intends to seek,' but 'the company is also developing a flu-Covid combination vaccine and an Omicron-specific vaccine for younger populations,' and is 'also developing a flu-Covid combination vaccine and an Omicron-specific vaccine for younger populations.'"

### **Importance Of Developing Drugs To Treat Mild COVID-19 Symptoms.**

A shift is afoot in the search for COVID-19 therapies: some researchers are turning their attention towards drugs that treat mild symptoms, rather than severe disease. "Treating mild symptoms 'might sound indulgent, but drugs for mild disease could mark a turning point in the fight against the virus,' says a researcher. 'It could help limit disease spread, but could also limit disease spread' and 'stem the rise of new variants.' But 'there are barriers to finding drugs for mild disease, including a lack of incentive to research mild disease. But US National Institutes of Health committee on COVID-19 treatment is working to find drugs to treat mild COVID-19, both because of broad public-health benefits and because long quarantine periods are a burden.'"

### **Pediatric COVID-19 Vaccine In Europe.**

The European Medicines Agency on Monday started reviewing a low-dose version of BioNTech (22UAy. DE) and Pfizer's (PFE) COVID-19 vaccine for children aged 6 to 11 years. "In June, the US Centers for Disease Control and Prevention 'cleared the way for use of the shot in children aged 5 to 11 years.'"

---

for approval in Europe in the age group on July 8, proposing a three-shot course with a 3 microgram dosage, which

### **Spray, Tablet COVID-19 Vaccines.**

That according to a recent study, "Injected vaccines against the coronavirus that causes Covid-19 have been hugely slowing the pandemic's death toll by an estimated 63%." But "even as vaccine manufacturers race to update the first-generation vaccines delivered via nasal sprays or tablets that would deploy more immune defenders to the body's front lines: the lining of the nose and throat." "The approach is promising for COVID-19, but "many scientists say the approach needs an injection of funding to accelerate the pace of development."

### **Curb Pandemic-Era Public Health Authority Through Litigation.**

Wesley J. (Wesley) reports, "Through a wave of pandemic-related litigation, a trio of small but mighty conservative legal blocs has been fighting America's future battles against infectious diseases." Motivated "by what they've characterized as an overreach by the federal government into three overlapping spheres – conservative and libertarian think tanks, Republican state attorneys general, and religious freedom advocates." "Government agencies charged with protecting community health."

### **Surge Higher Than Winter's Omicron Wave.**

Wesley (Wesley) reports, "New coronavirus infections in parts of California may be surging even higher than winter's Omicron wave." The article says "the concentration of coronavirus levels in San Francisco's wastewater is at even higher levels than last winter." "Professor in environmental health at Emory University." Indeed, "the wastewater data suggest many infections aren't being detected." "So many people are using at-home over-the-counter tests, which can be more convenient than getting tested at a medical facility."

### **More COVID-19 Antivirals Are Prescribed In Richer Zip Codes.**

Wesley (Wesley, Munro, 227K) reports, "Over four times as many prescriptions for COVID-19 treatment pills were filled in richer zip codes." "The Virginia Department of Health (VDH) COVID-19 task force leader of health care therapeutics coordination Alexis Page said the disparity is difficult to tell if the disparity exists because of actual need for the treatments or issues with access." "The trend for fewer prescriptions for income, health, language and transportation....mirrors the situation nationally – where the rate of oral treatment is lower in poorer areas." "The largest number of sites to receive the medication, according to a June Centers for Disease Control and Prevention report."

### **"Ever-Changing" Guidance Hindering State Pandemic Response.**

Wesley (Wesley) reports that on Monday, Connecticut Gov. Ned Lamont (D) "admitted that the ever-changing guidance from the federal government and now with President Joe Biden – has made it difficult for Connecticut health officials to adjust and respond during the pandemic." "Lamont joined local leaders and state Commissioner of Public Health Dr. Manisha Juthi at a meeting in this city's central library." "Lamont said he thinks the CDC has been a little slow and reactive and unclear going back during both administrations, from my point of view." "We're working closely with the medical community, trying to give people a clear sense of where we're going and what we're doing."

### **COVID-19 Vaccinations For Children 4 And Under.**

---

) reports Maine's "Cumberland County is among the leading counties nationally in COVID-19 vaccinations for children. More than 1,700 children in the southern Maine county aged six months up through four years have received their first shot in that age group, according to Maine Center for Disease Control and Prevention data."

### **U.S. Prepares Mask Mandates Ahead Of Fall Elections.**

The New York Times reports, "A new wave of COVID-19 cases and rising hospitalizations ahead of an October election are creating fresh calls for mask mandates in the Canadian province despite calls by some doctors to do so." The "global surge in cases, mostly in Europe, is prompting officials to consider mask mandates while trying to avoid extending or reintroducing unpopular restrictions." And "in Quebec, some now say the government's mask mandate is not going far enough."

### **China Announces COVID-19 Testing.**

The Wall Street Journal (Subscription Publication, 8.41M) reports that this week, two of China's largest cities ordered residents to undergo mass COVID-19 testing, signaling new and economically crippling lockdowns.

