

# Lowering Prescription Drug Costs for California

The lower cost prescription drug law, the Inflation Reduction Act, contains policies that lower prescription drug costs for seniors and people with disabilities across California:

Caps costs for covered insulin at \$35 per month for people with Medicare

Makes recommended vaccines available at no cost for people with Medicare Part D

Enables Medicare to negotiate prices for certain prescription drugs

Requires drug companies to pay a rebate to Medicare if they raise prices faster than the rate of inflation

In January 2024, two new cost-saving Medicare Part D benefits went into effect:

The Extra Help program is expanding to provide more benefits for qualifying enrollees with limited income and assets

Some enrollees now have their out-of-pocket drug costs capped at about \$3,500 in 2024, and in 2025, out-of-pocket costs will be lowered even more with a \$2,000 cap

## Inflation Reduction Act Impact: California by the Numbers

**100,000+**

Medicare enrollees in California who use insulin could have an average savings of **\$339** per year

**5.5 MILLION+**

Medicare Part D enrollees in California can receive free recommended preventive vaccines

**\$310 MILLION+**

expected savings for **~1.9 million** Medicare Part D enrollees in California, thanks to 2024 policies limiting Part D out-of-pocket costs

**MORE THAN 829,000**

Medicare enrollees in California take drugs selected for negotiation including:

**389,000+**

take Eliquis or Xarelto, cardiovascular drugs to prevent blood clots

**330,000+**

take Type 2 Diabetes medications Jardiance, Januvia, or Farxiga

**46,000+**

take Entresto to treat heart failure or other cardiovascular conditions
