Subject: Request regarding NTP meeting on June 1st

Dear Adm Levine,

I'm writing to ask whether we can include some of my colleagues on the NTP for the fluoride briefing with you at 3 pm on June 1st. The NTP is a collaborative effort with Drs. John Howard and his colleagues at the CDC (NIOSH), Jackie O'Shaughnessy and her colleagues at the FDA (NCTR), and Brian Berridge and his colleagues (including Mary Wolfe) at the Division of the NTP at NIEHS. While I am the Director of the NTP, the actual decisions about collaborative projects and monographs produced by the NTP, like the fluoride State of the Science monograph, involve the collective input from Drs. Howard, O'Shaughnessy, Berridge and Wolfe. Therefore, it would be very useful to have them at the briefing with me next week if possible. They have expressed an interest to be at the meeting with me.

Thanks for considering this request.

All the best, Rick