### **China Announces Testing As Other Regions Extend Lockdowns.**

The New York Times reports that Chinese cities including Shanghai are rolling out new mass testing or extending lockdowns on millions of residents. The newspaper reported "an average of around 390 local daily infections in the seven days ending on Sunday, higher than about 340 in other parts of Asia. China is adamant about implementing its dynamic zero COVID policy of eliminating outbreaks as soon as possible in many of its 16 districts and in some smaller areas where new infections had been reported recently, after similar tests in other cities."

### **U.S. Approves Moderna Pediatric COVID-19 Vaccine.**

The Associated Press (RNA.O) said late on Monday Australia's drug regulator Therapeutic Goods Administration (TGA) has provisionally approved the Moderna COVID-19 vaccine for children aged six months to five years. "Spikevax" was provisionally approved in the country for individuals aged six years and older and for emergency use in children aged 12 years and older, the statement said. "The approval comes as Australia battles a major virus outbreak fueled by the highly transmissible new variant, with rising case levels in several states."

### **South Korea 'Finally Defuse' COVID-19 Crisis.**

The Associated Press reports that South Korea is on the path to 'finally defuse' a crisis stemming from its first acknowledged outbreak of COVID-19, the state news agency said. "The crisis was driven by Omicron subvariants." It "says 99.98% of its 4.77 million fever patients since late April have fully recovered, and 99.99% of those that proved positive." Reuters says "the World Health Organization has cast doubts on North Korea's claims, saying it is amid an absence of independent data."

### **Japan Approves Pediatric Clinical Trial For COVID-19 Vaccine Candidate.**

The Associated Press reports that Eisai & Co Ltd (4507.T) said on Tuesday it started a clinical trial of its COVID-19 vaccine candidate among children aged 12 years and older. "The recombinant protein-based vaccine known as S-268019 will be carried out among 48 children in Japan." The vaccine "has been shown to be safe and effective in a phase 1 trial."

---

## Power Imbalance In Global Health.

ports, “A few months into the coronavirus pandemic, India and South Africa jointly petitioned the World Trade Organization for a moratorium on the export of COVID-19 vaccines, treatments, and medicines, without fear of legal action, until herd immunity was achieved worldwide.” The article says “this is not a success story, however. If anything, it illustrates the injustice baked in the current system.” The article also says “the WTO’s decision is based on a number of counts, and will have a limited impact on bringing about an end to the world’s coronavirus nightmare.”

## es County Plans To Bring Back Mask Mandates.

20.6M) op-ed, California Today author Soumya Karlamangla writes that according to the Centers for Disease Control, "the most effective measures to reduce the risk of Covid transmission." However, "only one of them is planning to reinstate an indoor mask mandate." Nationally, during the current Covid wave, Los Angeles County health officials hope that asking people to mask up will curb the virus's spread as well as their approach and believe that mandates should be reserved for crises, which the BA.5 wave has not yet proved itself to reduce transmission just helps us reduce stress elsewhere. ... So anything you can do to sort of mitigate the steepness

**Past COVID-19 Emergency Declarations.**

piece, Carrie Sheffield, a senior policy analyst at Independent Women's Voice, writes "Dr. Anthony Fauci may be re-empowered by the President's Department of Health and Human Services quietly re-upped the public-health emergency determination for COVID-19." She says "Kavirer Becerra "is merely a top power-broker in a power-hungry, nanny-state administration." She says "Biden wants to surprise, of course, as his White House continues down the path of toxic policymaking that will harm more than it help Americans."

## Abuse Over Endorsement Of Gender Transitioning For Children.

s Assistant Health Secretary Rachel Levine is being criticized “for endorsing gender-transition treatments as a way to address gender dysphoria, much as Florida for enacting limits on transgender treatments for youth,” said policies must “support and empower the ability to get gender affirmation treatment in their state.” Journalists and lawmakers took to social media, calling the speech “a disservice to children.” Among them, Sen. Roger Marshall (R-KS) warned that “under the Biden Admin’s ‘gender care’ policies, the health of children is at risk.” The speech drew criticism from a number of lawmakers, including Sen. Roger Marshall (R-KS), who criticized Levine’s appearance.

## U.S. HHS \$240K To Settle Possible HIPAA Violation.

ption Publication, 215K) reports, "Houston-based Memorial Hermann Health System paid the Health and Human Services Department of the Health Insurance Portability and Accountability Act. " The health system "failed to respond to a patient's news release." This "disclosure from HHS came Friday as the office announced 11 resolved investigations from its reports.

### **Ass Abortion Rights.**

47M) reports Vice President Harris traveled to New Jersey on Monday "to address the NAACP's 113th national convention and access," and had meetings scheduled "with more than 20 New Jersey state legislators and local leaders to discuss the 1973 9-year-old Roe v. Wade decision." Other speakers at the event include CMS Administrator Chiquita Brooks-LaSure and New Jersey Governor Phil Murphy.

