## **Incident Handling Checklist**

The below checklist provides guidelines to handlers on the major steps that should be performed in case of cybersecurity incidents. It does not dictate the exact sequence of steps that should always be followed. The actual steps performed may vary based on the type of incident and the nature of individual incidents.

Detection and Analysis	
1.	Determine whether an incident has occurred
1.1	Analyze the precursors and indicators
1.2	Look for correlating information
1.3	Perform research (e.g., search engines, knowledge base)
1.4	As soon as the handler believes an incident has occurred, begin documenting the
	investigation and gathering evidence
2.	Prioritize handling the incident based on the relevant factors (functional impact,
	information impact, recoverability effort, etc.)
3.	Report the incident to the appropriate internal personnel and external organizations
Containment, Eradication, and Recovery	
4.	Acquire, preserve, secure, and document evidence
5.	Contain the incident
6.	Eradicate the incident
6.1	Identify and mitigate all vulnerabilities that were exploited
6.2	Remove malware, inappropriate materials, and other components
6.3	If more affected hosts are discovered (e.g., new malware infections), repeat the Detection and Analysis steps (1.1, 1.2) to identify all other affected hosts, then contain (5) and eradicate (6) the incident for them
7.	Recover from the incident
7.1	Return affected systems to an operationally ready state
7.2	Confirm that the affected systems are functioning normally
7.3	If necessary, implement additional monitoring to look for future related activity
Post-Incident Activity	
8.	Create a follow-up report
9.	Hold a lessons learned meeting (mandatory for major incidents, optional otherwise)
6.2 6.3 7. 7.1 7.2 7.3 <b>Post-Inc</b> 8.	Remove malware, inappropriate materials, and other components  If more affected hosts are discovered (e.g., new malware infections), repeat the Detection and Analysis steps (1.1, 1.2) to identify all other affected hosts, then contain (5) and eradicate (6) the incident for them  Recover from the incident  Return affected systems to an operationally ready state  Confirm that the affected systems are functioning normally  If necessary, implement additional monitoring to look for future related activity  Cident Activity  Create a follow-up report