### **Abortion Access Have Increased Since Roe Overturned.**

Montes, Subscription Publication, 8.41M) reports that since the Supreme Court overturned Roe v. Wade, both orders and requests to restrict abortion access. Foreign providers of abortion pills have also recorded greater interest. Reuters (7/18, Hilburn, 137K) reports, "Some clinics have stopped offering the pills to out-of-state patients fearing that state lawmakers could pressure them into banning 'an FDA-approved drug, conservative lawmakers could still attempt to make abortion pills illegal, or make getting them harder to obtain." Reuters (7/18, Hilburn, 137K) reports that while some states provide similar coverage, others have not.

### **Louisiana Abortion Ban.**

Reuters (7/18, Hilburn, 137K) reports, "A Louisiana judge on Monday temporarily extended an order blocking the state trigger law but did not say whether the district court determines whether the near-total state abortion ban, with no exceptions for rape or incest, violates the Constitution. It is the first time in the weeks since the Supreme Court struck down Roe v. Wade and gave states the power to enact restrictions. The judge said he has blocked, unblocked and then reblocked the ban." Reuters (7/18, Hilburn, 137K) says a Baton Rouge district judge may rule "as soon as Tuesday on whether he will extend a temporary order blocking all abortions following Monday's hearing." Reuters (7/18, Hilburn, 137K) reports that whatever the district judge decides, "Louisiana Attorney General Jeff Landry said he anticipates that the court will rule in favor of the ban."

### **West Virginia Abortion Ban.**

Reuters (7/18, Hilburn, 137K) reports that Kanawha County, West Virginia Circuit Court Judge Tera Salango on Monday blocked the state's "pre-Roe v. Wade abortion ban" at the Kanawha Health Center of West Virginia – to restart services." The abortion ban "made performing or obtaining an abortion illegal." The judge said the ban "has been superseded by a slew of modern, conflicting laws." West Virginia Attorney General Patrick Morrissey criticized the decision and said he will appeal the decision to the state Supreme Court." Reuters (7/18, Hilburn, 137K) reports the judge argued that West Virginia's law "dating back to the 1800s making performing or obtaining an abortion a felony" is unconstitutional.

### ana To Try To Implement Law Restricting Abortion Access For Minors.

## Offer Abortion Training To More Medical Students.

s, 3.37M) says, "California lawmakers have laid the legal groundwork for a range of health providers to provide abortion care, but scant opportunities for training have made it harder for them to do so."

no's Republican Party "adopted language to their platform" on Saturday "that supports the criminalization of abortion on son to get an abortion to save their life." State GOP delegates "approved changes to the party's platform that went point of conception. The new language backs criminalization of all abortions in Idaho."

reports some anti-abortion groups in Texas “are intensifying their efforts to shut down access for residents seeking employers and others trying to” ensure abortion access. One recent court filing shows that beyond providers, anti-abortion groups are targeting people who support them; people who volunteer time or give money to abortion providers; employers who support pregnant workers;

ports, "As states pass and revive legislation restricting abortion following the Supreme Court ruling that overturned *Roe v. Wade*, Florida could "surpass last year's total of out-of-state abortions, which was nearly 4,900, according to Florida Agency for Health Care Regulation and Licensure. The state "has the third highest abortion rate among states in the country, according to the CDC."

### ask Complying With Both Federal, State Abortion Laws, Some Experts Say.

---

### **Michigan State Budget Funding For Adoptions.**

her, 2.16M) reports Michigan Gov. Gretchen Whitmer's (D) "office on Monday detailed more than \$20 million in line-items that would be cut if the governor signs it into law Wednesday." The majority "of the vetoed budget items in House Bill 5783...involve restrictions on the funding of adoption centers that promote alternatives to abortion." Whitmer "vetoed a \$2 million tax credit for adoptive parents" as well as "a \$1 million increase in adoption." "abortion."

### **Effect Of Supreme Court Decision Overturning Roe Closes.**

Mississippi abortion clinic at the center of a U.S. Supreme Court case that overturned Roe v. Wade has been sold and will be moved to Mexico City, the Associated Press on Monday." The owner "said the furniture and equipment from Jackson Women's Health Organization has been moved to Mexico."

### **Abortion Access In Federal Lands, Complicated, Legal Experts Say.**

In theory, clinics within federal enclaves could provide a loophole for abortion access in states with restrictive abortion laws, but in practice, providing abortion services on federal lands is complicated."

### **NIH Protects Reproductive Research Data After Overturn Of Roe V. Wade.**

Baumann, Subscription Publication, 4K) reports, "Reproductive health researchers shouldn't have to turn over their data to the federal government – although legal experts caution it's an added layer of protection and not a guarantee." The NIH program "will require researchers to turn over data from the legal process, making the data inadmissible as evidence unless the participant agrees to its disclosure, a policy that has been in place around since the 1970s, allowing researchers to study illicit drug use to guide evidence-based policies."

### **Estimated Number Of Mothers Choosing Adoption.**

AP (AP, 2.16M) reports that the overturning of Roe v. Wade is unlikely to lead to a spike in the number of mothers opting to give up their babies. The number of infants available for adoption will make an additional 10,000 infants available to adopt annually. That figure represents 9 percent of the estimated number of infants in the adoption waiting lists. Although there is no national source of reliable data, experts estimate the number of infants in the adoption waiting lists is around 100,000, according to the CDC and HHS.

### **Senate Filibuster" Block Efforts To Provide Legal Abortion Access.**

Senate Vice President Harris "on Monday said she and President Biden 'will not let the filibuster stand in our way' on providing legal abortion access ahead of November's midterm elections to protect 'our most essential rights and freedoms.'" Speaking at a NAACP convention, Harris said "the filibuster stand in our way of our most essential rights and freedoms."

no-Youngs, 20.6M) reports Harris "put the issue [of abortion] in terms of religion, saying that supporting a women's right to choose is a religious issue. It just requires us to agree the government shouldn't be making that decision for her.'" According to the Times, Harris' statement "tends to obscure more nuanced positions held by critical components of the party's electoral coalition, including Catholic voters in the Midwest, where the issue has helped push some Catholic voters toward Republicans." The article mentions the CDC and HHS.

---

### **Abortion Access Reportedly Among Biggest Users Of Phone Location Data.**

Many of the states rushing to ban abortion are also the biggest users of a surveillance tool that authorities could use to track people's phones." Supporters of abortion access "are expressing growing alarm about the potential uses that police or prosecutors could make, including to target abortion providers or the people seeking the procedure."

### **Ob-GYNs' Ability To Take Exams Virtually.**

Many OB-GYNs, including some who perform abortions, are celebrating a decision that allows them to avoid traveling to other states for gynecology. The Dallas-based medical group "had held virtual exams during the pandemic but planned to have the exams in person," but now, "saying the exams would be virtual," citing the Supreme Court decision to overturn Roe v. Wade.

### **Young Girls Highlighted.**

USA Today reports that following "the account a 10-year-old Ohio girl crossing state lines to get an abortion drew national attention, a new survey says pregnancy is common in young adolescent girls say those pushing for very young girls to carry pregnancies to term are ignoring the child."

### **Healthcare Consolidation Attempts.**

USA Today, "Fresh off the Federal Trade Commission's successful challenges to four hospital mergers, the Biden administration is pushing for more consolidation in the health care industry than it has in past years." Last year, President Biden "ordered the FTC and other agencies to look for anticompetitive behavior in health care industries." According to the trade commissioners, "this is a key way to slow health care price increases; protect patient privacy; and prevent unfair labor practices."

USA Today reports the FTC is also "interested in some legal theories of antitrust enforcement," which include "questioning whether vertical mergers, in which hospitals, insurers, or other types of health care companies seek to merge with companies that supply them with services or products."

### **4.8% Increase In 2023 Small Group Rates, 20.4% For Individual Market.**

USA Today, (Bordonaro, 22K) reports, "Health insurers planning to offer group and individual health plans in Connecticut in 2023 saw a 4.8% rate increase for small group plans and a 20.4% increase for individual market plans. The average requested rate filings for traditional fully-insured plans, which cover 206,186 people in the state, contained an average requested rate increase of 4.8% for small group plans (which cover 10,000 workers) and 20.4% for the individual market."

### **21st Century Cures Act Not Greatly Impacted Clinician Time On EHR Documentation, Study Finds.**

USA Today, (The 21st Century Cures Act final rule mandating patient access to clinical notes has not meaningfully impacted clinician time on EHR documentation, a new study finds. The study "analyzed a national longitudinal dataset of all ambulatory care physicians and advance practice providers using a national survey. The study found that after the final rule went into effect, though the effect sizes are minuscule."

### **California's New Limits On Healthcare Costs.**

USA Today, (Ibarra, 2.44M) reports, "California and the country are in the midst of a health care affordability crisis." However, the new law "will not directly impact the state's health care costs."

rocketing costs – its latest effort being a new Office of Health Care Affordability whose job will be to investigate the state budget was recently approved and “includes \$30 million to create the office, whose key responsibility will be to work with insurers and physician groups.” This office “is attempting to tackle the root of the issue: Providers can charge patients

### **t Among Americans, Survey Finds.**

that “a new survey of more than 1,000 U.S. workers with employer-sponsored health insurance shows that consumers are increasingly frustrated with billing errors.” From employee benefits company Optavise (formerly DirectPath), approximately one-third (35%) of respondents said they had pushed back, asking for a new, corrected bill.” Meanwhile, “some respondents paid the incorrect bill even though they knew it was wrong. In part, the amount of the error wasn’t worth the effort to fix it, a substantial jump from 43% in a 2021 version of the survey.”

### **Texas AG’s Lawsuit Against Administration.**

supports the Texas abortion ban “contains exceptions to save the life of the mother or to prevent ‘substantial impairment of the mother’s health.’” He is either woefully ignorant of this lifesaving provision or thinks he can willfully defy it in pursuit of his extremist political goals. “The law also states that ‘in any case in which the doctor determines in his or her professional medical judgment that it is necessary to perform an abortion to save a woman’s life, the doctor does not have a duty to save the woman’s life.’” The Post calls on the courts to dismiss the lawsuit.

### **on Restrictions.**

ness (7/18, 20.6M) that a proposed amendment to the Kansas state constitution that would “pave the way for tighter abortion restrictions” is on the ballot and “it is hard not to feel that the reproductive-rights side is a little overwhelmed.” Cottle describes “some of the challenges” and says they “are likely to pop up other places too, as the crucial battles on abortion shift to the state level.” Cottle says to “keep close tabs on the action. One day soon, a similarly intense, complicated fight may be headed their way.”

### **Losing The Abortion War.”**

g The Abortion) War,” Karen Attiah writes in the [Washington Post](#) (7/18, 10.52M) that “securing defeat is...an art,” and that “it is easy to lose to their opponents and confidently expose our nation to danger.” Among them, Attiah writes, “Remain vigilant against a Supreme Court order signed 49 years ago, do not strengthen these rights in law, even though you hold the political high ground.” She says to “drain the motivation of your supporters and give them a sense of defeat.”

### **untability For Increased Risk To Pregnant Women.**

(7/18, 10.52M), Jennifer Rubin says, “The Supreme Court’s overturning of Roe v. Wade is resulting in increased pain, suffering, and the media should “demand that Republicans face up to the consequences of their handiwork – and to demand that they take responsibility for the lives of the women who are being harmed.”

### **ortion Restrictions Threaten Lives Of “Both Parent And Child.”**

(7/18, 645K), 11 Tennessee pediatricians, internists, and OBGYNs argue that proposed tighter abortion restrictions in Tennessee “threaten the lives of both parent and child.”

---

condemn this decision to strip patients of their previously protected constitutional right to make their own reproductive choices.

### **Should Be On the Midterm Election Ballot.**

(7/18, 10.33M), in late June, the Food and Drug Administration “advised COVID-19 vaccine manufacturers to develop the shots will be ready by the fall.” But “that will probably be too late to stop BA.5,” and this late response is “partly a result of the COVID-19 crisis – and is threatening to repeat its mistakes with the ongoing outbreak of monkeypox. It’s long been bogged down by concerns about equity, armchair psychology, and an insatiable request for more data,” but instead of fixing that, it’s adding in even more red tape.” Pipes writes, “As midterm elections approach, FDA reform should be on the ballot.” The CD

---

### **Blueberries With Lead Contamination.**

its BrandStorm has recalled “two lots of its organic freeze-dried blueberry pouches due to ‘the presence or potential presence of lead in the products.” The company said the products “were distributed in the U.S. through retail and online stores services,” but the company has “not received any consumer complaints.” The recall is proactive recall.”

(Gibson, 5.39M), the [Miami Herald](#) (7/18, Neal, 647K), and [Food Safety News](#) (7/18).

---

### **Medicare Advantage Plans Can Disguise Profits As Costs.**

lays a new [report](#) from the USC-Brookings Schaeffer Initiative for Health Policy shows “parent companies that offer Medicare Advantage plans to disguise profits as costs in Medicare Advantage plans.” The report explained that “MLR rules do not apply to Medicare Advantage plans, allowing the profits to appear as costs in MLR reports for the Medicare Advantage plan.” For example, “there are substantial opportunities for net revenues to the parent company to be treated as costs to the health plans through Medicare Advantage plans.”

---

### **Medicaid Managed Care Nonprofit My Choice Wisconsin For \$150M.**

archen, Subscription Publication, 885K) reports Molina Healthcare will acquire Medicaid managed care organization My Choice Wisconsin, which operates existing Wisconsin core Medicaid and managed long-term services and supports business.” However, the nonprofit will remain a separate entity from Molina Healthcare Wisconsin.

---

### **Discovering Tools To Help Manage Endometriosis.**

reports on “endometriosis, a chronic condition that affects 10 percent of women and girls, according to the World Health Organization. The lack of awareness about how to recognize and treat the disease can prevent patients from getting help.” The Times adds, “The

ing tools to manage the often debilitating pain that comes with the disease.”

### **That Will Only Cover Fertility Treatment For Employees In Opposite-Sex Marriages.**

Illinois-based Catholic hospital system” OSF HealthCare “that employs more than 24,000 people will only cover fertility treatment for employees in opposite-sex marriages. The policy could run afoul of federal discrimination laws.” Under this new “policy it transferred this year to a new third-party administrator the responsibility for a married couple of opposite sex spouses to conceive’ and said its coverage aimed to assist ‘married opposite-sex couples’ in fertility treatment.” The policy was approved by Bloomberg Law.”

### **Multiple States That Can Cause Serious Illness, Death For Infants.**

is, “The Centers for Disease Control and Prevention is warning” that the parechovirus (PeV) “that can cause serious illness in infants, including death, was found in a baby boy in Connecticut.” PeV “is common in children – most kids will get it by the time they’re in kindergarten, and it’s usually gone by the time they’re 3 months old.” The virus spreads in two main ways: “the respiratory route (like coughing or sneezing) and the fecal-oral route.” The CDC is urging parents to test for parechovirus if an infant has an unexplained fever, sepsis-like syndrome, or neurological problems.

### **Experience Higher Death Rates Than Democratic Ones.**

(3.1M) analysis, Lydia Denworth, a Brooklyn, NY-based science writer and a contributing editor for Scientific American, says “the health care system in the U.S. has been struggling for years, and the pandemic has made the problems even more glaringly obvious. Democrat-leaning ‘blue’ states were more likely to enact mask requirements and vaccination mandates, while Republican-leaning ‘red’ states were more resistant to health measures.” The outcomes “of those differences emerged by the end of 2020, when rates of death from COVID-19 were significantly higher in red states than in liberal ones.” However, Denworth says “COVID is only the latest chapter in the story of politics and health. ... In the years prior to the pandemic, there was a growing gap in mortality rates for residents of Republican and Democratic controlled states.” She concludes that “a key takeaway from these studies is that the partisan mortality gap doesn’t have to keep widening.”

### **Collectively Earned More Than \$4.5B In 2021.**

The CEOs of approximately 300 health care companies collectively took home more than \$4.5 billion in 2021, according to a new study. While that may seem like a small amount, representing only 0.1% of the \$4.3 trillion U.S. health care economy, it still represents a vast amount of wealth for a small class of people. “Indeed, “the lavish pay packages – which have swollen over time, as profits and stock prices have soared – tower over the relatively high salaries of health care’s rank and file.” As “more than 100 CEOs collected eight-figure paydays last year, while the industry as a whole struggled to keep costs down, rationed patients to ration medications, and devoured more of everyone’s paychecks.”

### **Children Allegedly Getting Lead Poisoning On Rental Properties.**

has sued five more landlords who rent properties in which children with lead poisoning live, the state attorney general says. “The state has found that the landlords have failed to comply with state lead poisoning prevention laws, Attorney General Peter Neroni says. The laws require landlords to test for lead hazards, provide tenants adequate alternative housing during remediation, and penalties of up to \$5,000 per violation.”

### **A Saves Government Money Despite Contradicting Data.**

262K) reports that in June, “UnitedHealth Group’s top two executives, Andrew Witty and John Rex, told a crowd at a

---

rogram that outsources Medicare coverage to health insurance companies – saves the federal government money.”

### **CVS, Walgreens, 25 Other Store Brands Recalled For Bacterial Contamination.**

“The recall of a laxative sold as CVS’ store brand has been expanded to 30 brands of laxatives, including the store brand Navelbalm.” “Navarro Vi-Jon” pulled one lot of CVS Magnesium Citrate Laxative Oral Solution Lemon Flavor from CVS and Walgreens.” According to the recall notice’s risk statement, written by Vi-Jon and posted by the FDA, “Immunocompromised patients caused by *Gluconacetobacter liquefaciens* that could lead to serious, life-threatening adverse health consequences.”

### **CVS Narcolepsy Drug Patent Infringement.**

Yasiejko, Subscription Publication, 4K) reports, “Jazz Pharmaceuticals Inc. filed a lawsuit alleging that a narcolepsy drug, Xyrem, is related to Jazz’s Xyrem that Avadel, in a related case, has asked a Delaware federal judge to remove from Xyrem’s patent. On June 7 of the allegation that the patent’s claims are invalid, unenforceable, or wouldn’t be infringed by the brand. The complaint filed July 15 in the US District Court for the District of Delaware.”

### **CVS Changed Approval Recommendation For Heart Drug Vascepa.**

“Members of an expert panel that recommended the Food and Drug Administration approve a fish-oil-based heart drug, Vascepa.” Their “concern stems from the suggestion that a substantial benefit the drug showed in a large clinical trial may not be in the study.” Data from “a new analysis published in the medical journal *Circulation* on June 28 indicated that in the study, Vascepa may increase the risk of heart attacks and strokes.”

### **Decline Of Climate Emergency Following Stalled Environmental Legislation Talks.**

52M) reports, “President Biden is considering declaring a national climate emergency as soon as this week as he seeks to move forward, according to three people familiar with the matter who spoke on the condition of anonymity.” The potential “move” does not support his party’s efforts to advance a sprawling economic package this month that includes billions of dollars in new spending that could empower the Biden administration in its efforts to reduce carbon emissions and foster cleaner energy,” and two weeks ago, Biden announced a slew of additional actions aimed at curbing planet-warming emissions.” However, “any new executive action on the future of environmental regulations.”

### **Examined.**

a paywall that “a few days after undergoing cosmetic surgery, Chelsea was in a Philadelphia emergency room with a severe allergic reaction. Her face was hardened and blistered. The burning sensation was so intense she was struggling to breathe.” The article reportedly described the procedure.

### **Health Infrastructure, Dating Apps Could Help Stop The Spread Of STIs.**

“A disease specialist, and epidemiologist, and a senior fellow and editor-at-large for public health at the Kaiser Family Foundation.”

---

---

health activist and data scientist with a specialty in forecasting, policy, and public health analysis write in a [STAT](#) (cross the United States." While "the meteoric rise of dating apps has led to more casual relationships," more "users" together." Gounder and Donnelly say "this is one of several factors that has helped propel rates of these diseases skyward." They write that "later this year, the CDC will be difficult to respond to both new and old infectious disease threats." They write that "later this year, the CDC will be they conclude that "this represents a rare opportunity to think broadly about all the data systems that might strengthen help users avoid sexually transmissible infections."

### **Antibiotic Infections Global Killer, Action Is Needed.**

ve director of CARB-X and a professor at Boston University School of Law and Henry Skinner, the CEO of the AMR A assistant infections, including MRSA, are a leading global killer." Just "last week the Centers for Disease Control and P d 15 percent in 2020, after years of steady declines." The authors write, "The current economics of" new antibiotics approvals in the past decade have gone bankrupt or shut down their antibiotic programs. This broken market for new a gaining traction globally is subscription models" where "governments pay a pre-determined fee for the successful de described in the first years after approval."

## ating At 62%.

ts website that in a new CNN poll conducted by SSRS, “nearly 7 in 10 say President Joe Biden hasn’t paid enough attention to the economy, with 62% saying he hasn’t done enough in the poll stands at 38%, with 62% disapproving” while “his approval ratings for handling the economy (30%) are approaching, the poll finds no indication that Biden’s standing with the public is improving – and among some critical areas have softened by 13 points since the spring (from 86% in a late April through early May poll to 73% now).” His “approval for handling the economy” (down from 71% this spring). And on inflation, it is barely above water (51% of Democrats approve, 47% of Republicans disapprove). ***His Handling Of The Economy.*** CNBC (7/18, Liesman, 7.34M) reports on its website that the latest CNBC All-America Economic Survey shows Biden’s numbers have reached the lowest levels of his presidency and fallen further than that of either of his two predecessors. “Biden’s approval for handling the economy has reached its lowest point since he took office, with just 30% of Americans approving of his performance. The president’s economic record is supported by just 6% of Republicans, 25% of independents and 58% of Democrats. Biden’s rating “came in at 36%, 1 point lower than [former President Donald] Trump’s worst rating.”

## Says Rights Under Assault From “Extremist So-Called Leaders.”

Vice President Harris "told a gathering at a civil rights conference Monday that Americans' freedoms are under assault and enact voting restrictions." In her remarks, Harris said "We must recognize there are those who are fighting to undermine our democracy and assault our most fundamental freedoms." The Hill notes that Harris "didn't restrict access to abortion following the Supreme Court decision to overturn Roe v. Wade as well as voting restrictions that Republicans opposed to gun restrictions were infringing on Americans' rights to safety, noting that gun violence." Harris "urged her audience to vote for Democratic candidates 'up and down the ballot'." The Hill reports that Harris also "urged efforts to invest in historically Black colleges and universities, eliminate racial discrimination in housing, and bolster

**ge Act On Tuesday.**

M) reports that as Democrats “try to preemptively protect other rights that could be at risk after the Supreme Court’s decision in *Dobbs v. Jackson Women’s Health Organization*,” the House “is scheduled to vote Tuesday on the Respect for Marriage Act, which would require states to recognize a marriage as valid if it was performed in another state.” The Post says that the new legislation “would also require states to recognize a marriage as valid if it was performed in another state,” and would “allow a man and one woman and allowed states to not recognize same-sex marriages performed in other states,” and would “overturn the *Windsor* ruling.”

5.69M) reports it would “address a national patchwork of marriage laws by requiring states to legally recognize same-sex marriages that were performed.” Sen. Susan Collins (R-ME), the GOP sponsor of the bill in the Senate, “said the proposed legislation is ‘another step to promote equality, prevent discrimination, and protect the rights of all Americans.’” According to the Washington Post, the bill “has the support of the House but will probably run into opposition in the evenly divided Senate” despite Collins’ support as a Republican.

ington Post (7/18, 10.52M) that the “overturning of Roe has energized Republicans, convincing them that they can ride the wave of the religious right. And even if most of them don’t want to outlaw same-sex marriage, the conservative base does – and they drive the agenda. It’s not about whether they want to break up families and make it illegal for millions of Americans to get married. Let’s see what they’re interested in pursuing, but that every American should be able to marry the person they love and make a pretty good idea of their real intentions.”

### **g Four Seats To Supreme Court.**

ght House Democrats "called for legislation on Monday that would add four seats to the Supreme Court, lamenting a  
abortion rights." The Hill adds that while the 2021 Judiciary Act "has little chance of becoming law" because of "Rep  
among progressive Democrats about the court's direction under three conservative justices nominated by former P

### **ons To Unionize.**

reports the staffers for "eight of the most progressive members of the House filed petitions on Monday to form union  
collectively to bargain for better work conditions." The Times says their move "paves the way for House aides to beg  
e without the threat of retaliation – a right that other federal workers already enjoy."

the petitions were filed as rules "that clear the way for many legislative branch staffers to collectively bargain" tool  
most significant expansion of workers rights for Capitol Hill employees in almost thirty years, with House staffers no

orts staff in the offices of Reps. Jesús "Chuy" García (D-IL), Andy Levin (D-MI), Ro Khanna (D-CA), Alexandria Ocasio  
, and Cori Bush (D-MO) have begun the unionization process. [The Hill](#) (7/18, Schnell, 5.69M) reports the Congress  
ssional staff and our democracy." In a statement, the union said, "For far too long, congressional staff have dealt w  
es that prevent Congress from properly representing the communities and needs of the American people." The Cong  
union will ensure we have a voice in decisions that impact our workplace."

### **ty Sparks Warning From Burns.**

man, 20.6M) reports CIA Director William Burns issued a "warning to the agency's work force last week after what a  
cy in Virginia, according to people familiar with the matter." In the message, Burns "said that racism and racist sym  
ct was "found near a small agency facility located in a building that houses businesses and other organizations," but  
as even meant to be a noose, or if whoever placed it there knew that the C.I.A. secretly operated in the building." T  
oyee left the item, or that a foreign intelligence service was involved, according to some of those people briefed on  
l reported it, prompting the investigation and Mr. Burns's note."

### **tions To Trump, Others.**

ew York state residents "were charged with illegally using funds from Chinese and Singaporean investors to donate  
S. prosecutors said on Monday." The move "was part of an effort by Sherry Li and Lianbo Wang to showcase political  
w York, prosecutors said, adding that they raised \$27 million in investment, but never completed the project." The [Y](#)  
he two were charged with making donations in their own names with money from foreign nationals. The Journal say

events seem to have occurred each day since Donald Trump announced he was running for president in 2016.” Rotundo says. “I’ve been wrong about the 2022 midterms. And I haven’t given up entirely on those old rules. But we live in such a crazy time that I have to change my mind.”

### **Dangerous Strategy In GOP Primaries.**

A [New York Times](#) (7/18, 10.52M) article reports that the Democratic Governors Association’s efforts “to boost a Republican named Daniel L. Cox as a candidate for governor in Maryland, on the theory that Cox will be easier to defeat in a general election” is “part of a broader strategy to lure fringe figures over the GOP’s governing wing.” Hohmann says while the tactic “may have worked in a few places, it’s not working in Maryland.” Democrats, Hohmann writes, “barely have a grip on their own party’s many factions. Trying to fiddle with the GOP is a losing game.”

### **Equal Rights Act.**

A [Washington Post](#) (7/18, Subscription Publication, 8.41M), former President Jimmy Carter (D) and former Secretary of State James Baker (R) are calling for chaos in the 2024 presidential election.

### **Combating Disinformation On The Rise Ahead Of Midterms.**

A [Washington Post](#) (7/18, 10.52M) article reports that “Spanish-language right-wing disinformation that spiked around the 2020 election on social media is back on the rise ahead of the fall midterms.” According to “social media researchers and Democratic political strategists...far-right disinformation is spreading on social media platforms but also on newer platforms, including TikTok, Signal and Telegram.” Alvarez says, “The problem is hardly new. Spanish-language radio, is still an effective megaphone for false narratives, particularly in Miami, where far right-wing hosts have long been a staple. Spanish language Miami radio, conservative voices and disinformation have been almost indistinguishable.”

---

**China Competition.** A [Wall Street Journal](#) (7/18, Subscription Publication, 8.41M) editorial argues that the CHIP bill subsidizes protectionism. The Journal says the measure will encourage other industries to cite China competition as a reason to seek government money. A [Wall Street Journal](#) (7/18, Subscription Publication, 8.41M) editorial says Illinois Gov. J.B. Pritzker’s recent trips to New York to promote a 2024 presidential bid, may be an effort to escape his record in Illinois, which has seen low GDP growth as well as high unemployment. Pritzker has moved to other states.

**Climate Change.** A [Wall Street Journal](#) (7/18, Subscription Publication, 8.41M) says the heatwave is bringing the “predictable jargon of climate change.” The climate lobbyists and media and politics blame every turn in the weather on climate change. The Journal says Europe’s pledge to cut emissions, which have come at the cost of less reliable energy and greater vulnerability to Vladimir Putin. The Journal says that even if climate changes, further European emissions reductions will do nothing to alter global temperatures without larger cuts elsewhere.

**Kansas Lawmakers.** A [Wall Street Journal](#) (7/18, Subscription Publication, 8.41M) editorial lauds Kansas lawmakers for eliminating excise taxes on cosmetic procedures using a thin string to shape brows and pluck unwanted facial hair, from a state requirement that they be licensed.

---

**Tunisia's Slide Toward One-man Rule."** In an editorial, the [Washington Post](#) (7/18, 10.52M) argues that Tunisian President Kais Saïed "is determined to undermine the country's once-promising political institutions, established in the wake of a 2011 uprising against authoritarianism. Now, as he seeks to ratify in a referendum set for July 25, could deepen this political winter." The Post notes that leverage over economic aid and Tunisia's potential need for an International Monetary Fund bailout." The Post concludes by arguing that the international community must act to prevent Tunisia from becoming a one-man state."

**Texas Attorney General's Abortion Lawsuit."** The [Washington Post](#) (7/18, 10.52M) reports the Texas abortion ban "contains a loophole for 'medical emergencies, such as the prevention of major bodily function,'" but Texas Attorney General Ken Paxton (R) "is either woefully ignorant of this lifesaving exception or is ignoring it to achieve his political goals," as evidenced by his "legal challenge to a directive from the Biden administration that underscores the obligation of doctors to be pro-life. Yet he is saying that in cases where an emergency abortion is needed to save a woman's life, the doctor is not required to do so." The Post calls for the DOJ to dismiss his "harmful" lawsuit.
